

Special: Stump Treatment Certification Class

The Recertification Program for the Special: Stump Treatment certification class has been determined. Starting in 2006, certified Utility Tree Workers (UTW) and Utility Tree Trimmers (UTT) who also hold a Stump Treatment Certificate endorsement will have to attend a Stump Treatment Certificate tutorial (but will not have to rewrite the Stump Treatment Certification Examination). This tutorial will be held in conjunction with the UTT and UTW recertification sessions.

The UTT and UTW certification programs (including issuance of the Stump Treatment Certificate endorsement) will continue to be administered by the Industrial Vegetation Management Association of Alberta (IVMAA). Alberta Environment works with the IVMAA to ensure the certification and recertification of the Special: Stump Treatment Certificate endorsement is functional and effective.

If you require more information, please call the IVMAA at (780) 433-0838 or Alberta Environment at 780-538-8054.
