

WEEKLY ECONOMIC REVIEW – MARCH 31, 2006

The U.S. Federal Reserve Board increased its Fed funds rate for the fifteenth consecutive time this week, up 25 basis points to 4.75 per cent. Although this was Bernanke's first meeting as chair, the statement was unchanged from his predecessor, stating "some further policy firming may be needed". The Fed remains concerned that "possible increases in resource utilization, in combination with the elevated prices of energy and other commodities, have the potential to add to inflation pressures."

Alberta's population increased by 2.5 per cent in January 2006 to 3.3 million people, the highest rate of growth among the provinces and more than two and a half times the national growth rate. A large increase in the number of people moving from other provinces to booming Alberta represented majority of the population increase.

Tightening labour markets continued to put upward pressure on wages in January, with average weekly earnings increasing by 4.8 per cent from a year ago both nationally and in Alberta. Anecdotal evidence is showing an increase in retention packages being offered to employees in Alberta, ranging from monetary bonuses, free vacations, consumer goods and education savings packages. These incentives are in addition

to the signing bonuses and incentives being offered to new employees in most sectors across the province.

The average selling price of a home in Alberta was up 22 per cent in February from a year ago, as a shortage of homes available and strong demand persist. Nationally, home prices were up 12 per cent.

A perceived threat of Iran halting crude exports in retaliation to a U.N. call for Iran to end its' uranium enrichment program helped send the price of crude to a two month high of US\$67/bbl. Tensions in other oil exporting countries continue to contribute to supply concerns.

Economic Indicators Released this Week	Reference Period	Month/Previous Month	Month/Previous Year's Month	Year-to-date ¹
Average Weekly Earnings	January			
Alberta	787.21	0.4%	4.8%	n/a
