SECTION III

I, the undersigned official veterinarian duly authorized by the Government of Canada, do certify that the following requirements are met:

1. Canada is free from foot-and-mouth disease, Vesicular stomatitis, African swine fever, hog cholera, swine vesicular disease, Teschen disease and Aujeszky's disease and vaccination against these diseases is prohibited in Canada.
2. Canada's swine population is free of porcine brucellosis, with no vaccination.
3. All boars admitted to an AI Centre qualified for export are routinely tested every six months for tuberculosis, brucellosis, leptospirosis, transmissible gastro enteritis (TGE), Aujeszky's disease with negative results according to our Canadian AI program.
4. Farms of origin of donor boars are free of Tuberculosis and TGE. The donor boars have not been affected with nor vaccinated against Tuberculosis, TGE and PRRS.
5. The semen is derived from a boar/s standing at an officially approved AI centre, which is under control and supervision of the Canadian Food Inspection Agency (CFIA).
6. During the six (6) months prior to the first collection of the semen to twenty-eight (28) days following the last collection, no case of swine vesicular disease (SVD), transmissible gastro enteritis (TGE), Teschen disease, porcine respiratory reproductive syndrome (PRRS) has occurred at the AI centre.
7. During the twelve months immediately preceding the first collection of semen and until the date of dispatch of the semen to South Africa, the donor boar/s showed no clinical evidence of tuberculosis, brucellosis, TGE, leptospirosis, Aujeszky's disease, Teschen disease, rabies, PRRS.
8. The donor boar/s has/ve been kept at the AI centre for at least six (6) months prior to the first date of collection of semen and during this period has/ve never been used for natural mating.
