

Broadcasting Decision CRTC 2006-27

Ottawa, 2 February 2006

Canadian Broadcasting Corporation
Moncton, New Brunswick

Application 2005-1485-3

CBA-FM Moncton – Technical change

1. The Commission **approves** the application by the Canadian Broadcasting Corporation, the licensee of the radio programming undertaking CBH-FM Halifax, to change the authorized contours of its transmitter CBA-FM Moncton, by decreasing the effective radiated power from 77,000 watts to 68,000 watts and by increasing the antenna height.
2. The licensee advised that it had replaced its transmission tower near Moncton in the fall of 2005. The technical change is necessary to maintain the same coverage area.
3. The Commission notes that there will be no significant change to the authorized contours.
4. The Commission reminds the licensee that, pursuant to section 22(1) of the *Broadcasting Act*, this authority will only be effective when the Department of Industry notifies the Commission that its technical requirements have been met, and that a broadcasting certificate will be issued.
