September 1, cattle on feed numbers were down seasonally 17% from last month. One factor causing this was an increase in the number of cattle marketed in August 2000. The 3.7% increase in marketing was due to an extra five kill days compared to August 99. Placements are up seasonally by 88% from last month's numbers. Current percent fill of feedlots on September 1 sits at 51%.
