**VETERINARY HEALTH CERTIFICATE
EXPORT OF BOVINE SEMEN TO SERBIA AND MONTENEGRO**

SECTION I

- i) **Country identification:** **CANADA**
- ii) **Issuing Authority:** **Canadian Food Inspection Agency, Government of Canada**
- iii) **Region:** _____
- iv) **Name of Consignor:** _____
Address: _____

- v) **Name of Consignee:** _____
Address: _____

SECTION II

Name of A.I. Centre (where semen collected): _____

Address _____

SECTION III

I, the undersigned veterinarian duly authorized by the Government of Canada, do hereby certify that:

1. The donor bulls were born and raised in Canada or legally imported from BSE-free countries. They originated from herds free of BSE and they are not suspected of having or be affected by BSE. They were not fed prohibited animal protein according to the Canadian legislation.
2. The semen was collected from donor bulls described in Section IV I at an artificial insemination centre which is under official veterinary control of the Canadian Food Inspection Agency (CFIA).
3. At the time of collection of the semen, the donor bull was healthy and not suspected of being affected with any infectious disease transmissible through cattle.
4. The animals at the artificial insemination centre, including the donor bull, are free from tuberculosis, paratuberculosis, brucellosis, leptospirosis, campylobacteriosis, trichomoniasis, enzootic bovine leucosis (EBL), infectious bovine rhinotracheitis/infectious pustular vulvovaginitis (IBR/IPV) and foot and mouth disease.
5. The animals producing semen for artificial insemination are subjected to routine examinations, clinically and cytologically at regular intervals.
6. The donor bull has been regularly tested for the following diseases, with negative results:
 - a) tuberculosis - intradermal tuberculin test (bovine tuberculin);
 - b) brucellosis - serum agglutination test;
 - c) trichomoniasis - direct microscopic method or culture;
 - d) enzootic bovine leucosis - agar gel immunodiffusion test or ELISA
7. The donor bull has been tested for IBR/IPV, with negative results:
 - EITHER** a) seroneutralization test or ELISA test;
 - OR** b) virus isolation test of sample of the semen to be exported to Serbia and Montenegro.
8. The semen was stored under official veterinary supervision and was shipped in sealed containers.
