Agence de promotion économique du Canada atlantique

This map describes the wind resource of the Province of Prince Edward Island at 80 meters above the ground level (agl) at a resolution of 200 m. Created by the Université de Moncton, it is based on the Canadian Wind Energy Atlas (2004) data at 5 km resolution (www.windatlas.ca) and WAsP 8.2 model. Although it is believed to represent an accurate overall picture of the wind energy resource, estimates at any location should be confirmed by measurement. The authors are not responsible of the use of the present map.
