

WEEKLY ECONOMIC REVIEW

August 11, 2006

The United States Federal Reserve held its key interest rate steady at 5.25 per cent earlier this week, following 17 consecutive increases. According to the Fed, the pause was due to “economic growth moderating from its strong pace earlier this year”. However, the Fed kept its options open to increase interest rates later stating that “some inflation risks remain...and any additional firming needed to address these risks will depend on the outlook for both inflation and economic growth, as implied by incoming information”.

Alberta’s housing market remains strong. Through the first seven months of 2006, housing starts in Alberta averaged 50,000 (seasonally adjusted at annual rate), up 28 per cent from the same period last year, and on pace to surpass the 1978 annual record of 47,925. Growth in house prices in Calgary and Edmonton continues to be leagues ahead of other Canadian metropolitan areas. Calgary’s new house price index for June increased 49.2 per cent from last year and Edmonton’s advanced 28.1 per cent.

Cost pressures continue to build up in Alberta. In the second quarter of 2006, the

	Aug 4, 2006	\$8.22

*Estimate based on Nymex Futures Market Price

price index for non-residential construction increased by 10.3 per cent in Calgary and by 9.8 per cent in Edmonton from the same quarter in 2005.

Oil prices were quite volatile during the week. Early in the week, oil prices nearly reached record highs on news of British Petroleum shutting down the Prudhoe Bay oilfield in Alaska, the largest American oil field. However, thwarted terrorist attacks at London’s Heathrow airport caused oil prices to decline US\$2.35/bbl, with concerns over lower tourism and jet fuel demand.

Economic Indicators Released this Week	Reference Period	Month/Previous Month	Month/Previous Year's Month	Year-to-date ¹
Housing Starts²	July			
Alberta	49,600	-6.6%	34.4%	28.0%
