Introduction

About the Labour Market Monthly

The *Labour Market Monthly*¹, produced monthly by the Economics & Statistics Division of the Nova Scotia Department of Finance, is based primarily on data from the *Labour Force Survey (LFS)*, a household survey carried out monthly by Statistics Canada. The *LFS* is a sample of individuals who are representative of the civilian, non-institutionalised population 15 years of age or older in Canada's ten provinces. Specifically excluded from the coverage of the *LFS* are residents of the Territories, persons living on Indian Reserves, full-time members of the Canadian Armed Forces and institutional residents. These groups represent an exclusion of approximately 2 per cent of the population aged 15 or over. As of January 2006, the sample size has been approximately 53,372 households across Canada, with 2,873 of those in Nova Scotia.

Since its inception in 1945, the objectives of the *LFS* have been to divide the working-age population into three mutually exclusive classifications—employed, unemployed and not in the labour force—and to provide descriptive and explanatory data on each of these categories. Data from the *Survey* provide information on major labour market trends such as shifts in employment across industrial sectors, hours worked, labour force participation and employment rates.

The *Labour Market Monthly* contains: 1) year-to-date *LFS* highlights; 2) summary tables of selected labour force characteristics including labour force, employment, unemployment, unemployment rate and participation rate for Canada, the provinces, and CMAs; 3) a feature article; and 4) a selection of additional

key employment indicators obtained from other Statistics Canada surveys.

The *Labour Market Monthly* emphasizes the Nova Scotia employment situation and includes tables for Nova Scotia, its economic regions, and the Metropolitan Halifax area. The *Labour Force Monthly* coincides with Statistics Canada's Labour Force Survey release dates and will be available on our web site that day:

Highlights

LFS Release – September 2006

(October 2006 will be released November 3, 2006)

Refer to *Appendix I* for a series of statistical tables indicating key labour force characteristics for current month, last month and same month a year ago:

Employment Situation:

- Table 1 – Basic Characteristics, Canada/Provinces
- Table 2 – NS Economic Regions/Halifax CMA
- Table 3 – Job Tenure, Canada/Provinces
- Table 4 – Employment by Sector, Canada & NS
- Table 5 – CMAs, Canada

Appendix II provides a glossary of definitions, concepts/methods and sources associated with the labour market information covered in the *Labour Market Monthly* publication.

There were no direct quotes by Statistics Canada in this month's labour force release in *The Daily* in respect to Nova Scotia.

Seasonally Adjusted (month-over-month and year-over-year)

In Nova Scotia September 2006, labour force declined 0.2 per cent over August 2006 to 476,300 and declined 0.8 per cent over September 2005. Employment increased 0.5 per cent over August 2006 to 439,400 and increased 0.1 per cent over September 2005. Unemployment declined 7.8 per cent over August 2006 to 36,900 and declined 10.2 per cent over September 2005. The unemployment rate declined 0.7 percentage points over August 2006 to 7.7 per cent and declined 0.9 percentage points over September 2005.

Source: Statistics Canada, *Labour Force Survey*, Catalogue No. 71-001-XIE

In Canada September 2006, labour force remained unchanged over August 2006 at 17.6 million and increased 1.6 per cent over September 2005. Employment increased 0.1 per cent over August 2006 to 16.5 million and increased 1.9 per cent over September 2005. Unemployment declined 0.9 per cent over August 2006 to 1.1 million and declined 2.9 per cent over September 2005. The unemployment rate declined 0.1 percentage points over August 2006 to 6.4 per cent and declined 0.3 percentage points over September 2005.

On a seasonally adjusted three-month moving average basis, the unemployment rate for the Halifax Census Metropolitan Area (CMA) was 5.6per cent in September 2006 — an increase of 0.3 percentage points over August 2006. In September 2006, the Halifax CMA rate stood as the lowest rate east of Quebec City.

Year-to-date¹

The labour market trends established for the first eight months of 2006 carry over into September. For the first nine months of 2006, the demand for labour (employment) stands at 441,400, which is down slightly (0.4%) from the same period in 2005. Employment for the first eight months was 441,600, down 0.5 per cent from the same period last year. The employment level, however, still remains close to the high employment levels started in 2004 (442,200). Thus, the employment rate of 57.9 per cent for the first nine months still remains close to record annual level of 58.4 per cent reported in 2004.

The labour supply (labour force) at 480,200 is down 0.8 per cent for the first nine months. For the first eight months labour supply was also down 0.8%. The labour force participation also reflects the fall in labour supply with a decline of 0.7 percentage points to 63.0 % for the first nine months. The net impact of a larger decline in labour supply is an unemployment rate of 8.1% which is down 0.4 percentage points for the first nine months of 2006 compared to the same period in 2005.

As noted in previous reports, the dynamism in the economy is still centered in the Service Sector, which had an overall employment growth rate of 1.1 per cent, for the first nine months of 2006. Within this sector, there were both positive and negative changes. Employment growth was found in the Retail and Wholesale sector (1.2%), Business, Building and Support Services (20.6%), Health Care and Social Assistance (5.8%) and Public Administration (7.8%), while shrinkages occurred in Transportation and Warehousing (11.2%), Professional, Scientific and Technical Services (7.1%), Educational Services (1.3%) and Accommodation and Food Services (9.9%). Finance, Insurance and Real Estate, with a 0.1 per cent change, remains about the same at 21,700.

Some of the gains in the Service Sector reflect continued spending by consumers. For the first seven months of 2007, retail sales are up 6.7 per cent while residential capital investment is up 9.9 per cent for the first half of 2006.

The Good Sector employment shrunk slightly (0.4%) and employment losses were spread over all industries. Some of those losses are reflected in the decline of international exports. For the first six months of 2006, the value of domestic exports for international merchandise trade is down 7.1 per cent.

Feature - Employment Profile, 15-24 Year Olds— Students vs. Non-students, Summer Months, Nova Scotia

Summer Months (May to August)

Since a majority of students are not attending school in the summer, supplementary questions are asked from May to August of respondents (aged 15 to 24 years of age), that are included in the LFS, to monitor their labour market situation.

- *Students* are identified as those who are attending school full-time in March and who are on summer break. Those in this age group are classified as¹:
 - *returning students*—those that report that they were attending school full-time in the previous March and intend to return to school full-time in the fall.
 - *other students*—those that report that they were full-time students in the previous March but do not intend to return to school full-time in the fall, or are uncertain of their plans
- *Non-students*—those not enrolled full-time in any educational institutions.

Following is an overview of the compilation of the student/non-student population, 15-24 years of age, in the Nova Scotia labour market during May through August. *Note that numbers will not always total, due to rounding.*

During the four summer months of 2006, the Labour Force Survey (LFS) reported an average of 762,700 people aged 15 and over in Nova Scotia, a participation rate (labour force to population ratio) of 64.4 per cent, an unemployment rate (unemployment to labour force ratio) of 7.8 per cent and an employment rate (employment to population ratio) of 59.4 per cent.

The 15-24 year age group accounted for 16.2 per cent of the total population 15 years of age and over. For this group during the May to

August period, the average participation rate, unemployment rate, and employment rate averaged 74.5 per cent, 13.4 per cent and 64.5 per cent, respectively.

In the May to August 2006 period, 65.7 per cent of the population 15-24 years of age was represented by full-time students. The participation rate, unemployment rate and employment rate of these full-time students was 67.1 per cent, 14.3 per cent and 57.7 per cent, respectively. Those noted as non-students reported a participation rate, unemployment rate and employment rate of 88.6 per cent, 12.4 per cent and 77.6 per cent, respectively.

Source: Statistics Canada, Labour Force Survey, Catalogue No. 71-001-PPB

Although the population 15-24 years of age declined 4.0 per cent from summer 2005 to summer 2006, there was a 2.7 per cent growth in the number of full-time students (largely due to the "other student" component—those full-time students from March that were not planning, or not sure of plans, to return to school in the fall) and a decline of 5.4 per cent in the number of non-students. Within the 15-24 year ago group, full-time students' employment rate increased 2.2 percentage points to 57.7 per cent (returning students +1.5 per cent to 54.7 per cent, and other +3.3 per cent to 72.3 per cent), while non-students reported a 0.5 per cent decline to 77.6 per cent.

Other Key Employment Indicators

Along with the monthly Labour Force Survey, several other data sources provide an overview of changes occurring in the labour market of the province. The following tables reflect some of those activities.

Total Wages & Salaries

3rd quarter 2006 will be released November 30, 2006)

Year-to-date (January-June)

In the first half of 2006, total wages and salaries were \$7,095.0 billion in Nova Scotia. This represented a growth of 4.0 per cent over the first half 2005. Canada's total wages and salaries figure, of \$312,284.6 billion in the first half of 2006, exhibited a 6.0 per cent increase the same period a year earlier. In the first half of 2006, the Nova Scotia figure represented 2.3 per cent of the national total.

Total Wages & Salaries, Canada & Nova Scotia

	(\$billions) Jan-June 2005	Jan-June 2006
Canada	294,565.0	312,284.6
Nova Scotia	6,818.9	7,095.0

Labour income estimates are based on the North American Industry Classification System (NAICS) and are released quarterly in conjunction with the National Income and Expenditure Accounts estimates.

Source: Statistics Canada, Catalogue No. 13F0016XPB; CANSIM Table 382-0006

For Nova Scotia in the first six months of 2006, \$1,365.2 billion of total wages and salaries was from the goods producing sector and \$5,729.8 billion was from the service producing sector, representing 19.2 per cent and 80.8 per cent, respectively, of the total. Manufacturing industries were the major component within the goods producing sector (46.0 per cent). The greatest contributors to the service producing sector—professional and personal service industries, and trade—at 18.9 per cent and 17.5 per cent, respectively.

Average Weekly Earnings (including overtime)

(August 2006 will be released October 30, 2006)

Year-to-Date (January-July)

In the January to July period of 2006, the average earnings for all employees in Nova Scotia increased \$17.39, or 2.8 per cent, over the same period in 2005 to \$648.73 per week. In comparison, the average earnings for all employees in Canada rose \$25.26 or 3.5 per cent, to \$746.40 per week. Nova Scotia's 2006 year-to-date average weekly earnings were 86.9 per cent of the Canadian average.

In Nova Scotia average weekly employment was 390,053 (all employees as reported in SEPH) in January to July 2006, a 1.5 per cent increase from the same period in 2005. In comparison,

Canada's weekly employment was 13.9 million, an increase of 2.0 per cent from the same period in 2005.

In the January to July 2006 period, average weekly earnings in Nova Scotia's goods producing sector increased 4.5 per cent over the same period in 2005 to \$791.63, while in the service producing sector, average weekly earnings increased 2.5 per cent to \$621.09. In industries for which data is available, year-to-date 2006 average weekly earnings ranged from \$302.83 in accommodation and food services industries to \$871.86 in finance & insurance.

Employment Insurance

(August 2006 will be released October 24, 2006)

Year-to-Date (January to July)

In the January to July 2006 period, there was a monthly average of 42,759 beneficiaries in Nova Scotia that received regular EI benefits. This figure was 2.7 per cent lower than the comparable period in 2005. Nationwide, there was an average of 811,680 beneficiaries or 5.0 per cent fewer than the January to July 2005 monthly average.

Source: Statistics Canada, CANSIM Table 276-0001 and 276-0005

In Nova Scotia a total of \$447.4 million was paid in EI benefit payments during January to July 2006. This figure was 5.0 per cent higher than in January to July 2005. There was \$9.1 billion paid in EI benefit payments nationwide during January to July 2006, or 0.3 per cent more than in the same period in 2005.

Public Sector Employment – Nova Scotia

3rd quarter 2006 will be released November 29, 2006

Year-to-date (January-June)

Data from the Statistics Canada *Public Sector FMS Reports* indicates that, in the first half of 2006 there were 113,904 public sector employees in Nova Scotia, an increase of 6.6 per cent over the first half of 2005. The government portion increased 6.8 per cent to 106,487, while the business enterprises portion rose 4.1 per cent to 7,417. The federal government figure declined 0.1 per cent or by 34 people. The military component of federal employees in Nova Scotia decreased 2.9 per cent or by 321 persons to 10,630 in the first half of 2006.

Appendix II - Glossary

Labour Force Survey (LFS)

The following are key definitions used in the LFS. For a more detailed dictionary of concepts and definitions refer to Statistics Canada, *Guide to the Labour Force Survey*, Catalogue No. 71-543-GIE. Statistics Canada outlines other labour force information products and services in *Labour Force Survey Products and Services*, Catalogue No. 71-544-XIE.

Population: The target population covered by the survey corresponds to all persons aged 15 years and over residing in the provinces of Canada, with the exception of the following: 1) persons living on Indian Reserves, 2) full-time members of the regular Armed Forces, and 3) persons living in institutions.

Labour Force: The civilian non-institutional population 15 years of age and over that, during the survey reference week, was employed or unemployed and actively looking for work. Prior to 1966, persons aged 14 and over were covered by the survey.

Employment: Employed persons are those persons who, during the reference week, did any work for pay or profit, or had a job and were absent from work.

Full-time Employment: Refers to those persons who usually work 30 hours or more per week at their main or only job.

Part-time Employment: Refers to those persons who usually work less than 30 hours per week at their main or only job.

Unemployment: Unemployed persons are those persons who, during the reference week, were available for work and were either on temporary layoff, had looked for work in the past four weeks, or had a job to start within the next four weeks.

Not in the Labour Force: Persons not in the labour force are those who, during the reference week, were unwilling or unable to offer or supply

labour services under conditions existing in their labour markets, that is, they were neither employed nor unemployed.

Unemployment Rate: Unemployment rate is the number of unemployed persons expressed as a percentage of the labour force. The unemployment rate for a particular group (age, sex, marital status, etc.) is the number unemployed in that group expressed as a percentage of the labour force for that group.

Participation Rate: The total labour force expressed as a percentage of the population aged 15 years and over. The participation rate for a particular group (for example, women aged 25 years and over) is the labour force in that group expressed as a percentage of the population for that group.

Employment Rate: The number of employed persons expressed as a percentage of the population 15 years of age and over. The employment rate for a particular group (age, sex, marital status, province, etc.) is the number employed in that group expressed as a percentage of the population for that group.

Seasonal Adjustment (s.a.): Fluctuations in economic time series are caused by seasonal, cyclical and irregular movements. A seasonally adjusted series is one from which seasonal movements have been eliminated. Seasonal movements are defined as those which are caused by regular annual events such as climate, holidays, vacation periods and cycles related to crops, production and retail sales associated with Christmas and Easter. It should be noted that the seasonally adjusted series contain irregular as well as long-term cyclical fluctuations. The seasonal adjustment program is a complicated computer program which differentiates between these seasonal, cyclical and irregular movements in a series over a number of years and, on the basis of past movements, estimates appropriate seasonal

factors for current data. On an annual basis, the historic series of seasonally adjusted data are revised in light of the most recent information on changes in seasonality.

Wages and Salaries

Wages and Salaries: Wages and salaries is an aggregate of many types of payments made to employees—regular remuneration, directors' fees, bonuses, commissions, gratuities, income in kind, taxable allowances, retroactive wage payments and stock options. Wages and salaries are estimated on a "gross" basis that is, prior to deductions for employees' contributions to income tax, employment insurance, pension funds, etc. Supplementary labour income, which is defined as payments made by employers for the future benefit of their employees, comprises employer contributions to employee welfare, pensions, workers compensation and employment insurance. Wages and salaries, as well as, supplementary labour income are the components of Labour Income (all compensation paid to employees).

Wages and salaries estimates are derived to supply the System of National Accounts (SNA) with the Labour Income component of the Gross Domestic Product (GDP). Monthly estimates of wages and salaries are published, on a quarterly basis, for 16 industry groups. Industrial coverage is based on the North American Standard Industrial Classification System (NAICS).

For a more detailed dictionary of concepts and definitions from Statistics Canada, *Estimates of Labour Income*, Catalogue No. 13F0022-XIE or refer to:

<http://www.statcan.ca/cgi-bin/imdb/p2SV.pl?Function=getSurvey&SDDS=2602&lang=en&db=IMDB&dbg=f&adm=8&dis=2>

Average Weekly Earnings

Average Weekly Employment: For purposes of developing average weekly employment and average weekly earnings data, the target

population of the Statistics Canada Survey of Employment, Payrolls and Hours (SEPH), is composed of all employers in Canada, except, 1) those owners or partners of unincorporated business and professional practices, the self-employed, unpaid family workers, persons working outside Canada, casual workers for whom a T-4 is not required; 2) agriculture, fishing and trapping, private household services, religious organizations; and 3) the military. It draws its sample from the Business Register (BR) maintained by the Business Register Division of Statistics Canada and from a list of all businesses registered in Canada Customs and Revenue Agency's Business Number program with one or more active payroll deduction accounts.

Average Weekly Earnings: The Survey of Employment, Earnings and Hours is produced from the combination of the Business Payroll Survey results and the payroll deductions administrative data received Canada Customs and Revenue Agency.

SEPH is Canada's only source of detailed information on the total number of paid employees, payrolls, and hours at detailed industrial, provincial and territorial levels.

For further information about the *Survey of Employment, Payrolls and Hours* (SEPH), No. 2612, refer to Statistics Canada, *Employment, Earnings and Hours*, monthly, Catalogue No. 71-002-XIB or annual, Catalogue No. 72F0023-XCB; *CANSIM Tables 281-0023, 281-0024, 281-0026 and 281-0027*.

Employment Insurance (EI)

Employment Insurance Statistics: The *Employment Insurance Statistics Monthly* reports official statistics on the operation of the *Employment Insurance Statistics Program* and provides complementary labour market statistics. Statistics are produced from an administrative data source and may, from time to time, be affected by changes in the *Employment Insurance Act* or administrative procedures.

Number of Beneficiaries: The number of beneficiaries represents a count of persons who received Employment Insurance (EI) benefits during the *Labour Force Survey* reference week (usually containing the 15th day of the month).

Regular Benefit Payments: The regular benefit payments series measures the total of all monies received by individuals for the entire month, e.g., regular, training, job creation, sickness, self-employment, maternity, adoption, parental, retirement, fishing, work sharing and compassionate benefits.

For further information related to the EI data see Statistics Canada, *CANSIM Tables 276-0001 and 275-0006, 276-0011, 276-0015 and 276-0006.*

Public Sector

Public Sector: The population of public sector employment consists of all institutional units controlled and mainly financed by governments (federal, provincial, territorial and local) in Canada, including their business enterprises. Thus, the term “government” presented in the Statistics Canada’s Public Sector Employment Survey includes all organizations controlled by any of the three levels of government that are not-for-profit and perform non-commercial services. The Canadian military (regular forces and reservists) and uniformed RCMP members are included in the federal government. Organizations controlled by government that operate as commercial corporations (such as Canada Post or Hydro-Quebec) are considered government business enterprises. The two combine to give the total public sector.

Employment: Employment is a measure of the number of individuals who work within a given industry. In other words, employment refers to the number of persons drawing pay for services rendered or for paid absences, regardless whether employed on a full time, part-time or on a temporary basis.

Wages and Salaries: Wages and salaries include directors' fees, bonuses, commissions, gratuities, income in kind, taxable allowances,

and retroactive wage payments. Wages and salaries are estimated on a gross basis, that is, before deductions for employees' contributions to income tax, unemployment insurance, or pension plans. Wages and salaries accumulating over time, for example, retroactive payments, are accounted for in the month and year in which they are paid. Supplementary labour income, such as employer contributions to pension, medical or similar plans are not included.

Further information on public sector employment can be downloaded from Statistics Canada, *Canadian Statistics* module; *CANSIM Tables 183-0002 and 183-0004.* As well, more detailed information, definitions, data sources and methods for Survey No. 1713 are available at:

<http://www.statcan.ca/cgi-bin/imdb/p2SV.pl?Function=getSurvey&SDDS=1713&lang=en&db=IMDB&dbg=f&adm=8&dis=2>
