Ottawa, December 27, 1995

## Subject

### **Tillage Tools from Brazil**

This is to advise that the Department has concluded its re-investigation of normal values and export prices of deep tillage sweeps, field cultivator sweeps, reversible points, reversible heavy duty chisels, reversible twisted chisels, and reversible furrow shovels, known as tillage or earth engaging tools, used on chisel plows and field cultivators, originating in or exported from Brazil.

The subject goods are normally imported into Canada under the following 10-digit Harmonized System tariff classification numbers:

8432.90.20.10  
8432.90.20.20  
8432.90.20.30  
8432.90.20.40

Normal values have been issued to all known exporters. For new exporters or for new models not covered by this review, normal values will be established pursuant to a ministerial specification and will be based on the export price advanced by 41%. These values will be applicable to those goods released from Revenue Canada's possession on or after December 14, 1995.

In order to determine their liability for anti-dumping duty, importers of subject goods should contact their suppliers to determine whether specific normal values or advances over export prices will be applied to importations of subject goods. Importers can obtain normal values from the exporter or from the Department according to Memorandum D14-1-2, *Disclosure of Normal Value and Export Price Established under the Special Import Measures Act to Importers*. Importers are cautioned that new normal values may be higher than those currently in effect which may result in additional assessments of anti-dumping duty.

Importers are reminded that it is their responsibility to calculate and declare their anti-dumping duty liability. If importers are using the services of a customs broker to clear importations, the brokerage firm should be advised that the goods are subject to anti-dumping action and be provided with the information necessary to clear the shipments.

Should the importer disagree with the determination made on any importation of goods, a request for redetermination may be filed with the Director General, Anti-dumping and Countervailing Directorate. Such a request must be received within 90 days from the making of the determination, in the form and manner outlined in Memorandum D14-1-3, *Redetermination of Goods under the Special Import Measures Act*.

In addition, in cases where changes occur to domestic prices, market conditions and/or costs associated with production and sales, the concerned parties are responsible for informing the Department of such changes in writing and in a timely manner. In the event that the concerned parties do not properly notify the Department of substantial changes or if they do not provide the information required to make any necessary adjustments to values,

retroactive assessments will be applied if the Director General, Anti-Dumping and Countervailing Directorate, is of the opinion that such action is warranted.

Any questions concerning the above should be directed to:

Anti-dumping and Countervailing Directorate  
Trade Administration Branch  
Revenue Canada
