

On-line Service Station Locator

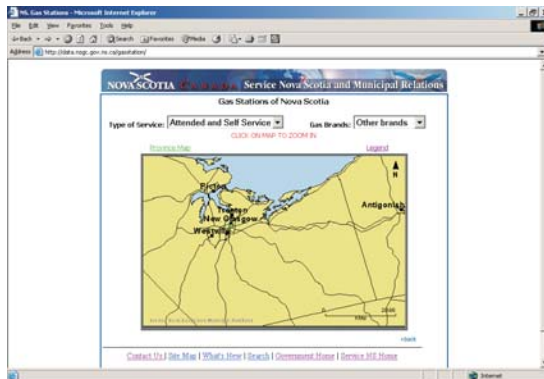

Provincial level

Through this free service, you will be able to locate a service station in any area of the province, by brand name and by the type of service offered – full-serve, self-serve, or a combination of the two.

Provincial level, “Other” full/assisted service only

The service is very simple to use. Choose some search criteria on the web page. For example, assume that you chose *Attended and Self-Serve* and *Other brands*. All of the *Other* brand stations in the province that have attended *and* self-serve pumps will be displayed on the screen.

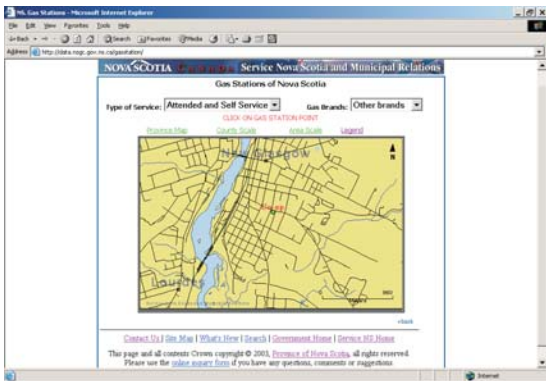

County level, “Other” full/assisted service only

To zoom in, click on the map in the region where you want to find a service station. In this example, assume that you clicked on Pictou County.

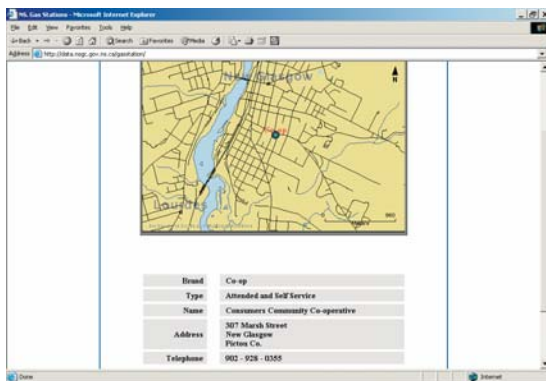

To zoom in to a community level, click on the map again. For demonstration, we chose the New Glasgow area.

Zooming in on the region; only "Other" full/self-serve

Almost done. Click near one of the station symbols and a street level map will come up on the screen.

Street level in the community; "Other" full/self-serve

Last, click on a service station symbol and the exact location of the station, its street address, phone number and other contact information will appear on the screen.

The "Other" station in New Glasgow meets our search criteria

Please note: The information contained in our databases was supplied by gasoline wholesalers and retailers, and applies to stations that sell directly to the general motoring public (not marinas, card lock sales, etc). Service Nova Scotia does not take responsibility for the accuracy of the information provided by industry retailers or wholesalers. All information, including the types of services offered (full-, self-serve, both), company name, address and phone number, is subject to change without notice. This information will be updated annually, around mid-year.
