Summary Report for the Community of Pikwitonei Public Consultation

Dear Mr. Chadha:

Attached find the summary report for the Public Consultation and associated technical work that has been carried out relative to community access for Pikwitonei.

During the Public Consultation in Pikwitonei, the existing rail, air, winter road, forestry road, and boat access conditions were reviewed with the community and community leadership. Discussions also centred on potential access improvements and potential options for All-Weather Road access. The visit to the community and the discussions with the mayor, community leaders, and residents provided the study team with a greater appreciation of the particular access issues faced by Pikwitonei residents.

We would like to acknowledge the support of the community leadership and also the direct involvement and technical input of Manitoba Transportation and Government Services.

Yours truly,

Dillon Consulting Limited
