**NOTE:** The final publication of bankruptcy statistics under the Standard Industrial Classification (SIC) system was for 2003. As of January 2004, these statistics are published under the North American Industry Classification System (NAICS). NAICS was developed jointly by Canada, the U.S. and Mexico. By using a more precise five and six-digit classification structure, NAICS improves comparison between countries for business activity at selected levels of aggregation. However, the change will cause discontinuity in historical time series data, as shown above for 2003.
