

Confined Field Trials for Spring 2004

Summary of Submissions and Field Trials of Plants with Novel Traits (PNTs) Proceeding under the *Seeds Act*, 2004

Year	Number of Submissions	Number of Field Trials
2004	64	180

Table 1: Summary of approved submissions (for which field trials were planted) and approved field trials that have been carried out in 2004. Please note that not all approved field trials take place once authorized.

Table 2: Provincial summary of field trials for individual crops as well as summary of field trials having been planted in each province. These numbers **do not** include authorized field trials which have not taken place, but **do** include trials that have been planted then subsequently destroyed.

Table 3: Summary of field trials' breeding objectives. Data has been broken down into breeding objectives of individual crops and is based on authorized field trials having been planted. Please note that some field trials had more than one breeding objective, therefore the number of field trials listed under breeding objective may exceed the total number of trials authorized. "Other" breeding objectives include pathogen resistance, and yield enhancement. **Last Updated:** August 30, 2004
