Explanatory notes:

The statistics are tabulated as follows:

The number of inspections relates to the number of regulatees inspected for compliance under each of the applicable regulations.

* Investigations are tabulated by number of investigations files. An investigation file may include activities relating also to another legislation and may include one or more regulations. Therefore, the total number of investigations shown by regulation does not add to the total at the legislation level.

All measures (except for prosecutions) are tabulated at the section level of a regulation. Example, if the outcome of an inspection is the issuance of a written warning which relates to 3 sections of a given regulation the number of written warnings is 3.

The number of prosecutions is represented by the number of regulatees that were prosecuted by charged date regardless of the number of regulations involved.
