INTRODUCTION

The Family Studies course provides skills and knowledge in the areas of parenting, money management, relationships, and the well-being of individuals/families. Learners have the opportunity to increase their knowledge as to how individuals/families function in society during different stages of the life cycle.

Throughout the human life cycle, people need to be cared for and to care for themselves and others. Nurturing and caregiving skills are utilized along with knowledge of human growth and development to anticipate changing personal and family needs.

PLAR SELF ASSESSMENT

Course: Family Studies 40S

Self – Assessment Checklist

The first step in the PLAR process is the filling out of the Self Assessment form. Consider each question carefully. The checklist indicates all of the learning outcomes covered in the Family Studies 40S course. Use the self-assessment to measure your abilities in the different areas and to uncover weak areas that you might have.

The total possible score is 184. If your score is:

147 or more ✓	100-147 ✓	Less than 100 ✓
You have a good chance of succeeding in the PLAR process	You could proceed with the challenge process after self study to improve in weak areas or you could challenge specific parts of the course.	Take the Family Studies 40S course. It is unlikely that you would be successful in the PLAR process.

PLAR Challenge Assessment Process

Once you have completed the self-assessment and decide that you are ready to challenge the Family Studies 40S course or individual units, to the assessment section, which outlines different assessment procedures that you might go through in order to receive recognition for this course (or a unit) through the PLAR process.

Total possible number of checkmarks is **184**.

Discuss your results with an Adult Learning Centre PLAR Advisor.

Note: Individual adult learning centres may have additional requirements. Speak to the PLAR advisor for more information.

Include:

- Who wrote it
- What is it called
- Where and by whom it was published or produced
- When it was published or produced

c. Bibliography

A bibliography is a list of all the sources used to find the information for your paper. You must include a bibliography with the research paper.
