WEEKLY ECONOMIC REVIEW

July 21, 2006

Canada's headline CPI inflation rate fell to 2.5 per cent in June (from 2.8 per cent in May). Gasoline and natural gas prices were the main contributors to the slowdown in inflation. The core inflation rate (which excludes the eight most volatile components of the CPI) eased to 1.7 per cent, down from 2.0 per cent the previous month.

Alberta's CPI inflation rate fell to 3.7 per cent in June (from 4.5 per cent in May), due in part to a 33 per cent drop in natural gas prices last month. In noting that Alberta's inflation rate remains above the Canadian average, Statistics Canada cited large increases in homeowners' replacement cost in recent months. This component of the CPI, which is estimated using new housing prices, has been pushed higher by rapidly rising Alberta house prices.

U.S. Federal Reserve Board chairman Ben Bernanke indicated that he expects U.S. inflation to ease in the coming months, due to a cooling U.S. housing market and an expected return to trend-level U.S. economic growth. Mr. Bernanke's comments were generally interpreted as a signal that the U.S. monetary tightening cycle may be nearing its end, despite recent increases in the U.S. inflation rate. U.S. headline inflation edged

up to 4.3 per cent in June, while core inflation rose from 2.4 to 2.6 per cent.

China's economy continued to expand at a remarkable pace, recording growth of 10.9 percent (annualized rate) in first half of 2006. China's exports surged 25.2 per cent in the first six months of the year, while imports jumped by 21.3 per cent.

Oil prices fell back from their recent record high of over US\$77/bbl, but remained highly volatile due to the continued hostilities in Lebanon and Israel. Markets remain concerned that a widening of the conflict could affect oil supplies from countries such as Iran.

Economic Indicators Released this Week	Reference Period	Month/Previous Month	Month/Previous Year's Month	Year-to-date ¹
Consumer Price Index (1997=100)	June			
Alberta	138.9	-0.4%	3.7%	3.7%
Canada	130.4	-0.2%	2.5%	2.5%
United States (1982-84=100)	202.9	0.2%	4.3%	4.7%
Wholesale Trade (\$ Millions)	May			
Alberta	5,076	-0.2%	11.5%	15.2%
Canada	41,789	0.9%	6.6%	8.0%
