

**VETERINARY HEALTH CERTIFICATE  
EXPORT BOVINE SEMEN TO ECUADOR**

**SECTION I**

- i) **Country of origin:** **CANADA**
- ii) **Issuing Authority:** **CANADIAN FOOD INSPECTION AGENCY  
GOVERNMENT OF CANADA**
- iii) **Region:** \_\_\_\_\_
- iv) **Name of Consignor:** \_\_\_\_\_  
**Address:** \_\_\_\_\_  
\_\_\_\_\_
- v) **Name of Consignee:** \_\_\_\_\_  
**Address:** \_\_\_\_\_  
\_\_\_\_\_

**SECTION II**

- i) **Name of A.I. Centre (where semen collected):** \_\_\_\_\_  
**Address:** \_\_\_\_\_

**SECTION III**

I hereby certify that:

1. The semen was collected from a bull maintained in an artificial insemination centre which is under official veterinary control.
2. At the time of the collection of the semen, the donor bull was clinically free from signs of illness including Malignant Catarrhal Fever, Contagious Bovine Pleuropneumonia, Actinomycosis and Q Fever.
3. All the animals maintained at the artificial insemination centre including the donor bull are recognized to be free of Tuberculosis, Brucellosis, Leptospirosis, Paratuberculosis, Bluetongue, Epizootic Haemorrhagic Disease, Enzootic Bovine Leucosis, Bovine Virus Diarrhoea, Campylobacteriosis and Trichomoniasis.
4. The donor bull has been subjected to the following tests with negative results:
  - a) Tuberculosis - intradermal
  - b) Brucellosis - serum agglutination
  - c) Leptospirosis - microagglutination lysis
  - e) Leucosis - agar gel immunodiffusion or ELISA
  - f) Bluetongue - agar gel immunodiffusion or ELISA
  - g) Epizootic Hemorrhagic Disease - agar gel immunodiffusion
  - h) Campylobacteriosis - culture
  - i) Trichomoniasis - direct microscopic or culture
5. The donor animal was tested for bovine viral diarrhoea by virus isolation with negative results prior to entering the artificial insemination centre and as a resident animal has been tested according to the Canadian Artificial Insemination Program which is in compliance with the Office International des Epizooties, Terrestrial Animal Health Code, Article 3.2.1.5.
6. The semen is of good quality and is free of foreign material.
7. All health tests on donor bulls are conducted by Official Veterinarians of the Canadian Food Inspection Agency (CFIA) and all tests are done in government laboratories.
