

Broadcasting Decision CRTC 2006-573

Ottawa, 5 October 2006

TFG Communications Inc.

Saint John and Rothesay and surrounding areas, New Brunswick

Application 2006-0899-5

Broadcasting Public Notice CRTC 2006-100

8 August 2006

CJEF-FM Saint John – New transmitter at Rothesay

1. The Commission **approves** the application by TFG Communications Inc. to amend the broadcasting licence for the radio programming undertaking CJEF-FM Saint John, in order to operate a low-power transmitter at Rothesay, to serve the population of Rothesay and its surrounding areas.
2. The new transmitter will operate at 95.1 MHz (channel 236LP) with an effective radiated power of 50 watts.
3. The Commission did not receive any interventions in connection with this application.
4. The Department of Industry (the Department) has advised the Commission that, while this application is conditionally technically acceptable, it will only issue a broadcasting certificate when it has determined that the proposed technical parameters will not create any unacceptable interference with aeronautical NAV/COM services.
5. The Commission reminds the licensee that, pursuant to section 22(1) of the *Broadcasting Act*, this authority will only be effective when the Department notifies the Commission that its technical requirements have been met, and that a broadcasting certificate will be issued.
6. Given that the technical parameters approved in this decision are for a low-power unprotected FM service, the Commission also reminds the licensee that it will have to select another frequency if the Department so requires.

7. The transmitter must be operational at the earliest possible date and in any event no later than 24 months from the date of this decision, unless a request for an extension of time is approved by the Commission before 5 October 2008. In order to ensure that such a request is processed in a timely manner, it should be submitted in writing at least 60 days before that date.

Secretary General

This decision is to be appended to the licence. It is available in alternative format upon request, and may also be examined in PDF format or in HTML at the following Internet site: <http://www.crtc.gc.ca>
