
Competitor Access Tariff

Items The attached tariff items have been issued pursuant to **TELECOM DECISION CRTC 2002-34.**

The attached cover page briefly explains why the items / pages are being issued, and whether they are new items, complete revisions or page revisions.

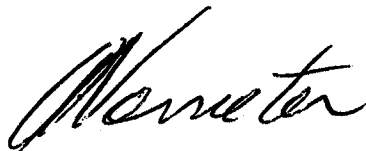

Filing instructions File the attached pages in the **SaskTel Tariff** listed above.

File:

- new items* numerically in the section they pertain to
 - complete revisions* by recycling the existing item and replacing with the attached
 - page revisions* by recycling the affected pages and replacing with the attached
-

Inquiries Direct inquiries to Rates and Tariffs, (306) 777-4122

Competitor Access Tariff

Attached Items The following table lists the items included in this package, briefly explains why they have been issued / revised, and states whether they are new items, complete revisions or page revisions:

Item	Title	Was issued / revised to ...	Type
610.04	Billing and Collection Service	• update info	page
610.06	Interconnecting Circuits with Truck Side Access	• update info	
610.10	Bulk Transfer of a Customer Base Between IXCs having Feature Group D Service	• update info	
610.16	Co Location Arrangements for Interconnecting Canadian Carriers	• update info	
610.18	Local Network Interconnection and Component Unbundling	• update info	
610.20	Link Arrangements for Interconnecting Canadian Carriers	• update info	
650.04	Directory File Service	• update info	
650.08	Billed Number Screening	• update info	
650.18	Radio Paging Access Service	• update info	
650.20	Wireless Service Provider-Network Access Service	• update info	
650.22	Zero-Dialed Emergency Call Routing Service (0-ECRS)	• update info	
650.24	Payphone Compensation Per Call	• update info	
650.28	Competitor Digital Network (CDN) Services	• update info	

ITEM
610.04**Billing and Collection Service – Continued****4. Rates – Continued**

Processing charges per account receivable purchased from the SP will apply each time an account receivable is:

- (a) returned prior to billing
- (b) billed to a customer, or
- (c) returned or charged back to the SP after billing

For ...	Charge
Processing charges per account receivable returned prior to billing	\$0.7768
Processing charge per account receivable billed	\$0.2407
Processing charge per account receivable returned or charged back after billing	\$9.84

Interconnecting Circuits with Trunk Side Access – Continued

1. General –Continued

- (C) An interconnecting circuit with trunk side access may be arranged to provide for the routing of toll free (800/888...) calls destined for the IXC's network. This arrangement is available for Access Tandem connections only and may use MF or CCS7 signalling.
- (D) When CCS7 signaling is requested, CCS7 links are required. CCS7 links refer to the DS-0 channels between ILEC designated gateway Signaling Transfer Points (STPs) and the IXC's STPs or between the ILEC's gateway STPs and the IXC's switch(es). This interconnecting arrangement may be provided by, subject to availability of suitable facilities, SaskTel or another designated company as determined by network design requirements to carry CCS7 signaling information associated with interconnecting circuits with trunk side access which connect SaskTel to the IXC for the purpose of call set-up and take down.
- (E) The facility over which interconnecting circuits with trunk side access and CCS7 links are provided is furnished at the rates and charges specified in the Digital Private Line item of SaskTel's General Tariff.
- (F) In addition to the service charges associated with 1 (E) above, service charges associated with the provision of interconnecting circuits with trunk side access and CCS7 links will apply for each DS-0 set. A DS-0 set is defined as a group of DS-0's which are of the same type (i.e. Feature Group D or toll free), within the same DS-1, connected at the same location and ordered at the same time.

The following charges apply for Network Service:

Per ...	Charge
Inward Order (each DS-0 set)	\$658.93
Change Order(each DS-0 set)	375.43

R

ITEM
610.06

Interconnecting Circuits with Trunk Side Access – Continued

2. Network Charges

(A) When the IXC requests an Interconnecting Circuit providing Trunk Side Access, a switching and aggregation charge as specified in (D) below applies to each minute of traffic carried on the Interconnecting Circuit.

1) When a call is blocked from the Direct Connection and, using overflow routing, is routed to the IXC by means of Access Tandem (AT) Connection, the switching and aggregation charge related to an AT Connection, as specified in (D) 2 below, applies for that call.

(B) The switching and aggregation charge relates to switching, transport and signaling functions performed by SaskTel at the originating or terminating end of a call, including and subject to availability:

- hardware answer supervision
- delivery of calling line identification.

(C) The charge is assessed on the basis of conversation minutes and is derived by multiplying the charge based on total elapsed carrier connect time by the connect time to conversation minutes ratio.

(D) Switching and Aggregation charge, each minute of originating or terminating traffic:

Per	Connect Time Charge (per minute)	Ratio	Conversation Minutes Charge
1. Direct Connection	\$0.00208	1.0792	\$0.00224
2. Access Tandem Connection	\$0.00239	1.0792	\$0.00258

Interconnecting Circuits with Trunk Side Access – Continued

3. PIC Processing – *continued*

(E) In the case of PIC selection changes which are disputed by the subscriber or an IXC on behalf of the subscriber, the subscriber's PIC selection will be reinstated to the previous PIC. The IXC must then provide evidence of subscriber authorization as described in section 4.5 of Schedule 4 (PIC Information Processing) of the CSG Agreement. If such subscriber authorization is not provided within fifteen (15) business days from the date of the request from SaskTel, the IXC will be deemed to have requested an unauthorized PIC change and will be assessed the unauthorized PIC charge specified in (H) 5 below. A PIC processing charge will also be assessed to the IXC having requested the unauthorized PIC change, to cover the reinstatement of the unauthorized PIC to the previous PIC selection.

(F) To enable the IXC to validate or place PIC subscription orders at the Working Telephone Number (WTN) level, the IXC may request and obtain from SaskTel a detailed record transaction in CARE format of all WTN's subscribed to a specific Billing Telephone Number (BTN). Charges are specified in (H) 6 below.

(G) To enable the IXC to perform a reconciliation between the IXC's billing records and SaskTel's PIC database, the IXC may request a Verification Record from SaskTel. Verification Records transactions are subject to the charge as specified in (H) 7 below.

(H)	Per	Charge
1	Account Set-up (each PIC processing account)	\$345.12
2	Changes to CARE Profile (each request)	86.28
3	User Handbook (each additional copy)	43.14
4	PIC Processing charge (each access line)	1.99
5	Unauthorized PIC Change charge (each access line)	30.45
6	Billing Telephone Number (BTN) Detail Charge (each WTN provided)	0.0963
7	Verification Record Charge (each access line)	0.0963

R

ITEM
610.06**Interconnecting Circuits with Trunk Side Access – Continued****3. Carrier Network Profile Change**

- (A) Before an IXC is initially provided with interconnecting circuits with trunk side access, the IXC is required to complete a Carrier Profile Questionnaire (CPQ) to select network and translation options. The CPQ data is subsequently programmed as required into SaskTel's switches, as required.
- (B) Service charges as outlined in (C) below, apply to change the selected options and change the network translations in SaskTel's switches associated with each impacted Carrier Identification Code (CIC) at any time subsequent to the initial programming.
- (C) The following service charges apply at each host switch impacted by the IXC's request:

Type of Network Profile	Charge
International Calling	\$78.11
Abbreviated Dialing No. 1	62.36
Pre-subscription Indication	78.11

Co-location Arrangements for Interconnecting Canadian Carriers – Continued

4. Rates – Continued

f. Rebates to the primary co-locator(s) are to be issued no later than 30 days after the actual co-location effective date, in all circumstances. SaskTel is subject to late payment charges at the rate specified in the General Terms of Service Tariff, in favour of the primary co-locator(s) where rebates are issued later than 30 days following the actual co-location effective date.

16. SaskTel reserves the right to pull the IC's fibre cable into the duct between the designated manhole, the cable vault and riser, as well as splice the fibre where required. Rates and charges as specified in this Tariff shall apply.

Rates and Charges apply as follows	Monthly Rate	Non-Recurring Charge
1. Service Order Charge per order per central office.		\$144.41
2. Entrance Conduit per metre or fraction of each cable.	\$0.1401	
3. Floor space each sq. metre of unsegregated or segregated space.	14.18	
4. Power Consumption per fuse amp.		
a) 48 Volt DC	13.35 (Note 7)	
b) 120 Volt AC	11.77 (Note 7)	
c) 120 Volt AC with generator back up.	13.84 (Note 7)	
5. Riser Space per metre per cable.	0.3501	
6. Application Charge per request per central office.		\$805.18
7. IC to IC cross-connection link.	(Note 5)	(Note 6)
8. Power Delivery		(Note 1,2,3,4,7)
9. Project Management Fee per central office		(Note 1,2,3,4)
10. Construction Fee (building modification)		(Note 1,2,3,4)
11. Construction Fee (enclosure)		(Note 1,2,3,4)
12. Site Preparation Fee		(Note 1,2,3,4)
13. Installation/Maintenance		(Note 1,2,3,4)
14. Cable Pulling/Splicing		(Note 1,2,3,4)

ITEM
610.18**Local Network Interconnection and Component Unbundling – Continued****4. Rates – Continued****2. Network Component Unbundling - Continued****a) Unbundled Local Loops – Continued**

Service Charges will be charged at the following rates for Type A and Type B Loops (all bands):

Service Charge per Service Order:

Business loop(s), per service order	\$ 40.69	R
Residence loop(s), per service order	\$ 22.11	R

Service Charge per Loop:

Per loop, Business	\$ 22.79	R
Per loop, Residence	\$ 15.12	R

Note: Extra construction charges may also apply.

ITEM
610.18

Local Network Interconnection and Component Unbundling -- Continued

4. Rates -- Continued

2. Network Component Unbundling - continued

b) Other Loop Related Charges

The number of Rate Bands may vary by unbundled local loop type.

Loop Selection Charges apply when a CLEC requests the identification of the availability of a loop, in a given location, meeting a specific loop category profile. This service charge includes a report which identifies whether a loop meeting a specific loop category profile is available in a given location, and provides the loop make-up.

For...	Monthly Rate	Service Charge
Loop Selection, per loop	N/A	\$52.52

R

Loop Modification Charges apply if a loop which meets a CLEC's requested loop profile is not available in a given location, and the CLEC requests the removal of bridge taps and/or loading coils from an unbundled loop at that location. This charge is based on the amount of work and the time required to modify the existing loop. Labour charges as specified in the 'Labour charges' table in this item will apply.

Additional charges apply in situations where the provision of specific loop types requires extra work or equipment (e.g., loop extenders for Type B loops), or when a CLEC requests further performance or qualification measurements than provided for within this tariff. Additional charges may include material provided at current cost. Labour charges as specified in the 'Labour charges' table in this item will apply.

ITEM

Local Network Interconnection and Component Unbundling – Continued

4. Rates – Continued

2. Network Component Unbundling – Continued

c) Connecting Links – Continued

Connecting Link B is a digital transmission path which supports the transmission of an ISDN BRI type signal.

A monthly rate for the use of central office riser space (per meter, per cable) also applies.

Connecting Link C is provided at the rates and charges specified in SaskTel General Tariff Item on Digital Network Access or in SaskTel Competitor Access Tariff Item on Competitor Digital Network Services.

A connecting link repair charge applies for a co-operative test and a connecting link change when a co-operative test determines that there is no trouble found in SaskTel's network. The repair charge will be the labour charges as specified in section 4.2 b) of this item.

Connecting Links	Monthly Rate	Service Charge
Connecting Link A, per 100 links	\$1.09	\$1400.30
Connecting Link B, per 100 links	1.09	1400.30
Riser Space, per metre, per cable Connecting Links A and B only	0.3501	N/A

2. Network Component Unbundling - Continued

e) Message Relay Service

Message Relay Service provides a deaf, deafened, hard of hearing or speech impaired customer with the ability to communicate with other customers through the use of a Teletypewriter (TTY) and a hearing customer to communicate with customers who use a TTY.

Access to Message Relay Service is available on a line-side basis to CLECs using their own switches. CLECs are required to provide connections from their local switches to SaskTel's DS-1 facilities to provide this connection are available through SaskTel's General Tariff items on Megalink Service or Digital Exchange Access Service.

A one-time set-up charge and a monthly charge per Network Access Service (NAS) or Working Telephone Number (WTN) applies, per CLEC, as detailed in this Tariff Item. In addition, a CLEC is responsible for all charges related to toll calls made by the CLEC's subscribers by means of Message Relay Service.

Message Relay Service	Monthly Rate	Service Charge
Set-up Charge, per CLEC	N/A	\$159.29
Charge per NAS or WTN	\$0.26	N/A

Local Network Interconnection and Component Unbundling – Continued

4. Rates – Continued

3. Compensation for Traffic Termination

a) Termination of CLEC Intraexchange Traffic

For traffic that is interchanged between a CLEC and SaskTel, and terminated within the same exchange, traffic imbalance may occur. When traffic imbalance exists, excluding any imbalance due to internet traffic, the party which originates less local traffic than it terminates (either the CLEC or SaskTel) is entitled to compensation. It is the responsibility of the party who is entitled to the compensation to detect and apply charges for the imbalance.

When SaskTel detects an imbalance of 20% or greater, the monthly rates specified in this Tariff Item apply, for each trunk, from the time SaskTel advises the CLEC of the imbalance, for as long as the imbalance exists.

The following Rates and Charges apply for termination of CLEC Intra-exchange Traffic:

For traffic imbalance of:	<u>Monthly Rate:</u>		
	greater than 20%	greater than 40%	greater than 60%
up to 24 trunks, each trunk	\$6.95	\$11.59	\$16.23
up to 48 trunks, each trunk	10.94	18.25	25.51
up to 72 trunks, each trunk	12.12	20.21	28.27
up to 96 trunks, each trunk	12.73	21.27	29.75
more than 96 trunks, each trunk	13.09	21.80	30.51

Link Arrangements for Interconnecting Canadian Carriers – Continued

3. Conditions of Service

1. SaskTel does not make any representation that these arrangements shall at all times be available in the quantities requested and at the locations specified by the registered Canadian Carrier or DSLSP co-locating in SaskTel's central office(s). SaskTel shall, however, make every effort to make such arrangements available on request.
2. A CO Link will be provided to the nearest SaskTel designated transport or demarcation cross-connect panel terminating within a SaskTel designated co-location area(s). The co-locator may then complete the circuit to their co-located equipment within their co-location space as appropriate.
3. DSLSPs that are not CLECs may not use link arrangements as provided under this Tariff Item to provide switched local services.
4. When it is necessary for SaskTel to install special equipment or to incur unusual expense in order to meet a co-locator's requirements, an additional charge may be assessed based upon the equipment installed or the expense incurred.
5. A DS-1 Link channelizing feature is available whenever the service application requires one which enables a DS-1 CO link to be connected to DS-0 access facilities. The use of this feature will result in a monthly rate and service charge as specified in this Item.
6. A DS-3 Link channelizing feature is available whenever the service application requires one which enables a DS-3 CO link to be connected to DS-1 access facilities. The use of this feature will result in a monthly rate and service charge as specified in this Item.

4. Rates

1. CO Link

The Customer shall pay to SaskTel the following rates and charges for Link Arrangements for Interconnecting Canadian Carriers. Such rates and charges are in addition to any other rates and charges that may be applicable.

Directory File Service - *Continued*

4. Rates

The following rates are payable in advance of the preparation and/or provisioning of Directory File Service.

Master file:

Each residential listing	\$0.1094	R
Each business or government listing	\$0.1182	R

Update file: (Note 1)

Each residence listing	\$0.2188	R
Each business or government listing	\$0.2363	R

Set-up fee:

Initial request for Master file or Master file and Update file	\$437.60	R
Request for customized features (Note 2)	\$437.60	
Request for a service reconfiguration (Note 3)	\$437.60	

Notes:

1. Update files are only provided in association with a master file of the same exchanges or NXXs and must be requested at the same time as the master file.
1. Customized features is defined as the initial subscription to government, business or residence listings on a separate basis and/or the initial subscription to a partial list of NXXs from an exchange.
3. Service reconfiguration is defined as a change to the current subscription.

ITEM
650.08**Billed Number Screening – Continued****4. Rates**
