THIRD QUARTER UPDATE
DECEMBER 31, 2003

Alberta Heritage Savings Trust Fund

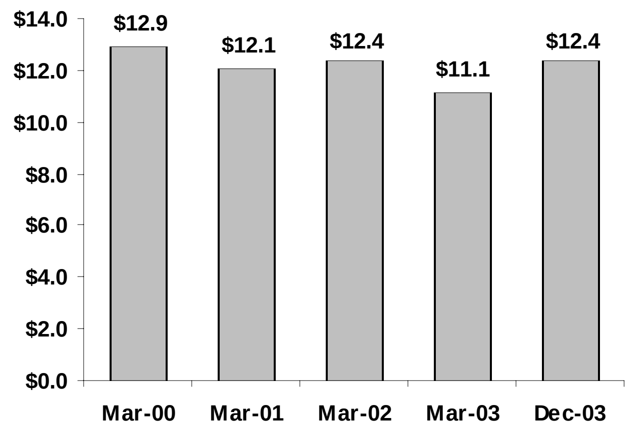
QUARTER IN REVIEW

World stock markets continued their upward trend this quarter, marking the third consecutive quarter that markets have risen. Low interest rates, steadily improving corporate earnings and increasing investor confidence continue to fuel the recovery in the stock market. The rebound in the global economy is being driven primarily by strong growth in the United States. After three years of belt tightening, companies are once again posting solid profits and increasing capital expenditures. As a result, the fair value of the Heritage Fund increased by $753 million this quarter and $2.0 billion over the past nine months. While gains in equity markets over the past nine months have been significant, the Heritage Fund maintains a long-term investment strategy and holds a diversified portfolio of assets to avoid over exposure to any particular asset class.

FUND VALUE

At December 31, 2003, the fair value of the Heritage Fund stood at $12.4 billion up from $11.9 billion at September 30, 2003 and $11.1 billion at March 31, 2003. Over the past nine months, the fair value of the Fund increased by $2.0 billion of which $703 million was transferred or payable to the General Revenue Fund resulting in a net increase in fair value of $1.3 billion. Overall, the Fund returned 6.3% from its investments this quarter and 18.0% over nine months. Fund equity, at cost, remained unchanged at $11.4 billion because all of the Fund's net income is transferred to the General Revenue Fund.

HERITAGE FUND - FAIR VALUE
(billions)



MARKET SUMMARY

The Canadian stock market rose again this quarter despite the appreciation in the Canadian dollar that has made exports more expensive and constrained growth. The S&P/TSX increased by 11.3% during the quarter and 31.4% over nine months. The materials, energy and financials sectors led all ten stock market industry sectors this quarter. Over nine months the technology sector posted the largest increase. The Canadian economy continued to generate new jobs. December marked the fourth consecutive month of employment growth in Canada. The housing market was particularly strong, setting new records in 2003 due in large part to low interest rates and job growth. The US economy accelerated this quarter. The US service sector grew while US factories expanded at a healthy pace. Worker productivity also rose, however employment is lagging. The strong increase in the non-North American market over nine months was fueled primarily from a stronger US economy.

The value of the US dollar weakened slightly this quarter against the Canadian dollar. At December 31, 2003, $1 US purchased $1.29 Canadian compared to $1.35 Canadian at September 30, 2003 and $1.47 Canadian at March 31, 2003. As a result, the appreciation in value of US dollar equity investments was partially reduced when translated into Canadian dollars.

MARKET SUMMARY

Benchmark Index Returns as at December 31, 2003	Current Quarter %	Nine Months %

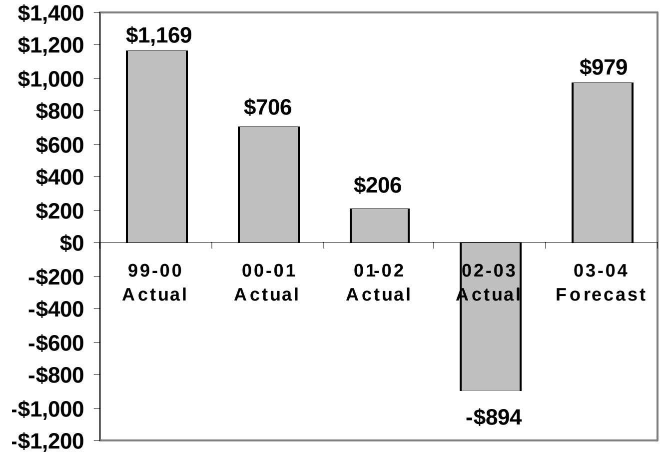
FORECAST NET INCOME

The Fund's forecast net income for the year ended March 31, 2004 is $979 million, an increase of $539 million from the original budget forecast of $440 million. On a consolidated basis, the forecast investment income is $964 million. The consolidated forecast income excludes income from holdings of Alberta provincial corporation debentures.

HERITAGE FUND NET INCOME
(millions)



CHANGE IN NET ASSETS

The Heritage Fund accounts for its investments on a cost basis of accounting. Investment income on a cost basis excludes unrealized gains and losses. Investment income on a fair value basis includes unrealized gains and losses. The investment income on a fair value basis for the three months ended December 31, 2003 totals $753 million and $1,975 million over nine months.

CHANGES IN NET ASSETS
(millions)

	Three Months Dec 31, 2003	Nine Months Dec 31, 2003	Nine Months Dec 31, 2002
Fair value, beginning of period	$ 11,911	$11,075	$ 12,414

Change in unrealized appreciation (depreciation) in value of investments	436	1,272	(169)
Investment income (loss), fair value basis	753	1,975	(820)
Transfers to the General Revenue Fund**	(317)	(703)	-
Fair value, end of period***	$ 12,347	$12,347	$ 11,594

* includes interest, dividends, realized gains and losses, derivative income and administration expenses

** see financial statements (Note 6)

*** includes investments of $12,711 million less net current liabilities of $364 million.

TRANSFERS TO THE GENERAL REVENUE FUND

Realized investment income earned by the Fund is not reinvested in the Fund. Instead, all of the net income is transferred to the Province's main operating fund, the General Revenue Fund (GRF), and used for Albertans' priorities like health care, education, roads, tax reductions and debt repayment. Changes in unrealized gains and losses are not included in net income determined by the cost basis of accounting and therefore not transferred to the General Revenue Fund. The Fund's net income for the nine months ended December 31, 2003, amounted to $703 million of which $330 million was transferred to the General Revenue Fund and $373 million remains payable to GRF. Actual cash transfers of $330 over nine months or $110 million per quarter are based on one quarter of the original budget estimate of income of $440 million for fiscal year 2003-2004.

INVESTMENT VALUATION

Investments and investment income are recorded on the financial statements of the Heritage Fund at cost in accordance with government accounting policies. The fair value of the Fund and its investments are provided for information purposes. Management uses fair value to assess the investment performance of the Fund against market-based benchmarks.

The Fund's policy is to write down the cost of those securities where the decline in value below cost is not considered temporary. On a quarterly basis, management reviews the Fund's investment portfolio to identify those securities where the fair value has declined significantly below cost. The Fund's net income of $703 million for the nine months ended December 31, 2003 includes write-downs of public equities totaling $2.5 million.

INVESTMENT ASSET MIX

The investment strategy is to invest in a diversified portfolio to optimize long-term returns at an acceptable level of risk. The policy asset allocation is reported in the Fund's 2003-06 business plan.

The long term policy asset mix for fixed income securities remains the same as the previous year at 35.0%. The policy asset mix for public equity investments decreases from 50.0% to 45.0% due to a reduction in Canadian equity investments by 5.0%. Private equities are expected to increase from 2.0% to 5.0% of total portfolio investments while absolute return strategies are expected to increase from 3.0% to 5.0%. Real estate investments remain unchanged at 10.0%.

The actual investment mix changed over the nine months. Fixed income securities declined from 35.8% to 32.4%. Public equity investments increased from 52.9% to 56.4% largely due to the increase in market value of public equity investments relative to other investments. Private equity investments increased slighlty from 0.8% to 0.9%. Absolute Return Strategies also increased from 2.6%

to 2.9% of the Fund's investment portfolio. Real estate investments decreased from 7.9% to 7.4% of the Fund's total investment portfolio.

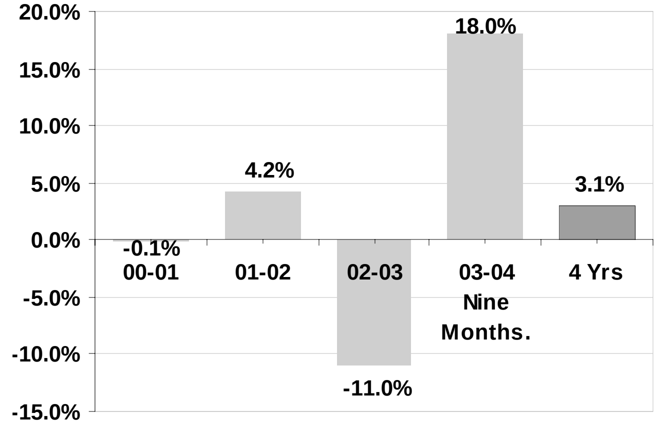
PERFORMANCE MEASUREMENT

HERITAGE FUND RATE OF RETURN

The Heritage Fund posted an overall positive rate of return of 6.3% this quarter, 40 basis points better than the Fund's benchmark return of 5.9%. Over nine months, fund investments returned a healthy 18.0%, or 70 basis points better than the benchmark of 17.3%. The Fund earned positive returns from all asset classes.

The performance of the Heritage Fund is measured over the long term. Over the past four-year period, the fund generated a nominal annualized return of 3.1%. The Heritage Fund is expected to generate a real rate of return of 5.0% at an acceptable level of risk over a moving four-year period. Over a four-year period, the annualized inflation rate was 2.5%. Therefore, the Fund is expected to generate a nominal annualized rate of return of 7.5%.

HERITAGE FUND ANNUAL RETURNS AT FAIR VALUE
(percent)

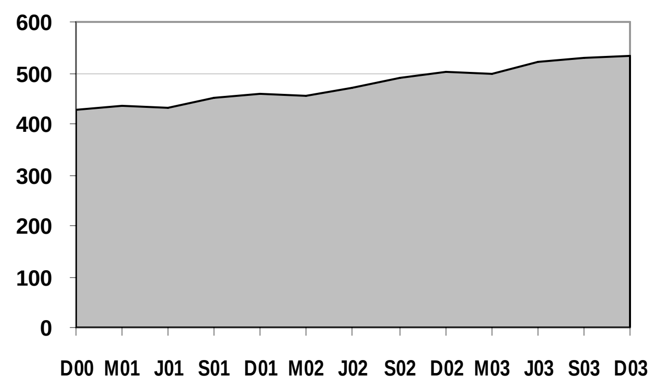


The performance of the Heritage Fund investments is measured against various market-based indices. Value added by investment management is accomplished through asset mix decisions and security selection. The following sections describe the performance of the Fund's major asset classes in relation to their benchmarks.

FIXED INCOME INVESTMENTS

The Canadian bond market posted lower returns this quarter. The Scotia Capital (SC) Bond Universe Index measures the performance of marketable Canadian bonds with terms to maturity of more than one year. Over the past quarter, the SC Bond Universe Index increased by 0.9% while the short term SC 91-Day T-Bill Index increased by 0.6%.

SC UNIVERSE BOND INDEX



LT Fixed income	Actual Return %	Benchmark SC Bond Universe Index %	Over (Under) bps*
Current quarter	1.1	0.9	20
Nine months	7.8	7.4	40
One year	7.3	6.7	60
Four years (annualized)	9.0	8.4	60

* bps is basis points, where 1 bps equals 0.01%.

ST Fixed Income	Actual Return %	Benchmark SC 91-Day T-Bill Index %	Over (Under) bps
Current quarter	0.7	0.6	10
Nine months	2.3	2.3	0
One year	3.1	2.9	20
Four years (annualized)	4.1	3.9	20

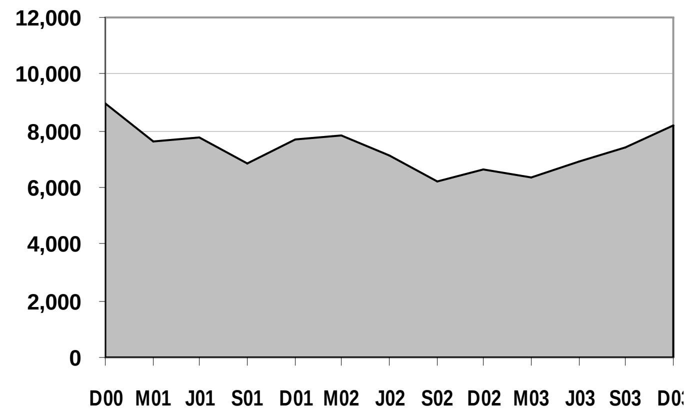
The Fund's actual rate of return over the quarter from Canadian bonds was 1.1%, 20 basis points better than the benchmark SC Bond Universe Index. The Fund's return from short-term securities was 0.7%, 10 basis points better than the benchmark SC 91-Day T-Bill Index. Over four years, returns from long-term and short-term securities exceeded their benchmarks by 60 and 20 basis points respectively. The out-performance over four years was primarily due to a higher weight in corporate bonds and duration management. The Heritage Fund's total fixed income portfolio is internally managed through various pools and direct holdings.

Over the past nine months, investments in bonds, notes, short term paper, provincial corporation debentures and loans declined from 35.8% to 32.4% of total investments. Total fixed income securities increased to $4.12 billion from $3.96 billion at March 31, 2003.

CANADIAN EQUITY INVESTMENTS

The Canadian stock market increased this quarter. The materials and energy sectors led the increase among the ten industry sectors. The Toronto Stock Exchange (S&P/TSX) Composite Index measures the performance of Canada's top companies in ten industrial sectors. The S&P/TSX Index increased by 11.3% for the three months ending December 31, 2003 and 31.4% over nine months.

S&P / TSX



Canadian Public Equities	Actual Return %	Benchmark S&P/TSX Index %	Over (Under) bps
Current quarter	11.3	11.3	0
Nine months	31.0	31.4	-40
One year	26.6	26.7	-10
Four years (annualized)	1.7	1.0	70

The Heritage Fund's Canadian equity portfolio is held in various investment pools managed by internal and external managers. Over the quarter, the Fund's actual return from Canadian equities was 11.3% equal to the benchmark S&P/TSX. Over four years, the fund's return from Canadian equities was 1.7% or 70 basis points better than the benchmark S&P/TSX. Good stock selection in small cap and large cap investment pools resulted in the out-performance.

At December 31, 2003, investments in Canadian public equities totaled 23.0% or $2.93 billion of the Heritage Fund investment portfolio compared to 21.4% or $2.37 billion at March 31, 2003.

US EQUITY INVESTMENTS

The United States equity market recorded gains this quarter. Materials and energy stocks led the increase in the US market over the quarter. The Standard & Poor's 500 Index, S&P 500, which measures the performance of the top 500 American companies, increased by 7.4% during the past three months and 16.9% over nine months in Canadian dollars.

S&P 500

		Benchmark	
	Actual Return	S&P 500 Index	Over (Under)
US Public Equities	%	%	bps
Current quarter	7.4	7.4	0
Nine months	18.1	16.9	120
One year	7.0	5.3	170
Four years (annualized)	-7.3	-8.0	70

The Fund's actual rate of return over the quarter from US equities was 7.4%, equal to the benchmark S&P 500. During the year, currency hedges added approximately 27 basis points to the performance of US equities. Over four years, the Fund's US equity portfolio returned a negative 7.3%, 70 basis points better than the benchmark S&P 500 Index. Over the long term, the out-performance was due to a weighting towards US small capitalization stocks.

At December 31, 2003, investments in US equities totaled 16.0% or $2.03 billion of the Heritage Fund investment portfolio compared to 15.8% or $1.75 billion at March 31, 2003.

NON-NORTH AMERICAN EQUITY INVESTMENTS

The Non-North American equity market recorded strong gains this quarter. The Morgan Stanley Capital International Index for Europe, Australasia and the Far East, MSCI EAFE Index, measures the performance of approximately 1,000 companies on 21 stock exchanges around the world. The index increased by 12.1% this quarter in Canadian Dollars and 32.8% over the past nine months.

MSCI EAFE

		Benchmark	
	Actual Return	MSCI EAFE Index	Over (Under)
EAFE Public Equities	%	%	bps
Current quarter	11.9	12.1	-20
Nine months	34.0	32.8	120
One year	13.9	13.4	50
Four years (annualized)	-8.5	-8.6	10

The Fund's actual return over the quarter from Non-North American equities was 11.9%, 20 basis points less than the benchmark MSCI EAFE Index. Over four years the Fund's Non-North American equity portfolio returned a negative 8.5%, 10 basis points better than the benchmark MSCI EAFE Index.

At December 31, 2003, investments in non-North American equities totaled 17.4% or $2.21 billion of the Heritage Fund investment portfolio compared to 15.7% or $1.74 billion at March 31, 2003.

REAL ESTATE INVESTMENTS

The Fund's real estate investments are held in the internally managed Private Real Estate Pool. Nearly half of the real estate portfolio is invested in retail, half in office and a small portion in industrial and residential. Approximately 74% of real estate holdings are located in Ontario, 24% in Alberta and 2% in British Columbia. The Fund's real estate portfolio earned 2.7% this quarter or 130 basis points better than the benchmark. Over four years the Fund's return from real estate was 7.8% or 170 basis points less than the benchmark.

Real estate	Actual Return %	Benchmark CPI plus 5%* %	Over (Under) bps
Current quarter	2.7	1.4	130
Nine months	4.8	4.1	70
One year	10.0	6.6	340
Four years (annualized)	7.8	9.5	-170

* Effective April 1, 2002, the benchmark changed from the Russell Canadian Property Index (RCPI) to CPI plus 5%. Therefore, the benchmark for four years is a combination of RCPI and CPI plus 5%.

At December 31, 2003, investments in real estate totaled 7.4% or $936 million of the Heritage Fund investment portfolio compared to 7.9% or $870 million at March 31, 2003.

ABSOLUTE RETURN STRATEGIES

Absolute return strategy investments were initiated late in the second quarter of last year. These strategies encompass a wide variety of investments with the objective of realizing positive returns regardless of the overall market direction. A common feature of many of these strategies is buying undervalued securities and selling short overvalued securities. Over the quarter, absolute return strategies generated a return of 3.6%, 200 basis points better than the benchmark Consumer Price Index (CPI) plus 6.0%. Over nine months, absolute return strategies returned 7.8%, 300 basis points better than the benchmark. The out-performance of the Absolute Return Strategy managers over nine months was protected by a currency hedge.

Absolute Return Strategies	Actual Return %	Benchmark CPI plus 6% %	Over (Under) bps
Current quarter	3.6	1.6	200
Nine months	7.8	4.8	300
One year	9.9	7.6	230
Four years (annualized)	n/a	n/a	-

At December 31, 2003, investments in absolute return strategies totaled 2.9% or $365 million of the Heritage Fund investment portfolio compared to 2.6% or $283 million at March 31, 2003.

ADMINISTRATIVE EXPENSES

Administrative expenses include investment management, cash management, custodial and other expenses. External management and custodial fees are deducted directly from the income of externally managed investment pools. Internal administrative expenses are deducted from the internally managed pooled funds or directly from the Fund.

The Fund's total administrative expenses for the nine months ending December 31, 2003, including amounts deducted from the investment income of the pooled funds, amounted to $13.857 million or 0.112% of the Funds net assets at fair value compared to $12.183 million or 0.105% of net assets for the same period last year.

ADMINISTRATION EXPENSE BREAKDOWN

Nine Months Ended December 31, 2003 (thousands)

	Nine Months Ended	
	Dec 31 2003	**Dec 31 2002**
	(thousands)	
Direct fund expenses	$ 1,861	$ 1,208
Externally managed investment pools	9,199	9,111
Internally managed investment pools	2,797	1,864
Total	$ 13,857	$ 12,183
Expenses as a percent of net assets at fair value	0.112%	0.105%

Over the past nine months, expenses of direct and internally managed investment pools increased by $1.586 million over the same period last year. The net increase in expense for the internally managed pools was due to additional staffing requirements, system improvements and the transfer of US passively managed investments from external managers to internal managers.

Expenses from externally managed investment pools increased by $88 thousand over the same period last year. The net increase was primarily due to the new Absolute Return Strategy Pool, initiated in the second quarter of 2002-03, which is relatively more expensive than other externally managed pools.

Notes to the Financial Statements

December 31, 2003 (unaudited)

NOTE 1 AUTHORITY AND MISSION

The Alberta Heritage Savings Trust Fund operates under the authority of the Alberta Heritage Savings Trust Fund Act (the Act), Chapter A-23, Revised Statutes of Alberta 2000, as amended.

The preamble to the Act describes the mission of the Fund as follows:

"To provide prudent stewardship of the savings from Alberta's non-renewable resources by providing the greatest financial returns on those savings for current and future generations of Albertans."

NOTE 2 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES AND REPORTING PRACTICES

These financial statements are prepared in accordance with generally accepted accounting principles.

The accounting policies of significance to the Fund are as follows:

(a) Portfolio Investments

Fixed-income securities, mortgages, equities, real estate investments and absolute return strategy investments held directly by the Fund or by pooled investment funds are recorded at cost. Cost includes the amount of applicable amortization of discount or premium using the straight-line method over the life of the investments.

Investments in loans are recorded at cost less any allowance for credit loss. Where there is no longer reasonable assurance of timely collection of the full amount of principal and interest of a loan, a specific provision for credit loss is made and the carrying amount of the loan is reduced to its estimated realizable amount.

Investments are recorded as of the trade date.

The cost of disposals is determined on the average cost basis.

Where there has been a loss in value of an investment in fixed-income securities, mortgages, equities, real estate and absolute return strategies that is other than a temporary decline, the investment is written down to recognize the loss. The written down value is deemed to be the new cost.

(b) Investment Income

Investment income is recorded on the accrual basis where there is reasonable assurance as to its measurement and collectability. When a loan becomes impaired, recognition of interest income in accordance with the terms of the original loan agreement ceases. Any subsequent payments received on an impaired loan are applied to reduce the loan's book value.

Gains and losses arising as a result of disposals of investments are included in the determination of investment income. Income and expense from derivative contracts are included in investment income.

(c) Foreign Currency

Foreign currency transactions are translated into Canadian dollars using average rates of exchange, except for hedged foreign currency transactions which are translated at rates of exchange established by the terms of the forward exchange contracts. Exchange differences on unhedged transactions are included in the determination of investment income.

(d) Investment Valuation

Fair value is the amount of consideration agreed upon in an arm's length transaction between knowledgeable, willing parties who are under no compulsion to act. Fair values of investments held either directly by the Fund or by pooled investment funds are determined as follows:

(i) Public fixed-income securities and equities are valued at the period-end closing sale price, or the average of the latest bid and ask prices quoted by an independent securities valuation company.

(ii) Mortgages, provincial corporation debentures and private fixed-income securities are valued based on the net present value of future cash flows. These cash flows are discounted using appropriate interest rate premiums over similar Government of Canada benchmark bonds trading in the market.

(iii) The fair value of private equities is estimated by managers or general partners of private equity funds, pools and limited partnerships. Valuation methods may encompass a broad range of approaches. The conservative value or cost approach is used to value companies without either profits or cash flows. Established private companies are valued using the fair market value approach reflecting conventional valuation metrics including discounted cash flows and multiple analysis.

(iv) The fair value of real estate investments are reported at their most recent appraised value, net of any liabilities against the real property. Real estate properties are appraised annually by qualified external real estate appraisers. Appraisers use a combination of methods to determine fair value including the replacement cost approach, direct comparison approach, direct capitalization of earnings approach and the discounted cash flows approach.

(v) The fair value of Absolute Return Strategy Pool investments are estimated by external managers.

(vi) The fair value of loans is estimated by management based on the present value of discounted cash flows.

(vii) The fair value of deposits, receivables, accrued interest and payables are estimated to approximate their book values.

(viii) The fair value of investments and any other assets and liabilities denominated in a foreign currency are translated at the year-end exchange rate.

(e) Valuation of Derivative Contracts

Derivative contracts include equity and bond index swaps, interest rate swaps, forward foreign exchange contracts, equity index futures contracts, credit default swaps and cross-currency interest rate swaps. As disclosed in Note 4, the value of derivative contracts is included in the fair value of pooled investment funds. The estimated amount receivable or payable from derivative contracts at the reporting date is determined by the following methods:

(i) Equity and bond index swaps are valued based on changes in the appropriate market based index net of accrued floating rate interest.

(ii) Interest rate swaps and cross-currency interest rate swaps are valued based on discounted cash flows using current market yields.

(iii) Credit default swaps are valued based on discounted cash flows using current market yields and calculated default probabilities.

(iv) Forward foreign exchange contracts and equity index futures contracts are based on quoted market prices.

NOTE 3 PORTFOLIO INVESTMENTS

The majority of the Fund's investments are held in pooled investment funds established and administered by Alberta Revenue. Pooled investment funds have a market based unit value that is used to allocate income to participants and to value purchases and sales of pool units. As at December 31, 2003, the Fund's percentage ownership, at market, in pooled investment funds is as follows:

	% Ownership	
	December 31, 2003	March 31, 2003
Internally Managed Investment Pools		
Canadian Dollar Public Bond Pool	40.0	38.1
Canadian Pooled Equity Fund	60.0	55.0

US Large Cap Equity Pool	41.6	41.6
US Passive Equity Pool	-	73.3
US Small/Mid Cap Equity Pool	23.1	26.9

(a) The Consolidated Cash Investment Trust Fund is managed with the objective of providing competitive interest income to depositors while maintaining appropriate security and liquidity of depositors' capital. The portfolio is comprised of high-quality short-term and mid-term fixed-income securities with a maximum term-to-maturity of three years. As at December 31, 2003, securities held by the Fund have an average effective market yield of 2.38% per annum (March 31, 2003: 3.23% per annum).

(b) The Canadian Dollar Public Bond Pool is managed with the objective of providing above average returns compared to the total return of the Scotia Capital Universe Bond Index over a four-year period while maintaining adequate security and liquidity of participants' capital. The excess return is achieved through management of portfolio duration and sector rotation. The portfolio is comprised of high quality Canadian fixed-income instruments and debt related derivatives. As at December 31, 2003, securities held by the Pool have an average effective market yield of 4.59% per annum (March 31, 2003: 5.41% per annum) and the following term structure based on principal amount: under 1 year: 2%; 1 to 5 years: 41%; 5 to 10 years: 31%; 10 to 20 years: 6%; over 20 years: 20%.

(c) As at December 31, 2003, fixed-income securities held directly by the Fund have an average effective market yield of 3.39% per annum (March 31, 2003: 4.36% per annum). As at December 31, 2003, fixed-income securities have the following term structure based on principal amount: 1 to 5 years: 100%.

(d) The Private Mortgage Pool is managed with the objective of providing investment returns higher than attainable from the Scotia Capital Universe Bond Index over a four-year period or longer. The portfolio is comprised primarily of high quality commercial mortgage loans (94.1%) and provincial bond residuals (5.9%). To limit investment risk, mortgage loans are restricted to first mortgage loans, diversified by property usage and geographic location, and include a small portion of NHA insured loans. As at December 31, 2003, securities held by the Pool have an average effective market yield of 5.93% per annum (March 31, 2003: 6.43% per annum) and the following term structure based on principal amount: under 1 year: 7%; 1 to 5 years: 23%; 5 to 10 years: 28%; 10 to 20 years: 21%; and over 20 years: 21%.

(e) As at December 31, 2003, Provincial corporation debentures have an average effective market yield of 7.45% per annum (March 31, 2003: 7.83% per annum) and the following term structure based on principal amounts: 5 to 10 years: 100%.

(f) Investment in loans are recorded at cost. The fair value of loans is estimated by management based on the present value of discounted cash flows. As at December 31, 2003, investment in loans, at cost, include the Ridley Grain loan amounting to $91,245,000 (March 31, 2003: $91,245,000) and the Vencap loan amounting to $1,863,000 (March 31, 2003: $6,114,000). The decrease in the carrying value of the Vencap loan resulted from a change to the constant yield method of amortization. The decrease of $4.25 million was charged to income of the current period.

- Under the terms of the loan to Ridley Grain, 11% Participating First Mortgage Bonds due July 31, 2015, interest is compounded semi-annually and payable annually to the extent of available cash flow and any shortfall is to be deferred and capitalized. The principal of $91,245,000 and deferred interest is repayable on or before July 31, 2015. Deferred interest at December 31, 2003 amounted to $88,414,959 (March 31, 2003: $76,189,320). Grain throughput volumes are the main determinant of profitability of the grain terminal and the value of the loan to the Fund. Due to the uncertainty of forecasting the grain throughput volumes, income from the participating bonds is recognized when it is measurable and collectable.
- The principal amount of the Vencap loan, amounting to $52,588,000, is due July 2046 and bears no interest.

(g) The Domestic Passive Equity Pooled Fund is managed on a passive approach with the objective of providing investment returns comparable to the S&P/TSX Index. A portion of the portfolio is comprised of both publicly traded Canadian equities and structured investments replicating the S&P/TSX 100 Index and the S&P/TSX 60 Index. The other portion of the portfolio fully replicates the S&P/TSX. The Pool's investment in units of the Floating Rate Note Pool (FRNP) are used as the underlying securities to support the index swaps of the pool. FRNP is managed with the objective of generating floating rate income needed for the swap obligations in respect of structured investments in foreign equities, domestic equities and domestic bonds. Through the use of interest rate swaps, FRNP provides investment opportunities in high quality floating-rate instruments with remaining term-to-maturity of ten years or less.

(h) The Canadian Large Cap Equity Pool consists of multiple portfolios of publicly traded Canadian equities. Each portfolio is actively managed by an external manager with expertise in the Canadian large cap equity market. The performance objective is to provide returns higher than the total return of the S&P/TSX Index over a four-year period. Return volatility is reduced through multiple manager investment style and market capitalization focus.

(i) The Canadian Pooled Equity Fund is managed with the objective of providing competitive returns comparable to the total return of the S&P/TSX Index while maintaining maximum preservation of participants' capital. The portfolio is comprised of publicly traded equities in Canadian corporations. Risk is reduced by prudent security selection and sector rotation.

(j) The Growing Equity Income Pool is managed with the objective of providing a steady and growing stream of dividend income to client portfolios by investing in mature companies with strong financial characteristics and growing distributions. Risk is reduced by holding established well capitalized companies. The performance of the pool is measured against the total return of the S&P/TSX Index.

(k) The Canadian Small Cap Equity Pool consists of multiple portfolios of publicly traded Canadian equities with market capitalization of .15% of the S&P/TSX Index total market capitalization at time of purchase. Each portfolio is actively managed by an external manager with expertise in the Canadian small cap equity market. The performance objective is to provide returns higher than the total return of the S&P/TSX Index over a four-year period and returns higher than the Nesbitt Burns Small Cap Index over shorter time periods. Return volatility is reduced through multiple manager investment style and small capitalization focus.

(l) Publicly traded US equities held in the S & P 500 Index Fund replicate the Standard & Poor's (S&P) 500 index. The performance objective is to provide returns comparable to the total return of the S&P 500 index over a four-year period. The Pool's investment in units of the Floating Rate Note Pool (FRNP) are used as the underlying securities to support the index swaps of the pool (see Note 3g).

(m) The US Large Cap Equity Pool consists of multiple portfolios of publicly traded United States equities. Each portfolio is actively managed by an external manager with expertise in the US large cap equity market. The performance objective is to provide returns higher than the total return of the Standard & Poor's (S&P) 500 index over a four-year period. Return volatility is reduced through multiple manager investment style and large capitalization focus.

(n) The US Small/Mid Cap Equity Pool consists of one portfolio of publicly traded United States equities. The portfolio is actively managed by an external manager with expertise in the small cap and mid cap US equity market. The performance objective is to provide returns higher than the total return of the Russell 2500 index over a four-year period.

(o) The Europe, Australasia and Far East (EAFE) Core and Plus Equity Pools consist of multiple portfolios of publicly traded non-North American equities. EAFE Core portfolios are actively managed by external managers with European and Pacific Basin mandates. EAFE core managers have constraints on foreign currency management and deviations from the MSCI EAFE index asset mix by country. The EAFE Plus portfolios are actively managed by external managers with less constraints on country allocation, stock selection, currency management and investments in emerging markets. The performance objective is to provide returns higher than the total return of the Morgan Stanley Capital International (MSCI) EAFE index over a four-year period.

(p) The externally managed EAFE Passive Equity Pool consists of one portfolio of non-North American publicly traded equities that replicate the MSCI EAFE index. The performance objective is to provide returns comparable to the total return of the MSCI EAFE index over a four-year period.

(q) The Private Real Estate Pool is managed with the objective of providing investment returns higher than the Consumer Price Index plus 5%. Real estate is held through intermediary companies which have issued to the Pool, common shares and participating debentures secured by a charge on real estate. Risk is reduced by investing in properties that provide diversification by geographic location, by property type and by tenancy. As real estate returns are positively correlated to inflation and negatively correlated to returns from fixed income securities and equities, the Pool provides diversification from the securities market with opportunities for high return.

(r) The Absolute Return Strategy Pool is managed with the objective of providing investment returns higher than the Consumer Price Index (CPI) plus 6%. The Pool uses external managers who employ various investment strategies. These strategies are expected to produce absolute positive investment returns with lower volatility.

(s) Private Equity and Income Pools are managed with the objective of providing investment returns higher than the Consumer Price Index (CPI) plus 8.0%. The Private Equity portfolio consists of the Private Equity Pool, PEP98, PEP02, Foreign Private Equity Pool 2002 and the Private Income Pool. Private equity investments are held in institutionally sponsored private equity pools. Risk is reduced by avoiding direct investments in private companies and by limiting holdings in any single pool. The Private Income Pool allows unit holders to participate as equity investors in infrastructure related projects.

(t) Where there has been a loss in value of an investment that is other than a temporary decline, the cost of the investment is written down to recognize the loss (see Note 2 (a)). Where the fair value remains less than cost, after recording a writedown, it is management's best judgement that the decline in value is caused by short term market trends and are temporary in nature.

NOTE 4 DERIVATIVE CONTRACTS

Derivative contracts are financial contracts, the value of which is derived from the value of underlying assets, indices, interest rates or currency rates. The Fund uses derivative contracts held indirectly through pooled investment funds to enhance return, manage exposure to interest rate risk and foreign currency risk and for asset mix management purposes. The notional value of a derivative contract represents the amount to which a rate or price is applied in order to calculate the exchange of cash flows.

(i) A swap is a contractual agreement between two counter-parties to exchange a series of cash flows based on a notional amount. An equity or bond index swap involves the exchange of a floating interest rate cash flow for one based on the performance of a market index. For interest rate swaps, parties generally exchange fixed and floating rate interest cash flows based on a notional amount. A credit default swap allows counter-parties to buy and sell protection on credit risk inherent in a bond. A premium is paid, based on a notional amount, from one counter party to a second counter party in exchange for a contingent payment should a defined credit event occur with respect to the underlying security. Cross-currency interest rate swaps are contractual obligations in which the principal amounts of Canadian fixed-income securities denominated in foreign currency are exchanged for Canadian currency amounts both initially and at maturity. Over the term of the cross-currency swap, counter-parties exchange fixed to fixed and fixed to floating interest rate cash flows in the swapped currencies. There are underlying securities supporting all swaps. Leveraging is not allowed.

(ii) Forward foreign exchange contracts are contractual agreements to exchange specified currencies at an agreed upon exchange rate and on an agreed settlement date in the future.

(iii) An equity index futures contract is an agreement to receive or pay cash based on changes in the level of the specified stock index.

The following is a summary of the fund's proportionate share of the notional amount and fair value of derivative contracts held by pooled funds at December 31, 2003.

	Maturity			December 31, 2003 (thousands)		March 31, 2003	
	Under 1 Year	1 to 3 Years	Over 3 Years	Notional Amount	Fair Value (a)	Notional Amount	Fair Value (a)
Equity index swap contracts	77%	23%	-	$ 1,070,108	$ 40,048	$ 575,028	$ (13,298)
Bond index swap contracts	100%	-	-	51,649	74	52,107	(173)
Forward foreign exchange contracts	100%	-	-	396,531	27,546	616,346	21,069
Interest rate swap contracts	39%	57%	4%	655,379	(25,367)	404,230	(13,765)
Equity index futures contracts	100%	-	-	9,957	794	13,754	421
Credit default swap contracts	-	100%	-	28,919	(355)	-	-
Cross-currency interest rate swaps	1%	32%	67%	313,868	(16,691)	275,384	(52,399)
				$ 2,526,411	$ 26,049	$ 1,936,849	$ (58,145)

(a) The method of determining the fair value of derivative contracts is described in note 2 (e).

NOTE 5 INVESTMENT RISK MANAGEMENT

Income and financial returns of the Fund are exposed to credit risk and price risk. Credit risk relates to the possibility that a loss may occur from the failure of another party to perform according to the terms of a contract. Price risk is comprised of currency risk, interest rate risk and market risk. Currency risk relates to the possibility that the investments will change in value due to future fluctuations in foreign exchange rates. Interest rate risk relates to the possibility that the investments will change in value due to future fluctuations in market interest rates. Market risk relates to the possibility that the investments will change in value due to future fluctuations in market prices.

The Standing Committee on the Alberta Heritage Savings Trust Fund reviews and approves the business plan of the Fund. In order to earn an optimal financial return at an acceptable level of risk, the Fund's business plan proposes the following long term asset mix policy:

Public equities	45%
Fixed income securities	35%
Real Estate	10%
Private equities	5%
Absolute Return Strategies	5%

Risk is reduced through asset class diversification, diversification within each asset class, quality and duration constraints on fixed-income instruments, and restrictions on amounts exposed to countries designated as emerging markets. Controls are in place respecting the use of derivatives (see Note 4). Forward foreign exchange contracts may be used to manage currency exposure in connection with securities purchased in foreign currency (see Note 4).

NOTE 6 FUND EQUITY

Section 8 (2) of the Alberta Heritage Savings Trust Fund Act (the Act) states that the net income of the Heritage Fund less any amount retained in the Fund to maintain its value shall be transferred to the General Revenue Fund annually in a manner determined by the Minister of Revenue.

Section 11(5) of the Act states that for fiscal years subsequent to 1999 and until the accumulated debt is eliminated in accordance with the Fiscal Responsibility Act, the Minister of Revenue is not required to retain any income in the Heritage Fund to maintain its value, but may retain such amounts as the Minister of Revenue considers advisable.

NOTE 7 NET INCOME (LOSS)

	(thousands)			
	Three Months Ended Dec. 31, 2003	Three Months Ended Dec. 31, 2002	Nine Months Ended Dec. 31, 2003	Nine Months Ended Dec. 31, 2002
Deposits and fixed income securities	$ 69,731	$ 70,603	$ 228,097	$ 214,747
Canadian equities	174,588	43,301	350,000	(239,400)
United States equities	30,219	(57,446)	11,538	(428,461)
Non-North American equities	23,021	(69,163)	47,910	(236,001)
Private equities	1,168	4,525	4,172	5,889
Real estate	20,899	18,224	41,784	34,495
Absolute Return Strategies	(1,693)	(953)	21,476	(953)
Investment income (loss)	317,933	9,091	704,977	(649,684)
Direct administration expenses (Note 9)	(582)	(313)	(1,861)	(1,208)
Net investment income (loss)	$ 317,351	$ 8,778	$ 703,116	$ (650,892)

Investment income (loss) is comprised of interest, dividends, amortization of discount and premiums, swap income, security lending income and realized gains and losses, net of write-downs, on investments. The Fund's share of income (loss) earned from externally and internally managed investment pools is net of administrative expenses incurred by the pools. (see Note 9).

The investment income for the nine months ended December 31, 2003 includes writedowns of public equities totalling $2,535,000 (December 31, 2002: $440,735,000).

NOTE 8 INVESTMENT PERFORMANCE

The following is a summary of the investment performance results attained by the Fund determined on a fair value basis:

	Current Quarter Return	Nine Months Return	Four-Year Compound Annualized Return
Time weighted rates of return			
Overall actual return	6.3%	18.0%	3.1%
Benchmark return*	5.9%	17.3%	7.5%

* The overall benchmark return for three months and nine months is a product of the weighted average policy sector weights and sector benchmark returns. The Fund is expected to generate a real rate of return of 5.0% over a moving four year period based on the Fund’s business plan. Over a four-year period, the annualized inflation rate was 2.5%. Therefore, the fund is expected to generate a nominal annualized rate of return of 7.5%.

NOTE 9 ADMINISTRATIVE EXPENSES

Administrative expense includes investment management, cash management, safekeeping costs and other expenses charged on a cost-recovery basis directly from Alberta Revenue. The Fund's total administrative expense for the period, including amounts deducted directly from investment income of pooled funds is as follows:

(thousands)

	Three Months Ended Dec. 31, 2003	Three Months Ended Dec. 31, 2002	Nine Months Ended Dec. 31, 2003	Nine Months Ended Dec. 31, 2002
Direct fund expenses, (Note 7)	$ 582	$ 313	$ 1,861	$ 1,208
Externally managed investment pools	2,779	3,203	9,199	9,111
Internally managed investment pools	946	643	2,797	1,864
Total	$ 4,307	$ 4,159	$ 13,857	$ 12,183
Percent of net assets at fair value	0.035%	0.036%	0.112%	0.105%

NOTE 10 COMPARATIVE FIGURES

Certain comparative figures have been reclassified to conform to December 31, 2003 presentation.

NOTE 11 APPROVAL OF FINANCIAL STATEMENTS

These financial statements were approved by the Deputy Minister of Revenue.
