Consignee: _____

Address: _____

I, the undersigned official veterinarian, duly authorized by the Government of Canada (Canadian Food Inspection Agency), hereby certify that, after due enquiry and to the best of my knowledge and belief, the day old chicks/hatching eggs ⁽¹⁾ described below meet the following requirements:

1. The day old chicks/hatching eggs originate from Canada, a country free of Highly Pathogenic Notifiable Avian Influenza (HPNAI).
2. The Canadian commercial poultry flock is officially recognized to be free from velogenic Newcastle disease, fowl typhoid, pullorum disease and egg drop syndrome.
3. The parent flock of the birds participates in the required programs for fowl typhoid and pullorum disease under Article 79 of the Health of Animals Regulations and are registered under that program. The flock of origin and hatchery are under regular inspection of the Canadian Food Inspection Agency.
4. The farm of origin of the day old chicks/hatching eggs have been free of the following diseases for one (1) year prior to export: Avian Influenza, Newcastle Disease, S.paratyphoid, Fowl typhoid, Pullorum disease, Mycoplasmosis (M.gallisepticum and M. Synoviae), Infectious Larygotracheitis, Infectious Bronchitis, Infectious Bursal Disease, Egg Drop Syndrome, Avian Leukosis, Reticuloendothelioses, Avian Reovirus infections, Avian encephalomyelitis, Swollen Head Syndrome, Mareks Disease, Chicken anemia and inclusion body hepatitis.
5. The flocks of origin have been kept on regular veterinary health monitoring. No clinical signs of the following diseases should have been observed for a period of one (1) year immediately prior to export: Avian Influenza, Newcastle Disease, S.paratyphoid, Fowl typhoid, Pullorum disease, Mycoplasmosis (M.gallisepticum and M. Synoviae), Infectious Larygotracheitis, Infectious Bronchitis, Infectious Bursal Disease, Egg Drop Syndrome, Avian Leukosis, Reticuloendothelioses, Avian Reovirus infections, Avian encephalomyelitis, Swollen Head Syndrome, Mareks Disease, Chicken anemia, inclusion body hepatitis, avian tuberculosis, fowl pox, fowl cholera, and infectious coryza.
6. The flocks of origin have been subjected to a routine vaccination program against specified diseases (please attach the list of diseases, dates of vaccinations and vaccine details to health chart as an adendum).
7. The flocks of origin should be proven to be serologically free from the following diseases: Fowl typhoid, Pullorum disease, Mycoplasmosis (M.gallisepticum and M. synoviae) and Avian leukosis.
8. The consignment to be exported should be:
 - a. Examined on the day of dispatch and found to be healthy without deformity and free from clinical disease.
 - b. Vaccinated at the hatchery of origin against Mareks disease using one of the following strains:
 CV 1988 (Ripsens) serotype I;
 CV 1988 (Ripsens) serotype I and HVT serotype III; or
 SB I serotype II and HVT serotype III
9. All cages, crates, vehicles and areas in the aircraft used for transportation of the chicks / hatching eggs were cleaned and disinfected in a manner approved by the Canadian Food Inspection Agency. The IATA standards have been followed when exporting birds to Sri Lanka.

10. Identification of Chicks or Hatching Eggs:

- i) Number shipped _____
- ii) Breed _____
- iii) Strain or Kind of Chicks or Hatching Eggs _____
- iv) Name of Establishment of Origin _____
- v) Location _____
