## About e-Learning

Foster, deliver, and facilitate learning anytime and anywhere there is an computer!

### What is e-Learning

e-Learning refers to learning and supportive resources that are made available through a computer. Although there are many definitions and varieties of e-Learning, CCOHS' e-Learning courses are delivered via the web.

### Features

If you like to learn at your own pace and in the comfort of your own environment our e-Learning courses are for you. Using a computer, you work through the modules using the many features of electronic learning such as:

- built-in links to supporting information and documents
- opportunity for interaction with course instructor(s)
- engaging graphics
- interactive learning activities

Other helpful features include:

- printable notepad
- bookmarking
- rollover "help bubbles"
- virtual tour of module navigation and learning features

### Benefits

## ▶ WHMIS for Managers/Supervisors

**NEW!**  
*e-Learning course now available!*

### Course Description

CCOHS developed this course by drawing upon the knowledge and experience accumulated from its information services since WHMIS (Workplace Hazardous Materials Information System) began. The purpose of this course is to help managers and supervisors understand and meet their health and safety responsibilities, including WHMIS.

The course familiarizes people who have supervisory and management responsibilities with the system used across Canada to provide safety information about hazardous products in workplaces. Participants will learn about their WHMIS duties and responsibilities, WHMIS symbols and their meanings, product labels, and material safety data sheets (MSDSs). The course also includes valuable, practical advice, and basic health and safety measures you can take to protect your employees and prevent workplace injuries and illnesses.

Topics include:

- Basics of WHMIS and Duties of the Employer
- Duties And Responsibilities As A Manager Or Supervisor
- Components Of A WHMIS Program
  - Hazard Communication
  - WHMIS Classes And Their Symbols
  - Labels
  - Material Safety Data Sheets (MSDSs)
- Safe Use And Handling Of Hazardous Materials
- Education And Training
- Helpful Resources

Section 1 – Introduction

## WHMIS for Workers - Preview

The following pages are extracted from CCOHS' "WHMIS for Workers" e-training program. The full program contains the following sections:

- Basics of WHMIS
- WHMIS Classes and Their Symbols
- Labels
- Material Safety Data Sheets (MSDS)
- Safe Use and Handling Tips
- Summary and Self Assessment

[Click here for more details about the program.](#)

Section 1 – Introduction

### Introduction to WHMIS for Workers

WHMIS stands for **Workplace Hazardous Materials Information System**. We will cover these topics in this module.

Introduction to

- Basics of WHMIS
- WHMIS Classes and their Symbols
- Labels
- Material Safety Data Sheets (MSDS)
- Safe Use and Handling Tips

Are you ready to get started? Click the **Next** button to start the module. If you would like to learn about the navigation options of this module, click the **Help** button, then select **Tour**.

CCOHS' Series Client Service Webinars  
 November 2005

## Section 1 – Introduction

### Why take this course?

In this course, you will learn to:

- recognize the symbols for each WHMIS class
- identify the hazards linked to each class
- get information about hazards and protective measures from labels and Material Safety Data Sheets
- take some basic measures to protect yourself

## Section 2 – Basics of WHMIS

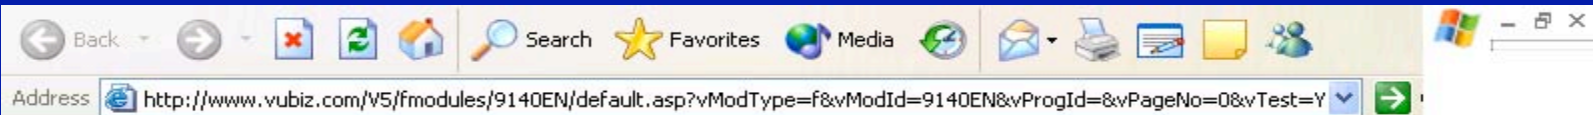

### Basics of WHMIS

In this section, you will learn about the basics of WHMIS.

- What WHMIS is
- Why you need to take WHMIS training
- What the responsibilities of workers, employers and suppliers/manufacturers are

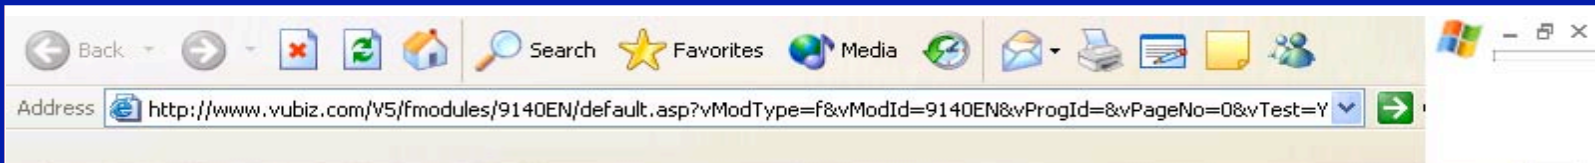

## Section 2 – Basics of WHMIS

### Controlled Products

The WHMIS laws set out rules to determine if a workplace product is "hazardous". The rules are based on properties such as toxicity, flammability and reactivity. If one or more of the rules applies to a product, it is called a "controlled product".

If there are controlled products in your workplace, you need WHMIS education and training.

## Section 2 – Basics of WHMIS

### Responsibilities

Workers, employers and suppliers/manufacturers all have specified responsibilities by law.

As a worker, you must:

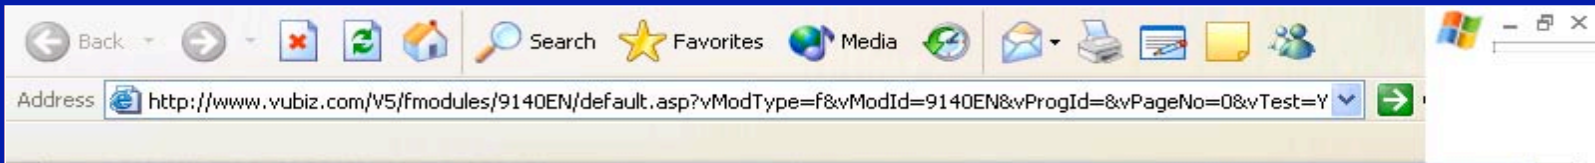

- take part in the training programs
- follow safe work procedures
- inform your employer about any hazards you may see in the workplace
- inform your employer about potential problems, such as labels on containers that are no longer readable, damaged or lost

Click on the green words for the responsibilities of the **employer** and **supplier/manufacturer**.

MENU ? HELP REPLAY MUTE NOTES X CLOSE MODULE page 8 of 10 BACK NEXT

## Section 2 – Basics of WHMIS

### End of Section: Quick Quiz

Using your computer mouse, drag the words on the left to their matching descriptions on the right.

Word		Description
WHMIS	<input type="text"/>	must identify workplace hazards and provide the right training.
Employers	<input type="text"/>	is an important way of making sure people know about the chemical hazards in the workplace.
Workers	<input type="text"/>	should follow safe work procedures.
"Controlled Products"	<input type="text"/>	each have specific responsibilities as described in WHMIS laws.
Workers, and Employers	<input type="text"/>	are products covered by WHMIS regulations
