Message from the Minister

Business planning is an essential tool for any organization interested in achieving its objectives in a cost-effective and timely manner. The Department of Finance is committed to open and transparent accounting of the province's finances, and through this Business Plan, we will show Nova Scotia taxpayers how we intend to accomplish this.

A balanced budget is once again our primary objective, while continuing to provide a high level of quality service to other departments within government, and to the people of Nova Scotia. Providing equitable, efficient and effective taxation that promotes economic growth in a strategic way is a key goal for the Department of Finance as we head into the 2003-2004 fiscal year.

The Honourable Neil LeBlanc Minister of Finance Howard C. Windsor Deputy Minister of Finance

Mission Statement

To establish a fiscal climate conducive for economic growth and to provide central agency support and policy direction for effective management of the Province's finances and pensions administration.

Planning Context

The department faces a number of opportunities and challenges in achieving its strategic goals:

- maintain a sustainable fiscal plan and a balanced budget amid increased public demand for services and programs, especially health, education and infrastructure
- ensure increased interdepartmental and intergovernmental collaboration and participation on financial issues affecting Nova Scotia
- provide effective management of the province's financial assets and liabilities under conditions of global economic uncertainty and volatility
- balance the increasing demand and expectations for central agency services to all departments and agencies with the core finance functions of the department
- recruit and maintain highly skilled and motivated staff who are able to meet the increasing work and client demands

The department's main resource is its staff consisting of experienced professionals in the fields of financial analysis and accountability, investments, cash management, pension administration, financial products, economics, taxation, federal-provincial fiscal arrangements, statistics, and policy development.

The department must keep stakeholders, which include the investment community and the general public, informed with timely and reliable information regarding financial reports, including the annual provincial budget. As part of its communication strategy, the department's website will continue to be enhanced to provide up to date information about the department's activities and the province's finances.

The department is leading a collaborative effort with other agencies, boards and local governments to assist in achieving its goal of financial accountability. Partnerships have been established within the broader public sector, including school boards, district health authorities, and municipalities through the implementation of a common Enterprise Resource Planning System which provides for the integration of information and standardized reporting across provincial public sector entities. This system not only spans the entire range of business done by government, but also has the ability to remain current with government's changing needs.

Strategic Goals

- enhance financial accountability and fiscal planning in the management and control of the province's finances
- achieve effective money management that maximizes return on investments and minimizes debt servicing costs within acceptable risk tolerances
- provide for equitable, efficient and effective taxation that promotes economic growth in a strategic way
- provide a core set of central agency services that supports other government departments and agencies in the management of the province's programs and public resources

The strategic goals of the Department of Finance represent the achievements that are key to meeting our mission statement. The strategic goals are consistent with, and support, the overall priorities of the government within the context of fiscal sustainability and a balanced budget.

Core Business Areas

Financial Management

Ensure financial accountability in the management and control of the province's finances

- financial accountability and governance
- expenditure monitoring and reporting (shared with Treasury & Policy Board)
- accounting, payroll, and pension administration

Investment and Treasury Management

Achieve effective money management that maximizes return on investments and minimizes debt servicing costs within risk tolerances acceptable to government

- managing the debt portfolio
- treasury function and investor relations
- managing the provincial pension funds

Fiscal Planning and Policy

Ensure responsible fiscal planning and budgeting that includes equitable, efficient and effective taxation to promote economic growth in a strategic way

- fiscal planning and budgeting (shared with Treasury & Policy Board)
- revenue and economic forecasting
- tax policy/analysis and federal fiscal policies and arrangements

Central Agency Services

Provide a core set of central agency services that support the management of the province's programs and public resources, in addition to supporting the core business functions of the Department of Finance

- Statistics
- Economic Policy and Analysis
- Internal Audit

The department's core business areas directly support the priorities of government as reflected in the Throne Speech and government's stated commitments. Many activities within the core business areas reinforce these linkages. Economic development is enhanced with the overall fiscal health of the province and through effective taxation policies. The development of accountability mechanisms in legislation and regulations directly supports the government's directions. As an integral part of the department's culture, Finance is a dynamic organization that reviews its services on an ongoing basis and responds to client needs and feedback within its fiscal capacity. All aspects of the department's core business areas support achieving fiscal stability and building a responsive and accountable government.

Priorities for 2003/04

The following details a list of programs or services delivered or administered by Finance that collectively address the mandate and strategic goals of the department.

Financial Management

- improve overall fiscal management by producing relevant and timely financial reports and continue to monitor and report on the fiscal plan in a timely manner, in conjunction with Treasury and Policy Board
- enhance accountability and governance structures as they relate to public policy and administration of financial resources through the government's financial management policies and procedures ensure compliance with the Public Sector Accounting Board (PSAB) Guidelines and adherence to Generally Accepted Accounting Principles (GAAP) for reporting financial results
- maintain timely and efficient payroll and government accounting services to government departments and agencies and maintain effective and efficient administration of pension services to plan members and beneficiaries

Investment and Treasury Management

- effectively manage financial risk, due to unforeseen events, in managing the investment assets and liabilities of the province
- continue to reduce the province's foreign currency exposure
- improve investor relations by making strong presentations to rating agencies on our financial position
- effectively manage the assets of the Teachers' Pension Plan and Public Service Superannuation Plan and the pensions plans and insurance programs of the former Sydney Steel Corporation

Fiscal Planning and Policy

- support a prudent, sustainable and balanced fiscal plan
- provide an assessment of the tax initiatives within the province to achieve a more competitive and responsive tax environment
- provide timely revenue forecasts essential to government's fiscal planning and budgeting
- provide tax policy and advisory services to departments and agencies to ensure new programs

and services consider tax implications and are cost-effective in the use of public funds

• provide research, analysis and advice on key federal-provincial issues and effectively represent Nova Scotia's interests in negotiations with other governments in such areas as federal transfer payments comprising Equalization, the Canada Health and Social Transfer, and tax collection agreements

Central Agency Services

- provide government departments and agencies with advice on and access to a wide range of social and economic statistics to support evidence-based management and policy development
- provide economic impact, benefit-cost and economic policy analysis to client departments and agencies for optimal use of public funds
- perform value-added corporate audit services to client departments and agencies for effectiveness of control structures and cost-effective usage of public funds

Red Tape Reduction
