

Acyclovir and its salts

Adrenocortical hormones and their salts

and derivatives: May be supplied for oral use when prescribed for acute therapy up to a maximum of seven days with a maximum of two courses in a three month period. May be supplied in topical form including nasal, inhaled, ophthalmic and otic

Allopurinol

Amantadine and its salts: Restricted to influenza prophylaxis

Amitriptyline and its salts: Restricted to maximum of 50 mg per dosage unit daily

Amoxicillin and its salts and derivatives

Ampicillin and its salts and derivatives

Atenolol and its salts: May be supplied when prescribed for hypertension

Azithromycin and its salts and derivatives

Bacillus Calmette-Guerin vaccine

Bacitracin and its salts and derivatives:

Restricted to topical form

Baclofen and its salts

Benzoyl peroxide

Benztropine and its salts

Benzydamine and its salts

Betahistine and its salts

Bupropion hydrochloride: May be supplied when prescribed for smoking cessation therapy

Calcipotriol: Restricted to topical form

Celecoxib

Cephalosporin C and its salts and derivatives

Cetirizine and its salts

Chlordiazepoxide and its salts: May be supplied up to a maximum of 10 days with a maximum of two courses in three months

Chlorhexidine and its salts

Chlorothiazide and its salts and derivatives: May be supplied when prescribed for hypertension

Chloroquine and its salts

Ciclopirox and its salts

Cimetidine and its salts

Ciprofloxacin and its salts

Clarithromycin and its salts and derivatives

Clindamycin and its salts and derivatives

Clotrimazole and its salts

Cloxacillin and its salts and derivatives

Codeine : Restricted to a maximum of 8 mg per Dosage unit

Colchicine: May be supplied up to a maximum of 10 days with a maximum of two courses in three months

Cromoglycic acid and its salts

Cyclobenzaprine and its salts

Dextrose injection: Restricted to concentrated solution for parenteral injection

Diclofenac and its salts

Doxycycline and its salts and derivatives

Doxylamine and its salts: May be supplied when prescribed for use in pregnancy

Econazole and its salts

Epinephrine and its salts

Erythromycin and its salts and derivatives

Esomeprazole and its salts

Etodolac and its salts and derivatives

Famciclovir and its salts

Famotidine and its salts

Fenopropfen and its salts

Fluconazole

Flurbiprofen and its salts

Folic Acid

Framycetin and its salts and derivatives

Fusidic acid and its salts

Gentamicin and its salts and derivatives:

Restricted to drops and ointment form, including betamethasone and gentamicin otic drops

Griseofulvin and its salts and derivatives

Hepatitis A vaccine

Hepatitis B Adult vaccine

Hepatitis B Pediatric vaccine

Hydrochlorothiazide: May be supplied when prescribed for hypertension

Hydrocortisone: Restricted to cutaneous topical form and combination otic preparations

Hydroxyzine and its salts and derivatives

Ibuprofen and its salts

Idoxuridine

Immune globulin products

Indomethacin

Ipratropium and its salts

Itraconazole and its salts

Ketoconazole and its salts: Restricted to topical form

Ketoprofen and its salts

*This list is an excerpt of the regulations under the *Pharmacy Act (Part I)*. Where there are any discrepancies, the official regulations take precedence. The complete regulation can be found at:

Ketorolac and its salts
Ketotifen and its salts
Lansoprazole and its salts
Levocabastine and its salts and derivatives:
Restricted to nasal and ophthalmic forms
Lorazepam and its salts: May be supplied in sublingual or oral form up to a maximum of seven days with a maximum of two courses in three months and in intravenous or rectal form to treat acute seizures
Mebendazole
Meclizine and its salts
Mefenamic acid and its salts
Meloxicam
Metformin and its salts and derivatives:
May be supplied up to a maximum of 3 months pending referral to a physician
Metoclopramide
Metoprolol and its salts: May be supplied when prescribed for hypertension
Metronidazole
Miconazole and its salts
Minocycline
Minoxidil: Restricted to topical use
Misoprostol: May be supplied when prescribed in combination with diclofenac and its salts
Mupirocin
Nabumetone
Naproxen and its salts
Neomycin and its salts and derivatives
Nicotine and its salts
Nitrofurantoin and its salts
Nitroglycerin
Norfloxacin
Nystatin and its salts and derivatives
Omeprazole
Pantoprazole and its salts
Penicillin and its salts and derivatives
Phenazopyridine and its salts
Piroxicam and its salts
Podophyllum and the following extracts and active principles (Podophyllum toxin and Podophyllum resin)
Polymyxin B its salts and derivatives
Potassium salts
Probenecid and its salts
Rabeprazole and its salts
Rabies immune globulin
Rabies vaccine
Ranitidine and its salts
Rho D immune globulin
Rifampin and its salts and derivatives:
Restricted to meningitis prophylaxis
Salbutamol and its salts
Sex Hormones (excluding injectable testosterone)
Sulindac and its salts
Sulphonamides and their salts and derivatives
Terbinafine and its salts
Terconazole and its salts
Tetanus immune globulin
Tetracycline and its salts and derivatives
Thyroxin and its salts
Tiaprofenic acid and its salts
Tioconazole and its salts
Trazodone and its salts: Restricted to a maximum of 50 mg per dosage unit
Tretinoin and its salts and derivatives
Trimethoprim and its salts
Valacyclovir and its salts
Varicella vaccine
Vaccinia Zoster immune globulin
Vitamins
Vitamin A
Vitamin B12 with intrinsic factor concentrate
Vitamin D
Vitamin K
