Inventory of Alberta Regional Projects

Introduction

The Inventory of Alberta Regional Projects is produced by Alberta Economic Development to complement the Inventory of Major Alberta Projects. The Regional Projects Inventory differs from the Major Projects in that it lists projects in Alberta that are planned, underway, or have recently been completed and are valued at less than \$2 million.

The data in the Regional Projects Inventory may assist firms in identifying potential supply opportunities and provide information on economic and business development activities taking place across the province. Project data is obtained from public information sources (such as building permits, newspaper clippings, news releases and Internet sites). Where possible, this data has been verified with the project proponent/developer. However, users of the Inventory may wish to *confirm* project data with the proponent/developer.

While efforts have been made to obtain the most recent information, it should be noted that projects are constantly being re-evaluated by industry. Although the Inventory attempts to be as comprehensive as possible, some information may not be available at the time of printing, or not published due to reasons of confidentiality.

The Inventory of Alberta Regional Projects and other Departmental publications can be accessed on the Internet at <http://www.alberta-canada.com/statpub/albertaConstructionProjects/index.cfm>. Projects, which have been, added to the Inventory between April 1, 2006 and June 30, 2006 are noted in UPPER CASE in the Project Description column. If you have questions or require additional information about the Regional Projects Inventory, contact the Regional Development Branch by phone at (403) 297-8920, or by fax at (403) 297-6168.

1. This Inventory lists projects in Alberta, valued at less than \$2 million, that have recently been completed, are currently under construction, or are proposed to start construction. Not all projects are listed due to reasons of confidentiality and/or due to information not being available at the time of printing
2. Project data is obtained from public information sources. Although, where possible, this data has been verified with the project proponent / developer, users of the Inventory may wish to confirm project data with the proponent / developer.
3. The Inventory does not breakdown project expenditures by any given year. The cost of a project is the value of expenditures expected over all phases of project construction, which may span over one or more years.
4. The costs of projects listed in the Inventory are estimated values only
