

VETERINARY HEALTH CERTIFICATE

EXPORT DAY OLD CHICKS/HATCHING EGGS TO EGYPT

Certificate for Day Old Chicks **Certificate for Hatching Eggs**

Consignor: _____

Address: _____

Consignee: _____

Address: _____

I, the undersigned official full-time salaried veterinary officer of the Government of Canada, hereby certify that following due enquiry and to the best of my knowledge and belief, the animals/hatching eggs identified below comply with the following requirements:

1. The day old chicks/hatching eggs originate from a province in Canada recognized to be free of avian influenza, subtypes H5 or H7.
2. Canada is officially recognized to be free from Velogenic Newcastle disease, fowl typhoid and pullorum disease.
3. The flock of origin participates in the required program under the legislative authority of the Health of Animals Act.
4. The flock from which the shipment originated has been subjected to regular inspection by an official veterinarian of the Canadian Food Inspection Agency and found to be free of evidence of infectious or contagious diseases, and, so far as can be determined, has not been exposed to such diseases.
5. The flock(s) and the hatchery(ies) from which the shipment originated were inspected by me within the past thirty (30) days and were found to be free from evidence of fowl pox, fowl cholera, infectious coryza, infectious laryngotracheitis, viral arthritis, psittacosis (ornithosis), avian tuberculosis, avian encephalomyelitis, reticuloendotheliosis, mycoplasmosis (chronic respiratory disease), infectious bronchitis, leucosis including Marek's disease, avian monocytosis, infectious bursal disease (gumboro disease), inclusion body hepatitis, trichomoniasis, histomoniasis, listeriosis, Arizonosis, coccidiosis, colibacillosis, espiroquetosis, erysipelthrix, spirochetosis, and chigger disease.
6. The flock of origin has been confirmed free of mycoplasma (*M. gallisepticum* and *M. synoviae*) and Salmonella (pullorum and gallinarum) through participation in a flock monitoring program.
7. The flock of origin has been confirmed free from clinical signs of avian influenza and has been subjected to serologic testing for Avian Influenza with negative results using the AGID test on 30 randomly selected samples within 30 days of exportation of the day old chicks or hatching eggs.
8. The day old chicks have been vaccinated against Mareks disease. (Vaccination information can be found in section 11).
9. All cages, crates, vehicles and areas in the aircraft used for transportation of the chicks/hatching eggs were cleaned and disinfected in a manner approved by the Canadian Food Inspection Agency.
10.
 - i) In the case of day old chicks, they have been clinically examined by a qualified poultry inspector prior to departure and found to be in good health without anomalies.
 - ii) In the case of hatching eggs, they were properly disinfected immediately after collection.
11. In the event that flock vaccination is practiced against specified poultry diseases, the following information is provided:
 - a) Date of Vaccination _____
 Dose _____
 Type of Vaccine _____
 Manufacturer _____

12 Identification of Chicks/Hatching Eggs

- i) Number shipped _____
- ii) Breed _____
- iii) Strain or Kind of Poultry or Hatching Eggs _____
- iv) Name of Establishment of Origin _____
- v) Location _____
