

# WATER RESOURCES

Commissioned by  
The Canada - Nova Scotia Strait of Canso Environment Committee  
1975

Strait of Canso  
Natural Environment Inventory

**INTRODUCTION**  
This map is one of a series commissioned by the Canada Nova Scotia Strait of Canso Environment Committee. The series is intended to provide basic information on the water resources of the Strait of Canso and the adjacent areas. The map is based on a geological map of the Strait of Canso and the adjacent areas, published in 1975, and a water resources map of the Strait of Canso and the adjacent areas, published in 1975. The water resources map presents information available as of November 1974, on the water resources of the Strait of Canso and the adjacent areas. The water resources map is based on a geological map of the Strait of Canso and the adjacent areas, published in 1975, and a water resources map of the Strait of Canso and the adjacent areas, published in 1975. The water resources map presents information available as of November 1974, on the water resources of the Strait of Canso and the adjacent areas. The water resources map is based on a geological map of the Strait of Canso and the adjacent areas, published in 1975, and a water resources map of the Strait of Canso and the adjacent areas, published in 1975.

**LEGEND**  
**HYDROSTRATIGRAPHIC UNITS**  
**BEDROCK**  
**CRYSTALLINE AND METAMORPHIC BEDROCK**  
This unit includes all crystalline and metamorphic rocks, including gneiss, schist, amphibolite, quartzite, and other crystalline rocks. These rocks are generally hard and resistant to weathering. They are commonly found in the western part of the Strait of Canso and the adjacent areas.

**WATER RESOURCES**  
**WELLS**  
Wells are indicated by a circle with a dot in the center. The number inside the circle indicates the well number. The location of the well is indicated by the letters and numbers following the well number (e.g., 1FA, 1FB, 1FC, etc.).

**SYMBOLS**  
**WELLS**
