

Natural Gas Rebate Program

The rebate program applies during winter months (October to March)

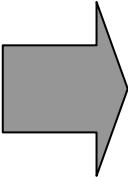

EUB approves regulated gas costs (before start of month)
This is the cost of gas that will appear on most consumer bills.

If price of gas is more than \$5.50/GJ for 2 out of 3 regulated gas companies, a rebate will be issued for that month

If price of gas is less than \$5.50/GJ for 2 out of 3 regulated gas companies, there will be no rebate that month

Rebates Will Directly Reduce Gas Bills
