Employment Situation APRIL 2005

About the Employment Situation Report

The Employment Situation Report is produced monthly by the Statistics Division of the Nova Scotia Department of Finance. It is based on the Labour Force Survey (LFS) which is a household survey carried out monthly by Statistics Canada. This publication contains summary tables of selected labour force characteristics including labour force, employment, unemployment, unemployment rate, and participation rate for Canada, the provinces, and CMAs. The publication emphasizes the Nova Scotia employment situation and includes tables for Nova Scotia, its economic regions, and the Metropolitan Halifax area. The report is available on the internet at:

http://www.gov.ns.ca/finance/publish/pub19.htm

The LFS survey is a sample of individuals who are representative of the civilian, non-institutionalised population 15 years of age or older in Canada's ten provinces. Specifically excluded from the survey's coverage are residents of the territories, persons living on Indian Reserves, full-time members of the Canadian Armed Forces and institutional residents. These groups represent an exclusion of approximately 2% of the population aged 15 or over. As of April 2005 the sample size has been approximately 51,072 households across Canada and 2,873 in Nova Scotia.

Since its inception in 1945, the objectives of the LFS have been to divide the working-age population into three mutually exclusive classifications--employed, unemployed and not in the labour force--and to provide descriptive and explanatory data on each of these categories. Data from the survey provide information on major labour market trends such as shifts in employment across industrial sectors, hours worked, labour force participation and employment rates.
