Re: Yukon Energy Corporation 20-Year Resource Plan 2006-2025

Dear Sirs:

Pursuant to the Board's Notice of Application, please accept this as my application for intervenor status in the proceeding to review Yukon Energy Corporation's submission of its 20-Year Resource Plan 2006-2025.

As was the case with my intervention in the proceeding dealing with YEC's 2005 revenue requirement, I believe that I can provide useful assistance to the Board in testing YEC's evidence and identifying issues that need to be considered. I believe that my 25 years of experience in energy utility rate regulation and Yukon energy policy development will enable me to raise a broader range of ratepayer-related issues (financial, technological, social and environmental) than could be raised by other less experienced intervenor groups. As was evidenced in the proceeding dealing with YEC's 2005 revenue requirement, not all ratepayers were represented by local registered participants.

As was the case with my previous intervention, it is my intention to offer my assistance to other non-utility stakeholders to provide them with a broader understanding of the issues under consideration and the impact decisions in these areas could have on them.

While I will not be able to participate in-person at the Public Workshop into the Application (scheduled for July 25th), I would appreciate receiving in advance any materials that are to be presented and discussed by YEC at this event. In an effort to reduce overall hearing costs, I would appreciate an opportunity to teleconference into the session to be led by Board staff following the Workshop in order to have an opportunity to make submissions on issues that could be considered at the Pre-Hearing Conference.

With respect to the Pre-Hearing Conference, and with a mind to reduce overall hearing costs, I would again appreciate the opportunity to teleconference into this session.

It is my intention to attend the hearing scheduled to take place in October.

My preference is to receive copies of all submissions in searchable electronic format via email (in English), but I will gladly accept paper copies delivered in a timely fashion to my home address as outlined below.

Should you have any questions, please do not hesitate to contact me. I look forward to receipt of your instructions.

Yours truly,

Original Signed By

Patrick McMahon
