

TRANSPORTATION PLANNING

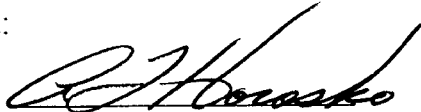

Policy / Standard: TP 3 / 98

Page 1 of 2

Date: February 2, 1998

**Subject: SHOULDER WIDTH
POLICY**

Approved:

Deputy Minister

POLICY	Design standards for shoulder widths are a function of the number of lanes, functional highway classification and AADT.
PURPOSE	<p>To set out design standards for shoulder widths for new construction and reconstruction.</p> <p>The methodology and reasoning behind the development of Policy TP 3 / 98 is explained in Appendix B of the Transportation Planning Manual (<i>Basic Design and Cross-section Standards - Background / Reference Material associated with Transportation Planning Policy: TP 2 / 98</i>).</p>
PROCEDURE	Shoulder widths will conform to the design standards specified on page 2.
