

Ottawa, November 15, 2006

MEMORANDUM D19-6-1

In Brief

ADMINISTRATION OF THE *EXPLOSIVES ACT* AND REGULATIONS

1. Changes to this memorandum have been made to accurately reflect the Canada Border Services Agency's (CBSA) role in assisting Natural Resources Canada to administer the *Explosives Act* and *Explosives Regulations*.
2. This memorandum is an updated and revised version of the previous Memorandum D19-6-1, dated December 12, 1984.

Printed in Canada

Ottawa, November 15, 2006

MEMORANDUM D19-6-1

ADMINISTRATION OF THE *EXPLOSIVES ACT* AND REGULATIONS

The Canada Border Services Agency (CBSA) assists Natural Resources Canada (NRCan) with the administration of the *Explosives Act* and *Explosives Regulations*. This memorandum outlines the provisions concerning the importation and in-transit movement of explosives and is based on the current *Explosives Act* and *Explosives Regulations*.

Legislation

Permit Requirement

Section 9(2) of the *Explosives Act* states the following:

“Except as provided by the regulations, no person shall import any explosive into Canada without a permit issued under this section.”

GUIDELINES AND GENERAL INFORMATION

Definitions

1. The following definitions are excerpts from the *Explosives Act* and *Explosives Regulations*:

“authorized explosive” means any explosive that is declared by the Chief Inspector to be an authorized explosive pursuant to section 22 of the *Explosives Regulations*.

“explosive” means any thing that is made, manufactured or used to produce an explosion, detonation or pyrotechnic effect, and includes gunpowder, propellant powders, blasting agents, dynamite, detonating cord, lead azide, detonators, ammunition of all descriptions, rockets, fireworks, fireworks compositions, safety flares and other signals.

“fireworks composition” means any chemical compound or mechanically mixed preparation of an explosive or inflammable nature that is used for the purpose of making any manufactured fireworks and is not included in any other class of explosives, and includes any star or coloured fire composition that is not manufactured fireworks.

“manufactured fireworks” means explosives of any class and any fireworks composition that is enclosed in any case or contrivance, or is otherwise manufactured or adapted for the production of pyrotechnic effects, pyrotechnic signals or sound signals.

“safety cartridge” means a cartridge for any shotgun, gun, rifle, pistol, revolver and industrial gun the case of which can be extracted after firing and that is so closed as to prevent any explosion in one cartridge being communicated to another cartridge but does not include tracer, incendiary, high explosive or other similar military type cartridges.

Exemptions

2. An explosive named in the table below may be imported without an Explosives Importation Permit provided it is for private use and not for sale and in a shipment that does not contain more of that explosive than the quantity set out in the table below.

Explosives	Quantity
Safety cartridges	5000
Percussion caps (primers) for safety cartridges	5000
Empty primed safety cartridge cases	5000
Gunpowder (black powder) in canisters of 500 grams or less and smokeless powder in canisters of 4000 grams or less	8 kilograms
Model rocket engines	6
Pyrotechnic distress signals and life-saving devices	Any quantity necessary for the safe operation of the aircraft, vessel, train or vehicle in which they are transported or for the safety of the occupants.

3. Christmas crackers may be imported for private use or sale without an Explosives Importation Permit.

4. Caps for toy guns may be imported for private use or sale without an Explosives Importation Permit when packed with individual novelties, other than toy guns, and imported in a quantity of not more than 50 per package.

5. Restrictions on the importation of hollow-point handgun ammunition no longer apply. Hollow-point ammunition for all types of firearms is now admissible.

6. Certain types of ammunition are referred to as being “caseless” since they do not have a cartridge. No special restrictions apply to this type of ammunition.

7. Explosives Importation Permits are not required for the importation of explosives by the Department of National Defence or Public Works and Government Services Canada acting on behalf of the Department of National Defence or for approved foreign defence contracts.

Prohibited Ammunition

8. Certain types of ammunition are prescribed to be prohibited ammunition and could be classified under tariff item No. 9898.00.00. Currently, armour-piercing handgun ammunition, explosive and incendiary ammunition, and shotgun ammunition containing “fléchettes” (darts) or similar projectiles are prohibited. For more information, see Memorandum D19-13-2, *Importing and Exporting Firearms, Weapons and Devices*.

Shipments in Transit

9. Explosives may enter, transit and exit Canada without the benefit of an Explosives Importation Permit when transported in bond and in a manner authorized by or under the *Transportation of Dangerous Goods Act*.

Importation

10. The procedures that apply to the importation of all explosives under the *Explosives Act* are outlined in Appendix A, *Single Shipment Authority*, and Appendix B, *Multiple Shipment Authority*. The objectives of these procedures are to establish effective controls, to facilitate the release of explosives with appropriate documentation, and provide accurate and timely information to NRCan.

11. Shipments of explosives cleared at an inland CBSA office should be removed from the sufferance warehouse as expeditiously as possible.

12. Particular attention is to be given to importations of explosive articles, which are often invoiced as toys and novelties. Many such items are considered prohibited or should undergo testing and analysis to determine admissibility.

13. Appendix C outlines explosive commodities that are either prohibited or commonly mistaken as non-explosives, such as toys and novelties. This list is intended as a guide and is not to be regarded as all-inclusive. When there is any doubt about the admissibility of an article, full particulars should be referred to the Explosives Regulatory Division of NRCan or its regional inspectors of explosives (addresses and telephone numbers are outlined in Appendix D).

Explosives Importation Permits

14. With the exception of limited quantities of certain explosives that are exempt from the Explosives Importation Permit requirement under section 148 of the *Explosives Regulations* (see paragraph 2 of this memorandum), all

importations of explosives must be accompanied by an Explosives Importation Permit issued by the Explosives Regulatory Division of NRCan.

15. Border services officers are to ensure that the permits outlined in Memorandum D19-13-2, *Importing and Exporting Firearms, Weapons and Devices*, are not confused with or accepted in lieu of an Explosives Importation Permit for the importation of explosive commodities that are subject to the requirements outlined in this memorandum and in Memorandum D19-13-2.

Importation of Explosives Without an Explosives Importation Permit

16. Shipments of explosives arriving at border crossing points without an Explosives Importation Permit should not be refused importation automatically. Rather, the importation should be processed in the following manner:

(a) During regular working hours:

The CBSA office at the point of importation will contact NRCan in Ottawa at 613-948-5200 or a regional inspector of explosives (addresses and telephone numbers are outlined in Appendix D) for further instructions.

(b) Upon authorization from NRCan, shipments of explosives may be allowed to proceed to inland points of importation provided that the following is met:

(i) the shipments move “in-bond”;

(ii) delivery requirements are in accordance with Memorandum D3-4-2, *Highway Cargo – Import Movements* (paragraphs 37 to 43);

(iii) the truck or container is sealed; and

(iv) Form A28, *Inspection or Operational Report*, accompanies the shipment.

(c) Form A28 is used to compare quantities declared at the border with quantities received at the delivery site. All the check-ups will be made at the delivery site.

(d) The CBSA office of accounting is to be notified immediately by telephone of the shipment particulars in order to ensure availability of a border services officer to perform the outturn check.

(e) Any overage or shortage in quantity must be reported immediately to NRCan prior to release.

(f) Note that sufferance warehouses do not have the approved facilities for the handling/safekeeping of explosives as required under the *Explosives Act* and *Explosives Regulations*. In these circumstances, special services charges will apply in accordance with Memorandum D1-2-1, *Special Services*.

(g) Outside regular working hours:

The CBSA office at the point of importation will attempt to obtain assistance from an NRCan inspector of explosives by calling the NRCan Commissionaire's Desk in Ottawa at 613-995-9667. The Commissionaire on duty will attempt to reach an inspector at home or abroad to provide assistance. In the unusual event where assistance is not available, the importation of the shipment into Canada will not be allowed.

Application for Explosives Importation Permits

17. Applications for Explosives Importation Permits should be directed to the Explosives Regulatory Division of NRCan at the address or facsimile number outlined in paragraph 35.

18. Explosives Importation Permit samples can be found in the appendices as follows:

- Appendix F: Application for Import Permit, Form 13
- Appendix G: General Explosives Importation Permit (12 months), Form 14
- Appendix H: Terms of General Explosives Importation Permit, Form 15
- Appendix I: Importer's Information Report, Form 16
- Appendix J: Annual Explosives Importation Permit, Form 17

Importation of Explosives for Testing Purposes

19. Where an importer/owner, exporter or manufacturer of explosives makes an application to have an explosive authorized for use in Canada, there may be a requirement that samples be forwarded to the Canadian Explosives Research Laboratory (CERL) for testing. The following procedures will apply to the clearance of sample explosives to be used exclusively for testing by CERL:

- (a) NRCan's Explosives Regulatory Division will present a general Explosives Importation Permit bearing a notation that authorizes the importation of a specified quantity of samples of explosive substances for use by CERL.
- (b) The Explosives Regulatory Division will present a Canada Customs Coding Form B3 that states the goods are of no commercial value and are imported by NRCan for testing purposes.
- (c) Where no invoice accompanies the shipment, the Explosives Regulatory Division will present a Form B15, *Casual Goods Accounting Document*.

Customs Self Assessment Program (CSA)

20. The CSA program gives approved importers, approved carriers and registered drivers the benefits of a streamlined clearance option for CSA-eligible goods. The streamlined clearance process eliminates the need for transactional transmissions of data related to eligible goods. This allows for the clearance of goods based on the identification of the approved importer, approved carrier and registered driver.

21. Some importers of explosives have been approved under the CSA program. These are importers whose permit covers the importation of airbags and/or seat belt pre-tensioners.

Additional Requirements

22. The importation of explosives may also be subject to the provisions and regulations under Memorandum D19-13-2, *Importing and Exporting Firearms, Weapons and Devices*.

Exportation

23. The exportation of explosives is subject to the provisions of the regulations under Memorandum D19-10-3, *Export and Import Permits Act (Exportations)*, which is administered by International Trade Canada.

Cutting Into or Dismantling Explosives

24. If the border services officer suspects that explosive articles like fireworks are being used as a decoy to smuggle contraband (such as drugs), the officer will not cut into, dissect or dismantle the article(s). The CBSA office will obtain assistance from the nearest Explosives Disposal Unit.

Detention

25. If the border services officer at the point of importation is not satisfied that the goods are the same as those described in the Explosives Importation Permit, the goods will be detained. They will only be released upon authorization of an inspector of explosives from the Explosives Regulatory Division of NRCan.

26. Pending application to the Explosives Regulatory Division for a permit (and the issuance of a permit), explosives that are not accompanied by an Explosives Importation Permit and do not come within the exemption provisions outlined in paragraphs 2 to 7 of this memorandum will be treated as follows:

(a) In the case of small quantities of the explosives listed below, they will be returned to the point of origin or detained by the border services officer at the point of importation for a period not exceeding 30 days:

- (i) highway flares, fuses, smoke signals and other small distress signals;

- (ii) model rocket engines (toy propellant devices);
- (iii) low-hazard fireworks for recreational use (fireworks showers, fountains, golden rain, lawn lights, pin wheels, Roman candles, volcanoes, sparklers and caps for toy guns);
- (iv) percussion caps (primers);
- (v) safety cartridges (includes blank cartridges, shotgun cartridges, centre-fire and rim-fire ammunition of less than .50 calibre); and
- (vi) safety fuses (without blasting caps).

(b) In the case of large quantities of the explosives outlined in paragraph 26(a) of this memorandum, they will be returned to point of origin;

(c) In the case of all explosives not enumerated in Nos. (i)–(vi) of paragraph 26(a) of this memorandum, they will be returned to the point of origin, regardless of quantity. For example:

- (i) all blasting explosives (including dynamite, slurries or water gels, boosters, detonating cord, detonators [blasting caps], and blasting agents);
- (ii) munitions;
- (iii) high-hazard fireworks for recreational use (rockets, serpents, shells, bombshells, tourbillions, maroons, large wheels, bouquets, barrages, bombardos, waterfalls, fountains, batteries, illuminations, set pieces, pigeons and firecrackers);
- (iv) high-hazard fireworks generally having a **practical use** (large distress signals, sound signals, pyrotechnic and smoke signals, railway-track signals, distress and line-throwing rockets, salutes, theatrical effects [including squibs and bullet effects] and wildlife-control devices);
- (v) oil-well service explosives (perforating and cutter charges); and
- (vi) propellant explosives for hand loading or antique weapons, including black powder (gunpowder) and smokeless powders.

27. Prohibited explosives will be returned to the point of origin or detained by the border services officer at the point of importation pending disposition under the provisions of the *Explosives Act*.

Disposal of Explosives

28. If after 30 days the explosives have not been properly entered at the CBSA, the nearest Canadian Police Explosives Disposal Unit is to be contacted and requested to dispose of the goods under the provisions of the *Explosives Act*. Addresses and telephone numbers are outlined in Appendix E.

29. Where large quantities of explosives or hazardous explosives are not accompanied by an Explosives Importation Permit and the importer/owner refuses to return the goods to the point of origin pending application for a permit (as directed in paragraphs 26(b) and (c) of this memorandum), the Explosives Regulatory Division or the nearest regional inspector of explosives will be contacted immediately regarding disposition of the goods (see paragraph 27 or Appendix D of this memorandum).

30. Where the importer/owner refuses to return prohibited explosives to the point of origin, the goods will be documented on an official receipt Form K21. The nearest Canadian Police Explosives Disposal Unit is to be contacted and requested to dispose of the goods under the provisions of the *Explosives Act*.

31. Where large quantities of detained, abandoned or seized explosives accumulate and present a hazard through lack of safe and secure storage, the nearest Canadian Police Explosives Disposal Unit is to be contacted and requested to dispose of the goods under the authority of section 26(2) of the *Explosives Act*.

32. CBSA personnel are not to deliver explosives of any kind to Canadian Police Explosives Disposal Units. Transportation arrangements will be the responsibility of the Unit disposing of the goods.

33. The disposal procedures outlined in paragraphs 28–32 of this memorandum do not apply to explosives imported by mail. The transmission of explosives by mail is subject to the provisions of the *Canada Post Corporation Act* and are to be disposed of according to established CBSA procedures concerning mail containing intoxicating liquors/dangerous materials.

Penalty Information

34. Section 21(1) of the *Explosives Act* states the following:

“Except as authorized by or under this Act, every person who, personally or by an agent or a mandatary, is in possession of, sells, offers for sale, makes, manufactures, imports or delivers any explosive is guilty of an offence punishable on summary conviction and is liable,

(a) for a first offence, to a fine not exceeding five thousand dollars; and

(b) for each subsequent offence, to a fine not exceeding ten thousand dollars or to imprisonment for a term not exceeding six months or to both.”

Additional Information

35. Questions concerning the *Explosives Act* and *Explosives Regulations*, the issuing of Explosives Import Permits, or permit or commodity clarification should be directed to the following:

Explosives Regulatory Division
Natural Resources Canada
1431 Merivale Road
Ottawa ON K1A 0G1

Telephone: 613-948-5200
Facsimile: 613-948-5195

Questions can also be directed to the regional inspectors of explosives whose addresses and telephone numbers are outlined in Appendix D.

36. Questions concerning the CBSA's administration of these procedures should be directed to the following:

Health, Safety and Security Unit
Admissibility Branch
Canada Border Services Agency
8th floor, 150 Isabella Street
Ottawa ON K1A 0L8

Telephone: 613-946-0240
Facsimile: 613-946-1520

APPENDIX A

SINGLE SHIPMENT AUTHORITY

Importer/Owner	Explosives Regulatory Division (NRCan)	Canada Border Services Agency
1. Apply for permit.	2. Issue General Explosives Importation Permit (Form 14) with an attached Terms of General Explosives Importation Permit (Form 15).	
	3. Permit is valid for 12 months and valid for one importation only.	
4. Present the importation permit (Form 14) (original or copy) to the border services officer. Note: Importers/owners who are registered in the Customs Self Assessment program are not required to present the above-mentioned importation permit.		
		5. Verify: (a) expiry date of permit; (b) permit authorization; and (c) value shipped and description with invoice.
		6. Endorse cargo control document and accounting document, where applicable, with permit number.
		7. Release goods.
		8. Return permit to the importer/owner.
9. Within 30 days of the importation, complete and submit Form 16, Importer's Information Report, to the following coordinates: Explosives Regulatory Division 1431 Merivale Road Ottawa ON K1A 0G1 Facsimile: 613-948-5195		

APPENDIX B

MULTIPLE SHIPMENT AUTHORITY

Importer/Owner	Explosives Regulatory Division (NRCan)	Canada Border Services Agency
1. Apply for permit.	2. Issue Annual Explosives Importation Permit (Form 17).	
	3. Permit is valid for 12 months and valid for an unlimited number of importations in that time period.	
4. Present the importation permit (Form 17) (original or copy) to the border services officer. Note: Importers/owners who are registered in the Customs Self Assessment program are not required to present the above-mentioned importation permit.		
		5. Verify: (a) expiry date of permit; (b) permit authorization; and (c) value shipped and description with invoice.
		6. Endorse cargo control document and accounting document, where applicable, with permit number.
		7. Release goods.
		8. Return original or photocopy of permit to the importer/owner.
9. Within 30 days of the importation (or in a bulk monthly transmittal), complete and submit Form 16, Importer's Information Report, to the following coordinates: Explosives Regulatory Division 1431 Merivale Road Ottawa ON K1A 0G1 Facsimile: 613-948-5195		

APPENDIX C

EXPLOSIVE COMMODITIES

Commodity	Description	Status
Cigarette loads or plugs	Small explosive charges designed for insertion in cigarettes or cigars that will cause them to explode after the victim takes a few puffs.	Prohibited
Exploding matches	Resemble ordinary book matches and are designed to explode after a certain delay, usually about the time they are in position to light a cigarette.	Prohibited
Sparkling matches	Resemble the normal book matches but send out a shower of sparks.	Prohibited
Ammunition for miniature tie clip, cufflink or key chain pistols	A violent type of blank ammunition made up for use as a novelty.	Prohibited
Auto alarms or jokers	Supposedly designed as burglar alarms but are really used for a practical joke: when wired to the ignition system of a car, they operate with a loud screeching whistle followed by copious emissions of smoke and a loud explosion.	Prohibited
Cherry bombs, M-80s, silver salutes and flash crackers	Very violent firecrackers that cause serious injuries every year; they are considered far too violent and contain an excessive charge of a prohibited fireworks composition.	Prohibited
Throw-down and step-on torpedoes and cracking balls	Small objects designed to explode on impact; some of the latter are so shaped and coloured as to look like children's breakfast cereal or candy balls.	Prohibited
Exploding golf balls	Designed to explode and emit a cloud of smoke on impact.	Prohibited
Stink bombs and smoke bombs (see also "Smoke signals and generators")	Often made to resemble cherry bombs and salutes, they are used for practical jokes (also prohibited under Memorandum D19-13-2, <i>Importing and Exporting Firearms, Weapons and Devices</i>).	Prohibited
Tear-gas pens and launchers	Resembling a pen, they may contain a mechanism activated by an explosive. Supposedly for protection against muggers, but are more commonly used as offensive weapons or as practical jokes (also prohibited under Memorandum D19-13-2).	Prohibited
Party poppers and table bombs	Designed to project paper streamers or dispense party favours; the smaller ones are made of coloured plastic and shaped like champagne bottles.	Prohibited
Table rockets and bottle skyrockets	Small fireworks designed to be launched from a table or a bottle and burst into a shower of sparks or a cloud of smoke.	Prohibited
Fake firecrackers and other trick devices	Any article that employs or simulates an explosive or a pyrotechnic for a trick or practical joke.	Prohibited
Toy pistol caps	These may be in the form of conventional paper rolls, individual paper discs, plastic rings or plastic strips; sometimes the caps are packed in with the toy pistol, revolver, rifle or machine gun.	Requires an import permit

Model rocket motors (toy propellant devices)	Small, hard cardboard cylinders containing a low explosive; one end is closed and the other open to form a nozzle. Normally packed three on a bubble package or three in a packing tube. Electric bridge wire igniters are usually included separately in the package; also may be packed within a model rocket kit.	Requires an import permit
Firecrackers	Small fireworks with entwined fuses used solely as noisemakers that constitute a unique hazard; possession is restricted to those persons having specific approval of the Chief Inspector of Explosives.	Requires an import permit
Flash powder, smoke powder and other high-hazard theatrical effects	As the names imply, these are small quantities of firework compositions suitably packaged and used by actors, musicians and magicians to achieve special theatrical effects during a performance.	Requires an import permit
Smoke signals and generators	Various small canisters or cartridges containing an ignition device and smoke composition, used for testing the duct work of furnace or air-conditioning systems, training of fire fighters, signaling distress, location of wind direction and similar tasks.	Requires an import permit

TERMS OF GENERAL EXPLOSIVES IMPORTATION PERMIT

The following are the terms annexed to Importation Permit No. dated _____.

1. No explosive shall be imported under this Permit other than the following:

Manufactured by:

2. The quantity of explosive so imported shall not exceed:

3. All explosives imported under this permit shall be packed in accordance with the regulations for the Transportation of Explosives as issued by the Board of Transport Commissioners for Canada, unless the shipment has been made from the United Kingdom and the explosive is packed in conformity with the laws of the United Kingdom.

4. No ship or boat containing explosives imported in virtue of this Permit shall bring to or moor, and no such explosive shall be unloaded or trans-shipped from any ship or boat, except at such port or part of the place of importation as may be appointed or authorized for that purpose by the Local Authority having jurisdiction over such place of importation.

5. The Importer and also - if the explosive is imported by ship or boat - the Owner and Master of any such ship or boat in which any explosive is being imported in virtue of this permit, shall, when required by an Inspector, or by any officer appointed by the Local Authority, having jurisdiction over the place of importation, or by any officer of the Commissioner of the CBSA, produce this permit to him/her and furnish such Inspector or Officer with the means necessary to enable him/her to ascertain whether the conditions of the same are complied with; and shall, when required by any Inspector or Officer as aforesaid, open or cause to be opened, any case or package imported under this Permit for the purpose of examination or for the taking of samples by such Inspector or Officer, and shall repack, or cause to be repacked, every case so opened using all due care and precautions in the opening and repacking of the same for the prevention of accidents.

6. The Importer and also - if the explosive is imported by ship or boat - the Owner and Master of the ship or boat in which any explosive is being imported in virtue of this permit, shall, if and when required by an Inspector, or by any officer appointed by the Local Authority having jurisdiction over the place of importation, or by any officer of the Commissioner of the CBSA, allow such Inspector or officer of the CBSA to take for examination small samples of any explosive so imported.

7. Present the importation permit (Form 14) (original or copy) to the border services officer for his/her use. Once the border services officer has reviewed the information he/she will return the General Explosives Import Permit to the importer, and endorse the cargo control document and accounting document, where applicable.

8. The Importer's Information Report (Form 16) needs to be completed for the shipment authorized by this permit. The completed Importer's Information Report shall be submitted by the Importer to the Chief Inspector of Explosives, Explosives Regulatory Division, Natural Resources Canada, Ottawa, within 30 days of the shipment.

9. A report in writing shall be rendered to the Chief Inspector of Explosives in the event of any theft of explosives during importation.

ANNUAL EXPLOSIVES IMPORTATION PERMIT

Permit No.:

Permittee's Name and Address:

Place of Importation:

IN PURSUANCE of the *Explosives Act*, the person above named is hereby authorized to import explosives at the above-named place, subject to the provisions of the said Act, and of any Orders in Council, regulations, and rules made, and to be made thereunder, and in force for the time being, and subject also to the terms hereunder given.

1. The explosives that may be imported under this authority are:

Manufactured by:

2. The quantity of these explosives that may be imported in any one consignment shall not exceed:

Magazine storage capacity

3. The two copies of this Annual Permit shall be handed to the border services officer for their use. The border services officer shall retain one copy and the other will be returned to the Importer. The Importation Permit (Form 17) is to be endorsed by the proper officer of the CBSA.
4. The number of importations shall be unlimited. However, an Importer's Information Report (Form 16) needs to be completed for each shipment. The completed Importer's Information Report shall be submitted by the Importer to the Chief Inspector of Explosives, Explosives Regulatory Division, Natural Resources Canada, Ottawa within 30 days of each importation or in a single bulk monthly transmittal.
5. A report in writing shall be rendered to the Chief Inspector of Explosives in the event of any theft of explosives during importation.
6. This Permit shall not be valid after _____.
