

Calculating monthly instalment payments for 2006

- Use this worksheet to calculate your monthly instalment payments.
- Use the amounts you calculated on Worksheet 1 to complete the current-year information area on this worksheet.
- You can use the option that results in the least amount payable by instalments. Any remaining unpaid tax is payable on or before the balance due date.
 - Option 1 – One-twelfth of the estimated tax payable for the current tax year is due each month of the tax year.
 - Option 2 – One-twelfth of the tax payable from the preceding tax year is due in each month of the current tax year.
 - Option 3 – One-twelfth of the tax payable from the year before the preceding tax year is due in each of the first two months of the current year. One-tenth of the difference between the tax for the preceding tax year and total of the first two payments is due in each of the remaining 10 months of the current tax year.
- This schedule is a worksheet only and does not have to be filed with your T2 Corporation Income Tax Return.
