

## Confined Field Trials for 1994

### Summary of Submissions and Field Trials of Plants with Novel Traits (PNTs) Proceeding under the *Seeds Act*, 1994

Year	Number of Submissions	Number of Field Trials
1994	105	772

**Table 1:** Summary of approved submissions (for which field trials took place) and approved field trials that have been carried out in 1994. Please note that not all approved field trials take place once authorized.

\*Numbers that are not in brackets are the number of field trials where the PNT expressed a pharmaceutical compound; numbers in brackets are the number of field trials where the PNT expressed an industrial compound.

**Table 3:** Summary of field trials' breeding objectives. Data has been broken down into breeding objectives of individual crops and is based on authorized field trials having taken place. Please note that some field trials had more than one breeding objective, therefore the number of field trials listed under breeding objective may exceed the total number of trials authorized. "Other" breeding objectives include antibiotic resistance and yield enhancement.
