* The yields refer to direct debt payable in Canadian dollars, excluding extendible issues and Canada Savings Bonds. Prior to 1975 some extendible issues are included but their inclusion does not materially affect the calculated average yields. From 1951 to 1958 the rates are the arithmetic averages of yields at month-end. From 1959 the yields shown are calculated from Wednesday mid-market closing prices and are for the last Wednesday of the month. / *Les rendements ci-dessus sont ceux des titres libellés en dollars canadiens émis par le gouvernement. Les obligations d'épargne du Canada et les émissions à échéance prorogable sont exclues du calcul. Cependant, certaines émissions à échéance prorogable sont incluses avant 1975. À partir de 1959, les rendements ci-dessus sont calculés à l'aide de la moyenne des cours acheteur et vendeur à la clôture le dernier mercredi du mois; de 1951 à 1958, ils représentent la moyenne arithmétique des rendements en fin de mois.*
