

Three day certification program in: **Residential Mechanical Ventilation Installation**

Introducing a growing new market!

Today's consumers are demanding healthier indoor environments and more energy-efficient homes and recent changes to the UK Building Regulations now call for new standards in home ventilation that will result in increased air-tightness and reduced energy consumption! The solution is Residential Mechanical Ventilation, and this provides Contractors and Building Professionals with an opportunity to take advantage of a whole new market segment!

About the training...

The course is designed around the respected Heating, Refrigeration and Air Conditioning Institute of Canada's HRAI Technical Manual, which deals with all aspects of design and installation of residential mechanical ventilation systems.

The course covers all aspects of installation and commissioning of mechanical ventilation systems including: air quality assessment, system requirements, system design, installation, house-as-a-system principles and a major focus on systems that include a heat recovery ventilator.

Participants will receive a copy of the new UK Version of SkillTech Academy's Residential Mechanical Ventilation Manual. Those who achieve 75% or higher on the exam will be awarded HRAI Certification.

Course Content:

Detailed information on:

Mechanical system interaction
Ventilation capacity

Ventilation air distribution
Exhaust-type systems

Balanced systems
Heat recovery ventilator systems

And an overview of:

System design and layout
Duct layout and sizing
Control system selection

Combustion appliances
Depressurization testing

Air flow measurement
System start-up

Space is limited to 20 participants!

**If you plan to attend, please complete the registration form on the back
and fax to +44(0) 1344 465605**

**If you require further information call Michael Doig at +44 (0) 1344 465600
or e-mail: Michael.doig@bsria.co.uk**
