2006 Conference Speakers

Andrew McKechnie

Andrew McKechnie, CRM CRSP, began his journey in Occupational Health and Safety in the fall of 1984. Serving as a union member of the Joint Workplace Health and Safety committee over a 12 year period, he helped develop an effective OSH program with a large Winnipeg employer. In order to advance his knowledge and commitment to the field of OSH, Andrew successfully completed the 3 year U of M Certificate Program in 1992. In 1995 Andrew was hired in a full-time safety position conducting Job Safety Analysis. In 1997, Andrew made a career path change and accepted a position as a corporate Health and Safety Coordinator with a Winnipeg based international organization. Currently, Andrew is a regulatory officer with the government and has accepted an opportunity with the Red River Community College, Health and Safety Certificate Program as an instructor. He holds designations in Canadian Risk Management (CRM) as well as Canadian Registered Safety Professional (CRSP).

Fred Leafloor

Fred Leafloor started his working career in the maritime environment, as a crewman on Canadian Coast Guard rescue vessels, then joined the Navy and was trained in shipboard safety and emergency response.

Fred has been a "full-time" safety professional since 1988, when he opened Safety First Industrial Safety Services in Western Canada. Moving the consulting company East in 1992 to follow the offshore industry, Fred and Safety First Industrial are now based in Halifax, Nova Scotia where the company services a wide range of clients in both the offshore industry and in the onshore commercial and industrial sectors.

Fred has been actively engaged in the CSSE for over 12 years and is currently in his second term as Regional Vice President CSSE Atlantic Region. He the Certified Health and Safety Consultant professional designation and is a Canadian Registered Safety Professional.

Stephen Torrence

Stephen is the Executive Director of Construction Safety Network of British Columbia. He joined the Construction Safety Network in September of 2001. Prior to that he was the Executive Director of the BC Horticultural Coalition he has more than 30-years experience in small business management within the public and private sector.

Accident
Prevention
Association of
Manitoba

There have been continued improvements made and a continuous evolution of health and safety in the workplace. There is also a new level of sophistication of health and safety committee members. WHY then, are there continuous serious accidents and tragic loss of life?

As we know, in the year 2000 there were about 45,000 injuries and 16 deaths in the Province of Manitoba as a result of accidents in the workplace. Something must change. If we continue to do the same things then the results will be the same.

Get the facts on safety & health and start to do things differently today — for the future of our workforce.
