Extracts from "Vital Statistics Act"

"Stillbirth" means the complete expulsion or extraction from its mother, after at least 20 weeks' pregnancy or after attaining a weight of at least 500 grams, of a product of conception in which, after such expulsion or extraction, there is no breathing, beating of the heart, pulsation of the umbilical cord, or unmistakable movement of voluntary muscle.

10.(2) Where a stillbirth occurs, the person who would have been responsible for the registration thereof as provided in section 3(1), if it had been a the birth, shall complete and deliver to the funeral director statement in the prescribed form respecting the stillbirth.

(4) Upon receipt of the statement, the funeral director shall complete the statement setting forth the proposed date and place of burial, cremation or other disposition of the body and shall deliver the statement to the district registrar of the registration district in which the stillbirth occurred.

Instructions

In case of more than one stillborn child at a birth, a separate return must be made for each, and the number of each, in order of birth, stated.

(1) Name of Child: - In place of the given name the word "Stillbirth" may be printed.

(15) Name of Father: - In the case of the parents not being married, the name of the father shall not appear on the certificate unless accompanied by his and the mother's written request.

(23) Physician's Statement of Cause of Stillbirth: - The morbid conditions relating to stillbirth are divided into two groups. In Part I are those causally related to the Immediate Cause and the Antecedent causes, and in Part II those not so related. In most cases a statement of cause under Part I will suffice. When it is necessary to record more than one entry these should be stated in order so as to indicate their medical relationship.

(a) Name first the "Immediate Cause" of stillbirth, i.e., the local disease, injury or complication which caused the stillbirth. Avoid the use of such terms as "Prematurity", "Birth Injury", "Cerebral Haemorrhage", "Asphyxia", etc., alone without stating, if possible, the primary factor responsible for these conditions.

(b) Then give the antecedent causes, i.e., the foetal and/or maternal conditions (if any) of which the immediate cause was the consequence, in order of causal relationship, stating the most recent one first and then others in order. Also check off whether the reported condition was a foetal or maternal condition.

(c) Part II should be reserved for "Other important contributory morbid conditions", particularly when the stillbirth was due to a combination of conditions none of which would have been fatal alone. Here too, check off whether foetal or maternal.

(d) Use accepted terms for morbid conditions and never record mere symptoms only.

The following examples illustrate the essential principles in the use of the form:

30. Cause of stillbirth	Example 1		Example 2		Example 3

Instructions

Physician's Statement of Cause of Death. - The morbid conditions relating to death are divided on the certificate into two groups. In Group I are those related to the disease or condition causing it. In most cases a statement of cause under Group I will suffice. Detailed certification is not desired, the entry of a single cause being preferable in all cases where this can be regarded as indicative of their mutual relationship. This information is sought so that the selection of the cause for tabulation may be made in the light of the certifier's viewpoint.

(a) Name first the immediate cause of death, i.e., the disease, injury or complication which caused death (not mode of dying or terminal condition).

(b) Then give other morbid conditions (if any) of which it was the consequence, in order of causal relationship (due to) stating the most recent one first and then others in order.

(c) Entries under Group II should be reserved for "other significant conditions contributing to the death, but not related to the disease or condition causing it".

(d) Accepted terms for morbid conditions should always be used - never record mere symptoms.

(e) **Maternal Deaths.** - Quality all diseases resulting from pregnancy, childbirth, miscarriage or abortion, e.g., "puerperal septicaemia", "eclampsia, arising during pregnancy". Distinguish between septicaemia originating in abortion and in childbirth.

(f) **Cancer.** - In all cases the organ or part FIRST affected should be specified.

(g) **Violent Deaths.** - Complete medical examinations and physicians who certify to deaths from violent causes should clearly indicate, in all cases, the fundamental distinction of whether the death was due to accident, suicide, or homicide, and then state the manner and nature of injury. The circumstances of each accident should be stated as fully as possible, e.g., a motor vehicle accident should be designated as such, and the type of vehicle involved, e.g., "truck", "private car", etc.

The following examples illustrate the essential principles in the use of the form.

I. Disease or condition directly leading to death.	Example 1 (a) Lobar pneumonia due to (or as a consequence of) (b) _____ due to (or as a consequence of) (c) _____	Example 2 (a) Pulmonary tuberculosis due to (or as a consequence of) (b) _____ due to (or as a consequence of) (c) _____	Example 3 (a) Acute peritonitis due to (or as a consequence of) (b) Acute appendicitis due to (or as a consequence of) (c) _____	Example 4 (a) Broncho-pneumonia due to (or as a consequence of) (b) Operation due to as a consequence of (c) Strangulated inguinal hernia	Example 5 (a) Uraemia due to (or as a consequence of) (b) Chronic nephritis due to as a consequence of (c) _____
II. Other significant conditions contributing to the death, but not related to the disease or condition causing it.	_____	_____	_____	Chronic rheittal nephritis	Chronic bronchitis

Stillbirth

"Stillbirth" means the complete expulsion or extraction from its mother, after at least 20 weeks pregnancy or after attaining a weight of at least 500 grams, of a product of conception, if such expulsion or extraction, there is no breathing, beating of the heart, pulsation of the umbilical cord, or demonstrable movement of voluntary muscles (S. Act. 1983).
