

**Re: UTC(Xit)20July05-20 PN 2005-2**

Xit Telecom did not ask this question to UTC Canada in its July 20 interrogatories. UTC(Xit)20July05-20 is an entirely different question dealing with cost proxies and mark-ups, which UTC Canada answered in full.

The closest question posed by Xit to UTC Canada to this new question is UTC(Xit)20July05-23, which UTC Canada answered to the best of its ability.

In any event, since the new question asks whether the Competition Bureau would consider price maintenance to be tantamount to an exercise of market power by the ILECs, it is an inappropriate question to ask of UTC Canada. This issue was not addressed in UTC Canada's evidence and the Competition Bureau is clearly the party who would know the answer.

Furthermore, contrary to the Rules of Procedure, Xit Telecom has provided no reasons why UTC Canada's answer is deficient.
