Foreword

The Economics and Statistics Division of the Nova Scotia Department of Finance is the *Nova Scotia Statistics Agency* as defined by the *Nova Scotia Statistics Act*. The Division operates as the government's statistical focal point for liaison with Statistics Canada and for dissemination of general socio-economic and demographic information to provincial users, with a special emphasis on government needs.

Our mission in producing the annual *Nova Scotia Statistical Review* is to disseminate key Statistics Canada and other source data, thus providing a comprehensive overview of the province and its economic performance. The *Review* includes a very broad scope of statistical information, including population, labour force, prices and incomes, exports, education, tourism and other data. This *Review* provides a substantial amount of timely sub-provincial data to users annually.

In addition to the annual *Nova Scotia Statistical Review*, the Economics & Statistics Division maintains an Internet site, <http://www.gov.ns.ca/finance/publish/publicationsb.asp?id=Pub21> and regularly releases numerous other publications.

We trust you will find the *2005 Nova Scotia Statistical Review* a beneficial research tool. We welcome any comments or suggestions you may offer from your experience working with this publication.

The Economics and Statistics Division strive to provide quality data to our users. However, we do acknowledge that errors can occur during the dissemination and publishing process. If there are any concerns about the accuracy of any of the data in this publication, users should always verify with the actual data source or contact us.

Sector Data—NAICS:

With the implementation of the North American Free Trade Agreement, the statistical agencies of Canada, the United States and Mexico have developed a common statistical framework that facilitates analysis of the economic and industrial structures of the three economies. This classification system is referred to as the North America Industry Classification System (NAICS) and, in Canada, replaced the Standard Industrial Classification, 1980 (SIC 1980). Statistics Canada's economic and industrial statistics identify industries using NAICS.

2004 Revised Data Release – November 8, 2005

Provincial Economic Accounts—Statistics Canada's, Provincial Economic Accounts, Catalogue No. 13-213.

Gross Domestic Product by Industry—Statistics Canada's GDP by Industry, Catalogue No. 15-213-XIB.

2006 Census of Canada:

Census Day for the 2006 Census of Canada is May 16, 2006. The Canadian census is a major undertaking with collection of information from approximately 30 million people scattered over 9 million square kilometres.

The Census will continue to provide data on all of the social and demographic themes it had in the past. New and modified questions in the 2006 Census questionnaire were developed and tested through in-depth consultations with data users in response to user needs. Progress of the 2006 Census of Canada may be monitored at: <http://www12.statcan.ca/english/census06/index.cfm>

Population Estimates:

Statistics Canada produces population estimates for provinces and territories on a quarterly and annual basis. The base population number that is used for these estimates is the most recent census count adjusted for net undercoverage. To adjust for net undercoverage an estimate is made of how many people were missed in the Census as well as how many people were counted more than once. Once the base number is determined, administrative records on births, deaths, immigration, emigration and interprovincial migration are used to produce the quarterly and annual population estimates for the next five years. At the end of the five-year period a new census is taken and the process is repeated. The population estimates shown in this publication are based on the 2001 Census counts.

Population Projections:

Statistics Canada population projections, based on Census 2001 results will be released in Fall 2005.

Symbols

The following standard symbols and abbreviations are used in this publication:

Symbols

--	figure(s) not available or amount too small to be expressed
...	figure(s) not applicable
-	nil or zero
e	estimated
F	figure(s) too unreliable to be published
p	preliminary
pa	preliminary actual
pr	preliminary revised
r	revised
ri	revised intention
i	intention
x	confidential
()	brackets around figures denotes negative number

Abbreviations

n.e.c.	not elsewhere classified
n.e.s.	not elsewhere specified

Number of Employer Businesses ⁽³⁾	2004	30,201	3,760	4,495	11,380	5,317	5,207

⁽¹⁾ Figures for the regions may not add to provincial total due to rounding.

⁽²⁾ Regions will not add to total as an unclassified amount, which is included in the total, is not allocated to region figures.

⁽³⁾ The major source of updates for the Business Register is from Canada Revenue Agency's Business Number Account Files. Register does not include all industrial activity in Canada, but is limited to the "employer" portion of the business world. Thus, any establishment that does not maintain an employee payroll, but may have a workforce which consists of contracted workers, family members or business owners is referred to as an "indiscriminate" and is excluded from this employer-based file (e.g., a corner store that is owner-operated, with no paid employees). Statistics Canada's Business Register, at March 2005, recorded 30,201 employer establishments and 24,112 indiscriminate establishments in Nova Scotia.

Population and Demographics

Population, Nova Scotia, July 1, 1986 to 2004

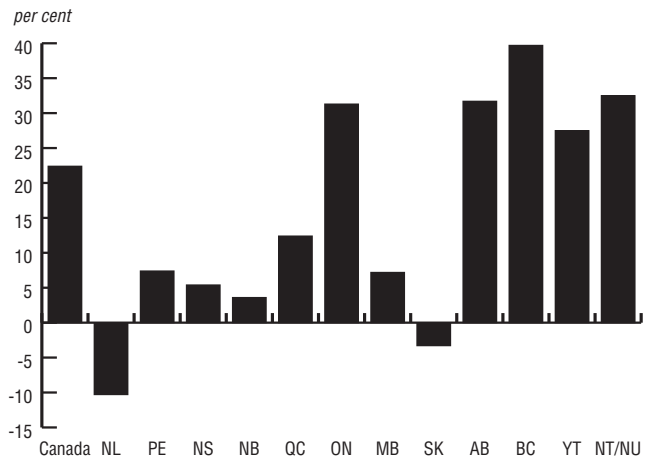

Source: Statistics Canada, *Annual Demographic Statistics, 2004*, Catalogue No. 91-213, Table 1.1

- The July 1, 2004 population of the four Atlantic Provinces together represented an annual increase of 558 persons over 2003⁽¹⁾. The increase of 795 persons in Nova Scotia represented a growth of 0.1% over the previous year. The province's 936,960 people represented 40.0% of the Atlantic Region and 2.9% of the Canadian population.
- In 2004, the 0–4 year age group represented 4.8% of Nova Scotia's population. The 5–19 year olds, 20–64 year olds and those 65+ represented 18.6%, 62.5% and 14.1% of the total population respectively.
- The population of the province has continued an ageing trend that is projected to carry well into the 21st century. Between 1996 and 2004, the population of prime labour force, aged 20–64 years, increased 3.7%. Youth under the age of twenty declined 10.8% over the same period, while seniors aged 65 and above increased 9.4%.
- There were 8,584 births in the province in 2003, down 0.9% from 2002. The number of deaths increased 2.4% over the same period to 8,191 resulting in a natural increase of 393.
- The twelve-month population growth of the province ending June 2004 was made up of a natural increase of 174, net international migration of 1,463 and net interprovincial migration of -842, resulting in a growth of 795 persons.

- In 2003 immigration to Nova Scotia was 1,463, up 3.8% from 2002. Nova Scotia received 0.6% of Canada's immigrants in 2003.

Population Growth, Canada by Province, 1986 to 2004

Source: Statistics Canada, *Annual Demographic Statistics, 2004*, Catalogue No. 91-213, Table 1.1

- Between 1996 and 2004, the province's population increased 0.6%. The growth continued to be greatest within the central area of the province. Population increased 8.0% in Halifax County to 379,770 in 2004. Except for the Annapolis Valley Region, all other regions outside of Halifax County Region experienced declines between 1996 and 2001. The largest decrease was for Cape Breton Region at 8.9%, followed by the North Shore Region at 3.1% where 2004 population was 147,621 and 160,953, respectively. While population grew 3.4% in Hants County to 41,796 and 2.1% in Colchester County to 51,466, Richmond County declined 11.4% to 9,995 and Guysborough County decreased 14.9% to 9,511.
- Towns showing the greatest growth from 1996 to 2004 included Berwick (7.9% to 2,422), Bridgetown (6.3% to 1,081), Bridgewater (5.9% to 7,972), Lockeport (3.7% to 733) and Yarmouth (1.3% to 7,843).

⁽¹⁾ These population estimates use the 2001 Census counts adjusted for net undercoverage. This adjustment process has also revised 1996 census estimates. This revision allows a better comparability between the coverage measures of the 1996 and 2001 censuses.

Population Growth, Nova Scotia by County, 1996 to 2004

Note:

Statistics Canada's *Population Projections for Canada, the Provinces and Territories, 2000-2026* (based on the 1996 Census), Catalogue No. 91-520 is expected to be updated by Fall 2005 (based on 2001 Census).

Numbers may not total due to rounding.

Census Family—refers to a married couple (with or without children of either or both spouses), a couple living common-law (with or without children of either or both partners) or a lone parent of any marital status, with at least one child living in the same dwelling. A couple living common-law may be of opposite or same sex. Children in a census family include grandchildren living with their grandparent(s) but with no parents present.

Private Household—refers to a person or group of persons (other than foreign residents) who occupy a private dwelling and do not have a usual place of residence elsewhere in Canada.

Family Structure—refers to the classification of “census families” as noted in definition above.

Legal Marital Status—legal conjugal status of a person

Never Married (single)—persons who have never married (including all persons less than 15 years of age) and persons whose marriage has been annulled and who have not remarried.

Legally Married (and not separated)—persons whose husband or wife is living, unless the couple is separated or a divorce has been obtained.

Separated, but Still Legally Married—persons currently married, but who are no longer living with their spouse (for any reason other than illness or work) and have not obtained a divorce.

Divorced—persons who have obtained a legal divorce and who have not remarried.

Widowed—persons who have lost their spouse through death and who have not remarried.

n.e.s. - not included elsewhere

⁽¹⁾ Includes origins with total response counts of 15,000 or more for Canada

⁽²⁾ Respondents who reported multiple ethnic origins are counted more than once in this table, as they are included in the multiple responses for each origin they reported. For example, a respondent who reported English and Scottish would be included in the multiple responses for English and for Scottish.

⁽¹⁾ Includes non-permanent residents (not shown as a separate column in this table), as well as, the sum of the counts for the Canadian-born and foreign-born population.

⁽²⁾ Includes persons born in Canada, as well as, a small number of persons born outside Canada who are Canadian citizens by birth.

⁽³⁾ This population is also referred to as the immigrant population, which is defined as persons who are, or have ever been, landed immigrants in Canada.

⁽⁴⁾ Includes data up to Census Day, May 15, 2001.

Numbers may not add due to rounding.

⁽¹⁾ The Aboriginal identity population comprises those persons who reported identifying with at least one Aboriginal group, that is, North American Indian, Metis or Inuit and/or who reported being a Treaty Indian or a Registered Indian, as defined by the Indian Act of Canada, and/or who reported being a member of an Indian Band or First Nation.

⁽²⁾ Type: MD - Municipal District; R - Indian Reserve; RGM - Regional Municipality; T - Town.

⁽³⁾ Includes the Aboriginal groups (North American Indian, Metis and Inuit), multiple Aboriginal responses and Aboriginal responses not included elsewhere.

⁽⁴⁾ Census Subdivisions (CSDs) are classified into 46 types according to official designations adopted by provincial or federal authorities. The Subdivision of County Municipality in Nova Scotia is an exception as it is a geographic area created as equivalent for municipalities by Statistics Canada in cooperation with the province for the purpose of disseminating statistical data. Data provided is for geography with an aboriginal identity population of 150+.

Numbers may not add due to rounding.

Household Living Arrangements—refers to the classification of persons in terms of whether they are members of a family household or of a non-family household, and whether they are family or non-family persons.

Private Household—refers to a person or group of persons (other than foreign residents) who occupy a private dwelling and do not have a usual place of residence elsewhere in Canada.

Census Family Household—refers to the classification of census families according to the presence and number of additional persons in the household. Additional persons refer to any household member who is not a member of the census family being considered. These additional persons may be either members of another census family or non-family persons.

Household Living Arrangements—refers to the classification of persons in terms of whether they are members of a family household or of a non-family household, and whether they are family or non-family persons.

Private Household—refers to a person or group of persons (other than foreign residents) who occupy a private dwelling and do not have a usual place of residence elsewhere in Canada.

Census Family Household—refers to the classification of census families according to the presence and number of additional persons in the household. Additional persons refer to any household member who is not a member of the census family being considered. These additional persons may be either members of another census family or non-family persons.

Household Type—Category to which a person living alone or a group of persons occupying the same dwelling belong. There are two categories: non-family households and family households. A non-family household consists either of one person living alone or two or more persons who share a dwelling, but do not constitute a family (e.g., a couple with or without children). Family households are divided into two subcategories: one-family households and multiple-family households. A one-family household consists of a single family (e.g., a couple with or without children). A multiple-family household is made up of two or more families occupying the same dwelling.

Household Size—number of persons occupying a private dwelling.

Private Household—refers to a person or group of persons (other than foreign residents) who occupy a private dwelling and do not have a usual place of residence elsewhere in Canada.

42

Employment Growth, Canada and the Provinces, 2003 to 2004

Source: Statistics Canada, *Labour Force Historical Review, 2004, CD-ROM No. 71F0004-XCB*

- Employment in the province averaged 441,600 in 2004, a gain of 10,300 from 2003 (+2.4%) and 30,500 above the 2000 figure. Canada's employment stood at 15,949,700 in 2004, up 1.8% over the previous year. Between 2003 and 2004 there has been a 2.8% increase in full-time jobs in Nova Scotia while part-time positions rose +0.6%.
- In 2004, the goods-producing sector represented 21.1% of total employment of the province. This sector increased between 2003 and 2004 by 800 people or 0.9%. Within the goods producing sector in 2004 significant increase in employment was in construction (+3,200 persons).
- There were 9,500 more people employed in the service sector in 2004, a 2.8% increase over 2003. The most notable employment growth in this sector between 2003 and 2004 was in business, building and other support services (+2,800 persons), education services (+2,400 persons) and professional, scientific and technical services (+2,100).
- Nova Scotia's unemployment rate in 2004 was 8.8%, down 0.3 percentage points from 2003, while the national rate was 7.2% as compared to 7.6% in 2003. From 2003 to 2004, the unemployment rate increased 0.3 percentage points to 11.3% in Prince Edward Island and 0.3 percentage points to 5.3% in Manitoba, while it declined 0.8 percentage points to 15.6% in Newfoundland and Labrador, 0.8 percentage points to

7.2% in British Columbia, 0.7 percentage points to 8.5% in Quebec, 0.5 percentage points to 9.8% in New Brunswick, 0.5 percentage points to 4.6% in Alberta, 0.3 percentage points to 5.3% in Saskatchewan and 0.2 percentage points to 6.8% in Ontario.

Unemployment Rate, Canada and the Provinces, 2004

Total Employment and Unemployment (excluding Military), Nova Scotia, 2000 to 2004

Source: Statistics Canada, *Labour Force Historical Review, 2004, CD-ROM No. 71F0004-XCB*

- The Halifax Region unemployment rate was 6.1% in 2004. This was the lowest rate recorded of metro areas east of Quebec City. In 2004, an annual growth in the labour force of 6,200 and an increase in employment of 7,000 resulted in an overall decline of 800 in the number of unemployed persons in Halifax Region. Comparing the regions of Nova Scotia to the previous year, declines in the unemployment rate were noted in the Halifax region (-0.5 percentage points to 6.1%), Cape Breton region (-0.4 percentage points to 15.5%) and the Southern region (-0.4 percentage points to 10.3%). The unemployment rate increased 0.3 percentage points to 10.0% in the North Shore region and rose 0.3 percentage points to 8.7% in the Annapolis valley region.
- February 11, 2003 labour related information from the 2001 Census of Canada was released. Data coverage includes labour force activity, class of worker, occupation, industry, place of work, mode of transportation, language of work and unpaid work.

Unemployment Rate, by Age Groups, Nova Scotia, 2000 to 2004

Note:

Important Changes in LFS 2005—Labour Force Survey (LFS) estimates have undergone extensive revisions. All estimates have been adjusted:

- population rebased to reflect 2001 Census population counts (was based on the 1996 Census estimates)
- industry estimates have been reclassified from the 1997 to the 2002 North American Industry Classification System (NAICS)
- occupation estimates have been reclassified from the 1991 Standard Occupation Classification to the National Occupational Classification - Statistics 2001 (NOC)
- geography boundaries have changed from the 1996 Standard Geographical Classification (SGC) to the 2001 SGC, which mainly affects boundaries of census metropolitan areas.

The article *Improvements in 2005 to the LFS*⁽¹⁾ provides an overview of the effect of these changes on the estimates. As a result of these changes, LFS estimates have been revised back to January 1975. Historical comparisons were released on February 4, 2005.

For labour force survey concepts and definitions refer to Statistics Canada, *Guide to the Labour Force Survey*, Catalogue No. 71-543-GIE.

* Prior to the introduction of the new LFS questionnaire, data on duration of unemployment were top coded to 99 weeks since values of only 2-digits could be processed. However, with the new questionnaire, this processing restriction no longer applies. As a result, two series are provided for average duration of unemployment:

- one with no upper limit to length of unemployment that begins in 1997
- another top-coded to 99 weeks for 1976 through the latest year.

⁽¹⁾ Data excludes maternity leave

Absenteeism—there are many kinds of absenteeism such as annual vacations, which are considered economically healthy for both the organization and the employee. Also, they are scheduled so that their effect upon the organization can be easily absorbed; the same is true for statutory holidays—these are considered controllable. Others, such as those caused by illness and family-related demands are generally unscheduled—and thus considered uncontrollable. The table above presents absence rates due to personal reasons, which accounted for about 28% of all time lost by full-time employees each week in 2001. Vacations, which accounted for about 47% of total time away from work are not counted in this data, nor are statutory holidays which represented 12%, maternity leave which accounted for 8% and other reasons, 6%.

Incidence—incidence of absence is the percentage of full-time employees reporting some absence in the reference week. In calculating incidence, the length of work absence—whether an hour, a day or a full week—is irrelevant.

Inactivity rate—shows hours lost as a proportion of the usual weekly hours of all full-time employees. It takes into account both the incidence and length of absence.

Days lost per worker—calculated by multiplying the inactivity rate by the estimated number of working days in the year (250).

Place of Work Status, for Employed Labour Force 15 years and Over, Canada, Nova Scotia and Halifax Metro, 2001 (continued)

Figures may not total due to rounding

- ⁽¹⁾ Place of Work Status—classification of people aged 15 or over who worked at some point between January 1, 2000 and May 15, 2001 (Census Day), according to whether they worked at home, worked outside Canada, had no fixed workplace address or worked at a specific address.
- ⁽²⁾ Worked at Home—persons whose job is located in the same building as their place of residence, persons who live and work on the same farm, building superintendents and teleworkers who spend most of their work week working at home.
- ⁽³⁾ Worked outside Canada—persons who worked at a location outside Canada. This can include diplomats, Armed Forces personnel and other persons enumerated abroad. This category also includes recent immigrants who may not currently be employed, but whose job of longest duration since January 1, 2000 was held outside Canada.
- ⁽⁴⁾ No Fixed Workplace Address—persons who do not go from home to the same workplace location at the beginning of each shift. Such persons include building and landscape contractors, traveling salespersons, independent truck drivers, etc.
- ⁽⁵⁾ Usual Place of Work—persons who are not included in the categories described above and who report to the same (usual) workplace location at the beginning of each shift are included here. Respondents are asked to provide the street address, city, town, village, township, municipality or Indian reserve, province/territory and postal code of their workplace. If the full street address was not known, the name of the building or nearest street intersection could be substituted.

⁽¹⁾ Commuting Distance—refers to the distance, in kilometres, between the respondent's residence and his or her usual workplace location. The variable relates to population 15 years of age and over, excluding institutional residents, who worked at some time since January 1, 2000 and who had a usual place of work.

⁽²⁾ Mode of Transportation—main means a person uses to travel between home and place of work, for example, by car, on foot, on public transit or by some other means. The variable relates to population 15 years of age and over, excluding institutional residents, who worked at some time since January 1, 2000 at a usual workplace address, or had no fixed workplace address. Persons who use more than one mode of transportation are asked to identify the single mode they use for most of the travel distance.

Prices

Consumer Price Index Growth, All Items and by Components, Nova Scotia (1992=100), 2003 to 2004

Source: Statistics Canada, *The Consumer Price Index*, Catalogue No. 62-001-XPB and CANSIM Table 326-0002

- Rental agreements, spousal and child support payments and other forms of contractual and price-setting arrangements are frequently tied in some manner to movements in the CPI.
 - Cost-of-living adjustments (COLA) clauses link wage increases to movements in the CPI.
 - Nova Scotia's inflation (as measured by the all-items Consumer Price Index) rose 1.8% during 2004. The Canadian rate of consumer price inflation was reported at 1.9%. The Nova Scotia CPI, which has been published since 1980 has shown inflation fluctuate from a high of 11.8% in 1981 to a low of 0.6% in 1998. During this period, Canada's CPI ranged from 12.4% in 1981 and 0.2% in 1994.
 - The consumer price index for the provinces and cities does not indicate which of the provinces or cities have higher or lower consumer price levels. Rather it indicates that some provinces or cities have higher or lower rates of consumer price change since the base period.
 - The New Housing Price Index measures changes over time in the contractors' selling prices of new residential houses, where detailed specifications remain the same between two consecutive periods. This series surveys 21 metropolitan areas across the country. The survey also collects contractors' estimates of the current cost of the land. The residual (selling price less land), which mainly relates to the current cost of the structure, is also independently indexed and is presented as the house series. The lots are serviced by builders; therefore, the servicing costs do not enter into the contractors' selling prices.
 - In 2004 the total New Housing Price Index in metropolitan Halifax, 121.6 (1997=100), represented a 2.1% increase over 2003. The Canada index, 123.2 (1997=100), increased 5.6%.
 - Statistics Canada's Survey of Spending⁽²⁾ reported average household expenditures in Canada totaled \$61,152 in 2003. The corresponding figure in Nova Scotia was \$54,295 and \$62,140 in Halifax Metro.
- The Consumer Price Index (CPI) is defined as a measure of the percentage change through time in the cost of purchasing a constant "basket" of goods and services representing the consumption of a particular population group.⁽¹⁾ When prices increase, the purchasing power of money drops. When prices drop, it means the purchasing power of money increases. The CPI is frequently used to estimate the extent to which this purchasing power of money changes. Therefore, it is a widely used measure of inflation or deflation. Consumers can compare movements in the CPI to changes in their personal income to monitor and evaluate changes in their financial situation. The CPI directly or indirectly affects virtually all Canadians:
 - Old Age Security pensions, Canada Pension payments and other forms of social and welfare payments are adjusted periodically to take account of changes in the CPI.

⁽¹⁾ Statistics Canada, *The Consumer Price Index Reference Paper*, Cat. No. 62-553 Occasional, p. 2

⁽²⁾ Statistics Canada, *Survey of Household Spending in 2001*, Catalogue No. 62F0031

Within total current consumption, shelter represented 17.3% of total expenditures in Nova Scotia, compared to 18.9% in Canada and 18.3% in Halifax Metro. Transportation represented 13.7% of total expenditures in Canada as compared to 14.9% in Nova Scotia and 13.7% in Halifax Metro. Another major component of expenditures, food, was 11.1%, 11.3% and 10.1% of Canada, Nova Scotia and Halifax Metro respectively.

New Housing Price Index ⁽¹⁾, Canada and Halifax (1997=100), 2000 to 2004

Year ⁽²⁾	Total	Canada Housing	Land	Total	Halifax Housing	Land
2000	104.1	106.2	101.3	107.4	108.7	105.4
2001	107.0	109.9	102.3	110.5	112.0	107.8
2002	111.3	115.9	103.5	114.5	115.9	111.9
2003	116.7	123.0	105.0	119.1	120.8	115.8
2004	123.2	131.1	108.1	121.6	123.6	117.0

⁽¹⁾ These price indexes relate to the selling prices of new houses constructed by residential general contractors. The estimated house only and land only indexes are also calculated in conjunction with the total selling price indexes. Since inception of the Goods and Services Tax in January 1, 1991 and the subsequent introduction of some provincial consumption taxes; the Quebec Sales Tax in Quebec (July 1, 1992), and the Harmonized Sales Tax in Newfoundland and Labrador, New Brunswick and Nova Scotia (April 1, 1997), the New Housing Price Index has not included these consumption taxes in index calculations.

⁽²⁾ Annual figures were calculated from an average of monthly data.

Income

Average Income Per Tax Filer, All Income Tax Returns, Nova Scotia, by Regions, 2001

Source: Canada Customs & Revenue Agency, *Annual Income Statistics Report, 2001, Geographic Table 1*, <http://www.cra-adrc.gc.ca/agency/stats/menu-e.html>

- Total personal income in Nova Scotia advanced 3.2% in 2004. Per capita income was \$27,092, an increase of 3.1% over 2003. For Canada, total personal income registered a 4.1% gain in 2004, while per capita income, at \$30,125, increased 3.2%.
- In Nova Scotia during 2004 labour income (wages and salaries as well as supplementary labour income), at \$15,323.9 million, was up 3.1% over 2003. Robust growth in income arose from higher employment and average wages. In 2003 the average earnings for all employees in Nova Scotia rose to \$611.93, an increase of \$14.85 or up 2.5% from 2003. Canada's average earnings increased 2.2% as well, increasing by \$15.33 to \$705.68.
- Canada Customs & Revenue Agency reported the 2001 average income per all tax filers in Nova Scotia was \$26,899. This compared to \$31,821 in the Halifax Region, the most populated region of the province.
- The Small Area and Administrative Data Division of Statistics Canada derives various data sets using taxation filer information including special tabulations for its labour force income profile series and neighbourhood

income and demographic profile series (see pages 86 and 94). Of the 912,090 taxfilers and dependents in Nova Scotia in 2002, 14% reported total income of \$50,000+. Average age of taxfilers and dependents was 38 and, of all taxfilers and dependents, 52% were female, 41% were married and 4% lived in an apartment.

- Low Income Cut-offs (LICOs) are one alternative for measuring the size, incidence and composition of the low income population; however, they are quite different from measures of poverty. Corresponding data for Nova Scotia shows that overall there has been decline in the prevalence of low income of all persons between 1999 and 2003, as the indicator fell from 11.4% to 10.7% over this period.

Note:

Comparison of Income Estimates across Household Survey Programs:

- A very comprehensive research paper produced by Statistics Canada provides an overview of the comparison of income estimates across their Household Survey Program (Catalogue No. 75F0002 MIE, No. 12). The following summarizes some of the content of that release.
- Income data are collected by many household surveys, either as a major part of their content and at a detailed level or as a variable of other primary data resulting in a smaller set of income information. These many surveys differ in many ways, due to ranging of sample sizes, methodology, the survey questions and data sources.

- Several surveys/programs at Statistics Canada that general income data include:

Survey of Labour and Income Dynamics (SLID)
Census of Population
Survey of Household Spending (SHS)

Canadian Community Health Survey (CCHS)
General Social Survey (GSS)
National Population Health Survey (NPHS)
T1FF Administrative Tax Data File (Small Area Administrative Data Division—SAADD)

	\$7.00	January 1, 2007
Prince Edward Island	\$6.80	January 1, 2005
Nova Scotia	\$6.50	April 1, 2004
	\$6.80	October 1, 2005
	\$7.15	April 1, 2006
New Brunswick	\$6.30	January 1, 2005
	\$6.40	January 1, 2006
	\$6.60	January 1, 2007
Quebec	\$7.60	May 1, 2005
Ontario	\$7.45	February 1, 2005
	\$7.75	February 1, 2006
	\$8.00	February 1, 2007
Manitoba	\$7.25	April 1, 2005
Saskatchewan	\$6.65	November 1, 2002
Alberta	\$7.00	September 1, 2005
British Columbia	\$8.00	November 1, 2001
Northwest Territories	\$8.25	December 18, 2003
Nunavut	\$8.50	March 3, 2003
Yukon	\$7.20	October 1, 1998

⁽¹⁾ The minimum wage is a basic labour standard that sets the lowest wage rate that an employer can pay to employees who are covered by labour legislation.

⁽²⁾ In most jurisdictions, these rates also apply to young workers. More information is available on special rates for young workers under *Current and Forthcoming Wage Rates in Canada for Young Workers and Specific Occupations*.

Husband-wife families with employment income of \$60,000 or more	530	480	690	820

Data is available for Canada, provinces, territories and census metropolitan area of geography.

(1) A husband-wife family consists of a man and woman living together (whether married or common law), with or without children, at the same address. Only husband-wife families with positive employment income are included in this table. Excluded families consist of: families where both spouses reported zero or negative employment income; and families where only one spouse reported negative employment income.

(2) Employment income includes wages and salaries, commissions from employment, training allowances, tips and gratuities, and net self-employment income (business, professional, commission, farming and fishing income).

(3) Children are taxfilers or imputed persons in couple and lone-parent families. Taxfiling children do not live with their spouse, have no children of their own and live with their parent(s). Most children are identified from the Canada Child Tax Benefit file, a provincial births file or a previous T1 family file.

(4) Characteristics such as age are as of December 31 of the reference year.

Average Total Income, by Economic Family Types, 2003 Constant Dollars, Nova Scotia, 1999 to 2003

Economic Family type	Average Total Income

Low Income Measures (LIM) are one alternative to the traditional Low Income Cut-offs (LICOs) for measuring the size, incidence and composition of the low income population. The Low Income Measure is a fixed percentage (50%) of median adjusted family income, where "adjusted" indicates that family needs are taken into account. There is no geographic component to the LIM, as there is with the LICO. Another difference with the LIM as compared to LICO is that the cutoffs are estimated from the income survey used to determine the low income statistics, whereas the other uses external data sets. Adjustment for family sizes reflects the fact that a family's needs increase as the number of members increases. Most would agree that a family of five has a greater need than a family of two. Similarly, the LIM allows for the fact that it costs more to feed a family of five adults than a family of two adults and three children.

There has been extensive and recurring media coverage of Statistics Canada's Low Income Cut-offs and their relationship to the measurement of poverty. At the heart of the debate is the use of the LICOs as poverty lines. Statistics Canada has clearly and consistently emphasized, since their publication began over 25 years ago, that the LICOs are quite different from measures of poverty. They reflect a consistent and well defined methodology which identifies those who are substantially worse off than the average. In the absence of an accepted definition of poverty, these statistics have been used by many analysts who wanted to study the characteristics of the relatively worse off families in Canada. These measures have enabled Statistics Canada to report important trends such as the changing composition of this group over time.

A Low Income Cutoff (LICO) is an income threshold below which a family is likely to spend significantly more of its income on food, shelter and clothing than the average family. The starting point for producing a set of cutoffs is the Family Expenditure Survey (FAMEX), which was redesigned and renamed the Survey of Household Spending (SHS) in 1997. Both surveys produce family expenditures on a wide variety of items, including food, shelter and clothing, which are of interest for LICOs. The relationship between income and the necessities of food, shelter and clothing is at the heart of the Low Income Cutoffs.

Both the traditional Low Income Cutoffs (LICOs) and the alternative, Low Income Measures (LIM) are used for measuring the size, incidence and composition of the low income population.

There has been extensive and recurring media coverage of Statistics Canada's Low Income Cutoffs and their relationship to the measurement of poverty. At the heart of the debate is the use of the LICOs as poverty lines. Statistics Canada has clearly and consistently emphasized, since their publication began over 25 years ago, that the LICOs are quite different from measures of poverty. They reflect a consistent and well defined methodology which identifies those who are substantially worse off than the average. In the absence of an accepted definition of poverty, these statistics have been used by many analysts who wanted to study the characteristics of the relatively worse off families in Canada. These measures have enabled Statistics Canada to report important trends such as the changing composition of this group over time.

Income Data, 2001 Census, Canada, Nova Scotia and Nova Scotia Counties by Region, 2000 (*continued*)

Total Income—total of income from all sources, including employment income, income from government programs, pension income, investment income and any other money income.

Employment Income—refers to total income received by persons 15 years of age and over during calendar year 2000 as wages and salaries, net income from non-farm unincorporated business and/or professional practice, and/or non-farm self-employment income.

Government Transfers—refers to total income from all transfer payments received from federal, provincial or municipal governments during calendar year 2000. This variable is the sum of the amounts reported in the Old Age Security pension and Guaranteed Income Supplement, benefits from Canada or Quebec Pension Plan, benefits from Employment Insurance, Canada Child Tax benefits and/or other income from government sources.

Census Family—refers to a married couple (with or without children of either or both spouses), a couple living common-law (with or without children of either or both partners) or a lone-parent of any marital status, with at least one child living in the same dwelling. A couple living common-law may be of opposite or same sex.

Non-Family Person—refers to (1) persons living with relatives other than spouse, common-law partner or children, (2) persons living with non-relatives only or (3) persons living alone.

Average Household Income—refers to the dollar amount obtained by adding up the total income of all household members and dividing this sum by the number of households.

Economic Family—refers to a group of two or more persons who live in the same dwelling and are related to each other by blood, marriage, common-law or adoption.

Incidence of Low Income—percentage of economic families or individuals who spend 20% more of their income than average on food, shelter and clothing.

Income Security

Distribution of Canada Pension Dollars, by Type of Beneficiary, Nova Scotia, 2004

Source: Social Development Canada, *Canada Pension Plan and Old Age Security Monthly Statistical Bulletins, June 2005, Table 1, 3, 6 and 8*, <http://www.sdc.gc.ca/en/isp/statistics/monthly.shtml>

- Data from the income section indicated that in 2002, 16.9% of income in Nova Scotia was made up of government transfer payments. Approximately \$4.0 billion was transferred to Nova Scotians: \$2.3 billion, or 57.1% from Federal Government programs; \$0.7 billion, or 18.2% from Provincial Government programs; \$2.0 million or 0.05% from Local Government programs and \$1.0 billion, or 24.7% from the Canadian Pension Plan.
- Total Nova Scotia benefits paid under the Canada Pension Plan in 2004 were \$1,094.6 million. This represented 4.7% of Canada’s total benefit payments from the Plan in 2004. The major amount of benefit payments in Nova Scotia under the Plan were:
 - Retirement benefits – 60.8%
 - Disability benefits – 20.5%
 - Survivor benefits – 14.8%
- During the month of June 2005, total benefits from the Canada Pension Plan of \$91.0 million were paid out to 207,846 recipients in Nova Scotia, while 4.6 million Canadians received a total of \$2,012.4 million.
- The total paid in 2004 to persons in Nova Scotia receiving Old Age Security Benefits was \$950.0 million, 3.4% of total Canadian benefits paid. During June 2005, there were 131,354 Nova Scotians that received a total of \$61.8 million from Old Age Security Pension, 59,455 people in the province that received a total of \$17.8 million from the Guaranteed Income Supplement while 4,374 Nova Scotians that received a total of \$1.7 million from Spouse’s Allowance benefits.
- The Small Area and Administrative Data Division of Statistics Canada derives various data sets using taxation filer information including special tabulations for its economic dependency profile series (see pages 106 to 110).

Notes:

Further information on “Income Support” is available on the Social Development Canada website: *Canada Pension Plan and Old Age Security Monthly Statistical Bulletins*, <http://www.sdc.gc.ca/en/isp/statistics/monthly.shtml> and from Statistics Canada, *Canada’s Retirement Income Programs: A Statistical Overview (1990–2000)*, Catalogue No. 74-507-XIE.

⁽¹⁾ Net amount data is taken from the HRSDC, Financial and Administrative Services Report, on the financial transactions published each month.

⁽²⁾ Gross amount represents the benefit expenditures recorded at the time the cheques are issued from the main computer cheque system. Therefore, this amount is not taking into consideration overpayments or underpayments. Benefits paid by the supplementary cheques system and under international agreements on social security cannot at this time be distributed by province, age, sex, etc.

⁽³⁾ Average amount paid is the sum of the benefits paid in the month divided by the number of benefits not including retroactive payments. It does not include benefits paid by the supplementary cheques system and under international agreements on social security as well as underpayments or other adjustments.

GIS as % of OAS ⁽⁵⁾	27.05%	28.83%	37.62%	28.75%	28.75%	45.26%

⁽¹⁾ Net paid represents the amount paid for Old Age Security benefits including underpayments, special or manual cheques, issued, returned cheques, journal vouchers, cash refunds. Recoveries of overpayments (Old Age Security, Guaranteed Income Supplement, Spouse's Allowance) are not included, neither spare refunds of the benefit repayments received from Revenue Canada.

⁽²⁾ Old Age Security Benefits are paid to persons living in Canada and Abroad under reciprocal Social Security Agreements.

⁽³⁾ Guaranteed Income Supplement is paid to Old Age Security pensioners who because of little or no income, qualified for such supplement.

⁽⁴⁾ Spouse's Allowance is paid to the 60 to 64 year old spouse/common law of a pensioner in receipt of OAS and GIS.

⁽⁵⁾ GIS as % of OAS is the percentage of the total number of Old Age Security pensioners who are in receipt of a Guaranteed Income Supplement.

⁽¹⁾ The Employment Insurance Coverage Survey has been conducted for Human Resources Development Canada since 1997. The survey is conducted in four cycles each year—in April, July, November and January. In 2000, the survey was expanded to help monitor the effect of the extended parental benefit program. In 2004, 2,340 unemployed and 1,247 mothers of a child less than one year old were surveyed. All estimates for 2000 to 2003 have been adjusted to reflect population counts from the 2001 Census.

⁽²⁾ The number of beneficiaries receiving total income benefits excludes employment insurance claimants receiving employment and support measures benefits.

⁽³⁾ A new type of benefits (compassionate) was created in January 2004.

Economic Dependency Profile, Canada, Nova Scotia and Nova Scotia Counties by Region, 2002 (continued)

Economic Dependency Profiles - Glossary of Terms

Amount (\$'000) represents total transfers expressed in thousands of dollars.

Canada Child Tax Benefit (CCTB) Plan is a system that replaced the previous federal Family Allowance program, the non-refundable child deduction and refundable Child Tax Credit. It is an income supplement for individuals who have at least one qualified dependent child. The Canada Child Tax Benefit is also based on the individual's family income and the number of dependent children.

Canada/Quebec Pension Plan (CPP/QPP) is compulsory contributory social insurance plans that protect workers and their families against loss of income due to retirement, disability or death. Canada Pension Plan and Quebec Pension Plan benefits include all benefits reported for the reference year.

Canadian Index (Canada=100) – The EDR for an area is expressed as a percentage of the EDR for Canada. Hence, if the Canadian index for an area is 95, that area's EDR is 95% of the national EDR.

Economic Dependency Ratio (EDR) is the sum of transfer payments received as benefits in a given area, compared to every \$100 of employment income for that same area. For example, where a table shows an Employment Insurance (EI) dependency ratio of 4.69, it means that \$4.69 in EI benefits were received for every \$100 of employment income for the area.

Employment Income includes wages and salaries, commissions for employment, training allowances, tips and gratuities, and self-employment income (net income from business, profession, farming, fishing and commissions).

Employment Insurance (previously Unemployment Insurance or UI) comprises all types of benefits paid to individuals under this program, regardless of reason, including regular benefits for unemployment, fishing, job creation, maternity, parental/adoption, retirement, self-employment, sickness, training and work sharing.

Goods and Services Tax (GST) Credit includes all amounts received through this program. Beginning in 1997, the GST was harmonized with the provincial sales

taxes in Newfoundland, Nova Scotia and New Brunswick and became the Goods and Services Tax/Harmonized Sales Tax (GST/HST) credit.

Government Transfer Payments, for the purposes of these data, denote the following payments made to individuals by the federal or provincial governments: Employment Insurance, GST Credit, Canada Child Tax Benefit, Old Age Security Pension/Net Federal Supplements, Canada and Quebec Pension plans, Workers Compensation, Social Assistance and non-taxable income and provincial refundable tax credits. The individuals in this case receive these payments without providing goods or services in return. Previous to the 1996 data, "transfer payments" also included superannuation and other (private) pensions.

Number represents total number of individuals who were in receipt of at least one of the transfers.

Old Age Security (OAS) Pension is part of the Old Age Security program, a federal government program that guarantees a degree of financial security to Canadian seniors. All persons in Canada aged 65 or older, who are Canadian citizens or legal residents, may qualify for a full OAS pension, depending on their years of residence in Canada after reaching age 18. Old Age Security benefits include all benefits reported for the reference year, excluding Guaranteed Income Supplements and Spousal Allowance benefits.

Provincial Index (Province=100) – The EDR for an area is expressed as a percentage of the EDR for the province. For example, if the EDR for an area has a provincial index of 110, that ERD is 10% higher than the provincial EDR.

Provincial Refundable Tax Credits unlike nonrefundable tax credits, are amounts paid to the taxfiler, regardless of tax liability.

Social Assistance includes payments made in the year on the basis of a means, needs or income test (whether made by an organized charity or under a government program).

Workers' Compensation includes any compensation received under Workers' Compensation in respect of an injury, disability or death.

Investment Income - includes both interest income and dividend income.

Investors - include taxfilers who reported dividend income on line 120 of their personal tax return. They may or may not have also reported interest and other investment income on line 121. When such income is reported on line 121, this amount is added to the amount of dividend income received, and the sum becomes the investment income of the investor. Savers - are defined as taxfilers who reported interest and investment income on line 121 of the personal income tax return, but no dividend income on line 120.

Note:

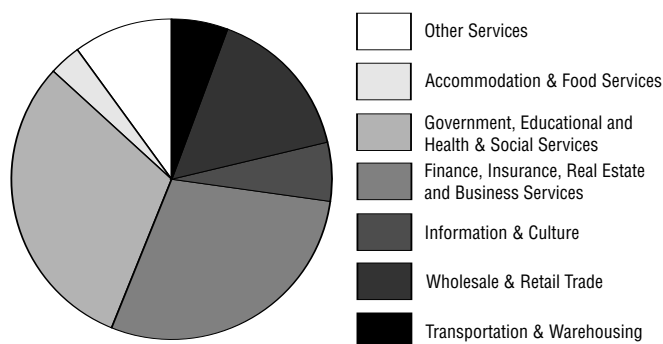

Also refer to the Economics and Statistics Division publication, *Overview of the Nova Scotia Economy, 1999 to 2004*. This paper provides a brief overview of the Nova Scotia economy, including the relative contribution of each sector to the provincial Gross Domestic Product (GDP), employment, wages and salaries, and average weekly wages growth, and structural changes in employment over the mid-term period and labour productivity. The release of this paper in late fall 2005 will incorporate revisions to Statistics Canada's GDP by industry (release November 8, 2005). This paper will be available on the Economics and Statistics web site: <http://www.gov.ns.ca/finance/publish/publicationsb.asp?id=Pub39>

- The Nova Scotia economy⁽¹⁾ is predominantly service-based. The province has a long established position as the principal private sector service centre for Atlantic Canada and the centre for regional public administration and defence. In 2004, the service sector, which includes a wide range of business and personal services, health and educational services, public administration, defence and other federal departments, represented 77.2% of the provincial economy. The goods producing sector, which includes manufacturing, construction, primary industries, and utilities, accounted for 22.6% of Nova Scotia's economy.

- From 2000 to 2004, the value added of provincial economy increased 10.2% (based on chained 1997 dollars data). The Gross Domestic Product (GDP) of goods producing sector increased 4.5%, while the GDP in the service producing sector grew by 12.2%. Within the goods producing sector from 2000 to 2004, construction and utilities showed the most significant growth, at 13.6% and 9.8%, respectively. Industries leading in growth in the service producing sector included information and cultural industries (+24.6%), administrative and support, waste management and remediation services (+21.8%), professional, scientific and technical services (+19.8%) and retail trade (+19.3%). During this period, the only sectors of overall decline were mining and oil and gas extraction (-7.5%) and agriculture, forestry, fishing and hunting (-1.8%).
- Total capital expenditures in 2004 reached \$5,846.0 million dollars. These were comprised 83% of private capital expenditures and 17% public expenditures. Investment intentions indicate that in 2005 capital expenditures are expected to increase 2.1% to \$5,967.5 million, with little change in the split between private and public expenditures.

Source: Statistics Canada, *Provincial Gross Product by Industry*, Catalogue No. 15-203-XPB, April 27, 2005

Note:

For information on the Chain Fisher Volume Index, which has been used since May 2001 as the official measure of real expenditure-based Gross Domestic Product refer to the following web site: <http://www.statcan.ca/english/concepts/chainfisher/methodology.htm>

- In Nova Scotia, from 2000 to 2004, there was a 7.4% employment gain that resulted in 30,500 new jobs. About 27,400 of these jobs were in the service sector. Distribution of employment between the goods and services producing sectors remained virtually unchanged with 79.0% jobs in the services producing sector in 2004, up by 8.5% from 2000, and 21.0% of jobs in goods producing sector, up 3.4% from 2000.
- From 2000 to 2004, the fastest growth in employment was observed in business, building and other support services industries, a 55.2% increase to 25,600 persons. By contrast, employment in mining and oil and gas extraction industries declined 28.6% to 2,500 persons.
- Total wages and salaries reached \$13,368.9 million in 2004, a 16.2% increase over 2000. While total wages and salaries in goods producing industries grew 9.0%, service producing industries showed an increase of 18.3%.
- In 2004, average weekly wages by industrial aggregate in Nova Scotia reached \$611.93, up 8.7% over 2000. In 2004, the average weekly wage in goods producing industries was \$746.13 and \$582.82 in service producing industries.

Gross Domestic Product, at Market Prices, Current Dollars and Chained (1997) Dollars, Canada and the Provinces, 2000 to 2004

Agriculture

Farm Cash Receipts, Nova Scotia 2000 to 2004

Source: Statistics Canada, *Farm Cash Receipts*, Catalogue No. 21-001XIB

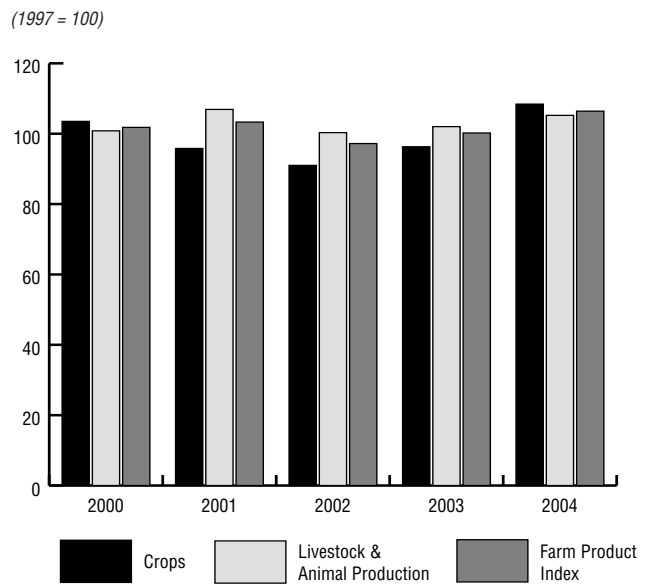

Refer to page (i) of the introductory section of this publication for an important notice about sector data, including information about the November 8, 2005 release of revisions to Statistics Canada's GDP by industry.

- The Census of Canada collects and disseminates a wide range of data on the agriculture industry such as number and type of farms, farm operator characteristics, business operating arrangements, land management practices crop areas, numbers of livestock and poultry, farm capital, operating expenses and receipts, and farm machinery and equipment. These data provide a comprehensive picture of the agriculture industry across Canada every five years at the national and provincial levels as well as at lower levels of geography.⁽¹⁾
- The 2001 Census of Canada counted 3,923 farms in Nova Scotia during 2000. This figure was down 11.9% from 1995. The area of farmland was reported as 407,055 hectares in 2001, down 4.7% from 1996. Average farm size (all types of land) increased from 96 hectares in 1996

to 103.8 hectares in 2001. In 2001, 31.4% of the province's farm area was concentrated in the Annapolis Valley (Annapolis, Hants and Kings County).

- The 2001 Census of Canada reported Nova Scotia's total gross farm receipts were \$460 million in 2000. Nearly 22% of farms were classified with \$100,000 or more total gross farm receipts. Cattle farms represented 21.1% of all farms and fruit farms accounted for 16.6% of all farms. The area in apples has declined 18.9% from 1996; while, the area in blueberries has increased 23.9%. Blueberries represent 81.4% of Nova Scotia's fruit acreage. The province is recognized as the nation's largest producer of blueberries, producing 35% of the Canada's crop. Although Nova Scotia had more area devoted to Christmas tree production than any other province in Canada in 2001, the 535 farms in the province producing Christmas trees represented a decline of 33.8% from 1996

Farm Product Price Index, Nova Scotia, 2000 to 2004

Source: Statistics Canada, *Farm Product Price Index*, Catalogue No. 21-007-XIB, Vol. 5, Table 1, 2 and 3

⁽¹⁾ Statistics Canada, Agriculture Division, *People, Products and Services, 2004*, Catalogue No. 21F0003GIE, p. 1

- In 2004 GDP (in chained 1997 dollars) in agriculture (crop and animal production) increased 3.6% over 2003 to \$189.5 million, while GDP for support activities for agriculture and forestry fell 0.3% to \$32.1 million.
- Capital investment in crop and animal production in 2004 decreased 2.9% over 2003 to \$47.1 million and in 2005 is expected to remain unchanged from 2004. Capital investment in support activities to agriculture and forestry decreased from \$5.5 million in 2003 to \$2.9 million in 2004 and is expected to decline in 2005 to \$2.8 million.
- In 2004 employment in the agriculture sector fell 16.7% to 5,500 persons.
- Total wages and salaries in the agriculture, forestry, fishing and hunting sectors were \$316.8 million in 2004, an decrease of 3.9% over 2003 and an increase of 31.5% over 2000.
- The Farm Income and Prices Section of Statistics Canada produces estimates of farm cash receipts by commodity, farm expenses by item, depreciation, net farm income, agriculture commodity prices, farm product price index, direct program payments, value of farm capital, farm debt, and cash flow statement, a value added account and a balance sheet for the agricultural sector.⁽¹⁾
- Farm cash receipts in 2004 rose 6.3% over 2003 to \$451,350 million. Compared to 2003, in receipts in 2004 from crops decreased 10.4% to \$113.0 million, total livestock and products rose 12.2% to \$289.4 million while forest and maple products (including Christmas trees) declined 2.1% to \$23.7 million. In 2004 assistance to farmers increased 53.8% over 2003 to \$25.3 million.
- Gross value added in Nova Scotia's agriculture sector increased 10.9% in 2004 to \$188.6 million.
- Although farm wages (cash wages, room and board) at \$91.5 million decreased 0.1% between 2003 and 2004, this figure was 20.3% over 2000.
- In 2004 the farm product price index (1997=100) increased 6.2% to 106.4. While the crop index increased 12.6% over 2003, the livestock index was up 3.1%.
- There were 125 greenhouses in Nova Scotia in 2004, a decrease of 19.4% over 2003. Nova Scotia greenhouses employed 1,390 people in 2004. Total greenhouse sales of \$35.1 million included \$4.8 million in greenhouse vegetables and \$30.3 million in ornamental and plant sales.
- In 2003 gross value added (factor cost) in the aquaculture industry of Nova Scotia increased 39.5% to \$14.7 million. Aquaculture tonnage rose 79.0% over 2002 to 7,513 tonnes while value increased 79.5% to \$35.3 million.
- Finfish made up 76.2% of total value of aquaculture production in 2003 while shellfish accounted for 23.8%.

(1) Data are reported on Census Day for the preceding calendar or fiscal year.

(2) As in previous censuses, response errors have resulted in an under-reporting of total gross farm receipts. However, the data are comparable with previous censuses.

(3) At 2000 prices.

(4) "Gross farm receipts" excludes forest products sold.

(5) Due to response errors in previous censuses, the sales of forest products may have been overstated. Changes to this question for 2001 limit the comparability of the data to previous censuses.

(6) As in previous censuses, response errors are common for the paid work question because of the variety of arrangements in hiring farm labour. However, the data are comparable with previous censuses.

(7) Conversion factor: 1 hectare is equivalent to 2.471 acres.

(8) Excludes Christmas tree area.

(9) Respondents could report more than one application

(10) As in previous censuses, the area of land on which herbicides, insecticides, fungicides and commercial fertilizer were applied is under-reported. However, the data are comparable with previous censuses.

(11) As in 1995, the area of land on which manure was applied using each manure application method was under-reported. However, the 1995 and 2000 data are comparable.

Sod	26	16	(38.5)	1,199	981	(18.2)
Christmas Trees	808	535	(33.8)	11,582	9,490	(18.1)
Farms ⁽⁷⁾ Reporting Certified Organic Products	--	23	--	--	--	--

⁽¹⁾ Conversion factor: 1 hectare is equivalent to 2.471 acres. Farm land includes land in crops, summer fallow land, tame or seeded pasture, natural land for pasture and all other land (including Christmas tree area).

⁽²⁾ Each census farm is classified according to the commodity or group of commodities that accounts for 51% or more of the total potential receipts. Since the farm numbers include only those with receipts of \$2,500 or more, the data differ from totals shown in other tables.

⁽³⁾ Data are reported on Census Day for the preceding calendar or fiscal year.

⁽⁴⁾ To make comparisons between the two years possible, the farm typing categories are based on the historical classification structure, not the North American Industrial Classification System (NAICS) farm typing categories introduced in 2001.

⁽⁵⁾ Includes tree fruits, berries and nuts.

⁽⁶⁾ Conversion factor: 1 square metre is equivalent to 10.76391 square feet.

⁽⁷⁾ Including fruits, vegetables or greenhouse products; field crops; animals or animal products; and other (maple syrup, herbs, etc.).

Forestry

140

Forestry Industries Manufacturing Shipments, Nova Scotia 2000 to 2004

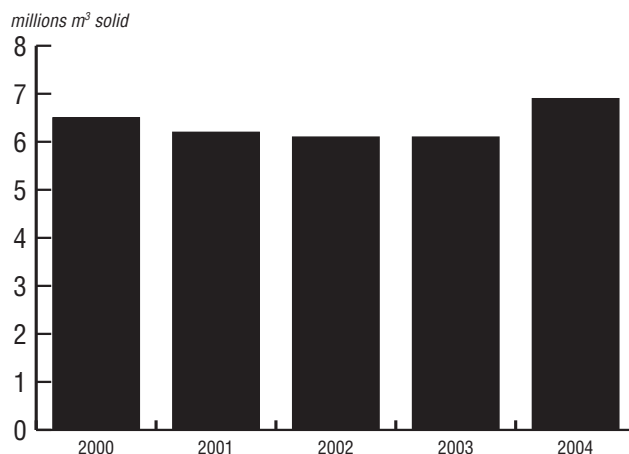

Source: Statistics Canada, *Monthly Survey of Manufacturing*, No. 2101, CANSIM Table 304-0015

Refer to page (i) of the introductory section of this publication for an important notice about sector data, including information about the November 8, 2005 release of revisions to Statistics Canada's GDP by industry.

- GDP (in chained 1997 dollars) in the logging and forestry sector during 2004 rose 3.5% from 2003 to \$171.3 million. GDP in support activities for agriculture and forestry decreased 0.3% to \$32.1 million.
- While capital investment in forestry and logging was \$5.0 million in 2004, the intention figure for 2005 is being reported at \$10.9 million. Capital expenditure in support activities for agriculture and forestry was recorded at \$2.9 million in 2004 and is expected to decrease to \$2.8 million in 2005.
- Between 2003 and 2004 employment within the forestry and logging sector, including support activities, decreased by 600 to 3,600 persons.

- In 2004, total wages and salaries within fishing, agriculture, and forestry and hunting decreased 3.9% over 2003 to \$316.7 million.
- The total provincial harvest for 2004 was reported at 6.9 million cubic metres of solid wood, an increase of 13.2% from 2003. Softwood species represented 87.1% or 6.0 million cubic metres of the total. On the production side, lumber production in 2005 increased 6.2% over 2003 to 1.8 million cubic metres.
- The value of manufacturers' shipments of paper and allied products rose 6.2% over 2003 to \$929 million in 2004, while shipments for wood products increased 20.6% to \$656 million during the same period.
- In 2004 the value of international export lumber sales increased 38.3% over 2003 to \$228.1 million. The value of wood pulp exports rose 14.8% to \$219.8 million and paper and paperboard exports increased 5.6% to \$520.6 million, while other wood fabricated materials declined 0.5% to \$36.8 million.

Forest Production, Total Harvest, All Land Tenures, Nova Scotia, 2000 to 2004

Source: Nova Scotia Department of Natural Resources, *Registry of Buyers, 2000-2004*, <http://www.gov.ns.ca/natr/forestry/registry/annualreport.htm>

- The Wood Acquisition Plan Program, required by the Forest Sustainability Regulations (under the Forests Act), completed the fifth year of operation in 2004. All Registered Wood Buyers that acquired more than 5,000 cubic metres from privately owned forest lands in Nova Scotia during the 2004 calendar year were required to submit, to the Department of Natural Resources, a Wood Acquisition Plan, for that volume in 2005.
- The volumes from 2004 that required a Wood Acquisition Plan totaled almost 6.2 million cubic metres. From those volumes, a total value of approximately 16.6 million silviculture credits was required in 2004. Just over 17.5 million silviculture credits were claimed, including 15.8 million silviculture credits and 1.7 administrative credits. Almost 34.5 thousand hectares of silviculture was claimed in 2004, for a value of 15.8 million silviculture credits.
- Nova Scotia lumber exports are exempt from the US countervailing duty on softwood lumber imports; however, they are subject to the US anti-dumping duty. Both of these duties were first imposed in May 2002. Several reviews of the rates, and adjustments to the rates, have occurred since then. As a result of the first Administrative Review, the anti-dumping duty rate applicable to the Maritimes, for the 2002-2003 review period and for subsequent new shipments, was reduced from 8.43% to 3.78%. Preliminary results of the second Administrative Review, which covered the 2003-2004 period and subsequent shipments, were announced on June 1, 2005 by the US Department of Commerce. The countervailing duty rate, applicable to provinces other than the Maritimes, was proposed to be reduced from 17.18% to 8.18%. The anti-dumping duty rate estimate fell to 2.44% from 3.78%. These new rates are still subject to change, pending their verification and finalization. The third Administrative Review for the 2004-2005 period has commenced, but no results have been announced.

Final estimates of production and shipments for sawmills are estimated by applying provincial factors to data collected in the monthly Sawmills and Planning Mills survey. These factors are ratios of the total quantity of lumber produced by sawmills in the monthly Sawmills and Planning Mills survey to the total quantity of lumber produced by all sawmills in Canada as measured by the Annual Survey of Manufactures (ASM). They are calculated for each province and reference year. Beginning in reference year 2000, these factors reflect a number of major conceptual and methodological changes made to the ASM. Two of the more significant changes included a) the use of the Statistics Canada's Business Register (BR) to identify in-scope businesses and b) the expansion in the coverage of the ASM to include all manufacturing activity in Canada. The BR is a central listing of all businesses operating in Canada. For the sawmill industry, this tool identified over 400 additional incorporated businesses with employees having sales of manufactured goods greater than or equal to \$30,000 that were missing from survey coverage prior to reference year 2000. Since most of these units were relatively small, they only accounted for about 5% of total sawmill shipments for Canada in 2000. The impact of incorporating these missing units into the sawmill numbers did, however, vary by province.

Beginning in reference year 2000, the coverage of the sawmill industry in the Annual Survey of Manufactures (ASM) increased to include all incorporated businesses with sales of less than \$30,000 in manufactured goods and all unincorporated manufacturers regardless of size. In 2000, these additional units contributed just under 1% to total sawmill shipments for Canada. The impact of incorporating these additional units into the sawmill estimates did, however, vary by province.

Fishing

Commercial Fish Landings, Quantity and Value, Percentage Change, Nova Scotia, 1998–2000 to 2003–2004

Note that 2004 data is preliminary.

Source: Department of Fisheries and Oceans Canada, *Statistical Services*
http://www.dfo-mpo.gc.ca/communic/statistics/commercial/landings/seafisheries/s2004aq_e.htm

Refer to page (i) of the introductory section of this publication for an important notice about sector data, including information about the November 8, 2005 release of revisions to Statistics Canada’s GDP by industry.

- In 2004, employment of 7,500 in the primary activity of fishing, hunting and trapping displayed an increase of 8.7% over 2003.
- In 2004, wages and salaries within fishing, agriculture, forestry and hunting declined 3.9% over 2003 to \$316.7 million.
- There were 284,306 tonnes of fish landed in Nova Scotia during 2004 valued at \$697,623 million. Compared to 2003, this represented a 22.9 % decrease in the quantity and a 15.5% decline in value of landings.
- Approximately 70% of the decline in the value of commercial fish landings in 2004 is tied to the performance of one species—lobster. In 2004, lobster accounted for 41.4% of total landed value, but both its quantity landed and its value decreased from 2003 figures—18.3% and 23.8% respectively.
- Overall, the groundfish industry showed decline in 2004 as compared to 2003. The quantity of landed groundfish decreased 1.5% while the value of landed groundfish declined by 14.3%. Within this sector, the landed value of hake increased 12.6% while flatfishes showed the greatest percentage decline at 45.9%. The quantity of pelagic and other finfish harvested (herring, mackerel, tuna, etc) in 2004 fell 17.4%, while its landed value declined 19.7% over 2003.
- In 2004 the shellfish sector’s quantity saw a decline of 22.5% and landed value decreased 15.4%. The positive note in the shellfish sector was a 3.5% gain in the quantity and an increase of 17.3% in the value of harvested crabs in 2004 as compared to 2003.
- Nova Scotia fish exports, valued at \$1.1 billion, are the largest product group accounting for 18.6% of the value of all Nova Scotia exports in 2004. While total exports from the province increased 7.0% in 2004, the value of fish exports decreased 7.7% over 2003.
- Aquaculture production is discussed in the “agriculture” section of this publication.
- GDP (in chained 1997 dollars) in the fishing, hunting and trapping sector was \$234.9 million in 2004, a decrease of 14.8% from 2003.
- Total capital expenditures in the province’s fishing, hunting and trapping sector were \$69.2 million in 2004, a 6.6% increase over 2003. Investment intentions for 2005 indicate a further increase of 6.6% to \$73.8 million.

Mining and Gas and Oil

Marketable Gas Receipts ⁽¹⁾, Nova Scotia, 2000 to 2004

⁽¹⁾ Total marketable gas - receipt of gas from fields, processing or reprocessing plants, after re-injection, field uses, processing plants and reprocessing plant shrinkage, plant use and losses have been deducted.

Source: Statistics Canada, *Natural Gas Transportation and Distribution*, Catalogue No. 55-002 Table 1; CANSIM Table 129-0002

Refer to page (i) of the introductory section of this publication for an important notice about sector data, including information about the November 8, 2005 release of revisions to Statistics Canada's GDP by industry.

- GDP (in chained 1997 dollars) in the Nova Scotia's mining and oil and gas extraction sector was \$537.1 million in 2004, down 0.1% from the previous year. The sector represented 2.3% of total GDP in the province in 2004.
- Capital investment in mining and oil and gas extraction in the province in 2004 declined 12.7% over 2003 to \$764.2 million and is expected to decrease 18.7% to \$621.1 million in 2005.
- During 2004 mining and oil and gas extraction employment was unchanged from 2003 at 2,500 in Nova Scotia.
- Total wages and salaries in the Nova Scotia mining and oil and gas extraction sector during 2003 declined 2.9% over 2004 to \$145.2 million.
- The value of mineral production in Nova Scotia during 2004 was \$278.3 million, a 5.7% increase over 2003. The value of mineral production now published by Statistics Canada excludes the oil and gas portion of fuels.
- The quantity of gypsum produced in Nova Scotia during 2004 increased 15.7% over 2003 to 7.9 million tonnes while its value increased 12.4% to \$93.5 million. In 2004 Nova Scotia produced about 84.2% of all gypsum produced in Canada. Most of the gypsum is exported to the United States where the demand remains strong for wallboard production.
- Nova Scotia's 2004 production value of stone increased 1.0% over 2003 to \$65.2 million, while the quantity of production decreased 1.3% to 9.6 million tonnes.
- Continued high prices for gold have maintained an elevated level of exploration activity for gold in Nova Scotia that began in 2003. Several projects in eastern Nova Scotia are continuing in the summer of 2005, based on encouraging results from work in 2004. These include work by Atlantic Gold NL (formerly Diamond Ventures NL) at Moose River, Acadia Gold Corporation at Forest Hills, and Scorpio Mining Corporation at Cochrane Hill.
- Global interest in large, polymetallic iron oxide - copper - gold mineral deposits resulted in extensive staking of highly prospective ground in central Nova Scotia in 2003. In 2005, several companies, including Monster Copper Corporation, Wallbridge Mining Company and Avalon Ventures Ltd., are continuing projects that were initiated on this ground in 2004.
- Commercial offshore natural gas production began December 31, 1999 with the Sable Offshore Energy Project (SOEP). In 2004, SOEP produced 4.3 billion m³ of natural gas, a 9.3% decrease in production from 2003. Tier II of SOEP began production in late 2003 with the Alma field, while the South Venture field came on stream in December 2004, so production occurs from five fields.
- The Province of Nova Scotia receives royalty income from the production of offshore gas and liquids. In the 2004-2005 fiscal year, royalties amounted to \$28.2

million, compared to \$24.1 million the previous fiscal year. Average daily production was 400 million cubic feet per day (MMcf/day) for the 2004–2005 fiscal year, compared to 454 MMcf/day for 2003–2004.

- EnCana Corporation's (formerly PanCanadian Limited) Deep Panuke Project officially remains on hold after EnCana called a "time-out" in February 2003 to re-evaluate the economics of the proposed project. Since that time EnCana has drilled exploration wells Margaree and Marcoh and has held talks with two of the SOEP partners about the possibility of tying Deep Panuke into existing SOEP infrastructure.
- As of March 31, 2005, there were 33 active exploration licenses offshore Nova Scotia encompassing 4.6 million hectares and with a total original work commitment of \$1.15 billion. In 2004, two exploration licenses were awarded January 1; however, twenty-three exploration licenses expired or were surrendered over the course of 2004. Also in 2004, two exploration and two development wells were drilled and four geophysical programs were undertaken resulting in 514.2 km of 2D and 353.3 km of 3D seismic data.

Utilities

Total Electricity Generation, Nova Scotia, 2000 to 2004

Source: Statistics Canada, *Electric Power Statistics, Catalogue No. 57-001-XIB*; *Electric Power Generating Transmission and Distribution, Catalogue No. 57-202-XPB* and *CANSIM Table 127-0001*

Refer to page (i) of the introductory section of this publication for an important notice about sector data, including information about the November 8, 2005 release of revisions to Statistics Canada's GDP by industry.

NSPI purchases about 100 gigawatt hours of wind energy each year. This is equal to the amount of energy used by 10,000 homes annually. In 2004, 73.4% of power in Nova Scotia was produced by thermal generation, while the remainder was generated by hydro, wind and tidal sources. In early 2004, NSPI launched a renewable generation program. In the spring of 2005, NSPI announced its latest agreement to purchase renewable energy from a wind farm being constructed by Glace Bay Lingan Wind Power Ltd. By the end of 2005, NSPI will have contracts in place to increase the supply of renewable energy in Nova Scotia by 25% (about 100 megawatts).

Note:

More information on energy-related utilities can be found on the website of the Nova Scotia Department of Energy (www.gov.ns.ca/energy). As well, Emera's 2004 Progress Report and 2004 Financial Report provides additional information on energy utilities. Emera's Report can be accessed at: www.emera.com/investors/annual_report.shtml

- GDP (in chained 1997 dollars) in the Nova Scotia's utilities sector was \$548.6 million in 2004, up 2.1% from the previous year. The sector represented 2.4% of total GDP in the province in 2004.
- During 2004 employment in Nova Scotia's utilities industry, at 2,500, had decreased 3.8% from 2003.
- At \$140.7 million in 2004, total wages and salaries in the utilities sector of the province increased 0.8% over 2003.
- Electric power generation in 2004 increased 1.3% over 2003 to 12,563,752 megawatt hours.
- Nova Scotia Power (NSPI) has produced and supplied electricity to Nova Scotians for over 80 years and continues to place increased emphasis on renewable energy, or green power, like wind, solar and hydro. NSPI owns and operates 396 megawatts of renewable generation from wind, hydro and tidal power, which makes up 18% of the company's generating capacity.

Refer to page (i) of the introductory section of this publication for an important notice about sector data, including information about the November 8, 2005 release of revisions to Statistics Canada's GDP by industry.

- In 2004 Nova Scotia's GDP (in chained 1997 dollars) in the construction sector decreased 0.6% over 2003 reaching \$1,318.7 million. The sector represented 5.7% of total GDP in the province in 2004.
- Total capital expenditures are comprised of construction⁽¹⁾ and machinery/equipment⁽²⁾ expenditures. In 2004, Nova Scotia's total capital expenditures were \$5.8 billion, an increase of 3.4% over 2003. Most of the increase was in construction expenditures, which rose 5.0% to \$3.6 billion, while machinery/equipment expenditures increased 0.8% to \$2.2 billion. At the national level in 2004, total capital expenditures increased 8.5% to \$243.9 billion. Between 2003 and 2004 among the provinces and territories, growth ranged from 3.2% in Prince Edward Island to a high of 45.6% in the Northwest Territories.

- Nova Scotia's 2005 intentions show total capital expenditures are anticipated to increase 2.1% over 2004 to \$6.0 billion, with construction expenditures declining 0.7% to \$3.6 billion and machinery/ equipment expenditures increasing 6.6% to \$2.4 billion. Canada's total capital expenditures are expected to increase 6.0% over 2004 to \$258.6 billion in 2005. Among the provinces and territories between 2004 and 2005, growth is expected to range from 0.2% in Nunavut to a high of 36.4% in the Northwest Territories.

⁽¹⁾ Capital expenditures on construction represent a process of human endeavour resulting in the erection, assembly, completion of freestanding, static buildings or other types of structures (excluding purchase price of land), including outlays for land servicing and site preparation. It also includes modifications, additions and major renovations, conversions and alterations to structures.

⁽²⁾ Capital expenditures on machinery and equipment represents the total capitalized cost of machinery such as automobiles, boilers, compressors, earth moving and materials handling machines, generators, motors, office and store furniture, professional and scientific equipment, pumps, tools and transformers.

- Within total capital expenditures, Nova Scotia's construction sector component increased 8.9% from 2003 to \$94.2 million in 2004. An annual growth of 3.4% in 2005 is expected increase that figure to \$97.4 million. Data in both 2004 and 2005 indicate the construction sector component represents 1.6% of total capital expenditures in Nova Scotia.
- Total construction expenditures in Nova Scotia's housing⁽³⁾ sector increased 10.4% from 2003 to \$1,614.3 million in 2004. An annual decline of 0.6% in 2005 is expected to decrease that figure to \$1,604.0 million
- During 2004 in Nova Scotia there were 28,100 people employed in construction. While this figure represented a 12.9% increase over 2003, the employment level was 18.1% over 2000.
- Total wages and salaries in the province's construction sector reached \$906.9 million in 2004, up 3.8% over 2003. Construction sector wages and salaries represented 6.8% of the Nova Scotia's total wages and salaries in 2004.
- Average weekly wages in the construction sector were \$696.43 in 2004, an increase of 1.4% over 2003. Average weekly wages by industrial aggregate in Nova Scotia reached \$611.93, up 2.5% over 2003.
- The value of building permits in the province during 2004 rose 11.0% over 2003 to \$1,125.8 million. The residential and commercial sectors reported growth of 13.2% and 16.7%, respectively, while the industrial sector and institutional and government declined 21.6% and 0.5%, respectively. In 2004, metro Halifax⁽⁴⁾ accounted for 54.1% of the province's value of building permits. Of metro Halifax's \$608.6 million in building permits in 2004, 71.2% were residential, 19.1% were commercial, 3.4% were industrial and 6.3% were institutional or government related.
- During 2004 there were 4,717 dwellings units started in Nova Scotia. These units represented a decline of 7.4% from 2003 activity.

Notes:

Private and Public Investment: Data back to 1998 have been revised significantly to reflect changes made to the survey to improve coverage of small businesses, capital items charged to operating expenditures and better information received from respondents after the reference periods were closed. The data are now more closely aligned with the figures for Gross Fixed Capital Formation in the system of national accounts. This change will not have any impact on GDP in the revised years.

The Nova Scotia Construction Activity Report, Statistics Division, Nova Scotia Department of Finance is a resource that monitors much of the province's major construction activity. The publication is produced three times a year—in February, July and November). The pdf version of the Report is available at: <http://www.gov.ns.ca/finance/publish/publicationsb.asp?id=pub09>

⁽³⁾ Housing is included in capital expenditures data as it forms a large proportion of construction expenditures and has cyclical fluctuations similar to those of business, institutional and government capital expenditures.

⁽⁴⁾ Building permits data uses the 2001 Census definition.

Figures may not add to totals due to rounding

Investment intentions are based on a sample survey of 29,000 businesses, governments and institutions across Canada. Data from this survey are calendarized and expressed in current dollars. Data back to 1998 have been revised significantly to reflect changes made to the survey to improve coverage of small businesses, capital items charged to operating expenditures and better information received from respondents after the reference periods were closed. The data are now more closely aligned with the figures for Gross Fixed Capital Formation in the System of National Accounts. This change will not have any impact on GDP in the revised years.

Manufacturing

Value of Manufacturing Shipments, Nova Scotia, 2000 to 2004

Source: Statistics Canada, *Monthly Survey of Manufacturing*, No. 2101 CANSIM Table 305-0015

Refer to page (i) of the introductory section of this publication for an important notice about sector data, including information about the November 8, 2005 release date of revisions to Statistics Canada's GDP by industry.

- In 2004 GDP (in chained 1997 dollars) in Nova Scotia's manufacturing sector increased 1.2% over 2003 to \$2,201.0 million. The manufacturing sector represented 9.6% of total GDP in the province in 2004.
- Total capital expenditure in Nova Scotia during 2004 fell 9.1% to \$395.3 million. It is expected to increase 9.8% to \$434.1 million in 2005.
- In 2004 employment in Nova Scotia's manufacturing sector declined 2.9% over 2003 to 43,200 persons. In 2004, approximately 41% of those employed in manufacturing were in durables⁽¹⁾ and 59% in non-durables⁽²⁾ manufacturing. Employment in the manufacturing sector accounted for 9.8% of total provincial employment.

Employment in Manufacturing, Nova Scotia, 2000 to 2004

Source: Statistics Canada, *Labour Force Historical Review, 2004*, CD-ROM No. 71F0004-XCB

- Total wages and salaries in Nova Scotia manufacturing industries in 2004 rose 0.6% over 2003 levels, reaching \$1,401.7 million. This sector accounted for 10.5% of the province's total wages and salaries during 2004.
- Average wages and salaries in the manufacturing sector reached \$753.97 in Nova Scotia during 2004, up 3.3% over 2003. This compared to the industrial aggregate figure in 2004 of \$611.93, an increase of 2.5% over 2003.

⁽¹⁾ Durables industries—include wood products, non-metallic mineral products, primary metals, fabricated metal products, machinery, computer and electronic products, electrical equipment, appliance and components, transportation equipment, furniture and related products and miscellaneous manufacturing.

⁽²⁾ Non-durables industries—include food beverages and tobacco products, textile mills, textile product mills, clothing, leather and allied products, paper, printing and related support activities, petroleum and coal products, chemicals and plastic and rubber products.

- Manufacturing shipments⁽³⁾ exhibited a solid year, surpassing \$9 billion for the first time ever. Manufacturing shipments⁽⁴⁾ increased 7.4% over 2003 reaching \$9,281.1 million. Nova Scotia's manufacturing shipments represented 1.6% of the national value of \$593,452.5 million in 2004. Wood products shipments represented 7.1% of all manufacturing shipments. The total value of wood products shipments posted the largest gain of all industry groups in 2004 for which data was publically available, increasing 20.4% from 2003 to \$655.8 million. During the same period, transportation equipment manufacturing (excludes tires) increased 9.8% to \$776.8 million, paper manufacturing increased 6.2% to \$858.1 million, machinery manufacturing increased 2.5% to \$181.0 million and food manufacturing increased 2.5% to \$2,062.3 million.
- In 2003 there were 1,106 manufacturing establishments⁽⁵⁾ in Nova Scotia generating \$3,309.7 million in value added.

⁽³⁾ The Monthly Survey of Manufacturing (MSM) publishes statistical series for manufacturers—shipments, inventories, unfilled orders and new orders. The value of these characteristics represent current monthly estimates of the more complete Annual Survey of Manufactures (ASM) data. Shipments are defined as the value of goods manufactured by establishments that have been shipped to a customer. Shipments exclude any wholesaling activity, and any revenues from the rental of equipment or the sale of electricity. The data collected by the MSM provides a current “snapshot” of shipment values by the Canadian manufacturing sector, enabling analysis of the state of the Canadian economy, as well as the health of specific industries in the short-to-medium term.

⁽⁴⁾ With the July 2004 release, all data have been re-benchmarked to the revised 2001 Annual Survey of Manufactures (ASM). Estimates of shipments, inventories and orders have been revised back to January 2000. Although the historical month-to-month movements were preserved, there were minor adjustments made to the levels of the Monthly Survey of Manufacturing (MSM). These adjustments were due to several factors: the use of new and revised data; the updating of the seasonal adjustment factors; and the re-benchmarking of the MSM to the revised 2000 and 2001 ASM levels. The average level of adjustment for shipments from reference year 2000 to 2005 was 0.24%.

⁽⁵⁾ Data may also be purchased for manufacturing industries by Census Division, 2000 to 2002, from Statistics Canada, Manufacturing, Construction and Energy Division, manufact@statcan.ca

⁽¹⁾ Total manufacturing activity

⁽²⁾ In 2000, major conceptual and methodological changes were incorporated into the Annual Survey of Manufactures (ASM). With reference year 2000, the universe was expanded to cover all manufacturing units. In addition to the incorporated manufacturing businesses over \$30,000 in sales of manufactured goods and with employees, the new ASM also includes:

- all incorporated businesses under \$30,000 that had employees
- all incorporated businesses that did not have any employees regardless of their annual sales value
- all unincorporated businesses.

The addition of these units added approximately 60,000 units to the ASM universe. Despite this tremendous increase in the number of establishments, the majority are relatively small. These units account for less than 5% of the total revenue from the sale of manufactured goods. However, the effect on the principal financial statistics does differ by industry and province. Data for these units are collected from administrative tax files rather than by questionnaire to reduce response burden.

Beginning with reference year 2000, data for Head Offices are no longer included, which affects the following variables: administration employees, salaries, total employees, salaries and wages, cost of materials, supplies and goods for resale, value of shipments, and other revenue and total value added. In 1999, Head Offices accounted for 3% of the total value and number of employees and 7% of the total value of shipments and other revenues.

Trade and Exports

International Merchandise Trade Exports⁽¹⁾, Destination by Country Group, Nova Scotia, 2004

⁽¹⁾ See page 175 for definition of international merchandise trade exports.

Source: Nova Scotia Department of Finance's estimates from Statistics Canada Laden Tabulations, *Nova Scotia Export Trade, 2004*

Refer to page (i) of the introductory section of this publication for an important notice about sector data, including information about the November 8, 2005 release date of revisions to Statistics Canada's GDP by industry.

- In 2004 Nova Scotia GDP (in chained 1997 dollars) in wholesale trade, at \$1,138.1 million, was up 2.4% over 2003 while retail, at \$1,632.0 million, rose 4.3%. Overall, the trade sector made up 12.1% of the province's total GDP.
- Capital expenditures in Nova Scotia's wholesale trade sector rose 16.7% to \$103.5 million in 2004, while the 2005 figure is expected to decrease 5.2% to \$98.1 million. Capital investment in retail trade declined 5.6% between 2003 and 2004 to \$195.0 million, while in 2005 it is expected to increase 4.0% to \$202.8 million.

Retail and Wholesale Trade Sales, Annual Percentage Change, Nova Scotia, 1999–2000 to 2003–2004

Source: Statistics Canada, *Retail Trade Survey, No. 2406 and Monthly Retail Survey Department Store Organizations, No. 2408; Retail Trade, Catalogue No. 63-005-XIE; CANSIM Table 080-0014; Annual Wholesale Trade Survey, No. 2445; Wholesale Trade, Catalogue No. 63-008-XIE; CANSIM Table 081-0005*

- In 2004 Nova Scotia employment in the trade sector increased 1.4% over 2003 to 73,700 persons. Wholesale trade employment increased 1.4% reaching 14,200 in 2004, while retail employment rose 1.5% to 59,500. Trade sector employment represented 16.7% of all employment in Nova Scotia during the year.
- Trade sector wages and salaries in Nova Scotia during 2004 rose 4.7% to \$1,892.5 million. This represented 14.2% of total wages and salaries in the province in 2004. The average weekly wages and salaries figure in the Nova Scotia trade sector increased 1.1% over 2003 to \$490.42 while average weekly wages and salaries—industrial aggregate—increased 2.5% to \$611.93 in 2004.

Retail Sales Per Capita, Nova Scotia, 2000 to 2004

Source: Statistics Canada, *Retail Trade Survey, No. 2406 and Monthly Retail Survey Department Store Organizations, No. 2408; Retail Trade, Catalogue No. 63-005-XIE; CANSIM Table 080-0014; Annual demographic Statistics, 2004, Catalogue No. 91-213-XPB*

- Nova Scotia reported \$10,296.5 million in retail sales during 2004, a 2.8% increase over 2003. This represented 3.0% of all retail sales in Canada during the year. The most substantial increases were noted in Nova Scotia's computer and software stores which experienced a 58.6% growth to \$29.6 million and in home furnishings stores as they increased sales 29.1% to \$93.7 million.
- Nova Scotia's wholesale trade in 2004 decreased 6.2% over 2003 to \$6,040.9 million, while Canada's total wholesale trade, at \$450,300.9 million, rose 6.9%. Nova Scotia's share of the nation's wholesale trade was 1.3%.
- In 2004, the total value of international merchandise trade exports from the province reached \$5,858.8 million, an increase of 7.0% over 2003. Approximately 77% of all Nova Scotia exports were destined to the United States. There was a 1.8% increase in the value of exports to the United States over the previous year. Overall, major commodity groups exported from Nova Scotia included inedible crude materials (25.0%), inedible fabricated materials (25.0%), food, feed and beverages (22.5%), special

transactions including tires (14.3%), inedible end products (13.1%) and live animals (0.04%). In 2004, the main mode of transportation for exports from the province was road and water, at 38.1% and 26.5% of the total value of exports respectively.

Note: International merchandise trade data is measured (valuated) on two bases—customs and balance of payments (BOP). Those with an interest in detailed commodity flows and geographic distributions typically select the custom basis data. Analysts interested in macroeconomic issues select the balance of payments data, as it measures economic transactions between Canadian residents and non-residents.

The “trade” section of the 2005 Nova Scotia Statistical Review has included customs basis international merchandise export trade data by commodity, country and mode of transportation. This export data can be identified by a province-of-origin code, thus providing information on domestic production at the provincial level. Imports are not identified by province-of-destination code, thus analysis or comparison with province-of-origin exports, such as a balance of trade computation, would be invalid.

Both exports and imports are identified by a province-of-clearance code. This code records the province into which imports entered, or from which province goods departed, the country. With this aggregation, it is possible to derive the value of international goods that were handled by the province. For this type of detailed analysis refer to *Nova Scotia Trade 2004* a publication release of the Statistics Division, Nova Scotia Department of Finance.

Data for the *Nova Scotia Trade 2004* report is mainly sourced from Statistics Canada and Industry Canada. Taking two views to Nova Scotia trade—a system of national accounts (SNA) approach and merchandise trade perspective—the report is a more comprehensive compendium of analysis and supporting data tables, e.g., inter-provincial and international trade in goods and services, mode of transportation, impact of foreign exchange rate changes on trade, etc. The publication is also a resource to definitions associated with various trade data. The pdf version of the Report is available at: <http://www.gov.ns.ca/finance/publish/>

Exports, by Mode of Transportation⁽¹⁾, Nova Scotia, 2004

	2004 (\$'000)	Share of Exports of Nova Scotia Origin that Cleared the Country 2004 (\$'000)
Total	5,858,822	100.0
Road	2,231,828	38.1
Rail	661,915	11.3
Water	1,552,228	26.5
Air	286,823	4.9
Other	1,126,028	19.2

⁽¹⁾ In Canada, a mode of transportation (MOT) code is assigned to trade goods at the geographical border point (province of clearance) where the merchandise leaves or enters the country. Any analysis pertains only to a moment in time of transportation activity. The data does not reveal if a combination of transportation modes may have been used before or after clearance. Date excludes services activity.

⁽¹⁾ The Monthly Restaurants, Caterers and Taverns Survey (MRCTS) has undergone several important methodological changes commencing with the April 2004 reference month. As a result of these changes, total food services sales for Canada and the provinces and territories have been revised back to January 1998. Users must be aware that historical comparisons of estimates produced by the MRCTS prior to May 2004 reference month should be made only with revised historical data. Please note that as kind of business (KOB) details' revision have been completed, the next revision step will be done on locations. Consequently that detail will remain suppressed until the completion of the revision process.

2003	154,447	68,320	224,592	447,359	579.8
2004	161,144	77,484	237,496	476,124	613.0

Volume of Sales of Alcoholic Beverages	Spirits ('000 litres)	Wine ('000 litres)	Beer ('000 litres)	Total ('000 litres)	Per Capita Sales Alcoholic Beverage⁽²⁾ (litre)
2000	5,989	5,572	60,806	72,367	94.6
2001	6,433	5,732	60,380	72,545	94.3
2002	6,888	6,001	61,627	74,516	95.5
2003	6,985	6,188	61,336	74,509	96.6
2004	7,530	6,710	63,382	77,622	99.9

⁽¹⁾Statistics on sales of alcoholic beverages by volume should not be equated with data on consumption. Sales volumes include only sales by liquor authorities and their agents, and sales by wineries and breweries and outlets that operate under license from the liquor authorities. Consumption of alcoholic beverages would include all these sales, plus homemade wine and beer, wine and beer manufactured through brew-on-premises operations, all sales in duty-free shops and any unrecorded transactions. Similarly, statistics on sales of alcoholic beverages by dollar value of sales should not be equated with consumer expenditures on alcoholic beverages. The sales data refer to the revenues received by liquor authorities, etc. and these revenues include sales to licensed establishments such as bars and restaurants. The sales data do not, therefore, reflect the total amount spent by consumers on alcoholic beverages since the price paid in licensed establishments is greater than the price paid by those establishments to the liquor authorities.

⁽²⁾Per capita data is based on the population aged 15 and over.

⁽¹⁾ Estimates for the most recent year are preliminary. Preliminary data are subject to revision. Due to rounding, components may not add to total (where applicable). The Annual Survey of Service Industries: Food Services and Drinking Places includes employer and non-employer establishments, whereas the Monthly Restaurants, Caterers and Taverns Survey does not include non-employer establishments in its estimates. Annual survey estimates, therefore, will differ slightly from monthly survey annual totals. Please note a change in the methodology: commencing with 2001, the annual data are no longer benchmarked to the Monthly Restaurants, Caterers and Taverns Survey.

⁽²⁾ Operating revenue excludes investment income, capital gains, extraordinary gains and other non-recurring items.

⁽³⁾ Operating expenses exclude write-offs, capital losses, extraordinary losses, interest on borrowing, and other non-recurring items.

**Food Services and Drinking Places (all establishments)⁽¹⁾, Summary Statistics,
Canada and Nova Scotia, 2001 to 2003 *(continued)***

- ⁽⁴⁾ Salaries, wages and benefits include vacation pay and commissions for all employees for whom a T4 slip was completed. This category also includes the employer portion of employee benefits for items such as Canada/Quebec Pension Plan or Employment Insurance premiums. Salaries and wages do not include working owners' dividends nor do they include the remuneration of owners of unincorporated business. Therefore the relative level of salaries, wages and benefits will be lower in industries where unincorporated businesses are significant contributors.
- ⁽⁵⁾ Operating profit margin is derived as follows: operating revenue minus operating expenses, expressed as a percentage of operating revenue. The derived figure excludes corporation income tax paid by incorporated businesses and individual income tax paid by unincorporated businesses. For unincorporated businesses, operating profit margin includes unpaid remuneration to partners and proprietors, which is not recorded as salaries, wages and benefits. Therefore the profit estimate will be higher in industries where unincorporated proprietorships and partnerships are significant contributors.
- ⁽⁶⁾ An active statistical establishment is one production entity or the smallest grouping of production entities which produces as homogeneous a set of goods and/or services as possible, which does not cross provincial boundaries, and for which records provide data on the value of output together with the cost of principal intermediate inputs used and cost and quantity of labour resources used to produce the output.

Transportation

186

Total Water-Borne Cargo, Tonnage, Halifax Port Authority, 2000 to 2004

Source: Halifax Port Authority

Refer to page (i) of the introductory section of this publication for an important notice about sector data, including information about the November 8, 2005 release date of revisions to Statistics Canada's GDP by industry.

- Overall GDP (in chained 1997 dollars) in the Nova Scotia transportation and warehousing sector in 2004 was \$1,004.4 million, showing upward movement of 3.3% over 2003. The sector represented 4.4% of total GDP in the province in 2004. Within the sector, components for which there was published data indicated that the GDP in truck transportation at \$292.1 million increased 3.3%, while air, rail, water and scenic/sightseeing and support activities for transportation increased 4.3% to \$501.3 million.
- Total capital expenditures in transportation and warehousing industries for Nova Scotia increased 18.6% from 2003 to \$184.6 million in 2004. Investment intentions for 2005 cite an increase of 47.8% to \$272.8 million.
- In 2004, overall employment in Nova Scotia's transportation and warehousing industry rose 5.4% over 2003 to 21,500.
- During 2004, total wages and salaries in the province's transportation and storage sector were up 4.4% over 2003 reaching \$718.0 million, thus accounting for 5.4% of total wages and salaries in Nova Scotia.
- Average weekly wages in the transportation and warehousing sector were \$739.80, an increase of 1.6% over 2003. Average weekly wages by industrial aggregate in Nova Scotia reached \$611.93 in 2004, up 2.5% over 2003.

Road

- There are approximately 23,000 kilometers of highways in Nova Scotia. The Trans Canada and 100-series highways are an all-weather, mostly controlled-access and high-speed system that joins with the New Brunswick Trans Canada Highway to points in Canada and the United States. Highway 104 includes a section of four-lane toll highway. During fiscal year 2004–05, the Province of Nova Scotia budgeted \$112.2 million in capital highway spending. This is approximately 5.8% more than last year's investment. For 2005–06, projected capital highway spending is \$143 million, or 28% more than in 2004–05.
- Some major improvements to highways and bridges include the following capital projects:
 - Highway 103 twinning from Otter Lake to Trunk 3 at Hubley - 7.0 kilometres, \$17.4 million project, slated to open in the fall of 2006–2007.
 - Highway 103 twinning from Trunk 3 at Hubley to west of Route 213 - 8.7 kilometres, \$27.4 million project, expected to open in the fall of 2006–2007.
 - Highway 103 Barrington Bypass - 8.3 kilometres, \$17.9 million project, expected to open in the fall of 2006–2007.
 - Highway 125 twinning from Balls Creek to Sydney River - 5.0 kilometres, \$22.0 million project, slated to open in the fall of 2009–2010.
 - On Trunk 4, 3.0 kilometres of roadway were upgraded at \$2.8 million as part of on-going improvements to the route from St. Peters to Sydney

River. Improvements to the Trunk 7 Corridor announced in July 2002, included upgrading and re-paving of 14.0 kilometres, at approximately \$1.7 million.

- Several bridge projects were started in 2004 under the \$50 million Truss Bridge Replacement Program, including: Simpson's Bridge on Melanson Road over the Gaspereau River in Kings County, \$1.1 million; Bruhm Bridge over the LaHave River, \$1.0 million; and the Eel Creek Bridge on Route 301 in Cumberland County was started with completion slated in 2005–2006. Furlong Bridge on Trunk 2, near Southampton, Cumberland County was completed at a cost of approximately \$1.2 million. The Route 305 Railway Overpass (Leitches Creek Bridge) at Seaview Drive was completed at a cost of approximately \$1.0 million. And on Trunk 2, the Elmsdale #2 Bridge spanning the Nine-Mile River, was completed at a cost of approximately \$2.4 million.
- Numerous companies provide passenger, parcel express and charter service connecting most major communities throughout the province.
- Truck transportation in 2004 was 29.1% of the GDP of the total transportation and warehousing sector. As noted previously, GDP for truck transport industries grew 3.3% to \$292.1 million. Average weekly wages in the truck transport sector increased 9.6% over 2003 to \$691.83 in 2004.

Water

- Numerous ports dot the coastline of the province with activities ranging from homes for fishing fleets to major international transshipment ports. The Strait of Canso Superport (Port Hawkesbury/Mulgrave) was Canada's second largest port by volume in 2004, shipping 24.8 million metric tonnes. With the exception of the transshipment of petroleum products from Valero LP Refined Product Terminal (Statia Terminals), much of the products shipped are produced locally: pulp, newsprint, super calendared paper, gypsum and seafood.
- Halifax is Nova Scotia's main container port. The Port of Halifax functions as a key international gateway to the North American continent. It is the eastern most port on the North American mainland with the greatest variety of facilities for shipping goods. This makes it

the closest "mainland" east coast port to Europe and the first destination for carriers sailing from Asia through the Suez Canal.

- In 2004, the Port of Halifax was nearing completion of a \$6.4 million capital project to deepen berths at the Fairview Cove Terminal from 14 metres to 17 metres. The completion of this project ensures that Halifax has the deepest container berths on the Eastern seaboard, able to accommodate the next generation of container ships. Overall capital investments of \$100 million are planned over five years to 2008, including \$35 million in 2005.
- Cruise activity in Nova Scotia increased in 2004. The Port of Halifax is the dominant port. In 2004, 122 cruise ship calls brought 212,000 cruise passengers to Halifax. This is the second year in a row that more than 100 cruise ships called on the Port of Halifax, with passengers and crew spending an estimated \$23 million. According to the Nova Scotia Department of Tourism, Culture and Heritage, there were also 61,000 cruise ship passenger visits in Cape Breton, up 25% from 2003.
- Car/passenger ferry services connect between Maine and Yarmouth, Nova Scotia; Port-aux-Basques and Argentia, Newfoundland to North Sydney, Nova Scotia; Saint John, New Brunswick to Digby, Nova Scotia; and Wood Islands, Prince Edward Island to Caribou, Pictou County, Nova Scotia.

Rail

- There are 805 kilometres of mainline track in Nova Scotia serving Halifax, Cape Breton, the Annapolis Valley and central Nova Scotia communities. Nova Scotia is served by three federally regulated railways—VIA Rail, Canadian National, and the Sydney Coal Railway—and two privately operated shortline carriers under provincial jurisdiction—Cape Breton & Central Nova Scotia Railway and the Windsor & Hantsport Railway.
- CN operates the primary inland rail connection linking Halifax, regional and international shippers, to markets throughout Canada and the United States. In addition, CN offers access to an extensive inter-modal service through its Halifax Richmond Terminal and service to the two container terminals.

- The Sydney Coal Railway is owned by the Quebec Railway Corporation Inc. and operates the former Devco railway, hauling coal between Sydney and Lingan.
- The Cape Breton & Central Nova Scotia Railway (CBNS) operates freight service between Truro and Sydney. The CBNS connects with Marine Atlantic at North Sydney and with CN at Truro westward and to Halifax. The Windsor & Hantsport Railway (WHRC) operates freight service between Windsor Junction and New Minas, connecting with CN at Windsor Junction.
- VIA operates a six-day a week transcontinental passenger rail service, the Ocean, between Halifax and Montreal with stations in Halifax and Truro.
- In December 2004, Halifax became the eighth Canadian airport permitted to offer United States preclearance. US preclearance will begin at the airport when construction of the new pre-clearance facility is completed in fall 2006. This will allow airlines to offer direct service to US airports without customs and immigration inspection facilities, as well as allow passengers to be treated as domestic upon arrival in the US.
- Passenger volume at the Halifax International Airport totaled 2.8 million in 2003, up 6.3% from 2002. The airport also handled 12,425 metric tonnes of cargo in 2003.
- Sydney Airport enjoyed scheduled service provided by Air Canada, Air Georgian, Air Canada Jazz and Air Saint-Pierre.

Air

- Halifax International Airport, which ranks as the seventh busiest airport in Canada, is the best-equipped airport in Atlantic Canada. In 2004, eighteen passenger services operated out of the Halifax International Airport and offered regular flights to all Canadian destinations as well as international service to Boston, New York (Newark and JFK), Detroit, Bermuda, London and points beyond. Also in 2004, eight cargo services provided service from Halifax to various points in Europe and Asia. Major airports with service connecting to key Atlantic Canadian points are also located in Sydney and Yarmouth. Numerous smaller facilities are located throughout the province to serve private craft and flying clubs.
- The operational, managerial and developmental control of the Halifax International Airport resides with the Halifax International Airport Authority (HIAA). In 2000 the Authority embarked on a multi-year \$110 million capital expenditure project for the airport—the Airport Improvement Program. Since 2000, the HIAA has undertaken \$80 million in renovation and new construction including new international and domestic arrivals areas, a water treatment facility, main lobby and retail expansion, and an airside subdivision. The next phase of the HIAA's 10-year \$220 million Airport Improvement Program involves a \$90 million terminal expansion, including a new baggage screening area, separate international and domestic departure areas and additional aircraft gates and bridges.

Note:

Further information on the Port of Halifax is available at <http://www.portofhalifax.ca>, for the Strait of Canso Superport at <http://www.straitsuperport.com> and for the Halifax International Airport at <http://www.hiaa.ca>

⁽¹⁾ Target population—the industry is defined by six bus industry categories using the North American Industrial Classification System (NAICS). The six categories are urban transit, scheduled intercity, charter, school bus, sightseeing and shuttle. Non-bus companies are excluded from the sightseeing NAICS (e.g., companies that operate sightseeing trains). Urban transit systems that are included within the financial structure of municipal governments, and which therefore, may exist outside one of the six bus industry NAICS, are included as a separate category to provide users with a complete data set by activity. For the Canadian System of National Accounts, the separate category is excluded, to avoid double counting.

⁽¹⁾ Respondents reported information for their 12-month fiscal period. Given the non-availability of adequate information to calendarize these fiscal year estimates, a zero-growth assumption for information reported other than on the calendar year basis is implicit in these estimates. Consideration has been given to release calendarized fiscal year estimates in the future.

⁽²⁾ Totals may not add up due to rounding.

⁽³⁾ Total revenue is the sum of operating and non-operating revenues.

⁽⁴⁾ Total expenses are the sum of operating and non-operating expenses.

⁽⁵⁾ Operating margin is the difference between operating revenue and operating expenses.

Information and Cultural Industries

Internet Use, Percentage of Households, Canada, Nova Scotia and Halifax, 2003

Source: Statistics Canada, CANSIM Table 358-0002

Refer to page (i) of the introductory section of this publication for an important notice about sector data, including information about the November 8, 2005 release date for revisions to Statistics Canada's GDP by industry.

- Information and cultural industries are comprised of businesses primarily engaged in producing and distributing (except by wholesale and retail methods) information and cultural products. The main activities of this sector are the publishing industries (except exclusively on Internet), software publishing, the motion picture and sound recording industries, the broadcasting industries, the internet publishing and web search ports, data processing industries and other information service industries. Some culture-related activities are actually components of other sectors, e.g., manufacturing, wholesaling or retailing information and cultural products, design activities, etc.

Per Capita Expenditures, on Culture, by Government, Nova Scotia, 1998–1999 to 2002–2003

Source: Statistics Canada, *Focus on Culture*, Vol. 14, No. 1, Catalogue No. 87-004-XIE

- GDP (in chained 1997 dollars) in Nova Scotia's information and cultural industries sector increased 1.1% in 2004 over 2003 to \$1,052.6. The sector comprised 4.6% of the province's total GDP in 2004.
- Capital expenditures in the province's information and cultural industries decreased 17.8% from 2003 to \$212.4 million in 2003. Investment intentions for 2005 are projected at \$231.7 million, an increase of 9.1%.
- Nova Scotia employment in the information, culture and recreation sector during 2004 decreased 2.9% over 2003 to 16,600.
- In 2004 wages and salaries in the information and cultural industries sector of Nova Scotia, at \$303.7 million experienced a decrease of 4.1% over 2003.
- An increasing connectedness to the Internet seems to be an indispensable means to developing our growing knowledge-based economy. Between 1999 and 2003 usage figures have increased more than 50% to 64.2%

and 63.1% of households in Canada and Nova Scotia, respectively. The most dramatic increase has been in use of the Internet from home, where usage has increased from 28.7% of Canadian households in 1999 to 54.5% of households in 2003. In Nova Scotia this usage rose from 26.7% of households in 1999 to 52.7% of households in 2003.

- The development in such areas as Nova Scotia's arts, crafts, theatres, museums, recordings, videos, books, radio and television programs broadens and deepens knowledge and understanding of the province's culture, as well as, provides a source of income for Nova Scotia artists and businesses. Expenditures by government on culture during 2002–2003 in the province included funds of \$110.9 million from the federal government, \$61.4 million from the provincial government and \$37.7 million from municipal governments.

⁽¹⁾ Estimates for the most recent year are preliminary. Preliminary data are subject to revision. Due to rounding, components may not add to total (where applicable).

Software Development and Computer Services, Canada and Nova Scotia, 1999 to 2003 *(continued)*

- ⁽²⁾ Operating revenue excludes investment income, capital gains, extraordinary gains and other non-recurring items. Note that prior to reference year 2000, total revenue rather than operating revenue is reported. The 1999 to 2000 trend may be slightly distorted.
- ⁽³⁾ Operating expenses exclude write-offs, capital losses, extraordinary losses, interest on borrowing, and other non-recurring items. Note that prior to reference year 2000, total expenses rather than operating expenses are reported. The 1999 to 2000 trend may be slightly distorted.
- ⁽⁴⁾ Salaries, wages and benefits include vacation pay and commissions for all employees for whom a T4 slip was completed. This category also includes the employer portion of employee benefits for items such as Canada/Québec Pension Plan or Employment Insurance premiums. Salaries and wages do not include working owners' dividends nor do they include the remuneration of owners of unincorporated business. Therefore the relative level of salaries, wages and benefits will be lower in industries where unincorporated businesses are significant contributors.
- ⁽⁵⁾ Operating profit margin is derived as follows: operating revenue minus operating expenses, expressed as a percentage of operating revenue. The derived figure excludes corporation income tax paid by incorporated businesses and individual income tax paid by unincorporated businesses. For unincorporated businesses, operating profit margin includes unpaid remuneration to partners and proprietors, which is not recorded as salaries, wages and benefits. Therefore the profit estimate will be higher in industries where unincorporated proprietorships and partnerships are significant contributors. Note that prior to reference year 2000, total profit margin rather than operating profit margin is reported. The 1999-2000 trend may be slightly distorted.
- ⁽⁶⁾ An active statistical establishment is one production entity or the smallest grouping of production entities which produces as homogeneous a set of goods and/or services as possible; which does not cross provincial boundaries; and for which records provide data on the value of output together with the cost of principal intermediate inputs used and cost and quantity of labour resources used to produce the output.
- ⁽⁷⁾ Prior to 2002, data refer to code 51421 data processing services, North American Industry Classification System (NAICS) 1997.

⁽¹⁾ The Canadian Broadcasting Corporation (CBC) distributes its program costs according to the province where the production activities occur. Station transmission costs are related to the geographic location of the transmitter. The CBC's network distribution costs follow the principle used for station transmission costs, except for terrestrial lines and satellite channels which are paid by Ottawa but transferred to Toronto and Montreal Network Centres. Payments to private station affiliates are charged to the responsible Network Centres and relate also to the province where these centres are located. The Corporation's administration costs are distributed according to the province where the administration function is located geographically. The CBC distributes its capital expenditures according to the provincial location of capital assets.

⁽¹⁾ Figures may not add to totals due to rounding.

⁽²⁾ The period of collection is the time period covered by the survey. It refers to the respondent's fiscal year which is between April 1st of the reference year and March 31st of the following year. While the frequency for the survey is biennial, there was no survey in 2001-2002. Instead a survey was done for the 2002-2003 financial year.

⁽³⁾ Includes paid and non-paid admissions.

⁽⁴⁾ Full-time includes paid employees who worked at least 30 hours per week all year.

⁽⁵⁾ Part-time includes paid employees who do not meet the full-time definition.

⁽⁶⁾ Includes municipal and regional sources.

⁽⁷⁾ Includes educational, religious, institutional or corporate budgets; corporate or foundation grants; and donations.

⁽⁸⁾ Includes earned revenues such as gross revenues from gift shops, sales counters, cafeterias, camping or recreational activity fees as well as interest income and other earned revenues.

⁽⁹⁾ Includes interest income from capital endowment funds.

⁽¹⁰⁾ Includes operating expenses such as the cost of goods sold, utilities, insurance, office supplies, fundraising and special events expenses.

⁽¹¹⁾ Includes capital expenses such as capital equipment, furniture and vehicles.

The Motion Picture Theatres Survey collects data on all movie theatres and drive-ins in Canada. The 2003/04 survey included 574 movie theatres and 54 drive-ins that provided data for the fiscal year April 1, 2003 to March 31, 2004. Theatres with total operating revenues of less than \$500,000 are referred to as small theatres. Medium-sized theatres earned \$500,000 to \$999,999, while large theatres were those with revenues of \$1 million to \$5 million. Very large theatres are those with revenue over \$5 million. The large and very large theatres are frequently grouped together in this release and referred to as larger theatres. The term older theatres refers to establishments that were in operation in both 2002/03 and 2003/04. No survey was conducted for the survey year 2001/02. Newly opened theatres mentioned for this release are those that opened in 2003/04.

Average Residential House Selling Price, Nova Scotia and Nova Scotia by Region, 2004

Source: Nova Scotia Association of Realtors, *Total MLS Report, December 2004*

Refer to page (i) of the introductory section of this publication for an important notice about sector data, including information about the November 8, 2005 release date for revisions to Statistics Canada's GDP by industry.

- Total employment during 2004 in the province's finance, insurance, real estate and leasing sector increased 1.3% over 2003 to 22,700. There were 13,800 persons employed in finance and insurance industries in Nova Scotia, down 2.8% from 2003. There were a further 8,900 employed in real estate and leasing industries, an increase of 8.5% over 2003.
- Wages and salaries within the province's finance, real estate and company management industries totaled \$978.5 million in 2004, up 5.9% over 2003.
- In Nova Scotia during 2004, the average weekly wages and salaries in the finance and insurance sector increased 5.6% over 2003 to \$858.30, while average weekly wages and salaries—industrial aggregate—increased 2.5% to \$611.93
- In 2004, the bank rate (last Wednesday of the month) was 2.50%, down from 3.19% in 2003. The prime business loan rate decreased 0.69 percentage points to 4.00%. The five-year chartered bank typical mortgage rate was down 0.16 percentage points to 6.23% and the consumer loan rate decreased 0.27 percentage points to 9.24%.
- The value of mortgages held by chartered banks in Nova Scotia has been increasing. When the four quarters of 2004 are averaged, the value of mortgages was \$9.0 billion, 6.8% above the average in 2003. Personal loans also increased in value. The quarterly average in 2004 was \$6.3 billion, 9.3% above the quarterly average of 2003.
- The value of insurance premiums in Nova Scotia during 2003 reached \$1,748.2 million, an increase of 10.8% over 2003. Auto, accident/sickness and property premiums constituted 28.9%, 26.5% and 15.9% respectively, of total premiums. Available figures for 2004 indicate that property insurance premiums at \$278.1 million increased 7.1% over 2003 and auto insurance premiums at \$504.5 million decreased 1.9%.
- Overall the number of sales of MLS residential listings declined 3.7% in 2004 from 2003. Halifax-Dartmouth, which had 57.8% of the units sold, slipped 6.4% from 2003 unit sales. The declines were more pronounced in Northern Nova Scotia at 24.6% and the Highland at
- Continued low interest rates had a positive influence on the finance, insurance, real estate, renting and leasing sector. In Nova Scotia, GDP (in chained 1997 dollars) in the sector, at \$5,126.2 million, increased 3.0% between 2003 and 2004. The sector represented 22.3% of the province's total GDP.
- Capital investment in finance and insurance in Nova Scotia during 2003 increased 11.1% over 2003 to \$412.7 million and is expected to increase to \$475.1 million in 2005. The real estate, rental and leasing sector recorded an expenditure increase of 23.0% from 2003 to 2004 to \$405.6 million and is anticipated to increase its investment 7.6% to \$436.6 million in 2005.

10.0%. However, overall sales value increased 3.7% in Nova Scotia from 2003 as a result of a 7.7% increase in the average selling price. Average price increases across the regions of Nova Scotia ranged from 1.7% to 15.7%.

- Between 2003 and 2004, office vacancy rates decreased from 9.3% to 8.4% in the Halifax downtown area, from 17.6% to 16.9% in Dartmouth, and from 10.9% to 9.3% in Bedford-Sackville. Vacancy rates increased in the peripheral area of Halifax from 10.7% to 12.4% in 2004. The industrial Halifax market vacancy rate increased from 5.1% in 2003 to 6.4% in 2004. All rates decreased in 2005.
- Canada Mortgage and Housing Corporation's (CMHC) Rental Market Survey is conducted every October in cities and large urban areas across Canada. The December 2004 release placed the rental market vacancy rate in Metro Halifax at 2.9%, up from 2.3% in 2003. Over the past year, average monthly rent for all units in Metro Halifax increased 4.4% from \$675 to \$705. From 2003 to 2004, the total rental market in Halifax Metro increased by 574 units to 37,198 units. Vacant units increased from 858 in 2003 to 1,073 in 2004.
- Over the past year in Cape Breton RGM and Truro CA, a decline was evident in average vacancy rates, from 6.8% to 5.9% and from 2.5% to 1.9%, respectively. In New Glasgow CA vacancy rates increased from 2.2% to 2.5%, while in Kentville CA, vacancy rates increased from 2.8% to 3.4%.
- CMHC's December 2004 Report also noted average monthly rent paid for all units in Truro, Kentville, Cape Breton RGM and New Glasgow was \$564, \$536, \$534 and \$480, respectively.

Accounting, Tax Preparation, Bookkeeping and Payroll Services, Canada and Nova Scotia, 1999 to 2003

Accounting, Tax Preparation, Bookkeeping & Payroll Services (NAICS 54121)	1999	2000	2001	2002	2003⁽¹⁾
Canada					
Operating revenue (\$millions) ⁽²⁾	7,226.7	7,941.7	8,157.6	7,854.6	8,361.0
Operating expenses (\$millions) ⁽³⁾	5,186.1	5,501.0	5,798.0	5,550.6	5,964.3
Salaries, wages and benefits (\$millions) ⁽⁴⁾	2,813.9	2,934.4	3,240.9	3,046.6	3,237.1
Operating profit margin (%) ⁽⁵⁾	28.2	30.7	28.9	29.3	28.7
Number of active establishments (Units) ⁽⁶⁾	22,227	21,690	21,783	23,827	24,440
Nova Scotia					
Operating revenue (\$millions) ⁽²⁾	114.9	131.7	122.7	126.1	156.4
Operating expenses (\$millions) ⁽³⁾	78.9	94.2	81.9	86.0	110.0
Salaries, wages and benefits (\$millions) ⁽⁴⁾	43.3	53.2	49.5	51.5	64.2
Operating profit margin (%) ⁽⁵⁾	31.3	28.4	33.2	31.9	29.7
Number of active establishments (Units) ⁽⁶⁾	446	456	420	420	501

NAICS - North American Industry Classification System

⁽¹⁾ Estimates for the most recent year are preliminary. Preliminary data are subject to revision. Due to rounding, components may not add to total (where applicable).

⁽²⁾ Operating revenue excludes investment income, capital gains, extraordinary gains and other non-recurring items. Note that prior to reference year 2000, total revenue rather than operating revenue is reported. The 1999 to 2000 trend may be slightly distorted.

⁽³⁾ Operating expenses exclude write-offs, capital losses, extraordinary losses, interest on borrowing, and other non-recurring items. Note that prior to reference year 2000, total expenses rather than operating expenses are reported. The 1999 to 2000 trend may be slightly distorted.

⁽⁴⁾ Salaries, wages and benefits include vacation pay and commissions for all employees for whom T4 slips were completed. This category also includes the employer portion of employee benefits for items such as Canada/Quebec Pension Plan or Employment Insurance premiums. Salaries and wages do not include working owners' dividends nor do they include the remuneration of owners of unincorporated business. Therefore the relative level of salaries, wages and benefits will be lower in industries where unincorporated businesses are significant contributors.

⁽⁵⁾ Operating profit margin is derived as follows: operating revenue minus operating expenses, expressed as a percentage of operating revenue. The derived figure excludes corporation income tax paid by incorporated businesses and individual income tax paid by unincorporated businesses. For unincorporated businesses, operating profit margin includes unpaid remuneration to partners and proprietors, which is not recorded as salaries, wages and benefits. Therefore the profit estimate will be higher in industries where unincorporated proprietorships and partnerships are significant contributors. Note that prior to reference year 2000, total profit margin rather than operating profit margin is reported. The 1999 to 2000 trend may be slightly distorted.

⁽⁶⁾ An active statistical establishment is one production entity or the smallest grouping of production entities which produces as homogeneous a set of goods and/or services as possible; which does not cross provincial boundaries; and for which records provide data on the value of output together with the cost of principal intermediate inputs used and cost and quantity of labour resources used to produce the output.

⁽¹⁾ *212,145 sq.ft. was added to inventory; thus, actual new supply was 181,114 sq.ft.

Inventory - includes all existing single and multi-tenant leased industrial and flex properties greater than or equal to 25,000 sq.ft.

Vacancy Rate - percentage of total inventory physically vacant as at the survey date including direct vacant and sublease space.

Absorption - change in physically occupied space over a given time period.

sq.ft. - square foot

Number of active establishments (Units) ⁽⁶⁾	--F	--F	--F	--F	--F

The survey's methodology has changed for 2003 and therefore, the 1999 to 2002 data have been revised.

- (1) Estimates for the most recent year are preliminary. Preliminary data are subject to revision. Due to rounding, components may not add to total (where applicable).
- (2) Operating revenue excludes investment income, capital gains, extraordinary gains and other non-recurring items. Note that prior to reference year 2000, total revenue rather than operating revenue is reported. The 1999 to 2000 trend may be slightly distorted.
- (3) Operating expenses exclude write-offs, capital losses, extraordinary losses, interest on borrowing, and other non-recurring items. Note that prior to reference year 2000, total expenses rather than operating expenses are reported. The 1999 to 2000 trend may be slightly distorted.
- (4) Salaries, wages and benefits include vacation pay and commissions for all employees for whom a T4 slip was completed. This category also includes the employer portion of employee benefits for items such as Canada/Quebec Pension Plan or Employment Insurance premiums. Salaries and wages do not include working owners' dividends nor do they include the remuneration of owners of unincorporated business. Therefore the relative level of salaries, wages and benefits will be lower in industries where unincorporated businesses are significant contributors.
- (5) Operating profit margin is derived as follows: operating revenue minus operating expenses, expressed as a percentage of operating revenue. The derived figure excludes corporation income tax paid by incorporated businesses and individual income tax paid by unincorporated businesses. For unincorporated businesses, operating profit margin includes unpaid remuneration to partners and proprietors, which is not recorded as salaries, wages and benefits. Therefore the profit estimate will be higher in industries where unincorporated proprietorships and partnerships are significant contributors. Note that prior to reference year 2000, total profit margin rather than operating profit margin is reported. The 1999 to 2000 trend may be slightly distorted.
- (6) An active statistical establishment is one production entity or the smallest grouping of production entities which produces as homogeneous a set of goods and/or services as possible; which does not cross provincial boundaries; and for which records provide data on the value of output together with the cost of principal intermediate inputs used and cost and quantity of labour resources used to produce the output.

Real Estate Rental and Leasing and Property Management, Canada and Nova Scotia, 1999 to 2003

Summary Statistics	1999	2000	2001	2002	2003 ⁽¹⁾

Percentage Change in Number of Business Bankruptcies, 1999–2000 to 2003–2004

Source: Industry Canada, *Office of the Superintendent of Bankruptcy*

Refer to page (i) of the introductory section of this publication for an important notice about sector data, including information about the November 8, 2005 release date for revisions to Statistics Canada's GDP by industry.

- According to a Statistics Canada database that tracks all businesses that issue T4 slips, there were 32,089 businesses in Nova Scotia that employed people in 2002. Small businesses, those employing less than 50 employees, accounted for 91.7% and large businesses, those employing 50 or more employees, accounted for 8.3% of all businesses. Of the total 404,100 employees of businesses in 2002, 31.9% worked within small business and 68.1% were in large business. Approximately 74% of the \$12,604 million in payrolls in 2002 were derived from Nova Scotia's large businesses sector.
- During the 2004–05 period, there were 8,858 new company registrations in the province or 3.8% fewer than the previous year. Just over half of the new registrations were partnership and business name registrations.

- Statistics indicate there were 255 business bankruptcies in Nova Scotia in 2004, a decline of 7.9% from 2003. Nearly half of the bankruptcies in 2004 were in construction, retail, and transportation/warehousing (22.0%, 17.6%, and 8.6% respectively). Liabilities associated with the year's bankruptcies declined 1.1% to \$57.4 million.
- The Nova Scotia Business Climate Index is an approach that was adapted for the province by CanMac Economics Limited. The Index monitors and compares the Nova Scotia business climate nationally and in Atlantic Canada using comparable measures.⁽¹⁾

⁽¹⁾ No. of Businesses - includes all private and public sector businesses or organizations (including public administration) which issued T4 slips to employees for the year. Both incorporated and unincorporated entities are included but only if they issue T4 slips to employees. Non-employer businesses are excluded.

⁽²⁾ ALU—Average Labour Unit—is used to represent number of employees. It is calculated by dividing total annual payroll by average annual earnings per employee. No distinction is made between full-time and part-time employees.

⁽¹⁾ No. of Businesses—includes all private and public sector businesses or organizations (including public administration) which issued T4 slips to employees for the year. Both incorporated and unincorporated entities are included but only if they issue T4 slips to employees. Non-employer businesses are excluded.

⁽²⁾ Employees represented as ALU—Average Labour Unit—calculated by dividing total annual payroll by average annual earnings per employee. No distinction is made between full-time and part-time employees.

⁽¹⁾ The major source of updates for the Business Register is from Canada Revenue Agency's Business Number Account Files. These employer accounts represent the universe of business entities having paid employees in Canada. Therefore, the Business Register does not include all industrial activity in Canada, but is limited to the "employer" portion of the business world. Thus, any establishment that does not maintain an employee payroll, but may have a workforce which consists of contracted workers, family members or business owners is referred to as an "indiscriminate" and is excluded from this employer-based file (e.g., a corner store that is owner-operated, with no paid employees). Statistics Canada's Business Register, at March 2005, recorded 30,201 employer establishments and 24,112 indiscriminate establishments in Nova Scotia.

⁽¹⁾ Corporations are principally those that are required to file a schedule of ownership information under the Corporations Act (CRA). The Act applies to every corporation that carries on business in Canada or that is incorporated under a law of Canada or a province, whose gross revenue for the reporting period exceeds \$15 million, or whose assets exceeded \$10 million. In addition, corporations with assets and sales under these amounts but having long-term debt or equity owing directly or indirectly to non-residents exceeding a book value of \$200,000 must also provide ownership information. An enterprise is a group of corporations under common control. The controlling interest, referred to as the enterprise head, may be an individual, a related group, a corporation or a government. Controlled corporations are called subsidiaries. A multi-corporation enterprise contains one or more subsidiaries. A corporation that is not controlled by another corporation and that does not control another corporation is called a single-corporation enterprise.

⁽²⁾ Corporations in the data base that have not been assigned an industry code.

⁽¹⁾ A new estimation system has been put in place for 2003. Data for outstanding administrative records have been estimated thereby reducing the previous understatement of R&D and in particular R&D employment counts. The new estimation system has projected data for more than 2,000 firms. The estimation of these records is also reflected in the 2004 planned expenditures and the 2005 spending intentions.

Educational Services

240

Public and Private Expenditure on Education, by Level of Education, Nova Scotia, 1997–1998 to 2001–2002

Source: Statistics Canada, *Education Indicators in Canada*; *Report of the Pan-Canadian Education Indicators Program 2003*, Catalogue No. 81-582-XIE, Table B1.1, B1.4, B1.5, B2.2 and B2.4, updated June 29, 2005

Refer to page (i) of the introductory section of this publication for an important notice about sector data, including information about the November 8, 2005 release date for revisions to Statistics Canada's GDP by industry.

- In 2004, GDP (in chained 1997 dollars) in the educational services sector decreased 0.8% over 2003 to \$1,243.9 million. The sector represented 5.4% of total GDP in the province in 2004.
- Total capital expenditure in education services during 2004 rose 2.7% over 2003 to \$199.2 million and is expected to decline 8.5% to \$182.3 million in 2005.
- In 2004, employment in Nova Scotia's educational services sector increased 7.1% over 2003 to 36,100. Employment in this sector accounted for 8.2% of total provincial employment.
- Total wages and salaries in educational services industries in 2004 rose 0.7% over 2003 levels, reaching \$1,205.0 million. This sector accounted for 9.0% of the province's total wages and salaries during 2004.
- Average weekly wages by industrial aggregate in Nova Scotia reached 611.93 in 2004, an increase of 2.5% over 2003, while average weekly wages in the educational services sector in 2004 were \$715.57, an increase of 3.1% over 2003.
- The majority of activity in the Educational Services sector occurs in the public sphere of a Primary to Grade 12 (P-12) public school system, a university system and a community college system. The Department of Education also has an involvement in apprenticeship and adult learning program.
- There are private schools delivering P-12 education, private career colleges and private organizations that deliver other education services.
- The level of public involvement is reflected by the public expenditures on education. Public expenditures on all levels of education were more than four times the private sector expenditure in 2001–2002. The expenditures are at similar levels for the university system, but for the P-12, trade/vocational and college system, public expenditures far outstrip private expenditures.
- In 2004–2005, the multi-year, multi-million dollar school construction and renovation program continued on schedule and included completing construction of three new schools. Infrastructure activity started in 2003 with a \$123 million capital investment to the expansion of the community college system also continued. A new campus currently under construction is slated for opening in 2007. For a development update, see: <http://www.nsc.ca/>
- In 2003–2004 school year there were 442 schools educating 148,514 students in P-12 programs. There were 9,305.5 full-time equivalent teachers. The student/teacher (full-time equivalent) ratio was 16.0.

- The declining birth rates are impacting the P-12 system. From the 2002-2003 school year, the number of students dropped 1.4%; the number of teachers, declined 0.3% and the number of schools decreased 1.8%. In 1980–1981 school year there were 185,585 students (25% more than in 2003–2004) and 10,904.3 full-time equivalent teachers (17.2% more than in 2003–2004).
- Projected enrollment for the 2007–2008 school year is 130,962, an 11.8% decline from 2003–2004. All school boards will suffer lower enrollments. In absolute terms, Halifax is projected to lose approximately 5,000 students. The largest relative decline is expected in the Cape Breton-Victoria School Board, an 18.3% decline.
- The overall high school graduation rate in 2002–2003 stood at 81%, higher for females (84%) than males (78%). The rate slipped slightly from the 1997–1998 rate of 82%. The Nova Scotia rates are higher than the Canadian overall graduation rate of 74%.
- In terms of educational attainment, the 2001 Census indicated: 35.4% of Nova Scotians did not have a high school leaving certificate; 9.7% had only a high school leaving certificate; 9.6% had some (not resulting in a diploma or certificate) postsecondary education; 14.1% had a trades certificate or diploma; 14.7% had a college certificate or diploma; 2.5 had a university certificate or diploma below bachelor level; and 14.0% had at least one university degree.
- In 2002, there were 439 registered apprenticeship completions in Nova Scotia, a 35.5% drop from 1992.
- In October 2004, Nova Scotia's eleven universities had 36,509 full-time students registered, 1.0% higher than October 2003. Full-time undergraduates were the vast majority of students at 90.7%. Part-time student enrollment also expanded from 2003. There were 8,500 students, an increase of 2.3%. The share of graduate part-time students increased to 30.0%.
- Nova Scotia is attracting more foreign students to its university system. There were 3,312 visa students registered in October 2004, an increase of 7.6% from the previous year.
- Demographics are also impacting the university system. The number of first year students dropped 12.1% from 2003 to 8,398 students, with seven of the universities reporting lower levels.
- In 2002–2003, there were 2,007 full-time university educators in Nova Scotia with fairly similar levels among full-professors, associate professor and other ranks.
- In 2005, universities and colleges in Nova Scotia reported revenues of \$882.4 million, 43.6% that were transfers from government and 29.4% that were from tuitions. Total expenditures were \$946.2 million, leaving a \$63.8 million deficit.
- The average undergraduate tuition fees for the 2004–2005 school year in Nova Scotia were \$6,003, 4.6% higher than the previous year. The Canadian average was \$4,140.
- Under a memorandum of understanding signed in December 2004, for the next three years, universities will receive stable, predictable funding, while tuition fee increases are limited to no more than 3.9% for most programs. The agreement also limits increases to other fees such as those for labs and residences.

⁽¹⁾ Using the most current enrolment data available, average tuition fees have been weighted by the number of students enrolled by institution and field of study. Fees at both public and private institutions are included in the weighted average calculations.

⁽²⁾ Both in and out-of-province students are included in the weighted average calculations.

⁽³⁾ Using the most current enrolment data available, average additional compulsory fees have been weighted by the number of students per institution. Fees at both public and private institutions are included in the weighted average calculations.

Health Care and Social Assistance

Health Care Services, Total Health Expenditures⁽¹⁾, Nova Scotia, 12-Month Period ended March 31, 2000 to 2004

⁽¹⁾ The expenditures have been restated to more accurately reflect the effects of the departmental reorganization.

Source: Nova Scotia Department of Health

Refer to page (i) of the introductory section of this publication for an important notice about sector data, including information about the November 8, 2005 release date for revisions to Statistics Canada's GDP by industry.

- In 2004 GDP (in chained 1997 dollars) in the health services and social assistance sector of Nova Scotia increased 1.1% over 2003 to \$1,902.4 million. The sector represented 8.3% of total GDP in the province in 2004.
- Nova Scotia's total capital expenditure in health care and social assistance in 2004 decreased 2.0% over 2003 to \$155.4 million. It is expected to decline 4.0% to \$149.2 million in 2005.
- In 2004 employment in Nova Scotia's health care and social assistance sector increased by 1.1% to 53,700. Employment in this sector accounted for 12.2% of total provincial employment in 2004.
- Total wages and salaries in health care and social assistance industries within Nova Scotia in 2004 rose 4.8% over 2003, reaching \$1,589.4 million. This sector accounted for 11.9% of the province's total wages and salaries during 2004.
- The average weekly wages and salaries in the health care and social assistance sector increased 6.7% over 2003 to \$639.77 in 2004, while average weekly wages and salaries by industrial aggregate increased 2.5% to \$611.93 in Nova Scotia in 2004
- In 2005 there were 44 hospitals in Nova Scotia, if the two sites for QEII Health Science Centres were counted separately.
- In the 2003–2004 there were 2,116 physicians counted by Health District Authority. This would include a minimal number (less than 20) of locums working in more than one Health District Authority. Payments for physicians' services amounted to \$480.46 per insured person in 2003–2004.
- Other than physicians, the latest available number of health care practitioners was for 2002–2003 when there were: 485 dentists, a decrease of one from the previous year; 3,342 registered Licensed Practical Nurses, an increase of three; 9,279 actively practicing Registered Nurses, an increase of 111; 1,016 Pharmacists (includes certified dispensers and pharmaceutical chemists), an increase of 67; and 458 Physiotherapists, an increase of eight.
- For the 2003-2004 fiscal year, total medical services insurance (does not include private insurance) was \$596.5 million, a 10.7% increase from the previous year. Physicians Service, at \$449.7 million or 75.4% of the total, is the largest amount. The total expenditure for Prescription Drugs/MIS Pharmacare, which includes more than Department of Health expenditures, was \$137.0 million or 23.0% of the total payments. Dental Services at \$5.9 million and Prosthetic Services at \$1.0 million were the only payments to decline from previous years. Optometric Services increased the most from 2002–2003, 12.8% to \$2.8 million.
- In 2003, approximately 80,000 Nova Scotians 12 and older reported alternative health care consultations in the past year. Just over 80% of that number consulted a chiropractor.

- For the fiscal year ending March 31, 2004 health care service expenditures amounted to \$2.4 billion, an increase of 18.7% from the previous year. Total health expenditures have grown 33.8% between the 1999–2000 and 2003–2004 fiscal years.
- Not including recoveries from other parties, the largest health care expenditures for the 2003–2004 fiscal year were \$1,009.4 million for acute care, \$500.5 million in medical services, \$253.7 in long-term care and \$106.3 million in Pharmacare. There was \$69.2 million in capital expenditures: \$57.1 million for capital and hospital construction; and \$12.0 million for capital equipment for hospitals.
- Nova Scotia has higher rates than Canada in a number of measures that impact health care and/or social assistance. Nova Scotia tends to be an older population. According to a 2004 Statistics Canada study on nutrition in 2004, 35.0% of Nova Scotia's population are overweight and 24.7% are obese compared to 36.1% and 23.1%, respectively, for Canada. Findings of the study noted 68% of Nova Scotian children (2–17 years of age, not pregnant) were neither underweight nor obese in 2004, with 18.3% being overweight. For Canada 18.1% of all children were overweight but 73.8% were neither underweight nor obese.
- In 2004, 20% of the Nova Scotia population smoked, averaging 14.9 cigarettes a day, with higher rates found in the 20–24 and 25–44 age categories. More males (15+ years of age) smoked than females (15+ years of age). Former smokers made up 32% of the population while 48% of the population never smoked.
- Cancer occurrence is also higher in Nova Scotia than for Canada as a whole. In data released in 2005, new cancer occurrences for males per 100,000 were reported at 520 in Nova Scotia and 448 in Canada, both higher than new cases in 1998. For females the comparable statistics are 388 for Nova Scotia and 355 for Canada, with a stronger increase since 1998 than for males. The highest rate for new cases was 137 for prostate cancer for males and 110 for breast cancer for females. Cancer death rates for both sexes in 2005 were also higher in Nova Scotia than Canada. Except for Nova Scotian males, death rates have decreased since 1998.
- On the 2001 Participation and Activity Limitation Survey (PALS), 146,000 Nova Scotians 15 years of age and older reported a disability. For 34.1% it was judged as mild; for 26.4%, moderate; and for 26.4%, severe; and for 13.1%, very severe. Compared to Canadian shares, Nova Scotians had a lower level of very severe disabilities but other levels of very severe disabilities (14%) but other levels were closer.
- On the 2001 PALS 6,210 Nova Scotia children under 15 years of age were reported as having a disability: 60.7% with a mild to moderate disability; and 39.3% with a severe to very severe disability.
- The 2001 PALS showed that for the 15–64 year age group reporting disabilities, 35.8% were not in the labour force compared to 23.0% of people without disabilities. There is more divergence in the employment ratio (employed/total population) for people reporting disability (37.5%) and people not reporting disability (68.1%).
- The level of employment for people with disabilities has an impact on income. For adults with disabilities the total average income reported in the 2001 PALS was \$19,912 and for adults without disabilities, it was \$24,523.
- In 2003 there were 58,300 social assistant recipients in Nova Scotia, down 5.2% from 2002.
- In 2003–2004 there were 19 shelters operating for abused women and their dependent children. There were 8,162 admissions to shelters—7,417 women and 745 children—during this period.
- In Nova Scotia in 2000–2001, 54.1% of children were in childcare. This increased from 39.0% in 1994–1995. The average number of hours for which a child was in the main childcare arrangement was 26.7 hours. A day care center was the main childcare arrangement for 21.2% of children between 6 months and five years of age. Almost half of the children were cared for in someone else's home.

⁽¹⁾ World Health Organization, International Classification of Diseases, 10th revision (ICD-10).

The number of deaths of individuals where the underlying cause of death is one of those specified, per 100,000 population, that would have occurred in the standard population if the actual age-specific rates observed in a given population had occurred in the standard population.

Rates are age-standardized using the direct method, and the 1991 Canadian Census of Population structure. All rates are per 100,000 population. The use of a standard population results in more meaningful mortality rate comparisons, because it adjusts for variations in population age distributions over time and across geographic areas.

Counts and rates in this table exclude: deaths of non-residents of Canada; deaths of residents of Canada whose province or territory of residence was unknown; and, deaths for which age of decedent was unknown.

Rates in this table are based on place of residence for indicators derived from death events.

Missing data on sex of the deceased were imputed based on death registration number.

⁽²⁾ Age-standardized mortality rates for breast cancer (ICD-10 code C50) were calculated for females only.

⁽³⁾ Age-standardized mortality rates for prostate cancer (ICD-10 code C61) were calculated for males only.

⁽¹⁾ Disability for purpose of Participation and Activity Limitation Survey (PALS)—persons with disabilities are those who reported difficulties with daily living activities, or who indicated that a physical, mental condition or health problem reduced the kind or amount of activities they could do. Types of disabilities of adults include hearing, seeing, speech, mobility, agility, pain, learning, memory, developmental and psychological.

⁽²⁾ Disability rate refers to the total number of persons who reported activity limitations expressed as a percentage of the population.

⁽³⁾ The Canada total excludes the Yukon, Northwest Territories and Nunavut.

⁽⁴⁾ The sum of the values for each category may differ from the total due to rounding.

⁽¹⁾ Disability for purpose of Participation and Activity Limitation Survey (PALS)—persons with disabilities are those who reported difficulties with daily living activities, or who indicated that a physical, mental condition or health problem reduced the kind or amount of activities they could do. Types of disabilities of adults include hearing, seeing, speech, mobility, agility, pain, learning, memory, developmental and psychological.

⁽²⁾ Severity of disability index was constructed based on the answers to the survey questions. Points were given according to the intensity and the frequency of the activity limitations reported by the respondent.

⁽³⁾ The Canada total excludes the Yukon, Northwest Territories and Nunavut.

⁽⁴⁾ The sum of the values for each category may differ from the total due to rounding.

⁽¹⁾ Disability for purpose of Participation and Activity Limitation Survey (PALS)—persons with disabilities are those who reported difficulties with daily living activities, or who indicated that a physical, mental condition or health problem reduced the kind or amount of activities they could do. Types of disabilities of children include hearing, seeing, speech, mobility, dexterity, learning, developmental delay, development disability or disorder, psychological and chronic condition.

⁽²⁾ Disability rate refers to the total number of persons who reported activity limitations expressed as a percentage of the population.

⁽³⁾ The Canada total excludes the Yukon, Northwest Territories and Nunavut.

⁽⁴⁾ The sum of the values for each category may differ from the total due to rounding.

Severity of Disability⁽¹⁾⁽²⁾ for Children under 15 Years with Disabilities, by Age Groups, Canada and Nova Scotia, 2001

Age Groups	Total ⁽⁴⁾	%	Severity of Disability		Severe to Very Severe	
			Mild to Moderate Total	%	Total	%
Canada - Total⁽³⁾						
Total - Age under 15 years	180,930	100.0	103,770	57.4	77,160	42.6
Male	113,220	100.0	62,460	55.2	50,760	44.8
Female	67,710	100.0	41,310	61.0	26,400	39.0
Nova Scotia - Total						
Total - Age under 15 years	6,210	100.0	3,770	60.7	2,440	39.3
Male	3,960	100.0	2,300	58.1	1,660	41.9
Female	2,250	100.0	1,470	65.4	780	34.6

⁽¹⁾ Disability for purpose of Participation and Activity Limitation Survey (PALS)—persons with disabilities are those who reported difficulties with daily living activities, or who indicated that a physical, mental condition or health problem reduced the kind or amount of activities they could do. Types of disabilities of children include hearing, seeing, speech, mobility, dexterity, learning, developmental delay, developmental disability or disorder, psychological and chronic condition.

⁽²⁾ Severity of disability index was constructed based on the answers to the survey questions. Points were given according to the intensity and the frequency of the activity limitations reported by the respondents. The scale for adults and for children age 5 to 14 was divided into four groups—mild, moderate, severe and very severe, while the scale for children under 5 was divided into two groups—mild to moderate and severe to very severe.

⁽³⁾ The Canada total excludes the Yukon, Northwest Territories and Nunavut.

⁽⁴⁾ The sum of the values for each category may differ from the total due to rounding.

⁽¹⁾ Disability for purpose of Participation and Activity Limitation Survey (PALS)—persons with disabilities are those who reported difficulties with daily living activities, or who indicated that a physical, mental condition or health problem reduced the kind or amount of activities they could do. Types of disabilities of adults include hearing, seeing, speech, mobility, agility, learning, memory, developmental and chronic condition. The population excludes persons living in institutions and on Indian reserves.

⁽²⁾ The sum of the values for each category may differ from the total due to rounding.

⁽³⁾ Includes persons who have attended courses at postsecondary institutions and who may or may not have a high school graduation certificate. Excludes persons with a postsecondary certificate, diploma or degree. Examples of postsecondary institutions include community colleges, institutes of technology, CEGEPs, private trade schools, private business colleges and schools of nursing.

⁽⁴⁾ This sector includes non-degree-granting institutions such as community colleges, CEGEPs, private business colleges and technical institutes.

⁽¹⁾ Information is representative of the trends of a subset of 473 shelters that responded to this survey. A person may be admitted more than once during the reporting period. The term shelter is used broadly to refer to all residential facilities for abused women and their dependent children. The types of shelters are defined by the Transition Home Survey as transition home, second state housing, safe home network, women's emergency centre/shelter, emergency shelter, family resource centre and other.

Percentage of Tourism Receipts by Region of Origin, Nova Scotia, 2004

Source: Nova Scotia Department of Tourism, Culture and Heritage, *Enquiry and Research Services Section*; <http://www.gov.ns.ca/dtc/pubs/insights>

Refer to page (i) of the introductory section of this publication for an important notice about sector data, including information about the November 8, 2005 release date of revisions to Statistics Canada's GDP by industry.

- Despite the service sector dominating the Nova Scotia economy, detailed statistics are not readily available for all industries. This section has grouped together various components of the service sector that are not already discussed in other sections of the Review.
- Within various industries of Nova Scotia's service sector, GDP (in chained 1997 dollars) growth from 2003 to 2004 was found in the: Information and Culture Industries, up 1.1% to \$1,052.6 million; Professional, Scientific and Technical Services, up 0.5% to \$683.5 million; and Administrative and Support Services, Waste Management and Remediation Services, up 1.6% to \$404.8 million. Over the same time period, GDP (in chained 1997 dollars) shrank in Arts, Entertainment and Recreation Industries, 1.0% to \$152.4 million; Accommodation and Food Services, down 0.8% to \$569.1 million; and Other Services (except Public Administration), 0.1% to \$536.2 million.
- Data for 2003 indicated growth from 2002 in the number of establishments offering Engineering Services, up 2.8% to 365; Architectural Services, up 5.2% to 77; Employment Services, up 9.1% to 600; and Personal and Laundry Services, up 5.0% to 957.

- Call Centres have been a growing industry in Nova Scotia. In 2005, inbound and/or outbound call centers service was provided by approximately 45 call centre locations across the province that employed nearly 14,000 people.
- The average weekly wages and salaries in the industries in this section vary considerably in 2004. Average weekly wages and salaries in Professional, Scientific and Technical Services was \$768.30, Other Services (except Public Administration) was \$453.92, while Accommodation and Food Services was \$272.23. The Nova Scotia average weekly wage was \$611.93.
- Tourism is not classified as an industry in Statistics Canada's GDP and employment by industry statistics. These statistics are reported occasionally through Statistics Canada's Tourism Satellite Account.
- In 2004, there were 2.2 million visitors to Nova Scotia, an increase of 4.5% from 2003. The majority of these visitors, 54.8%, came from Atlantic Canada, while 18.3% came from Ontario and 13.5% came from the United States. Most visitors (71.6%) arrived by road.
- During 2004 tourism receipts totaled \$1.3 billion (generated by Nova Scotians and by visitors). Halifax-Dartmouth has the largest share of tourism revenue at 48%.

Note: Further references,

Statistics Canada, *The Tourism Satellite Account*, see: <http://www.statcan.ca/> The Tourism Satellite Account (TSA) is referred to as a satellite (extension) account because tourism is not an identified industry within the standard economic accounts. Rather, the TSA extracts the tourism components out of several industries. The approach is based on principles approved by the United Nations Statistical Commission. The results of this report are based primarily on information from Statistics Canada's input-output accounts and travel surveys.

NAICS - North American Industry Classification System

- (1) Estimates for the most recent year are preliminary. Preliminary data are subject to revision. Due to rounding, components may not add to total (where applicable).
- (2) Operating revenue excludes investment income, capital gains, extraordinary gains and other non-recurring items. Note that prior to reference year 2000, total revenue rather than operating revenue is reported. The 1999-2000 trend may be slightly distorted.
- (3) Operating expenses exclude write-offs, capital losses, extraordinary losses, interest on borrowing, and other non-recurring items. Note that prior to reference year 2000, total expenses rather than operating expenses are reported. The 1999-2000 trend may be slightly distorted.
- (4) Salaries, wages and benefits include vacation pay and commissions for all employees for whom T4 slips were completed. This category also includes the employer portion of employee benefits for items such as Canada/Quebec Pension Plan or Employment Insurance premiums. Salaries and wages do not include working owners' dividends nor do they include the remuneration of owners of unincorporated business. Therefore the relative level of salaries, wages and benefits will be lower in industries where unincorporated businesses are significant contributors.
- (5) Operating profit margin is derived as follows: operating revenue minus operating expenses, expressed as a percentage of operating revenue. The derived figure excludes corporation income tax paid by incorporated businesses and individual income tax paid by unincorporated businesses. For unincorporated businesses, operating profit margin includes unpaid remuneration to partners and proprietors, which is not recorded as salaries, wages and benefits. Therefore the profit estimate will be higher in industries where unincorporated proprietorships and partnerships are significant contributors. Note that prior to reference year 2000, total profit margin rather than operating profit margin is reported. The 1999-2000 trend may be slightly distorted.
- (6) An active statistical establishment is one production entity or the smallest grouping of production entities which produces as homogeneous set of goods and/or services as possible; which does not cross provincial boundaries; and for which records provide data on the value of output together with the cost of principal intermediate inputs used and cost and quantity of labour resources used to produce the output.

F - Too unreliable to be published

(1) Comprises the following standard North American Industry Classification System (NAICS) codes: 5322; 5323.

(2) Estimates for the most recent year are preliminary. Preliminary data are subject to revision. Due to rounding, components may not add to total (where applicable).

(3) Operating revenue excludes investment income, capital gains, extraordinary gains and other non-recurring items. Note that prior to reference year 2000, total revenue rather than operating revenue is reported. The 1999–2000 trend may be slightly distorted.

Consumer Goods Rental (all establishments)⁽¹⁾, Canada and Nova Scotia, 1999 to 2003 *(continued)*

- ⁽⁴⁾ Operating expenses exclude write-offs, capital losses, extraordinary losses, interest on borrowing, and other non-recurring items. Note that prior to reference year 2000, total expenses rather than operating expenses are reported. The 1999–2000 trend may be slightly distorted.
- ⁽⁵⁾ Salaries, wages and benefits include vacation pay and commissions for all employees for whom a T4 slip was completed. This category also includes the employer portion of employee benefits for items such as Canada/Québec Pension Plan or Employment Insurance premiums. Salaries and wages do not include working owners' dividends nor do they include the remuneration of owners of unincorporated business. Therefore the relative level of salaries, wages and benefits will be lower in industries where unincorporated businesses are significant contributors.
- ⁽⁶⁾ Operating profit margin is derived as follows: operating revenue minus operating expenses, expressed as a percentage of operating revenue. The derived figure excludes corporation income tax paid by incorporated businesses and individual income tax paid by unincorporated businesses. For unincorporated businesses, operating profit margin includes unpaid remuneration to partners and proprietors, which is not recorded as salaries, wages and benefits. Therefore the profit estimate will be higher in industries where unincorporated proprietorships and partnerships are significant contributors. Note that prior to reference year 2000, total profit margin rather than operating profit margin is reported. The 1999–2000 trend may be slightly distorted.
- ⁽⁷⁾ An active statistical establishment is one production entity or the smallest grouping of production entities which produces as homogeneous a set of goods and/or services as possible; which does not cross provincial boundaries; and for which records provide data on the value of output together with the cost of principal intermediate inputs used and cost and quantity of labour resources used to produce the output.

⁽¹⁾ Environmental protection expenditures are defined as all capital (investment) and operating (current) expenditures incurred by businesses in order to comply with or to anticipate Canadian and international environmental regulations, conventions or voluntary agreements. The challenge in measuring expenditures made on environmental initiatives (e.g., projects to reduce energy consumption or water generation) is to isolate them from expenditures made in order to reduce production costs. For this reason, the 1997 Survey expanded the criterion of environmental protection to include any expenditure that ensures or anticipates compliance to environmental regulations or official voluntary agreement. Environmental protection expenditures are classified as 1) environmental monitoring, 2) environmental assessments and audits, 3) site reclamation and decommissioning, 4) wildlife and habitat protection, 5) pollution abatement and control (end-of-pipe processes), 6) pollution prevention, 7) environmental fees, fines and licenses and 8) other environmental protection. Expenditures on environmental research and development are excluded, in principle, from the data on business expenditures. These data are collection through the Research and Development in Canadian Industry Survey.

Food Services and Drinking Places, Canada and Nova Scotia, 2001 to 2003 *(continued)*

NAICS - North American Industry Classification System

⁽¹⁾Estimates for the most recent year are preliminary. Preliminary data are subject to revision. Due to rounding, components may not add to total (where applicable). The Annual Survey of Service Industries: Food Services and Drinking Places includes employer and non-employer establishments, whereas the Monthly Restaurants, Caterers and Taverns Survey does not include non-employer establishments in its estimates. Annual survey estimates, therefore, will differ slightly from monthly survey annual totals. Please note a change in the methodology: commencing with 2001, the annual data are no longer benchmarked to the Monthly Restaurants, Caters and Taverns Survey.

⁽²⁾ Operating revenue excludes investment income, capital gains, extraordinary gains and other non-recurring items.

⁽³⁾ Operating expenses exclude write-offs, capital losses, extraordinary losses, interest on borrowing, and other non-recurring items.

⁽⁴⁾ Salaries, wages and benefits include vacation pay and commissions for all employees for whom a T4 slip was completed. This category also includes the employer portion of employee benefits for items such as Canada/Quebec Pension Plan or Employment Insurance premiums. Salaries and wages do not include working owners' dividends nor do they include the remuneration of owners of unincorporated business. Therefore the relative level of salaries, wages and benefits will be lower in industries where unincorporated businesses are significant contributors.

⁽⁵⁾ Operating profit margin is derived as follows: operating revenue minus operating expenses, expressed as a percentage of operating revenue. The derived figure excludes corporation income tax paid by incorporated businesses and individual income tax paid by unincorporated businesses. For unincorporated businesses, operating profit margin includes unpaid remuneration to partners and proprietors, which is not recorded as salaries, wages and benefits. Therefore the profit estimate will be higher in industries where unincorporated proprietorships and partnerships are significant contributors.

NAICS - North American Industry Classification System

- (1) Estimates for the most recent year are preliminary. Preliminary data are subject to revision. Due to rounding, components may not add to total (where applicable).
- (2) Operating revenue excludes investment income, capital gains, extraordinary gains and other non-recurring items. Note that prior to reference year 2000, total revenue rather than operating revenue is reported. The 1999-2000 trend may be slightly distorted.
- (3) Operating expenses exclude write-offs, capital losses, extraordinary losses, interest on borrowing, and other non-recurring items. Note that prior to reference year 2000, total expenses rather than operating expenses are reported. The 1999-2000 trend may be slightly distorted.
- (4) Salaries, wages and benefits include vacation pay and commissions for all employees for whom a T4 slip was completed. This category also includes the employer portion of employee benefits for items such as Canada/Quebec Pension Plan or Employment Insurance premiums. Salaries and wages do not include working owners' dividends nor do they include the remuneration of owners of unincorporated business. Therefore the relative level of salaries, wages and benefits will be lower in industries where unincorporated businesses are significant contributors.
- (5) Operating profit margin is derived as follows: operating revenue minus operating expenses, expressed as a percentage of operating revenue. The derived figure excludes corporation income tax paid by incorporated businesses and individual income tax paid by unincorporated businesses. For unincorporated businesses, operating profit margin includes unpaid remuneration to partners and proprietors, which is not recorded as salaries, wages and benefits. Therefore the profit estimate will be higher in industries where unincorporated proprietorships and partnerships are significant contributors. Note that prior to reference year 2000, total profit margin rather than operating profit margin is reported. The 1999-2000 trend may be slightly distorted.
- (6) An active statistical establishment is one production entity or the smallest grouping of production entities which produces as homogeneous a set of goods and/or services as possible; which does not cross provincial boundaries; and for which records provide data on the value of output together with the cost of principal intermediate inputs used and cost and quantity of labour resources used to produce the output.

Public Administration

309

Refer to page (i) of the introductory section of this publication for an important notice about sector data, including information about the November 8, 2005 release date of revisions to Statistics Canada's GDP by industry.

- Public administration comprises establishments primarily engaged in activities of a government nature, e.g., the enactment and judicial interpretation of laws and their pursuant regulations, and the administration of programs based on them. Legislative activities, taxation, national defence, public order and safety, immigration services, foreign affairs and international assistance, and the administration of government programs are activities that are purely governmental in nature.⁽¹⁾
- Health care and social assistance, as well as, educational services are each addressed in further detail in separate sections within this publication.
- Total GDP (in chained 1997 dollars) for the public administration sector in Nova Scotia was \$2,293.1 million in 2004, a 0.5% increase over 2003. Public administration contributed 10.0% to Nova Scotia's total GDP in 2004. The largest single contribution to this sector came from defence services—\$804.0 million—which was 3.5% of the Nova Scotia GDP total in 2004. Federal Government public administration (except defence) contributed \$657.6 million. Both were down slightly from 2003, 0.3% and 0.7%, respectively. Provincial public administration GDP in 2004 was \$497.0 million while local, municipal and regional public administration was \$335.8 million.
- During 2004, capital investment in public administration in Nova Scotia was \$602.6 million, a 0.7% increase over 2003. Revised intentions of capital expenditures in public administration indicate an expected increase of 10.8% between 2004 and 2005 to \$667.5 million.
- In 2004 employment in public administration was 27,800, an increase of 0.7% over 2003. This figure is based on Statistics Canada's Labour Force Survey that represents civilian non-institutional population 15 years of age and over only. According to an unrelated source—Public Sector FMS Reports of the Public Institutions Division of Statistics Canada—in 2004, 12.7% of Canada's military employment or 10,696 persons, were in Nova Scotia. Nova Scotia military employment in 2004 increased 0.9% over the previous year.
- As of June 15, 2004 there were 1,615 police officers in Nova Scotia. This averaged to one police officer for every 580.1 people. Not including traffic crime, there were 82,116 criminal code incidents in 2004, up 1.7% from 2003. The largest percentage increase was in homicide, which was up 62.4% to 13. The largest percentage decrease was for sexual assault, which declined 8.9% to 820.
- Based on estimates of labour income from Statistics Canada's, System of National Accounts, wages and salaries in Nova Scotia's federal public administration (excluding the military) totaled \$691.7 million in 2004, unchanged from 2003, while military wages and salaries in the province increased 0.8% to \$576.0 million in 2004. Wages and salaries in provincial public administration were \$335.9 million in 2004, an annual increase of 2.3%. Local public administration wages and salaries increased 4.5% over 2003 to \$190.8 million in 2004.
- In 2004 average weekly wages and salaries in the public administration sector in Nova Scotia was \$819.19, an increase of 1.6% over the previous year, while the industrial aggregate was rose 2.5% to \$611.93.
- The Nova Scotia government's April 26, 2005 budget forecast a surplus of \$87.5 million in fiscal year 2004–2005 and in fiscal 2005–2006, estimates a surplus of \$63.3 million.
- When computed by the Financial Management System (FMS), the 2004–2005 fiscal year per capita surplus of the provincial general government was \$123 in Nova Scotia, while the per capita surplus of provincial and territorial general government was \$4 for Canadians. Performance was reversed for net debt per capita for provincial and territorial general government: \$812,707 for Nova Scotians and \$8,106 for Canadians.

Provincial and Territorial Government Tax Rates, Federal and the Provinces, as of January 1, 2005

Tax Description	Federal	Nova Scotia
Personal Income Tax		
Low Income Rate (%)	16	8.79
Middle Income Rate (%)	22	14.95
High Income Rate (%)	26/29	16.67/17.50
High Income Surtax (%)	-	10
Basic Personal Amount (\$)	8,148	7,231
Indexation	Year 2000	...
Corporation Income Tax		
General Rate (%)	21/25	16
Small Business Rate (%)	12	5.0
Sales Tax ⁽¹⁾ (%)	7	8
Gasoline Tax ^(2,3) (cents/litre)	10.0	15.5
Tobacco Tax ⁽³⁾ (cents/cigarette)	7.93	15.52
Capital Tax		
General/Banks (%)	0.175/1.15-1.4	0.6/4
Payroll Tax/Employment Insurance (%)	1.95	-
Insurance Premiums ⁽⁴⁾	-	3/4

⁽¹⁾ On April 1, 1997, the retail sales taxes in Nova Scotia, New Brunswick and Newfoundland and Labrador and the federal Goods and Services Tax (GST) in those provinces were replaced by a single, harmonized value-added tax, the Harmonized Sales Tax (HST). The HST has the same basic operating rules as the GST and applies a single rate of 15% to the same base of goods and services. Seven percentage points of the 15% represent the federal component and 8 percentage points represents the provincial component.

⁽²⁾ Gasoline tax for motor vehicles.

⁽³⁾ Does not include federal and provincial sales tax, where applicable.

⁽⁴⁾ Unless otherwise indicated, the lower rate applies to life, sickness and accident insurance.

Note for the RCMP municipal contracts: expenditures include only the cost billed to the municipality and not the total cost of the contract, nor any additional policing costs. Civilian employees provided by the municipality are not included under "other personnel".

Use caution in comparing forces: The number of officers may not reflect the number available for general community policing because some officers in certain communities are restricted to specific locations (e.g., ports, airports). Operational expenditures may vary considerably between police services for many reasons.

Canada provides legal aid through separate legal aid plans in each of the provinces and territories. Each provincial/territorial government has developed its own personalized legal aid scheme using one of three general models—juricare, staff and mixed. Nova Scotia, as well as, Newfoundland and Labrador, Prince Edward Island and Saskatchewan have adopted the staff system approach. The staff system directly employs lawyers to provide legal aid services.

Victim Services, Types of Agencies, Canada and Nova Scotia, 2002–2003

Victim Services ⁽¹⁾	Canada			Nova Scotia		
	(#)	(%)	Clients Assisted ⁽⁹⁾	(#)	(%)	Clients Assisted ⁽⁹⁾
Total victim service agencies ⁽²⁾	484	100	359,767	30	100	10,550
System-based agencies ⁽³⁾	46	10	21,630	5	17	6,182
Police-based agencies ⁽⁴⁾	207	43	137,769	24	80	3,603
Court-based agencies ⁽⁵⁾	52	11	29,830	-	-	--
Sexual assault centres ⁽⁶⁾	61	13	83,233	1	3	--
Community-based agencies ⁽⁷⁾	97	20	82,584	-	-	--
Other victim service agencies ⁽⁸⁾	21	4	4,721	-	-	--

⁽¹⁾ This table represents the number of victim service agencies that responded to the 2002–2003 Victim Services Survey (excluding the criminal injuries compensation & financial benefit programs); the numbers do not represent a census of all victim service agencies in Canada. Overall, 81% of agencies surveyed responded to the survey. Data are on the fiscal year April 1 to March 31. For more information on the concepts, methods and quality of the data contained in this table, consult the statistical data documentation at <http://www.statcan.ca/english/sdds/5035.htm>.

⁽²⁾ Total victim service agencies represent the total number of victim service agencies that responded to the 2002–2003 Victim Services Survey; the response rate for all agencies is 81%. The survey response rates for all agencies for each province and territory are: Newfoundland and Labrador, 92%; Prince Edward Island, 100%; Nova Scotia, 100%; New Brunswick, 95%; Quebec, 59%; Ontario, 77%; Manitoba, 95%; Saskatchewan, 88%; Alberta, 76%; British Columbia, 85%; Yukon Territory, 100%; Northwest Territories, 83%; and Nunavut, 100%.

⁽³⁾ Total system-based agencies represent the number of system-based agencies that responded to the 2002–2003 Victim Services Survey; the national response rate for this type of agency is 100%. Services in the Atlantic Provinces follow the system-based model of service delivery. Services under this model are independent from police, courts, and Crown-attorneys and assist victims throughout their contact with the criminal justice system from the police right through to the corrections stage. This model can be characterized as one-stop service delivery. In 2002/03, Manitoba Justice became responsible for the delivery of victim services, including those that had been delivered by the Royal Canadian Mounted Police (RCMP).

⁽⁴⁾ Total police-based agencies represent the number of police-based agencies that responded to the 2002–2003 Victim Services Survey; the national response rate for this type of agency is 84%. The survey response rates for this type of agency for the provinces and territories are: Nova Scotia, 100%; New Brunswick, 50%; Ontario, 100%; Manitoba, 100%; Saskatchewan, 79%; Alberta, 74%; and British Columbia, 90%.

⁽⁵⁾ Total court-based agencies represent the number of court-based agencies that responded to the 2002–2003 Victim Services Survey; the national response rate for this type of agency is 84%. The survey response rates for this type of agency for the provinces and territories are: Ontario, 79%; Manitoba, 100%; Saskatchewan, 100%; Alberta, 100%; British Columbia, 88%; Yukon Territory, 100%; Northwest Territories, 50%; and Nunavut, 100%.

⁽⁶⁾ Total sexual assault centres represent the number of sexual assault centres that responded to the 2002–2003 Victim Services Survey; the national response rate for this type of agency is 58%. The survey response rates for this type of agency for the provinces and territories are: Newfoundland and Labrador, Prince Edward Island, 100%; Nova Scotia, 100%; New Brunswick, 100%; Quebec, 48%; Ontario, 58%; Saskatchewan, 100%; Alberta, 60%; and British Columbia, 64%.

⁽⁷⁾ Total community-based agencies represent the number of community-based agencies that responded to the 2002–2003 Victim Services Survey; the national response rate for this type of agency is 83%. The survey response rates for this type of agency for the provinces and territories are: Newfoundland and Labrador, 100%; New Brunswick, 100%; Quebec, 70%; Ontario, 89%; Manitoba, 0%; Saskatchewan, 100%; Alberta, 67%; British Columbia, 81%; Northwest Territories, 100%; and Nunavut, 100%. Community-based agencies are non-government, not-for-profit agencies that provide direct services to victims of crime. Community-based agencies were included in the survey if they were funded by a ministry responsible for justice matters in their province or territory or by a federal ministry responsible for justice matters, or if the equivalent of their program in another jurisdiction received funding from a ministry responsible for justice matters. Community-based agencies include Ontario's Victim Crisis Assistance and Referral Services (VCARS) which work closely with the police but are community-based, non-government services. For the purpose of this survey, transition homes are excluded because Statistics Canada's Transition Home Survey already surveys them.

⁽⁸⁾ Total other agencies represent the number of other agencies that responded to the 2002–2003 Victim Services Survey; the national response rate for this type of agency is 100%. Other agencies include hospital-based spousal and/or sexual assault treatment centres and agencies that are a combination of the types of agencies listed (for example, an agency may be a sexual assault centre as well as a spousal assault or family crisis centre).

⁽⁹⁾ 412 of the 484 victim service agencies that responded to the 2002–2003 Victim Services Survey provided annual counts of clients served. Nationally, the following percentage of agencies provided annual counts of clients served: 100% of system-based agencies; 85% of police-based agencies; 77% of court-based agencies; 89% of sexual assault centres; 80% of community-based agencies; and 90% of other types of agencies. Overall, the response rate to the 2002/03 Victim Services Survey was 81%. In Nova Scotia, 27 of the 30 agencies that responded to the 2002–2003 Victim Services Survey provided annual counts of clients served. For this province, the following percentage of agencies provided annual counts of clients served: 100% of system-based agencies; 88% of police-based agencies; and 100% of sexual assault centres. Overall, the survey response rate for this province was 100%.

History of the G8

- The first Summit in 1975, with six countries participating, has its roots in the early 1970s with two precursor groups known as the Brussels group (1971) and the Library Group (1973). Both of these groups had included selected developed democratic countries that met to discuss world issues, but meetings were largely confidential. The G6 developed from these groups and met in Rambouillet, France, to discuss global economic problems. Canada joined in 1976 to create the G7 and Russia in 1998 to make the G8. In all, the participating countries today include Canada, France, Germany, Italy, Japan, Russia, the United States and the United Kingdom.

Note: Comparable data for Russia not available.

Source: Statistics Canada, *Canadian Economic Observer*, June 2005, Table 47, Catalogue No. 11-0110

- Meetings are held annually, and countries rotate holding a year-long presidency and hosting a summit. Canada has hosted four summits: in Ottawa and Montebello (1981), in Toronto (1988), in Halifax (1995) and in Kananaskis (2002). Canada will next host in 2010. Russia will host for the first time in 2006. The Summit agenda addresses a wide range of international economic, political and social issues and thus, influence global developments and manage global crises. In 2005 the summit will try to reach non-binding agreements on how to resolve problems in Africa (e.g., fight against AIDS, tuberculosis and malaria; poverty; development) and climate change.

⁽¹⁾ GDP—a purchasing power parity (PPP) dollar calculation of all goods and services produced in a country.

⁽²⁾ Exports minus imports.

⁽³⁾ For comparability with the trade data, GDP is expressed in current US dollars.

⁽⁴⁾ Germany was only West Germany in 1976.

⁽⁵⁾ Levels have been classified according to an international coding system.

⁽⁶⁾ Figures for Canada and France show compensation adjusted for employment taxes and government subsidies to estimate the actual labour cost to employers.
