In Yukon Energy Corporation's 20-Year Resource Plan, one of the proposed projects would affect the water levels of Marsh Lake. Two members of the Yukon Utilities Board own lakefront property on Tagish Lake. The Board is of the understanding that the water levels of Tagish Lake may be affected by a change in the water levels of Marsh Lake. As a result, the Board considers it appropriate to advise parties of this information and ask whether any party has concerns regarding this potential appearance of bias.

In the absence of any concerns received by October 6, 2006, these Board members will remain assigned to the consideration of YEC's Resource Plan.
