Why subscribe to CCOHS' legislation service?

We simplify the compliance process

Acts, regulations and amendments may be widely available on the Internet, but that's where compliance begins, not ends. Here are **17 reasons to sign up** for CCOHS's Canadian enviroOSH Legislation.

We give you your time back

1. **Find out what's new when it happens** – no more multi-site searching for new acts and regulations. Canadian enviroOSH Legislation's monthly update service consolidates all new announcements so that you don't have to.
2. **Keep on top of changes.** We monitor proposed amendments by checking bills of the various legislatures. The monthly update service uses highlighted text to identify changes in bill status and provides links to government websites containing copies of the bills.
3. **No more need for gazettes.** Save the time spent scanning gazettes. We alert you monthly and incorporate regulatory amendments – monthly on the web service and quarterly on the CD-ROM service.
4. **No more hunting around for in force dates.** New or amending legislation often contains provisions that have not been proclaimed *in force*. It's time consuming to monitor these proclamations – let us do it for you. Our monthly update service informs you of all proclamations and the affected acts. We then make the proclaimed sections available, in full text, through the Canadian enviroOSH Legislation service.
5. **No more fussing with binder inserts.** Canadian enviroOSH Legislation is 100% electronic. We do the inserting for you, electronically.

We give you the goods

6. **Find what you're looking for.** A bill title is often a poor indicator of any act(s) it amends. Our update service lists all relevant acts for each bill.
7. **Get the bottom line.** Canadian enviroOSH Legislation's update service identifies amended legislation, summarizes the amendments' significance, provides links to the full text legislation, and uses highlighted text to identify the changes.
8. **Get the back story.** Canadian enviroOSH Legislation posts a complete amendment history at the top of all documents. Other services don't

always offer this feature, yet it's a vital guide to the completeness and currency of the legislation.

We make it simple

9. **Consistent formatting simplifies and speeds your reading and absorption.** Canadian enviroOSH Legislation formats all acts and regulations the same way, regardless of jurisdiction.
10. **Easily search for topics across jurisdictions.** Searching a topic across the websites of as many as 14 jurisdictions is very difficult, involving different search protocols. Canadian enviroOSH Legislation allows you to easily search all jurisdictions or just a few, simultaneously.
11. **Bookmark only one URL.** Using the Internet to maintain a legislation collection requires a number of URLs, which can be subject to change. Canadian enviroOSH Legislation's collection has just one entry point.
12. **We compile guidelines and codes of practice for you.** These can be widely scattered on government websites – we include them with the relevant legislation.
13. **We include what's missing.** Tables and graphics are sometimes missing from documents on government sites.
14. **We link it all together, even standards.** Legislation documents on government Internet sites are standalone. Canadian enviroOSH Legislation hyperlinks related documents, including guidelines and standards.

We offer what others can't

15. **Access to full text of referenced standards** from the Canadian Standards Association (CSA) and the Canadian General Standards Board (CGSB). Added bonus: Canadian enviroOSH Legislation service is often the only source of earlier editions of standards still cited in legislation.
16. **Access to new editions of existing standards**, even if not yet cited by the legislation.
17. **Unparalleled client support.** From useful user documentation, tutorials and tips to ongoing content and technical support, we offer a level of support and expertise unmatched by any other service.

What our clients are saying

"Canadian enviroOSH Legislation (plus Standards) is invaluable to us in our compliance auditing work. It provides updated legislation from every province and territory and referenced CSA standards, making it easy for us to compare and assist in compliance for the legislative requirements.

A tremendously useful tool in keeping us updated as well as giving us quick and easy access to obtain the answers we need. By supporting our ISO 14001 & OHSAS 18001 requirements, the Legislation service also helps us surpass our SHE best management practices."
