## 1. Background and Introduction

Leger Marketing Alberta conducted the January 2006 OmniAlberta survey with 900 Alberta heads or joint-heads of households between January 26 and February 12, 2006.

Leger was commissioned to include eight questions on behalf of mkm as part of the January 2006 OmniAlberta survey.

The survey instrument, including all questions and demographics, is included in Appendix A. Computer tables showing all responses to these questions are included in Appendix B.

## 2. Methodology

### 2.1 Data collection

A total of 900 telephone interviews were conducted with the head or joint head of household in randomly selected Alberta households.

### 2.2 Analysis

To evaluate differences or similarities in responses between different subsets of the population, the results for each question have been cross-tabulated by the following variables in the computer tables:

```
\checkmark ~ R e g i o n ;
\checkmark Gender;
\checkmark ~ A g e ~ o f ~ r e s p o n d e n t ;
\checkmark ~ H o u s e h o l d ~ s i z e ;
\checkmark ~ C h i l d r e n ~ i n ~ h o u s e h o l d ;
\checkmark ~ E d u c a t i o n ~ l e v e l ;
\checkmark ~ E m p l o y m e n t ~ s t a t u s ; ~ a n d ~
\checkmark ~ H o u s e h o l d ~ i n c o m e .
```

### 2.3 Statistical reliability

For a given sample size, it is possible to set what are called confidence bounds or limits around an observed percentage and assert that such limits are correct 95 percent of the time (for example). These confidence limits are valuable indicators of the reliability of observed results. When interpreting data, confidence limits should always be kept in mind because these limits can vary dramatically depending on the sample size. A table of these confidence limits is located in Appendix C. Such tables do not provide any indication of whether an observed percentage is meaningful, as that depends upon the context and the interpretation that is made.

Results for a sample size of 900 are accurate to within $\pm 3.3$ percentage points, 19 times out of 20.

To evaluate differences or similarities in responses between different subsets of the population, the results have been cross-tabulated in the computer tables by various subsets of the population.

The calculation of the statistical reliability of the subsets is based on the size of the smallest sample. The statistical reliability of the sample sizes for subsets is:

- A sample size of 300 (Region) is accurate to within $\pm 5.7$ percentage points, 19 times out of 20;
- A sample size of 450 (Gender) is accurate to within $\pm 4.7$ percentage points, 19 times out of 20; and
- A sample size of 199 (Age) is accurate to within $\pm 7.0$ percentage points, 19 times out of 20.

### 2.4 Rating scale

Throughout the questionnaire, a seven-point scale was used for respondents to rate their opinions. The rating scale used in the study is:

- Concerned: 1 means not at all concerned, 4 means concerned and 7 means extremely concerned; and
- Agreement: 1 means strongly disagree, 4 means neutral and 7 means strongly agree.

For the purpose of analysis and discussion, the numerical ratings were consolidated, where appropriate, into three groups:

| Rating on the <br> $\mathbf{1}$ to $\mathbf{7}$ scale |  |
| :---: | :--- |
| $\mathbf{6 , 7}$ | I nterpretative Level |
| $\mathbf{4 , 5}$ | These respondents express top-box positive responses. <br> These respondents disclose mid-range responses about a <br> particular factor, or provide a moderately positive response. |
| $\mathbf{1 , 2 , 3}$ | These respondents provide negative responses. |

## 3. Analysis of Findings

### 3.1 Perceptions of how to Ensure Quality Health Care for Future Generations (Fig.1)

Respondents were read a series of statements and were asked to indicate which statement was closest to their views on how to ensure quality health care will be available to future generations.

Albertans generally do not perceive the current health care system to be sufficient for future generations, with only $\mathbf{5 \%}$ indicating the system is working well and does not need to be changed.

One-quarter (26\%) of Albertans indicate the health care system needs a major restructuring.

An additional two-thirds ( $67 \%$ ) of indicate some form of change is needed, nut not a major restructuring. Specifically, 41\% of Albertans indicate major changes are needed, but not need a major restructuring and $\mathbf{2 7 \%}$ indicate only small changes are needed.

Fig.1: Perceptions of Alberta Health Care System(Q.1)

## Differences by Sub-segments of the Population

Region
Compared to other regions of Alberta (28\% Calgary CMA and 28\% other cities and rural), a Iower proportion of Edmonton CMA residents (21\%) indicate the health care system needs a major restructuring. Additionally, a higher proportion of Edmonton CMA residents ( $31 \%$ ) than Calgary CMA residents ( $24 \%$ ) believe only small changes to the health care system are needed.

## Gender

A higher proportion of females (44\%) than males (37\%) indicate major changes are needed but the system does not need a major restructuring. A higher proportion of males (29\%), than females ( $24 \%$ ) indicate only small changes are needed.

## Age

Compared to those aged 18 to 34 years ( $21 \%$ ), a higher proportion of Albertans aged 45 years or more (a range of $28 \%$ to $29 \%$ ) indicate the health care system needs a major restructuring. This difference in opinion by age groups is reinforced by a lower proportion of Albertans aged 35 years or more (a range of $21 \%$ to $27 \%$ ) indicating only small changes in health care are needed compared to Albertans aged 18 to 34 years (35\%).

Lower proportions of Albertans aged 18 to 34 years (33\%) and 55 years or more (38\%) indicate major changes are needed to the health care system but it doesn't need a major restructuring, compared to Albertans aged 35 to 54 years (a range of $46 \%$ to $48 \%$ ).

### 3.1.1 Types of Changes to Alberta's Health Care System

Respondents who indicate changes to the health care system are needed, were asked to indicate what types of changes they would like to see.

The top suggestions provided by Albertans include changes or improvements to:
$\checkmark$ Wait time (41\%);
$\checkmark$ Staff (28\%);
$\checkmark$ Organization and logistics (22\%);
$\checkmark$ Medical infrastructure (16\%); and
$\checkmark$ Coverage (13\%).

Table 1: Suggested Changes to Alberta's Health Care System (Q.2)

- Multiple Mentions -

| Those who think the health care system needs to be changed | Total ( $\mathrm{n}=838$ ) | Edmonton $(n=283)$ | $\begin{aligned} & \text { Calgary } \\ & (\mathrm{n}=279) \end{aligned}$ | $\begin{aligned} & \text { Other } \\ & (\mathrm{n}=276) \end{aligned}$ |
| :---: | :---: | :---: | :---: | :---: |
| Improve Wait Time (NET) | 41\% | 43\% | 43\% | 37\% |
| Improve wait time (GEN) | 22\% | 24\% | 24\% | 20\% |
| Improve wait time for surgery / operations | 8\% | 8\% | 8\% | 8\% |
| Improve wait time for ER / hospital | 8\% | 9\% | 9\% | 5\% |
| Improve wait time for specialists | 6\% | 6\% | 6\% | 5\% |
| Improve wait time for doctors | 5\% | 5\% | 5\% | 5\% |

| No answer <br> Don't know | $\mathbf{7 \%}$ | $1 \%$ | $1 \%$ | $2 \%$ |

### 3.2 Awareness of Third Way'

Respondents were asked if they have heard about the Alberta Government's new health care plan called Third Way'.

Half ( $51 \%$ ) of Albertans indicate they are aware of 'Third Way'.
Table 2: Awareness of Alberta Government's "Third Way" Health Care Plan (Q.3)

| All Respondents | Total <br> $(\mathbf{N}=\mathbf{9 0 0})$ | Edmonton <br> $(\mathrm{n}=300)$ | Calgary <br> $(\mathrm{n}=300)$ | Other <br> $(\mathrm{n}=300)$ |
| :--- | :---: | :---: | :---: | :---: |
| Yes, have heard about Third Way | $\mathbf{5 1 \%}$ | $58 \%$ | $53 \%$ | $43 \%$ |
| No, have not heard about Third Way | $\mathbf{4 7 \%}$ | $39 \%$ | $46 \%$ | $54 \%$ |
| Don't know | $\mathbf{3 \%}$ | $3 \%$ | $1 \%$ | $3 \%$ |

## Differences by Sub-segments of the population

Reported awareness of 'Third Way' is higher among:
$\checkmark$ Residents of Edmonton CMA (58\%) and Calgary CMA (53\%) compared to other Alberta cities and rural areas (43\%);
$\checkmark$ Males ( $59 \%$ ) compared to females ( $43 \%$ ); and
$\checkmark$ Respondents aged 45 years or more (a range of $59 \%$ to $64 \%$ ) compared to respondents aged 18 to 44 years (a range of $32 \%$ to $49 \%$ ), with respondents aged 18 to 34 years reporting the lowest levels of awareness (32\%).

### 3.2.1 Perceptions of 'Third Way’

Respondents who report awareness of 'Third Way' were asked to indicate what they think "Third Way' means.

One quarter (24\%) of Albertans perceive 'Third Way' to mean privatization of health care services. One-in-five ( $20 \%$ ) Albertans perceive 'Third Way' to mean private care for those willing to pay, followed by $\mathbf{1 3 \%}$ who mention a combination of private and public health care, $9 \%$ who mention a "two-tier" system, $9 \%$ who provide comments related to an improved health care system and $8 \%$ who think Third Way' means better service if you can afford it

Lower proportions of Albertans provide other mentions.
Table 3: Perceptions of "Third Way" (Q.4)

- Multiple Mentions -

| Respondents who have heard of Third Way | $\begin{gathered} \text { Total } \\ (\mathrm{n}=461) \end{gathered}$ | Edmonton $(n=173)$ | $\begin{gathered} \hline \text { Calgary } \\ (\mathrm{n}=158) \\ \hline \hline \end{gathered}$ | $\begin{gathered} \hline \text { Other } \\ (n=130) \end{gathered}$ |
| :---: | :---: | :---: | :---: | :---: |

| Other mentions | 6\% | 7\% | 4\% | 5\% |
| Don't know | 17\% | 18\% | 11\% | 21\% |

### 3.3 Expected Changes to Alberta's Health Care System

All respondents were asked to indicate what specific changes they expect the Alberta Government will be making to the health care system in the next couple of years.

Thirty-eight percent ( $38 \%$ ) of Albertans provide comments related to the privatization of health care such general mentions about the privatization of health care services ( $25 \%$ ) and private services for people willing to pay (3\%). Two percent (2\%) or fewer Albertans provide other mentions relative to the privatization of health care.

One-in-ten (10\%) Albertans mention a decreased wait time for services followed by 8\% of Albertans who each provide mentions related to increased health care facilities and staffing.

Lower proportions of Albertans provide other mentions.
Table 4: Expected Changes to Health Care System Over Next Couple of Years (Q.5)

### 3.4 Concern About Alberta Government's Changes to the Health Care System

Seven-in-ten (71\%) Albertans are very (38\%) or moderately (34\%) concerned about the changes that the Alberta Government is considering making to the health care system. One quarter ( $23 \%$ ) of Albertans are not concerned and $6 \%$ are unable to form an opinion.

Fig.2: Concern About Changes to Health Care System (Q.6)
(Scale: 1 = Not at all concerned; 4 = Concerned; 7 = Extremely concerned)

## Differences by Sub-segments of the Population

Proportions of very concerned ( 6,7 ratings) are higher among:
$\checkmark$ Edmonton CMA residents (44\%) compared to residents of Calgary CMA (35\%) and other Alberta cities and rural areas (35\%);
$\checkmark$ Females (43\%) compared to males (32\%);
$\checkmark$ Respondents aged 45 years or more (a range of $42 \%$ to $45 \%$ ) compared to respondents aged 18 to 44 years (a range of $29 \%$ to $34 \%$ ).

### 3.5 Perceptions of Public and Private Health Care

All respondents were read a series of 11 statements related to public and private health care. This next section of the summary report analyzes perceptions for each statement.
3.5.1 "We all share responsibility for taking time now to ensure our health care system remains stable into the long term future"

The vast majority (95\%) of Albertans agree, including more than three-quarters (77\%) of Albertans who strongly agree, we all share responsibility for taking time now to ensure our health care system remains stable into the long term future.

Fig.3a: Perceptions of Public and Private Health Care (Q.8f)
(Scale: 1 = Strongly disagree; 4 = Neutral; 7 = Strongly agree)
We all share responsibility for taking time now to ensure our health care system remains sustainable into the long term future

## Differences by Sub-segments of the Population

Age
Compared to respondents aged 18 to 34 years (69\%) a higher proportion of respondents aged 35 years or more (a range of $77 \%$ to $84 \%$ ) strongly agree we all share responsibility for taking time now to ensure our health care system remains stable into the long term future.
3.5.2 "Recognizing the impacts of our individual lifestyles on our overall health and wellness, we each hold responsibility for our own health and wellness"

The vast majority (94\%) agree, including 72\% of Albertans who strongly agree with the statement "Recognizing the impacts of our individual lifestyles on our overall health and wellness, we each hold responsibility for our own health and wellness".

Fig.3b: Perceptions of Public and Private Health Care (Q.8c)
(Scale: 1 = Strongly disagree; 4 = Neutral; 7 = Strongly agree)

## Differences by Sub-segments of the Population

Region
Compared to residents of Calgary CMA (66\%), a higher proportion of residents from
Edmonton CMA (74\%) and other Alberta cities and rural areas (77\%) strongly agree we each hold responsibility for our own health and wellness.

### 3.5.3 "We all share responsibility for the health and wellness of our communities"

Ninety-four percent (94\%) of Albertans agree, including 70\% of Albertans who strongly agree we all share responsibility for the health and wellness of our communities.

Fig.3c: Perceptions of Public and Private Health Care (Q.8b)
(Scale: 1 = Strongly disagree; 4 = Neutral; $7=$ Strongly agree)
We all share responsibility for the health and wellness of our communities

## Differences by Sub-segments of the Population

Region
Compared to residents of the major urban areas of Edmonton CMA and Calgary CMA (a range of $67 \%$ to $68 \%$ ), a higher proportion of residents from other Alberta cities and rural areas (74\%) strongly agree we all share responsibility for the health and wellness of our communities.

Age
Compared to respondents aged 55 years or more ( $21 \%$ ), a higher proportion of respondents aged $\mathbf{1 8}$ to 34 years (28\%) agree we all share responsibility for the health and wellness of our communities.

### 3.5.4 "I $t$ is critical that we are provided with a full range of options for our health care"

More than nine-in-ten (92\%) Albertans agree, including 69\% who strongly agree that it is critical we are provided with a full range of options for our health care.

Fig.3d: Perceptions of Public and Private Health Care (Q.8a)
(Scale: 1 = Strongly disagree; 4 = Neutral; 7 = Strongly agree)
It is critical that we are provided with a full range of options for our health care

## Differences by Sub-segments of the Population

Proportions of strong agreement ratings (6,7 ratings) are higher among:
Females (73\%) compared to males (65\%); and
$\checkmark$ Respondents aged $\mathbf{3 5}$ to 54 years (a range of $\mathbf{7 1 \%}$ to 76\%) compared to respondents aged 55 years or more (63\%).

### 3.5.5 "All heath care services covered by the Canada Health Act should be delivered through publicly-owned facilities and paid for by Alberta Health"

Seventy-eight percent (78\%) of Albertans agree, including 54\% who strongly agree, all health care services covered by the Canada Health Act should be delivered through publicly-owned facilities and paid for by Alberta Health. One-in-five (20\%) Albertans do not agree with this statement.

Fig.3e: Perceptions of Public and Private Health Care (Q.7b)
(Scale: 1 = Strongly disagree; 4 = Neutral; 7 = Strongly agree)
All health care services covered by the Canada Health Act should be delivered through publicly-owned facilities and paid for by Alberta Health

## Differences by Sub-segments of the Population

Proportions of strong agreement ratings (6,7 ratings) are higher among:
$\checkmark$ Residents of Edmonton CMA (57\%) and other Alberta cities and rural areas (56\%), compared to residents of Calgary CMA (49\%);
$\checkmark$ Females (58\%) compared to males (50\%); and
$\checkmark$ Respondents aged 55 years or more (58\%) compared to respondents aged 18 to 34 years (50\%).

### 3.5.6 "We each need to make our own choices and manage our own health care"

Eight-in-ten (80\%) Albertans agree, including 46\% who strongly agree, we each need to make our own choices and manage our own health care. Eighteen percent (18\%) of Albertans do not agree with this statement.

Fig.3f: Perceptions of Public and Private Health Care (Q.8d)
(Scale: 1 = Strongly disagree; $4=$ Neutral; $7=$ Strongly agree)

## Differences by Sub-segments of the Population

Age
Compared to respondents aged 18 to 34 years (40\%), a higher proportion of respondents aged 55 years or more ( $50 \%$ ) strongly agree we each need to make our own choices and manage our own health care.
3.5.7 "Private facilities should be able to provide certain health care services covered by the Canada Health Act, as long as Alberta Health pays for the service, and not the person receiving the service"

Seventy-seven percent ( $77 \%$ ) of Albertans agree, including 45\% who strongly agree with the statement ""Private facilities should be able to provide certain health care services by the Canada Health Act, as long as Alberta Health pays for the service, and not the person receiving the service". Twenty-two percent (22\%) of Albertans do not agree with this statement.

Fig.3g: Perceptions of Public and Private Health Care (Q.7c)
(Scale: 1 = Strongly disagree; 4 = Neutral; 7 = Strongly agree)
Private facilities should be able to provide certain health care services covered by the Canada Health Act, as long as Alberta Health pays for the service, and not the person receiving the service

## Differences by Sub-segments of the Population

Proportions of strong agreement ratings (6,7 ratings) are higher among:
$\checkmark$ Residents of Calgary CMA (48\%) compared to residents of Edmonton CMA (42\%); and
$\checkmark$ Respondents aged 45 years or more (a range of 47\% to 49\%) compared to respondents aged 35 to 44 years ( $41 \%$ ).
3.5.8 "The health care system should include incentives and/ or penalties to encourage everyone to make healthy lifestyle choices"

Three-quarters (75\%) of Albertans agree the health care system should encourage everyone to make healthy life style choices, including 43\% who strongly agree. One quarter (24\%) do not agree with this statement.

Fig.3h: Perceptions of Public and Private Health Care (Scale: $1=$ Strongly disagree; $4=$ Neutral; $7=$ Strongly agree)
The health care system should include incentives and/or penalties to encourage everyone to make healthy lifestyle choices

## Differences by Sub-segments of the Population

Region
Compared to residents of Calgary CMA (72\%) , a higher proportion of residents from other Alberta cities and rural areas (79\%) agree the health care system should encourage everyone to make healthy life style choices.

Gender
Compared to females (26\%), a lower proportion of males (21\%) do not agree the health care system should encourage everyone to make healthy life style choices.

Age
Compared to respondents aged 18 to 44 years (a range of 39\% to 41\%), a higher proportion of respondents aged 45 to 54 years ( $48 \%$ ) strongly agree the health care system should encourage everyone to make healthy life style choices.
3.5.9 "Albertans who are willing to pay private facilities for health care services that would normally be paid for by Alberta Health should be able to do so if they want"

Seven-in-ten (71\%) Albertans agree, including 40\% who strongly agree, with the statement "Albertans who are willing to pay private facilities for health care services that would normally be paid for by Alberta Health should be able to do so if they want". Nearly three-in-ten (28\%) Albertans do not agree with the statement.

Fig.3i: Perceptions of Public and Private Health Care (Q.7d)
(Scale: 1 = Strongly disagree; 4 = Neutral; $7=$ Strongly agree)
Albertans who are willing to pay private facilities for health care services that would normally be paid for by Alberta Health should be able to do so if they want

## Differences by Sub-segments of the Population

Strong agreement ratings (6,7 ratings) are higher among:
Males (43\%) compared to females (38\%); and
\& Respondents aged 35 years or more (a range of 42\% to 44\%) compared to respondents aged 18 to 34 years (35\%).

Region
Compared to residents of Edmonton CMA (33\%), a lower proportion of residents from Calgary CMA (26\%) and other Alberta cities and rural areas (26\%), disagree that Albertans should be able to pay private facilities for Alberta Health care services if they want.

### 3.5.10 "If Albertans were allowed to pay for some health care services, then waiting lists would be shorter for those who choose not to pay for these services"

Two-thirds (66\%) of Albertans agree that waiting lists would be shorter for those who choose not pay for service, with similar proportions of Albertans strongly (35\%) and somewhat (31\%) agreeing with the statement. Thirty-two percent (32\%) of Albertans do not agree with this statement.

## Fig.3j: Perceptions of Public and Private Health Care (Q.7e)

(Scale: 1 = Strongly disagree; 4 = Neutral; 7 = Strongly agree)
If Albertans were allowed to pay for some health care services, then waiting lists would be shorter for those who choose not to pay for these services

Proportions of strong agreement ratings (6,7 ratings) are higher among:
$\checkmark$ Males (37\%) compared to females (32\%); and
$\checkmark$ Respondents aged 55 years or more (41\%) compared to respondents aged 18 to 54 years (A range of $30 \%$ to $34 \%$ ).

### 3.5.11"All of the health care services covered by the Canada Health Act are currently

 delivered through publicly-owned facilities"Six-in-ten (62\%) Albertans agree health care services covered by the Canada Health Act are currently delivered through publicly-owned facilities. There appears to be confusion about the system that currently exists, demonstrated by the higher proportion of Albertans somewhat agreeing ( $41 \%$ ) than strongly agreeing ( $21 \%$ ) with this statement. This is further demonstrated by three-in-ten (30\%) Albertans who do not agree with the statement.

Fig.3k: Perceptions of Public and Private Health Care (Q.7a)
(Scale: 1 = Strongly disagree; 4 = Neutral; 7 = Strongly agree)
All of the health care services covered by the Canada Health Act are currently delivered through publicly-owned facilities

## Differences by Sub-segments of the Population

Region
Compared to residents of Edmonton CMA (58\%) , a higher proportion of residents from other Alberta cities and rural areas (67\%) agree all Canada Health Act services are currently delivered through publicly-owned facilities.

Age
Compared to respondents aged 18 to 44 years (a range of $17 \%$ to 19\%), a higher proportion of respondents aged 55 years or more ( $26 \%$ ) strongly agree all Canada Health Act services are currently delivered through publicly-owned facilities.

Appendix A: Survey I nstrument

Hello, my name is $\qquad$ and I'm calling from Leger Marketing. We are conducting
a 15-minute survey on a variety of topics. May I please speak with the head or joint head of the household?

RESPONDENT AVAILABLE: CONTINUE
NOT AVAILABLE: CALLBACK

## IF REQUESTED:

We are not selling anything and your individual responses will be kept confidential. This survey is registered with the Canadian Survey Research Council. They can be reached at 1-800-5549996 and will verify that we are conducting this survey.

Please contact Barry Davis of Leger Marketing if you have any questions about the survey, at 423-0708 in Edmonton, or 1-877-344-0444 toll-free.

D1. DO NOT ASK. RECORD GENDER. CHECK QUOTAS: 50/50 IN EACH REGION.

1 Male
2 Female
A. Do you or any member of your family currently work for... READ LIST

## TERMINATE IF YES TO ANY IN Q.A

B. Just to confirm, are you 18 years of age or older?

1 Yes CONTINUE
2 No TERMINATE

I want to ask you some questions about the health care system in Alberta.

1. To begin with, which of the following statements is closest to your own views on how to ensure quality health care will be available to future generations. READ AND ROTATE

1 - The health care system needs a major restructuring
2 - Major changes are needed to the health care system, but it doesn't need a major restructuring
3 - Only small changes to the health care system are needed
4 - The system is working well and does not need to be changed
9 - DK/NA
2. IF AT LEAST SMALL CHANGES NEEDED ... What kind of changes would you personally like to see made to Alberta's health care system?

99 - DK/NA
3. Have you heard about the Alberta Government's new health care plan called the Third Way'?

1 - Yes
2 - No
9 - Not sure / Don't know
4. IF YES ... In your own words, can you explain what you think the Alberta Government means when it talks about the 'Third Way'?

99 - DK/NA
5. What specific changes do you expect the Alberta Government will be making to the health care system over the next couple of years?

99 - DK/NA
6. On a scale from 1 to 7 where 1 means not at all concerned, 4 means concerned and 7 means extremely concerned, how concerned are you about the changes that the Alberta Government is considering making to the health care system.

```
|__- |
9-DK/NA
```

7. The next set of questions deal with your feelings about public and private health care. Please tell me whether the extent to which you agree or disagree with the following statements using a scale from 1 to 7 where 1 means you strongly disagree, 4 means you are neutral and 7 means you strongly agree. READ AND RANDOMI ZE
a) All of the health care services covered by the Canada Health Act are currently delivered through publicly-owned facilities.
b) All health care services covered by the Canada Health Act should be delivered though publicly-owned facilities and paid for by Alberta Health.
c) Private facilities should be able to provide certain health care services covered by the Canada Health Act, as long as Alberta Health pays for the service, and not the person receiving the service.
d) Albertans who are willing to pay private facilities for health care services that would normally be paid for by Alberta Health should be able to do so if they want.
e) If Albertans were allowed to pay for some health care services, then waiting lists would be shorter for those who choose not to pay for these services.
8. Again, using a scale from 1 to 7 , where 1 means strongly disagree, 4 means you are neutral and 7 means strongly agree, please rate the following statements:
a) It is critical that we are provided with a full range of options for our healthcare.
b) We all share responsibility for the health and wellness of our communities.
c) Recognizing the impacts of our individual lifestyles on our overall health and wellness, we each hold responsibility for our own health and wellness.
d) We each need to make our own choices and manage our own healthcare.
e) The health care system should include incentives and/or penalties to encourage everyone to make healthy lifestyle choices.
f) We all share responsibility for taking time now to ensure our healthcare system remains sustainable into the long term future.

9-DK/NA

## DEMOGRAPHICS

Now I have some questions that will help us classify the data.
D2. In the past month, have you personally accessed the Internet or e-mail... READ
a. From home?

1 Yes
2 No
DO NOT READ
F5 Don't know
b. From work?
c. From any place other than home or work?

D3. Which of the following age groups are you in. . . READ
1 18-24 years
2 25-34
3 35-44
4 45-54
5 55-64
665 or higher

T4. IF YES ... In your own words, can you explain what you think the Alberta Government means when it talks about the 'Third Way'?

Total
Privatization of healthcare services

Private care for pay
Combination of
public and private
healthcare

Establish two-tier system

IMPROVED HEALTHCARE SYSTEM (NET)
-Shortening of wait times
-More options for people

- Improved healthcare for Albertans
-Other improvement mentions

Better service if
you can afford it
Private clinics
Private insurance

Violation of the
Canada Health Act
