

# **Facility and Functional Centre Definitions**

**and**

## **Facility Listing**

**As of June 19, 2006**

## **Claim Submission Requirements – Facility Numbers and Functional Centre Codes**

Claims submitted to the Alberta Health Care Insurance Plan require a facility number and functional centre code. The facility number identifies the physical location where the service was provided. The functional centre code identifies the specific area within the facility where the service was provided. Claim submissions must correctly describe the area within the facility where the services took place. \*\*

Alberta Health and Wellness has assigned facility numbers and applicable functional centre codes to all formally recognized or accredited facilities in Alberta. This information is listed in the attached Facility Listing. Please use the listing when preparing claims for services provided in registered general (active treatment) hospitals, auxiliary hospitals, nursing homes, mental health regional clinics and correctional centres. The information is current to the date displayed at the top of the listing. Updates to the Facility Listing will be communicated to practitioners via Alberta Health Care Insurance Plan Bulletin.

The following pages provide definitions of the facility types and functional centre codes contained in the Facility Listing. For more information about facilities and functional centres in relation to claim submissions, please refer to section 1.5 and 3.3 in the Alberta Health and Wellness *Physician's Resource Guide* or *Allied Health Practitioner's Resource Guide*, as applicable to your practice.

**NOTE:** Claims for services provided in a publicly-funded clinic located within a hospital to a registered in-patient or out-patient should contain the facility number and applicable functional centre code for the hospital. Claims for services provided in a practitioner's private, leased office/clinic located within a hospital to a patient who is **not** a registered in-patient or out-patient should contain the facility number for that office.

☛ If your private, leased office/clinic within a hospital has not been registered and assigned a facility number for claim submission purposes, you should complete and return the AHC 0910 Facility Registration form. To obtain a copy of the form, you can fax a request to (403) 272-7774, or download a copy from our website at [www.health.gov.ab.ca/ahcip/ahcip\\_submission.html](http://www.health.gov.ab.ca/ahcip/ahcip_submission.html).

If you require further information about facility registration, please contact Professional and Facility Registries in Edmonton at 422-1522. For toll-free access from elsewhere in Alberta, call 310-0000 and at the prompt enter 780-422-1522.

\*\* A location code is used instead of a facility number and functional centre code when services are provided in the patient's home (HOME), a school (SCHL), or other unregistered location such as a roadside (OTHR).

## I. General hospital – Facility and functional centre definitions

In the *Hospitals Act*, a general hospital is defined as "a hospital providing diagnostic services and facilities for medical or surgical treatment in the acute phase for adults and children and obstetrical care". General hospitals have several functional centres. Each functional centre is associated with in-patient, out-patient, or diagnostic and therapeutic services.

An in-patient is a person admitted to and assigned a bed in a hospital by the order of a physician, for the provision of diagnostic or treatment services or both. An out-patient is a patient registered to receive out-patient diagnostic, treatment or therapeutic services. In each case, the attending physician keeps a record of the services provided, for retention by the hospital.

**When submitting a claim for services provided in a general hospital, the functional centre code should be consistent with the information provided below.** For example, a surgical service provided to an in-patient would indicate functional centre code SURG, while a surgical service provided to an out-patient would reflect functional centre code D/N.

### Functional centre codes associated with in-patient services

The functional centre codes defined below should be used only for registered in-patients.

- a) **ICU1, ICU2, ICU3** (intensive care unit level 1, 2, 3) — an area where medical services are provided to seriously ill patients who require constant supervision and monitoring.
- b) **ICN1, ICN2, ICN3** (neonatal intensive care unit level 1, 2, 3) — an area equipped for providing a defined level of intensive care services to newborns.
- c) **ICO1, ICO2, ICO3** (obstetrical intensive care unit level 1, 2, 3) — an area equipped for providing a defined level of intensive care services to obstetrical patients.
- d) **LTC** (long-term care) — an area designated for the provision of medical services to long-term patients awaiting placement in a long-term care facility.
- e) **MED** (medical) — an area where medical and non-surgical services are provided to in-patients (for example, paediatrics, obstetrics).
- f) **SURG** (surgical) — an area designated for the provision of surgical services to in-patients.

### Functional centre codes associated with out-patient services

The functional centre codes defined below should be used only for registered out-patients.

- a) **CLNC** (clinic) — an area designated for the provision of medical and non-surgical services to registered out-patients.
- b) **D/N** (day/night care) — an area designated for the provision of planned/scheduled medical and surgical services to patients attending for a number of hours of the day or night.
- c) **EMRG** (emergency) — the area where medical services are provided to patients with conditions requiring immediate attention.
- d) **PEMG** (paediatric emergency) — an area where medical services are provided to paediatric patients with conditions requiring immediate attention.

## I. General hospital – Facility and functional centre definitions (cont.)

### Functional centre codes associated with diagnostic and therapeutic services

The functional centre codes defined below should be used only when the service takes place in one of these areas within the hospital.

- a) **CLAB** (clinical laboratory) \*\* — an area equipped for the provision of laboratory investigative procedures.
- b) **DIMG** (diagnostic imaging) \*\* — the diagnostic imaging unit within the facility.
- c) **ELEC** (electrodiagnosis) \*\* — an area designated for the measurement and recording of electrical impulses to evaluate the brain and associated physiologic functions.
- d) **HBOC** (hyperbaric oxygen chamber) — an area containing a pressurized compartment in which 100% oxygen is administered to a patient for treating specified medical conditions.
- e) **OLAB** (other diagnostic laboratories) \*\* — an area where highly specialized non-invasive procedures are provided.
- f) **RDON** (radiation oncology) \*\* — an area housing X-ray equipment and radioactive elements for therapeutic purposes.

## II. Auxiliary hospital – Facility and functional centre definitions

An auxiliary hospital is a facility designated for the provision of medical services to in-patients who have long-term or chronic illnesses, diseases or infirmities. Services may include acute palliative programs, geriatric day programs or day/night programs.

Claims for services provided in an auxiliary hospital should include the applicable functional centre code as defined below.

- a) **LTC** (long-term care) — an area where medical services are provided for long-term patients.
- b) **MED** (medical) — an area where care is provided to an in-patient in a sub-acute care program approved by and registered with Alberta Health and Wellness.
  - ☛ Sub-acute care is defined as care provided for patients requiring short-term treatment or convalescence of an active but stable condition, or following a medical procedure with the intent that the patient be discharged home after care is completed.
- c) **CLNC** (clinic) — an area designated for the provision of medical and non-surgical services for registered patients.

*\*\* Claims cannot be submitted for laboratory, radiology and non-invasive diagnostic services provided in a general hospital. Payment for these services is the responsibility of the hospital.*

### **III. Nursing home – Facility and functional centre definitions**

A nursing home is a facility designated for the provision of nursing home care. Nursing homes have one associated functional centre, as follows:

**LTC** (long-term care) — an area where medical services are provided to long-term patients.

Claims for services provided in a nursing home can be submitted with a blank functional centre code to allow the claim processing system to default to LTC. A facility number is still required in this case.

### **IV. Mental health regional clinic – Facility and functional centre definitions**

This is a facility operated by a Regional Health Authority for the provision of community-based mental health services. Mental health regional clinics have one associated functional centre, as follows:

**EXRM** (examination room) — an area designated as an examination room.

Claims for services provided in a mental health regional clinic can be submitted with a blank functional centre code to allow the claim processing system to default to EXRM. A facility number is still required in this case.

### **V. Correctional centre – Facility and functional centre definitions**

This is a facility designated for the provision of insured health services within the confines of a provincial correctional centre, that are not being paid for on a contract or sessional basis.

Provincial correctional centres have one associated functional centre, as follows:

**CLNC** (clinic) — a medical and non-surgical office or clinic located within a provincial correctional centre, where insured services are provided that are not being paid for on a contract or sessional basis.

Claims for services provided in a correctional centre can be submitted with a blank functional centre code to allow the claim processing system to default to CLNC. A facility number is still required in this case.
