

12.7 Defects Log, Chicken  
(ISO Sampling Plan 2859-1)

ESTABLISHMENT:	DATE:						SHIFT:						LINE NO:					
<b>PATHOLOGY DEFECTS</b>	1	2	3	4	5	6	7	8	9	10	11	12	13	14	15	16	17	18
TIME																		
INSPECTOR																		
SAMPLE SIZE																		
INSPECTION TYPE																		
Airsacculitis																		
Ascites																		
Emaciation																		
Cellulitis (NTOL)																		
Dark-Coloured Carcasses																		
Hepatitis/icterus																		
Peritonitis/Salpingitis																		
Other* (specify)																		
<b>First Sample Total</b>																		
<b>Second Sample Total</b>																		
<b>Cumulative Total</b>																		
Corrective Action																		

NTOL: Not Trimmable On-Line;

\*Avian Keratoacanthoma, Arthritis, Bruising (NTOL), Dermatitis (NTOL), Marek's Disease, Neoplasms, Pendulous Crop, Valgus Varus Deformity, Synovitis

<b>PROCESSING DEFECTS</b>	1	2	3	4	5	6	7	8	9	10	11	12	13	14	15	16	17	18
Faecal Contamination																		
Extraneous Material																		
Bile Contamination																		
Extensive Bruising																		
Extensive Overscald/Mutilation																		
Inadequate Bleeding																		
<b>First Sample Total</b>																		
<b>Second Sample Total</b>																		
<b>Cumulative Total</b>																		
Corrective Action																		

Corrective Actions: c.d. = change detector; r. = retest; a. = added defect detector; v. = verbal warning; s. = line speed reduction

Note: Shaded area is for double sampling plans only (Reduced and Tightened)
