

The Honourable Peter G. Christie, Minister of Finance

December 20, 2004

Overview

The Province of Nova Scotia's second forecast update for 2004-2005 shows that government will be able to invest more in key priorities this year, while maintaining a budget surplus of \$2.7 million.

Higher than budgeted revenues will allow government to make additional investments in health care, education, social services, and in other important areas. Total revenues are up \$249.4 million, due to higher provincial corporate income tax revenues and additional federal revenues for health care and equalization. Health care funds will be targeted to specific priorities such as reducing wait times in patient care. Other funds will be used to support universities and public school education, programs and services for low-income Nova Scotians, and infrastructure investments in other sectors.

Government will also set aside an additional \$60 million for debt reduction to provide flexibility in capital infrastructure investments in future years.

NOVASCOTIA

Revenues

Total revenues are forecasted to be \$249.4 million higher than the 2004-2005 Budget.

Exclusive of any prior years' adjustments, provincial own source revenues are forecasted to be \$90.0 million higher than in the budget. This is primarily due to revised income tax share data.

Personal income tax revenues are forecasted to be \$10.5 million higher than the budget projection.

Corporate income tax revenues are forecasted to be up \$51.5 million due to stronger than anticipated corporate taxable income and an increase in Nova Scotia's share of the national total. The forecast for the large corporations capital tax has been reduced by \$17.4 million to reflect more recent federal data.

Harmonized sales tax revenues are also forecasted to be \$10.5 million higher than budgeted due to a projected increase in Nova Scotia's share of the declared revenue pool, which is the base for the sales tax allocation to the harmonized provinces. Exclusive of any prior years' adjustments, federal source revenues are forecasted to be \$162.8 million higher than projected in the budget. As a result of two First Minister Meetings, one on healthcare and one on equalization, additional federal revenues will flow to the province in fiscal 2004-2005.

National levels for equalization have been set for the next two years until a panel can report to the federal government to determine the allocation of entitlements for fiscal 2006-2007. This increase in the national level of equalization has adjusted the 2004-2005 forecast up from the budget by \$118.6 million. Increases in healthcare funding will move revenues upward by \$44.2 million in fiscal 2004-2005.

Overall, prior years' adjustments from federal and provincial sources are down \$3.5 million. Increases in equalization and corporate income tax for prior years are being offset by a negative adjustment to harmonized sales tax, resulting from revised national pool data.

Revenue Fiscal 2004–2005			(\$ thousands)
REVENUE SOURCE	Budget	Forecast	Increase (Decrease) from Budget
Provincial Revenue Sources			
Personal Income Tax	1,465,695	1,476,161	10,466

Total—Revenues	5,574,172	5,823,560	249,388

Net Program Expenses

Federal-provincial-territorial negotiations in the fall of 2004 resulted in agreements to increase federal funding for health care and equalization. This allows the Government of Nova Scotia to invest more in the priorities of Nova Scotians this year.

Additional health care investments in 2004-2005 are intended to reduce wait times for people seeking medical treatment, and improve the services people receive. District Health Authorities will receive an additional \$19.2 million in capital grants for infrastructure and \$19.5 million to shorten wait lists. The long term care sector will receive \$4.2 million more to deal with deferred maintenance issues and \$1.6 million has been added to addiction treatment programs for the Healthy Living Initiatives.

Investments by the Department of Education, totalling \$5.3 million, cover a variety of initiatives, ranging from buying textbooks and technology for schools to improvements in the regional libraries. Also, an additional \$2.0 million has been provided to the regional school boards for non-capital infrastructure maintenance.

The recently announced Memorandum of Understanding with Universities will provide Nova Scotia institutions with committed funding increases until March 31, 2008. The first installment of \$20.3 million is included in this forecast. In return, student tuitions will not increase more than 3.9 per cent per year during the coming three years.

In December 2004, the Department of Community Services announced investments totalling \$11.0 million in emergency home repair programs, public housing and vocational day programs to help seniors, low-income Nova Scotians and persons with disabilities. This investment has been partially offset by other savings in the department.

The increase in the Service Nova Scotia and Municipal Relations forecast includes \$15.8 million for the Keep the Heat program, which offsets energy costs for low-income earners. An additional \$0.8 million has been allocated to the Provincial Capital Assistance Program for municipal infrastructure projects.

The Province is investing an additional \$10.0 million in 2004–2005 through the Tourism, Culture and Heritage department in programs that will better promote the province in key markets and assist in regional tourism initiatives.

The additional \$8.9 million in the forecast of the Department of Agriculture and Fisheries reflects the steps taken to help farmers who have been affected by the downturns in the agriculture sector, primarily the result of the Canada-wide BSE (mad cow)crisis. Also, an additional \$0.7 million has been allocated to Natural Resources to upgrade infrastructure in provincial parks; these investments were offset by savings in other areas of the department.

The latest forecast for Transportation and Public Works includes an additional \$11.0 million related to liabilities primarily connected to the ongoingclean-up of Boat Harbour and the demolition of the old Halifax Infirmary.

The \$10.3 million increase in the Public Service envelope includes \$5.0 million for community and economic development initiatives in the Office of Economic Development. This is in addition to the \$4.4 million noted in the September forecast update and \$2.0 million in the Office of Health Promotion for recreational facility development grants and the nicotine replacement program. These increases have been partially offset by savings elsewhere in the Public Service envelope.

The Province is forecasting an increase of \$19.3 million in the Restructuring Costs appropriation to provide for higher than anticipated wage settlements.

Net Program Expenses Fiscal 2004–2005		(\$ thousands)	
	Budget	Forecast	Increase (Decrease) from Budget
Agriculture and Fisheries	40,796	49,648	8,852
Community Services	694,145	703,514	9,369
Education and Universities	1,209,379	1,236,965	27,586
Energy	7,350	7,280	(70)
Environment and Labour	26,152	26,079	(73)
Finance	14,134	13,039	(1,095)

Tourism, Culture and Heritage	41,055	51,055	10,000
Transportation and Public Works	241,009	252,009	11,000
Restructuring Costs	56,474	75,771	19,297
Total - Net Program Expenses	5,077,630	5,234,252	156,622

Pension Valuation Adjustment

The Province of Nova Scotia accounts for pensions and other retirement benefit costs on a basis that is consistent with generally accepted accounting principles. As such the current forecast recognizes pension expense to include the cost of pensionable service earned by employees and amortization of the experience gains and losses in the pension plans. Assumptions used to calculate pensionable service are tied to market rates of return. Recent market performance has indicated a change in these assumptions. A net negative adjustment of \$35.5 million has been forecasted.

Net Debt Servicing Costs

The latest forecast for Net Debt Servicing Costs includes an increase of \$18. 0 million. This is primarily attributed to increased interest costs on pension obligations.

Debt Retirement for Strategic Infrastructure Investment

The Strategic Infrastructure Investment represents an allocation of \$60.0 million to the 2004-2005 annual surplus to enable the Province to increase its capital spending in 2005-2006 and 2006-2007 without negatively impacting the Debt Reduction Plan.

Economic Performance and Outlook—2004

The latest forecast for Nova Scotia projects real Gross Domestic Product (GDP) for 2004 to increase 2.1 per cent, up slightly from the forecast of 2.0 per cent in the budget. Continued growth in consumer and capital spending supports the real GDP forecast.

However, there are concerns over the continued appreciation of the dollar and a slower pace than expected in the United States and Canadian economies, which may have had a dampening effect on export sales in the latter months of 2004.

The recent survey of private sector economic forecasts reveals that those forecasters are in line with the budget and the revised forecast, with an average growth rate for Real GDP at 2.1 per cent for 2004.

CPI inflation is on track with the budget projection of 1.5 per cent while employment is growing at a much faster pace than anticipated. Employment growth has been revised upwards to 2.2 per cent for 2004 from the 1.1 per cent projected in the budget.

Net Income for Government Business Enterprises

Net income for Government Business Enterprises is up \$3.7 million overall.

The Nova Scotia Liquor Corporation's revenues are forecasted to be \$11.6 million lower than 2004-2005 budget, due to lower than projected sales.

Revenues for the Nova Scotia Gaming Corporation are forecasted to be \$15.3 million higher for 2004-2005. Video lottery revenues have increased \$19.5 million over budget and casino revenues are up \$3.7 million. These are offset by a \$7.2 million decline in ticket lottery.
