FIRST QUARTER UPDATE
JUNE 30, 2003

Alberta Heritage Savings Trust Fund

QUARTER IN REVIEW

World stock markets surged ahead this quarter. Better than expected corporate profit reports and low interest rates helped fuel the recovery in the stock market. The information technology, health care and telecommunications sectors posted the strongest gains of the ten industry sectors in Canada, recording increases of 21.7%, 21.2% and 20.1% respectively.

The US stock market measured by the Standard & Poors' 500 Index, increased by 15.4% in US dollars and 6.5% in Canadian dollars. The Canadian stock market measured by the Toronto Stock Exchange, S&P/TSX Composite Index, increased by 10.6% while the Non-North American stock market measured by the MSCI EAFE Index increased by 10.0% in Canadian dollars. The Canadian bond market measured by the Scotia Capital Bond Universe Index increased by 5.1%. The value of the US dollar weakened against the Canadian dollar over the quarter. At June 30, 2003, \$1 US dollar purchased \$1.36 Canadian compared to \$1.47 Canadian at March 31, 2003. As a result, the appreciation in value of US dollar equity investments over the quarter was partially reduced when translated into Canadian dollars.

At June 30, 2003, the fair value of the Heritage Fund stood at \$11.7 billion up from \$11.1 billion at March 31, 2003. During the quarter, the increase in fair value of \$786 million was offset by transfers to the General Revenue Fund of \$199 million, resulting in a net increase of \$587 million. Overall, the Fund returned 7.1% from its investments this quarter, at fair value. Fund equity, at cost, remained unchanged at \$11.4 billion.

HERITAGE FUND - FAIR VALUE

(billions)

INVESTMENT INCOME

The Fund recorded net income of \$199 million during the first quarter of 2003-04. The Fund earned \$95 million from investments in equity markets, \$77 million from investments in bonds, notes and short-term paper, \$10 million from real estate investments and \$17 million from absolute return strategies.

NET INVESTMENT INCOME (LOSS)

(millions)

	Fixed Income	Equity Income	Real Estate	Absolute Return Strategies	Total
03-04 1st Qtr	\$ 77	\$ 95	\$ 10	\$ 17	\$ 199
02-03 Fiscal Yr	286	(1,224)	39	5	(894)
01-02 Fiscal Yr	444	(276)	38	-	206
00-01 Fiscal Yr	532	157	17	-	706
99-00 Fiscal Yr	610	539	20	-	1,169

FORECAST NET INCOME

The forecast net income for the year ended March 31, 2004 is \$440 million. On a consolidated basis, the forecast net income is \$426 million. The consolidated forecast net income excludes income from holdings of Provincial Corporation debentures.

HERITAGE FUND NET INCOME

(millions)

CHANGE IN NET ASSETS

The Heritage Fund accounts for its investments on a cost basis of accounting. Investment income on a cost basis excludes unrealized gains and losses. Investment income on a fair value basis includes unrealized gains and losses. The investment income on a fair value basis for the three months ended June 30, 2003 totals \$786 million.

CHANGES IN NET ASSETS

(millions)

	Three Months Ended	
	June 30, 2003	June 30, 2002
Fair value, beginning of period	\$ 11,075	\$ 12,414
Investment income (loss), cost basis*	199	(84)
Change in unrealized appreciation (depreciation) in value of investments	587	(498)
Investment income (loss), fair value basis	786	(582)
Transfers to the General Revenue Fund**	(199)	-
Fair value, end of period***	\$ 11,662	\$ 11,832

* includes interest, dividends, realized gains and losses, derivative income and administration expenses

** see financial statements (Note 6)

*** includes investments of \$11,735 million less net current liabilities of \$73 million.

TRANSFERS TO GENERAL REVENUE FUND

All of the net income is transferred to the Province's main operating fund, the General Revenue Fund (GRF), and used for Albertans' priorities like health care, education, roads, tax reductions and debt repayment. Changes in unrealized gains and losses are not included in net income determined by the cost basis of accounting and therefore not transferred to the General Revenue Fund. The Fund's net income for the quarter ended June 30, 2003, amounted to \$199 million of which \$110 million was transferred to the General Revenue Fund in June and \$89 million remains payable to GRF. The cash transfer of \$110 million during the quarter is based on one quarter of forecast income for 2003-04 of \$440 million.

INVESTMENT VALUATION

Investments and investment income are recorded on the financial statements of the Heritage Fund at cost in accordance with government accounting policies. The fair value of the Fund and its investments are provided for information purposes. Management uses

fair value to assess the investment performance of the fund against market-based benchmarks.

For cost-based accounting, the Fund's policy is to write down the cost of those securities where the decline in value below cost is not considered temporary. On a quarterly basis, management reviews the Fund's investment portfolio to identify those securities where the fair value has declined significantly below cost. The Fund's net income of \$199 million for the quarter ended June 30, 2003 includes write-downs of public equities totaling \$1.7 million.

INVESTMENT ASSET MIX

The investment strategy is to invest in a diversified portfolio to optimize long-term returns at an acceptable level of risk. The policy asset allocation is reported in the Fund's 2003-06 business plan.

For the 2003-04 fiscal year, the policy asset mix for fixed income securities remains the same as the previous year at 35%. The policy mix for public equity investments decreases from 50% to 45% due to a reduction in Canadian equity investments by 5%. Real estate investments remain unchanged at 10%. Private equities and absolute return strategies are each expected to increase to 5% of total portfolio holdings.

The actual investment mix changed over the past quarter. Fixed income securities declined from 35.8% to 34.2%. Public equity investments increased from 52.9% to 54.7%. Real estate investments decreased from 7.9% to 7.7% of the Fund's total investment portfolio. Absolute Return Strategies also declined from 2.6% to 2.5% of the Fund's investment portfolio while private equity investments increased from 0.8% to 0.9%. These changes were largely due to the increase in market value of public equity investments over the quarter relative to other investments.

ASSET MIX POLICY PERCENT OF FAIR VALUE (percent)

	2003-04		2002-03	
	Policy Target	Actual Jun 03	Policy Target	Actual Mar 03

	100.0	100.0	100.0	100.0

* The underlying exposure for US and Non-North American equities and a portion of private equities is in local currency.

PERFORMANCE MEASUREMENT

HERITAGE FUND RATE OF RETURN

The Heritage Fund posted an overall positive rate of return of 7.1% this quarter, 40 basis points better than the benchmark return of 6.7%. The Fund earned positive returns from all asset classes.

The performance of the Heritage Fund is measured over the long term. Over the past four-year period, the fund generated an annualized return of 1.7%. The Heritage Fund is expected to generate a real rate of return of 5.0% at an acceptable level of risk over a moving four-year period.

HERITAGE FUND ANNUAL RETURNS AT FAIR VALUE

(percent)

The performance of the Heritage Fund investments is measured against various market-based indices. Value added by investment management is accomplished through asset mix decisions and security selection. The following sections describe the performance of the Fund's major asset classes in relation to their benchmarks.

FIXED INCOME INVESTMENTS

The Canadian bond market performed well this quarter. The Scotia Capital (SC) Bond Universe Index measures the performance of marketable Canadian bonds with terms to maturity of more than one year. Over the past quarter, the SC Bond Universe Index increased by 5.1% while the short term SC 91-Day T-Bill Index increased by 0.8%.

SC UNIVERSE BOND INDEX

	Benchmark		
	Actual Return	SC Bond Universe Index	Over (Under)
<u>LT Fixed income</u>	%	%	
Current Quarter	5.3	5.1	20 bps
One year	11.7	11.3	40 bps
Four years (annualized)	8.2	7.6	60 bps

	Benchmark		
	Actual Return	SC 91-Day T-Bill Index	Over (Under)
<u>ST Fixed income</u>	%	%	
Current Quarter	0.8	0.8	0 bps
One year	3.2	3.0	20 bps
Four years (annualized)	4.3	4.1	20 bps

The Fund's actual rate of return over the quarter from Canadian bonds was 5.3%, 20 basis points better than the benchmark SC Bond Universe Index. The Fund's return from short-term securities was 0.8% the same as the benchmark SC 91-Day T-Bill Index. Over four years, returns from long-term and short-term securities exceeded their benchmarks by 60 and 20 basis points respectively. The out-performance over four years was primarily due to a higher weight in corporate bonds and duration management. The Heritage Fund's total fixed income portfolio is internally managed through various pools and direct holdings.

Over the quarter, investments in bonds, notes, short term paper, provincial corporation debentures and loans declined from 35.8% to 34.2% of total investments. Total fixed income securities remain approximately unchanged over the quarter at \$4.0 billion.

CANADIAN EQUITY INVESTMENTS

During the quarter, there were economic concerns related to SARS, BSE disease and a strengthening of the Canadian dollar against the US dollar. Despite these factors, the Canadian stock market had strong performance in the quarter. The Toronto Stock Exchange (S&P/TSX) Composite Index which measures the performance of Canada's top companies in ten industrial sectors, increased by 10.6% for the three months ending June 30, 2003.

S&P / TSX

	Actual Return	Benchmark		
		S&P/TSX Index	Over (Under)	
<u>Canadian equities</u>	%	%		
Current Quarter	10.3	10.6	(30)	bps
One year	0.5	(0.3)	80	bps
Four years (annualized)	0.7	1.5	(80)	bps

The Heritage Fund's Canadian equity portfolio is held in various investment pools managed by internal and external managers. Over the quarter, the Fund's actual return from Canadian equities was 10.3% or 30 basis points below the benchmark S&P/TSX, due to an underweight position in technology securities. Over four years, the fund's return from Canadian equities was 1.5% or 80 basis points less than the benchmark S&P/TSX. Over the longterm, the under-performance was due to an over-weight position in growth oriented equities.

At June 30, 2003, investments in Canadian public equities totaled 22.3% or \$2.6 billion of the Heritage Fund investment portfolio compared to 21.4% or \$2.4 billion at March 31, 2003.

US EQUITY INVESTMENTS

The United States equity market showed positive gains this quarter. Better than expected corporate profit reports contributed to the increase in market prices. The Standard & Poor's 500 Index (S&P 500), which measures the performance of the top 500 American companies, increased by 6.5% over the quarter in Canadian dollars.

S&P 500

The Fund's actual rate of return over the quarter from US equities was 7.6% or 110 basis points better than the S&P 500. The out-performance was primarily due to a positive currency hedge return, a weighting towards US small capitalization stocks and good stock selection in US active mandates. Over four years, the Fund's US equity portfolio returned a negative 8.2%, 70 basis points better than the benchmark S&P 500 Index.

	Actual Return	Benchmark		
		S&P 500 Index	Over (Under)	
<u>US Public Equities</u>	%	%		
Current Quarter	7.6	6.5	110	bps
One year	(10.2)	(10.7)	50	bps
Four years (annualized)	(8.2)	(8.9)	70	bps

At June 30, 2003, investments in US equities totaled 15.9% or \$1.9 billion of the Heritage Fund investment portfolio compared to 15.8% or \$1.8 billion at March 31, 2003.

NON-NORTH AMERICAN EQUITY INVESTMENTS

The Non-North American equity market recorded strong gains this quarter. The Morgan Stanley Capital International Index for Europe, Australasia and the Far East (MSCI EAFE Index) measures the performance of approximately 1,000 companies on 21 stock exchanges around the world. The index increased by 10.0% over the year in Canadian dollars.

MSCI EAFE

	Actual Return	Benchmark		Over (Under)
		MSCI EAFE Index		
<u>Non-North American equities</u>	%	%		
Current Quarter	11.3	10.0	130	bps
One year	(15.7)	(16.6)	90	bps
Four years (annualized)	(7.0)	(8.7)	170	bps

The Fund's actual return over the quarter from Non-North American equities was 11.3% or 130 basis points better than the MSCI EAFE Index. The out-performance was due to superior stock selection. Over four years the Fund's Non-North American equity portfolio returned a negative 7.0%, 170 basis points better than the benchmark MSCI EAFE Index. The out-performance was due to superior stock selection for pacific region investments.

At June 30, 2003, investments in non-North American equities totaled 16.5% or \$1.9 billion of the Heritage Fund investment portfolio compared to 15.7% or \$1.7 billion at March 31, 2003.

REAL ESTATE INVESTMENTS

The Fund's real estate investments are held in the internally managed Private Real Estate Pool. Nearly half of the real estate portfolio is invested in retail, half in office and a small portion in industrial and residential. Approximately 70% of real estate holdings are located in Ontario, 28% in Alberta and 2% in British Columbia. The Fund's real estate portfolio earned 1.3% this quarter and 8.3% over 4 years. For the current quarter, the real estate portfolio returned 30 basis points above the benchmark. The real estate portfolio returned 150 basis points below the benchmark over four years due to a relatively larger position in lower performing Ontario and Alberta office properties. However, the market dominant nature of these properties make them highly sought after and lower yielding.

	Actual Return	Benchmark		Over (Under)
		CPI plus 5%*		
<u>Real estate</u>	%	%		
Current Quarter	1.3	1.0	30	bps
One year	9.7	7.9	180	bps
Four years (annualized)	8.3	9.8	(150)	bps

* Effective April 1, 2002, the benchmark changed from the Russell Canadian Property Index (RCPI) to CPI + 5%. Therefore, the benchmark for four years is a combination of RCPI and CPI + 5%.

At June 30, 2003, investments in real estate totaled 7.7% or \$901 million of the Heritage Fund investment portfolio compared to 7.9% or \$870 million at March 31, 2003.

ABSOLUTE RETURN STRATEGIES

Absolute return strategy investments were initiated late in the second quarter of last year. These strategies encompass a wide variety of investments with the objective of realizing positive returns regardless of the overall market direction. A common feature of many of these strategies is buying undervalued securities and selling short overvalued securities. Over the quarter, absolute return strategies generated a return of 2.8%, 160 basis points better than the benchmark Consumer Price Index (CPI) plus 6.0%.

	Actual	Benchmark		
		CPI plus	Over	
Absolute Return	Return	6%	(Under)	
Strategies	%	%		
Current Quarter	2.8	1.2	160	bps
One year	n/a	n/a	-	bps
Four years (annualized)	n/a	n/a	-	bps

At June 30, 2003, investments in absolute return strategies totaled 2.5% or \$291 million of the Heritage Fund investment portfolio compared to 2.6% or \$283 million at March 31, 2003.

The increase in expenses related to externally managed investment pools was primarily due to the new Absolute Return Strategy Pool which was initiated in the second quarter of 2002-03. Administrative expenses of this pool totaled \$1.5 million for the three months ended June 30, 2003 (June 30, 2002: nil). The increase in expenses from direct and internally managed investment pools resulted from additional staffing requirements and system improvements.

ADMINISTRATIVE EXPENSES

Administrative expenses include investment management, cash management, custodial and other expenses. External management and custodial fees are deducted directly from the income of externally managed investment pools. Internal administrative expenses are deducted from the internally managed pooled funds and also directly from the Fund.

In the first quarter of 2003-04 year, the administrative expenses charged directly to the Fund were \$665 thousand compared to \$420 thousand in the first quarter of 2002-03. The Fund's total administrative expense for the three months ending June 30, 2003, including amounts deducted from the investment income of the pooled funds, amounted to \$5.518 million or 0.047% of the Funds net assets at fair value compared to \$3.98 million or 0.034% of net assets for the quarter ended June 30, 2002.

Notes to the Financial Statements

June 30, 2003 (unaudited)

NOTE 1 AUTHORITY AND MISSION

The Alberta Heritage Savings Trust Fund operates under the authority of the Alberta Heritage Savings Trust Fund Act (the Act), Chapter A-23, Revised Statutes of Alberta 2000, as amended.

The preamble to the Act describes the mission of the Fund as follows:

"To provide prudent stewardship of the savings from Alberta's non-renewable resources by providing the greatest financial returns on those savings for current and future generations of Albertans."

NOTE 2 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES AND REPORTING PRACTICES

These financial statements are prepared in accordance with generally accepted accounting principles.

The accounting policies of significance to the Fund are as follows:

(a) Portfolio investments

Fixed-income securities, mortgages, equities, real estate investments and absolute return strategy investments held directly by the Fund or by pooled investment funds are recorded at cost. Cost includes the amount of applicable amortization of discount or premium using the straight-line method over the life of the investments.

Investments in loans are recorded at cost less any allowance for credit loss. Where there is no longer reasonable assurance of timely collection of the full amount of principal and interest of a loan, a specific provision for credit loss is made and the carrying amount of the loan is reduced to its estimated realizable amount.

Investments are recorded as of the trade date.

The cost of disposals is determined on the average cost basis.

Where there has been a loss in value of an investment in fixed-income securities, mortgages, equities, real estate and absolute return strategies that is other than a temporary decline, the investment is written down to recognize the loss.

The written down value is deemed to be the new cost.

(b) Investment Income

Investment income is recorded on the accrual basis where there is reasonable assurance as to its measurement and collectability. When a loan becomes impaired, recognition of interest income in accordance with the terms of the original loan agreement ceases. Any subsequent payments received on an impaired loan are applied to reduce the loan's book value.

Gains and losses arising as a result of disposals of investments are included in the determination of investment income. Income and expense from derivative contracts are included in investment income.

(c) Foreign Currency

Foreign currency transactions are translated into Canadian dollars using average rates of exchange, except for hedged foreign currency transactions which are translated at rates of exchange established by the terms of the forward exchange contracts. Exchange differences on unhedged transactions are included in the determination of investment income.

(d) Investment Valuation

Fair value is the amount of consideration agreed upon in an arm's length transaction between knowledgeable, willing parties who are under no compulsion to act. Fair values of investments held either directly by the Fund or by pooled investment funds are determined as follows:

- (i) Public fixed-income securities and equities are valued at the period-end closing sale price, or the average of the latest bid and ask prices quoted by an independent securities valuation company.

*(unaudited)***Note 2 (continued)**

- (ii) Mortgages, provincial corporation debentures and private fixed-income securities are valued based on the net present value of future cash flows. These cash flows are discounted using appropriate interest rate premiums over similar Government of Canada benchmark bonds trading in the market.
- (iii) The fair value of private equities is estimated by management.
- (iv) Real estate investments are reported at their most recent appraised value, net of any liabilities against the real property. Real estate properties are appraised annually by qualified external real estate appraisers.
- (v) The fair value of Absolute Return Strategy Pool investments are estimated by external managers.
- (vi) The fair value of loans is estimated by management based on the present value of discounted cash flows.
- (vii) The fair value of deposits, receivables, accrued interest and payables are estimated to approximate their book values.
- (viii) The fair value of investments and any other assets and liabilities denominated in a foreign currency are translated at the year-end exchange rate.

(e) Valuation of Derivative Contracts

Derivative contracts include equity and bond index swaps, interest rate swaps, forward foreign exchange contracts, equity index futures contracts and cross-currency interest rate swaps. As disclosed in Note 4, the value of derivative contracts is included in the fair value of pooled investment funds. The estimated amount receivable or payable from derivative contracts at the reporting date is determined by the following methods:

- (i) Equity and bond index swaps are valued based on changes in the appropriate market based index net of accrued floating rate interest.
- (ii) Interest rate swaps and cross-currency interest rate swaps are valued based on discounted cash flows using current market yields. The fair value of cross-currency interest rate swaps was not available in prior years. Consequently, no amount is provided for comparative purposes.
- (iii) Forward foreign exchange contracts and equity index futures contracts are based on quoted market prices.

The majority of the Fund's investments are held in pooled investment funds established and administered by Alberta Revenue. Pooled investment funds have a market based unit value that is used to allocate income to participants and to value purchases and sales of pool units. As at June 30, 2003, the Fund's percentage ownership, at market, in pooled investment funds is as follows:

	% Ownership	
	June 30, 2003	March 31, 2003
Internally Managed Investment Pools		
Canadian Dollar Public Bond Pool	38.9	38.1
Canadian Pooled Equity Fund	56.9	55.0

US Small/Mid Cap Equity Pool	26.9	26.9

- (a) The Consolidated Cash Investment Trust Fund is managed with the objective of providing competitive interest income to depositors while maintaining appropriate security and liquidity of depositors' capital. The portfolio is comprised of high-quality short-term and mid-term fixed-income securities with a maximum term-to-maturity of three years. As at June 30, 2003, securities held by the Fund have an average effective market yield of 3.18% per annum (March 31, 2003: 3.23% per annum).
- (b) The Canadian Dollar Public Bond Pool is managed with the objective of providing above average returns compared to the total return of the Scotia Capital Universe Bond Index over a four-year period while maintaining adequate security and liquidity of participants' capital. The excess return is achieved through management of portfolio duration and sector rotation. The portfolio is comprised of high quality Canadian fixed-income instruments and debt related derivatives. As at June 30, 2003, securities held by the Pool have an average effective market yield of 4.66% per annum (March 31, 2003: 5.41% per annum) and the following term structure based on principal amount: under 1 year: 2%; 1 to 5 years: 38%; 5 to 10 years: 33%; 10 to 20 years: 7%; over 20 years: 20%.
- (c) As at June 30, 2003, fixed-income securities held directly by the Fund have an average effective market yield of 3.50% per annum (March 31, 2003: 4.36% per annum). As at June 30, 2003, fixed-income securities have the following term structure based on principal amount: 1 to 5 years: 100%.

- (d) The Private Mortgage Pool is managed with the objective of providing investment returns higher than attainable from the Scotia Capital Universe Bond Index over a four-year period or longer. The portfolio is comprised primarily of high quality commercial mortgage loans (95.1%) and provincial bond residuals (4.9%). To limit investment risk, mortgage loans are restricted to first mortgage loans, diversified by property usage and geographic location, and include a small portion of NHA insured loans. As at June 30, 2003, securities held by the Pool have an average effective market yield of 5.94% per annum (March 31, 2003: 6.43% per annum) and the following term structure based on principal amount: under 1 year: 3%; 1 to 5 years: 30%; 5 to 10 years: 21%; 10 to 20 years: 29%; and over 20 years: 17%.
- (e) (e) As at June 30, 2003, Provincial corporation debentures have an average effective market yield of 7.32% per annum (March 31, 2003: 7.83% per annum) and the following term structure based on principal amounts: 5 to 10 years: 100%.
- (f) Investment in loans are recorded at cost. The fair value of loans is estimated by management based on the present value of discounted cash flows. As at June 30, 2003, investment in loans, at cost, include the Ridley Grain loan amounting to \$91,245,000 (March 31, 2003: \$91,245,000) and the Vencap loan amounting to \$6,114,000 (March 31, 2003: \$6,114,000).
- ◆ Under the terms of the loan to Ridley Grain, 11% Participating First Mortgage Bonds due July 31, 2015, interest is compounded semi-annually and payable annually to the extent of available cash flow and any shortfall is to be deferred and capitalized. The principal of \$91,245,000 and deferred interest is repayable on or before July 31, 2015. Deferred interest at June 30, 2003 amounted to \$76,189,320 (March 31, 2003: \$76,189,320). Grain throughput volumes are the main determinant of profitability of the grain terminal and the value of the loan to the Fund. Due to the uncertainty of forecasting the grain throughput volumes, income from the participating bonds is recognized when it is measurable and collectable.
 - ◆ The principal amount of the Vencap loan, amounting to \$52,588,000, is due July 2046 and bears no interest. Amortization ceased being recorded on the loan from December 31, 2000 onward.
- (g) The Domestic Passive Equity Pooled Fund is managed on a passive approach with the objective of providing investment returns comparable to the S&P/TSX Index. A portion of the portfolio is comprised of both publicly traded Canadian equities and structured investments replicating the S&P/TSX 100 Index and the S&P/TSX 60 Index. The other portion of the portfolio fully replicates the S&P/TSX. The Pool's investment in units of the Floating Rate Note Pool (FRNP) are used as the underlying securities to support the index swaps of the pool. FRNP is managed with the objective of generating floating rate income needed for the swap obligations in respect of structured investments in foreign equities, domestic equities and domestic bonds. Through the use of interest rate swaps, FRNP provides investment opportunities in high quality floating-rate instruments with remaining term-to-maturity of ten years or less.
- (h) The Canadian Large Cap Equity Pool consists of multiple portfolios of publicly traded Canadian equities. Each portfolio is actively managed by an external manager with expertise in the Canadian large cap equity market. The performance objective is to provide returns higher than the total return of the S&P/TSX Index over a four-year period. Return volatility is reduced through multiple manager investment style and market capitalization focus.
- (i) The Canadian Pooled Equity Fund is managed with the objective of providing competitive returns comparable to the total return of the

S&P/TSX Index while maintaining maximum preservation of participants' capital. The portfolio is comprised of publicly traded equities in Canadian corporations. Risk is reduced by prudent security selection and sector rotation.

- (j) The Canadian Small Cap Equity Pool consists of multiple portfolios of publicly traded Canadian equities with market capitalization of .15% of the S&P/TSX Index total market capitalization at time of purchase. Each portfolio is actively managed by an external manager with expertise in the Canadian small cap equity market. The performance objective is to provide returns higher than the total return of the S&P/TSX Index over a four-year period and returns higher than the Nesbitt Burns Small Cap Index over shorter time periods. Return volatility is reduced through multiple manager investment style and small capitalization focus.
- (k) Publicly traded US equities held in the S & P 500 Index Fund replicate the Standard & Poor's (S&P) 500 index. The performance objective is to provide returns comparable to the total return of the S&P 500 index over a four-year period. The Pool's investment in units of the Floating Rate Note Pool (FRNP) are used as the underlying securities to support the index swaps of the pool (see Note 3g).
- (l) The US Large Cap Equity Pool consists of multiple portfolios of publicly traded United States equities. Each portfolio is actively managed by an external manager with expertise in the US large cap equity market. The performance objective is to provide returns higher than the total return of the Standard & Poor's (S&P) 500 index over a four-year period. Return volatility is reduced through multiple manager investment style and large capitalization focus.
- (m) The US Small/Mid Cap Equity Pool consists of one portfolio of publicly traded United States equities. The portfolio is actively managed by an external manager with expertise in the small cap and mid cap US equity market. The performance objective is to provide returns higher than the total return of the Russell 2500 index over a four-year period.
- (n) The Europe, Australasia and Far East (EAFE) Core and Plus Equity Pools consist of multiple portfolios of publicly traded non-North American equities. EAFE Core portfolios are actively managed by external managers with European and Pacific Basin mandates. EAFE core managers have constraints on foreign currency management and deviations from the MSCI EAFE index asset mix by country. The EAFE Plus portfolios are actively managed by external managers with less constraints on country allocation, stock selection, currency management and investments in emerging markets. The performance objective is to provide returns higher than the total return of the Morgan Stanley Capital International (MSCI) EAFE index over a four-year period.
- (o) The externally managed EAFE Passive Equity Pool consists of one portfolio of non-North American publicly traded equities that replicate the MSCI EAFE index. The performance objective is to provide returns comparable to the total return of the MSCI EAFE index over a four-year period.
- (p) The Private Real Estate Pool is managed with the objective of providing investment returns higher than the Consumer Price Index plus 5%. Real estate is held through intermediary companies which have issued to the Pool, common shares and participating debentures secured by a charge on real estate. Risk is reduced by investing in properties that provide diversification by geographic location, by property type and by tenancy. As real estate returns are positively correlated to inflation and negatively correlated to returns from fixed income securities and equities, the Pool provides diversification from the securities market with opportunities for high return.

- (q) The Absolute Return Strategy Pool is managed with the objective of providing investment returns higher than the Consumer Price Index (CPI) plus 6%. The Pool uses external managers who employ various investment strategies. These strategies are expected to produce absolute positive investment returns with lower volatility.
- (r) Private Equity and Income Pools are managed with the objective of providing investment returns higher than the Consumer Price Index (CPI) plus 8.0%. The Private Equity portfolio consists of the Private Equity Pool, PEP98, PEP02, Foreign Private Equity Pool 2002 and the Private Income Pool. Private equity investments are held in institutionally sponsored private equity pools. Risk is reduced by avoiding direct investments in private companies and by limiting holdings in any single pool. The Private Income Pool allows unit holders to participate as equity investors in infrastructure related projects.
- (s) Where there has been a loss in value of an investment that is other than a temporary decline, the cost of the investment is written down to recognize the loss (see Note 2 (a)). Where the fair value remains less than cost, after recording a writedown, it is management's best judgement that the decline in value is caused by short term market trends and are temporary in nature.

NOTE 4 DERIVATIVE CONTRACTS

Derivative contracts are financial contracts, the value of which is derived from the value of underlying assets, indices, interest rates or currency rates. The Fund uses derivative contracts held indirectly through pooled investment funds to enhance return, manage exposure to interest rate risk and foreign currency risk and for asset mix management purposes. The notional value of a derivative contract represents the amount to which a rate or price is applied in order to calculate the exchange of cash flows.

- (i) A swap is a contractual agreement between two counter-parties to exchange a series of cash flows based on a notional amount. An equity or bond index swap involves the exchange of a floating interest rate cash flow for one based on the performance of a market index. For interest rate swaps, parties generally exchange fixed and floating rate interest cash flows based on a notional amount. Cross-currency interest rate swaps are contractual obligations in which the principal amounts of Canadian fixed-income securities denominated in foreign currency are exchanged for Canadian currency amounts both initially and at maturity. Over the term of the cross-currency swap, counter-parties exchange fixed to fixed and fixed to floating interest rate cash flows in the swapped currencies. There are underlying securities supporting all swaps. Leveraging is not allowed.
- (ii) Forward foreign exchange contracts are contractual agreements to exchange specified currencies at an agreed upon exchange rate and on an agreed settlement date in the future.
- (iii) An equity index futures contract is an agreement to receive or pay cash based on changes in the level of the specified stock index.

The following is a summary of the fund's proportionate share of the notional amount and fair value of derivative contracts held by pooled funds at June 30, 2003.

(thousands)

	Maturity			June 30, 2003		March 31, 2003	
	Under 1 Year	1 to 3 Year	Over 3 Years	Notional Amount	Fair Value (a)	Notional Amount	Fair Value (a)
Equity index swap contracts	82%	18%	-	\$ 661,164	\$ 18,182	\$ 575,028	\$ (13,298)
Bond index swap contracts	100%	-	-	54,858	746	52,107	(173)
Forward foreign exchange contracts	100%	-	-	406,569	22,011	616,346	21,069
Interest rate swap contracts	30%	65%	5%	451,874	(20,474)	404,230	(13,765)
Equity index futures contracts	100%	-	-	17,119	1,571	13,754	421
Cross-currency interest rate swaps	4%	22%	74%	233,584	(26,484)	275,384	(52,399)
				<u>\$ 1,825,168</u>	<u>\$ (4,448)</u>	<u>\$ 1,936,849</u>	<u>\$ (58,145)</u>

(a) The method of determining the fair value of derivative contracts is described in note 2 (e).

NOTE 5 INVESTMENT RISK MANAGEMENT

Income and financial returns of the Fund are exposed to credit risk and price risk. Credit risk relates to the possibility that a loss may occur from the failure of another party to perform according to the terms of a contract. Price risk is comprised of currency risk, interest rate risk and market risk. Currency risk relates to the possibility that the investments will change in value due to future fluctuations in foreign exchange rates. Interest rate risk relates to the possibility that the investments will change in value due to future fluctuations in market interest rates. Market risk relates to the possibility that the investments will change in value due to future fluctuations in market prices.

The Standing Committee on the Alberta Heritage Savings Trust Fund reviews and approves the business plan of the Fund. In order to earn an optimal financial return at an acceptable level of risk, the 2003-2004 business plan proposes the following asset mix policy for the Fund:

Fixed income securities	35%
Public equities	48%
Private equities	3%
Real Estate	10%
Absolute Return Strategies	4%

Risk is reduced through asset class diversification, diversification within each asset class, quality and duration constraints on fixed-income instruments, and restrictions on amounts exposed to countries designated as emerging markets. Controls are in place respecting the use of derivatives (see Note 4). Forward foreign exchange contracts may be used to manage currency exposure in connection with securities purchased in foreign currency (see Note 4).

NOTE 6 FUND EQUITY

Section 8 (2) of the *Alberta Heritage Savings Trust Fund Act* (the Act) states that the net income of the Heritage Fund less any amount retained in the Fund to maintain its value shall be transferred to the General Revenue Fund annually in a manner determined by the Minister of Revenue

Section 11(5) of the Act states that for fiscal years subsequent to 1999 and until the accumulated debt is eliminated in accordance with the *Fiscal Responsibility Act*, the Minister of Revenue is not required to retain any income in the Heritage Fund to maintain its value, but may retain such amounts as the Minister of Revenue considers advisable.

NOTE 7 NET INCOME

	<i>(thousands)</i>	
	Three Months Ended June 30, 2003	Three Months Ended June 30, 2002
Deposit and fixed-income securities	\$ 77,526	\$ 74,396
Canadian equities	79,366	(148,314)
United States equities	6,908	(18,119)
Non-North American equities	7,808	689
Private equities	1,059	1,365
Real estate	9,936	6,281
Absolute Return Strategies	17,291	-
Investment income (loss)	199,894	(83,702)
Direct administrative expenses (Note 8)	(665)	(420)
Net investment income (loss)	\$ 199,229	\$ (84,122)

Investment income (loss) is comprised of interest, dividends, amortization of discount and premiums, swap income, security lending income and realized gains and losses, net of write-downs, on investments. The Fund's share of income (loss) earned from externally and internally managed investment pools is net of administrative expenses incurred by the pools. (see Note 8).

The investment income for the three months ended June 30, 2003 includes writedowns of public equities totalling \$1,706,000 (June 30, 2002: \$98,330,000).

NOTE 8 ADMINISTRATIVE EXPENSES

Administrative expense includes investment management, cash management, safekeeping costs and other expenses charged on a cost-recovery basis directly from Alberta Revenue. The Fund's total administrative expense for the period, including amounts deducted directly from investment income of pooled funds is as follows:

	<i>(thousands)</i>	
	Three Months Ended June 30, 2003	Three Months Ended June 30, 2002
Direct fund expenses (Note 7)	\$ 665	\$ 420
Externally managed investment pools	3,882	3,041
Internally managed investment pools	971	519
Total	\$ 5,518	\$ 3,980
Percent of net assets at fair value	0.047%	0.034%

NOTE 9 COMPARATIVE FIGURES

Certain comparative figures have been reclassified to conform to June 30, 2003 presentation.

NOTE 10 APPROVAL OF FINANCIAL STATEMENTS

These financial statements were approved by the Deputy Minister of Revenue.
