Facts

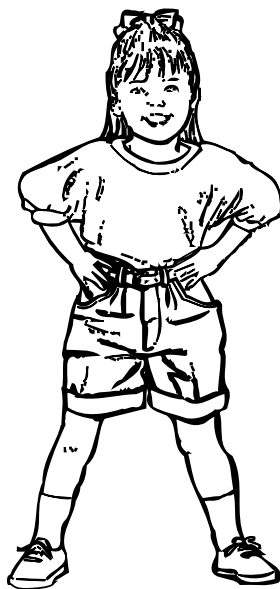

The Nova Scotia Children's Oral Health Program – MSI

Gleam TEAM
Your Partners for Life.

Did you know?

In Nova Scotia the cost of most basic dental services and treatments for children are covered by MSI up to the end of the month in which the child turns 10.

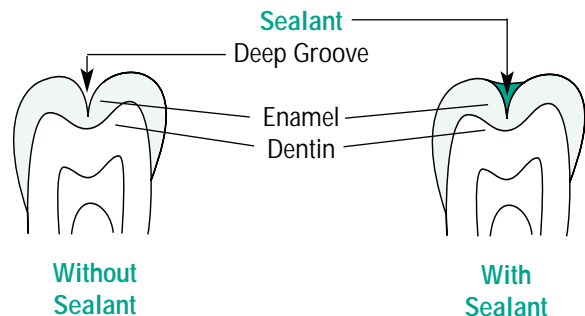

Every year the MSI program will cover:

- One dental examination
- Two x-rays
- One preventive service (This could include brushing and flossing instruction, and/or cleaning)
- Nutritional counselling
- Fillings

Special Consideration

Parents of children with unique financial needs who do not meet program guidelines may apply to MSI for Special Consideration. This is applicable only to children up to the end of the month in which they turn 10 years of age.

Sealants are covered **once per lifetime** on all first permanent molars with deep grooves. A sealant is a clear or shaded, thin plastic material that is placed on chewing surfaces of back teeth (molars) where decay happens most often.

Fluoride Treatments are sometimes covered. Check with the dentist to see if your child qualifies for a fluoride treatment paid for by MSI.

For more information, contact your local dentist or call MSI at 1-888-846-9199.

Begin regular dental visits by one year of age.
