Address _____

iii) **Name of semen production centre where semen was collected:** _____

Address _____

iv) **Markings on official seal applied to shipping container:** _____

v) **Import Permit Number issued by** _____

SECTION II - SANITARY CERTIFICATION

I, the undersigned Veterinarian, duly authorized by the Government of Canada do hereby certify that:

1. The semen was:
 - i) collected from a donor bull which has been tested immediately preceding entry into the semen production centre and confirmed to be negative for tuberculosis, brucellosis, leptospirosis, paratuberculosis, enzootic bovine leucosis, bluetongue, epizootic haemorrhagic disease, trichomoniasis and campylobacteriosis; and
 - ii) collected from a donor bull which has been resident at least thirty (30) days at a semen production centre which is officially approved and supervised by the Canadian Food Inspection Agency; and
 - iii) processed and continuously stored at an approved semen production centre in compliance with international zoosanitary norms.
2. The donor bull is maintained in the Artificial Insemination centre where natural service is not authorized and was healthy at the time of collection of the semen.
3. All animals maintained at the semen production centre, including the donor bull, are recognized to be free of tuberculosis, brucellosis, leptospirosis, paratuberculosis, enzootic bovine leucosis, bluetongue, epizootic haemorrhagic disease, trichomoniasis, campylobacteriosis and bovine virus diarrhea based on regularly scheduled testing performed at the centre by the Canadian Food Inspection Agency on the following basis:
 - i) at intervals of six (6) months:
 - a) Bluetongue - ELISA
 - b) Brucellosis - serum agglutination and complement fixation test
 - c) Leptospirosis - micro-agglutination lysis test
 - d) Epizootic Haemorrhagic Disease - agar gel immunodiffusion test
 - e) Enzootic bovine leucosis - agar gel immunodiffusion test or ELISA
